The NTP Chemical Repository program provides repository assistance to the carcinogenesis bioassay, cellular and genetic toxicology, chemical pathology and systemic toxicology programs. This includes not only storage but location and acquisition of approximately 1,000 chemicals with a final capacity of 5,000 chemicals, cataloging of Wisweisser Line Notations (WLNS), Chemical Abstract Service (CAS) numbers and numerous other pertinent information on chemical, physical and toxicological properties. This information is put into a custom designed computer program which also generates randomized codes for various aliquots that are to be tested blind. Tracking and monitoring of repository functions are accomplished by this computerized data base management system which allows multi-tier access into a hierarchical system of data retrieval and file security. The repository, upon searching through on-line computer data bases, edits and produces chemical specific handling documents both for day to day safe handling as well as for emergency situations, performs quality assurance (QA) tests for numerous NTP contract laboratories and ships these chemicals to national as well as international laboratories. Finally, upon completion of the bioassay studies, the repository receives and aliquots an archive sample of the chemical, then arranges for the environmentally safe disposal of surplus test chemicals. The NTP Chemical Repository is thus involved in the entire toxicity testing cycle from beginning to end. Two repositories have been established which operate under similar standard operating procedures; both divide the chemicals into three groups, when quantities permit: a testing lot, an archive sample and a public allotment. Present contractual requirements prohibit combination of the repositories at this time.

NIEHS

FY 1982 Accomplishments

More than 1,000 aliquots (Table 42) were sent to investigators in FY 1982 either as coded blind samples or as uncoded shipments for toxicity testing. This is a 50% increase in repository shipments and is primarily due to expansion of NTP cellular and genetic toxicology efforts. Redesignated chemical specific safe handling documents and emergency procedure documents have provided clearer and more explicit handling procedures for these potentially toxic test compounds.

Flash point determinations of liquid test chemicals were initiated to meet Department of Transportation shipping requirements when this information was unavailable from the literature. A total of 50 compounds have been tested by the closed cup method.

A method of direct probe insertion mass spectrometry was developed to enable impurities separated by high performance thin layer chromatography to be identified.

An apparatus for determining the permeation of glove materials by NTP test chemicals has been constructed and validation of the method by ASTM standards was completed. The purpose of this work was to provide valuable information to help enable NTP laboratory researchers to conduct studies on test chemicals in a safe manner. Glove permeability tests on 20 compounds with 4 different glove materials have been studied.

A method for gas transfer from large cylinders to smaller lecture bottles was accomplished and monitored using sulfur hexafluoride as a market compound. The design of this sampling procedure has allowed effective guidelines to be formulated for the safe handling of gaseous samples.

More effective and explicit packaging and shipping requirements were written to permit transfer of approximately 60 shipments of bulk chemicals to the repository for removal of archive samples and final disposal of surplus bioassay chemicals.

Completion of an addition to the Hazardous Materials Laboratory will now enable storage of approximately 5000, 500-gram samples at 4 different temperature levels (25°C, 5°C, −20°C and −70°C). A safe is also available for storage of narcotics. (A full Drug Enforcement Administration (DEA) license has been approved). (CONTACT PERSON: Dr. D. B. Walters)

FY 1983 Program Plans

During FY 1983 the Chemical Repository program will continue to provide assistance to all branches of NTP. Increased shipments are anticipated due to the expanded high priority testing battery of the Cellular and Genetic Toxicology program.

A more refined computer software and hardware package for tracking and monitoring is being investigated to meet the expanding needs of the NTP. It is anticipated that approximately 50 compounds will be tested for glove permeability to assist in development of possible structure-activity relationships.

Combination of the repositories has been delayed due to contract restraints but plans are proceeding to accomplish this at the end of FY 1984. (CONTACT PERSON: Dr. D. B. Walters)

Pathology Repository and Archives

The NTP maintains a centralized repository of histopathology materials collected during the bioassay studies. This is done in accordance with Good Laboratory Practice procedures and to provide a complete history of the pathology findings. Storage facilities are provided for wet tissues, paraffin blocks, microscopic slides, and printouts of the data that appear in the technical reports. User facilities complete with microscopes are provided for investigators to view the materials. For more information or scheduling of user facilities, contact Dr. E. E. McConnell, Chief, Chemical Pathology Program, National Toxicology Program, P.O. Box 12233, Research Triangle Park, NC 27709; or 919-541-3440 (commercial), 629-3440 (FTS).

Data Management and Analysis

NTP programs generate a large volume of complex data that must be acquired, validated, and stored so that these are easily and quickly retrievable, eventually at multiple locations. Thus, a continuing priority commitment is to develop efficient automatic data processing systems to capture various types of management and experimental data, and to make this information available for periodic examination, updating, summarization and statistical analyses. Furthermore, the complexity of the system requirements demands that systems for NTP not be developed as isolated units but rather that there be centralized coordination and management of the systems so that services are distributed according to established priorities and resources are used most efficiently and without duplication of effort.

Statistical research efforts include continued investigation of possible modification of the basis experimental design of the two-year carcinogenesis bioassay. The purpose of these modifications will be to provide the low-dose information needed for extrapolation without adversely affecting the power of the bioassay for detecting carcinogenic effects. The problem of incorporating historical control information into statistical analysis of bioassay data is being studied. Stastistical methodology is being developed that will take into account extrabinomial variability due to differences in test laboratory, animal sources, and other factors.

NIEHS

FY 1982 Accomplishments

Data Processing Systems—The Toxicology Data Management System (TDMS) being developed to support the animal bioassay program continued toward implementation. Specially designed microprocessors were delivered and are in use for live support of bioassay experiments at five contract laboratories. These early studies have shown the animal room data (animal weights, clinical observations, dosages, deaths, etc.) collection modules to be effective. Another component of the system being tested is for collection of micropathology information. A system to collect gross pathology observations is under development. Development of modules for statistical and summary reports is ongoing. More detailed information on TDMS may be found in the NCTR entry in this section. CONTACT PERSONS: For Systems—Mr. A. Konvicka, NCTR: for toxicology—Dr. M. Dieter, NIEHS)

In support of the Cellular and Genetic Toxicology program, a laboratory data collection and management system was developed. Data are entered into the system via intelligent data entry terminals at the laboratories which allows easy validation of data for each laboratory. Periodically the data base is updated into a host computer where the data are used for data analyses, quality control, and report generation. Efficient data structures and an automatic archiving system allow the data to be stored at a fraction of the usual cost. The system was installed and is operating in *Salmonella* testing laboratories at SRI International, Case Western Reserve University, and EG&G/ Mason Research Institute. A fourth terminal, located at NIEHS was installed to collect *Drosophila*, cellular transformation and cytogenetics data. CONTACT PERSON: Dr. E. Zeiger and Mr. M. Rowley.

An NTP chemical management and tracking system (CHEMTRACK) has been developed on the Model 204 Data Base System at the Parklawn Computer Center. CHEMTRACTK provides the NTP with the capability to interactively query information on chemical status, nomination, test results, milestones and publications. Procedures have been developed which will allow NTP scientists and administrators with little computer experience to generate queries and batch reports on NTP chemicals. User and system documentation have been developed and training of NTP personnel begun. (CONTACT PERSONS: Mr. M. Rowley and Ms. F. Jordan)

The system that has been supporting the animal bioassay program, the carcinogenesis bioassay data system (CBDS), continued to collect animal weight and pathology information for chronic studies. The system routinely produced the reports and basic statistics required for the program. In addition, systems were maintained to collect and report data for *in vitro* studies and for the Strain A mouse pulmonary adenoma studies. To aid in program management, several systems which collect and report fiscal and experimental statuses were utilized. Plans are being made for the orderly transition of CBDS activities, procedures and data to the TDMS. (CONTACT PERSON: Mr. M. Rowley)

Statistical Studies—Possible statistical modifications of the basic experimental design of the NTP's two-year carcinogenesis bioassay continued to be evaluated during FY 1982. Changes under consideration include additional dose levels, reallocation of animals among experimental and control groups, and the selection dose levels other than the traditional MTD (maximum tolerated dose) and one-half MTD. Monte Carlo simulation was used to compare several hundred two- and three-dose designs with respect to the precision of low-dose risk estimation, assuming a multistage model for carcinogenesis. A general class of designs was located which yields adequate power for testing and the high precision needed for extrapolation. The traditional NTP design was in this class of optimal designs. In addition, the number of animals utilized in the bioassay was investigated with respect to the power for testing and the precision of low-dose estimation. The results show that additional animals (beyond the standard 150 per sex species group) would only slightly improve the extrapolation but could greatly improve power. A bioassay using between 150 and 300 animals would yield sufficient power in an optimal design. (CONTACT PERSON: Dr. C. Portier)

Patterns of tumor incidence in the two-year cancer bioassay feeding studies in Fischer rats were investigated. It was found that the overall frequencies of statistically significant ($P<0.01$) increases and decreases in tumor incidence in treated groups relative to controls were approximately the same. The decreases were due primarily to mammary gland fibroadenomas in females (which were clearly associated with decreased weight gain in the treated groups) and leukemia/ lymphoma in both sexes (which were frequently associated with increased liver tumor incidences in the treated groups). A clear explanation for this latter association is not apparent. The increased tumor incidences in the treated groups relative to controls were due primarily to liver neoplastic nodules. (CONTACT PERSON: Dr. J. Haseman)

During FY 1982, a standardized statistical report format was developed for summarizing the results of statistical analyses of data from NTP prechronic and "special" studies. The analyses are currently provided under contract by Program Resources, Incorporated. Prechronic data are being maintained in a standard format for eventual transfer to the toxicology data management system (TDMS). Efforts are also underway to ensure that the statistical capabilities currently available through CBDS will be maintained when TDMS becomes fully operational. (CONTACT PERSON: Dr. J. Haseman)

Microbial mutagenicity experiments, especially large-scale collaborative studies, continued to receive substantial statistical research attention in FY 1982. Primary focus has been on sources of variability, such as within- and between-day, and especially the possibility of genetic draft. Research also was performed to determine the adequacy of statistical methods used to analyze recessive lethal test data, such as for *Drosophila*. Preliminary results indicate that there is room for substantial improvement. (CONTACT PERSON: Dr. B. Margolin)

FY 1983 Program Plans

Data Processing Systems—The CBDS will continue to collect pathology data and produce reports until it is completely replaced by the TDMS. (CONTACT PERSONS: Mr. M. Rowley and Mr. J. Washington)

Additional components of TDMS will be tested in FY 1983. The most important of these are the gross pathology system and the query language processor. As these major components are completed, more attention will be directed toward implementing the system in as many as ten additional NTP contract laboratories. Particular attention will be given to identifying the special needs of NTP users and to expanding the system to accommodate additional types of data collection within the bioassay program. (CONTACT PERSON: For systems—Mr. A. Konvicka, NCTR: for toxicology—Dr. M. Dieter, NIEHS)

Plans are being developed to move the laboratory data management system supporting cellular and genetic toxicology programs to an NTP in-house computer, a DEC VAX 11/780. A data base management system obtained from DEC and a graphics and query system currently under development will be utilized to provide the NTP with extensive data review, statistical analyses and graphics capabilities. (CONTACT PERSON: Mr. M. Rowley)

Additional report generation and query software will be developed for CHEMTRACK. Special reports will include those for teratology, immunotoxicology and pharmacokinetics programs. In FY 1983, CHEMTRACK will continue to provide the NTP with interactive query and report generation capabilities. Data will be loaded into CHEMTRACK from all NTP program areas. CHEMTRACK will function as the primary source of nomination/selection information and will provide a data base of information on NTP committee actions. (CONTACT PERSONS: Mr. M. Rowley and Ms. F. Jordan)

Statistical Studies—During FY 1983, further research will be carried out with regard to the utilization of historical control data in NTP carcinogenesis bioassays. Computer simulation techniques will be employed to compare the operating characteristics of three procedures that have recently been proposed to incorporate historical control data into a formal statistical analysis. (CONTACT PERSON: Dr. D. Hoel)

A related effort is underway to identify factors responsible for the extrabinomial variation present throughout the historical control data base. Potential sources of variation include time, laboratory, pathologist, animal supplier, and length of study. (CONTACT PERSON: Dr. J. Hasemen)

Statistical research will continue concerning possible modifications of the chronic bioassay design. Goodness-of-fit and the exact size of the trend tests will be considered. (CONTACT PERSON: Dr. C. Portier)

The current NTP historical control data bases maintained on CBDS will be re-defined during FY 1983. Early NCI studies not subject to the rigorous pathology quality assurance procedures currently employed by the NTP will be eliminated: Nomenclature inconsistencies will be resolved. Additional computer programs will be generated and/or existing programs revised to increase the usefulness of the data base to chemical managers and other interested scientists. (CONTACT PERSON: Dr. K. Chu)

Analyses of three separate *Salmonella* test databases will be pursued further, and assay reproducibility will be studied quantitatively. Research focus has broadened and now included *in vitro* and *in vivo* cytogeneticity assays. (CONTACT PERSON: Dr. B. Margolin)

NCTR

Toxicology Data Management Systems

The Division of Toxicology Data Management Systems (TDMS) actively supports the NTP in several areas. Currently, this includes:

- Site Support (Contract Laboratories)
- Software Maintenance and Enhancement
- Software Development
- Central Computer Facilities
- Other projects as defined by NTP

FY 1982 Accomplishments

Site Support—Involved was shipping, installing, and maintaining terminals, printers, modems and balances at the following NTP contract laboratories:

- Battelle-Columbus
- International Research and Development Corporation
- Hazelton Laboratories
- E.G. & G. Mason Research
- Microbiological Associates
- Southern Research Institute

There was development and implementation of training programs for the support of the TDMS Protocol Analysis System, Experiment Information System (EIS), and the Administrative System.

Initial visits were made to all the sites listed above. These visits were to introduce TDMS to the personnel at each facility and, when possible, to complete PAS manual forms for use in the Protocol Analysis System (PAS) on the laboratories first study using TDMS. Two of the laboratories each had two studies that began on manual forms rather than direct entry via computer terminals; therefore, these facilities were also trained on the use of EIS manual forms in the animal rooms during the initial visits. The data collected on these manual forms was sent to NCTR for entry into the system by TDMS personnel. Training sessions were held or have been scheduled at all sites.

TDMS prepared "first draft" user guides for all the systems. This documentation will be available to the user soon and will prove to be an invaluable aid during system use.

Software Maintenance and Enhancement Support—The Protocol Analysis System (PAS) was modified to accomodate multiple users. This allowed the concurrent entry of the PAS data of multiple experiments by two or more users. A copy function was also added which allows the user to copy a segment from one experiment to another. This tool is very valuable in that it saves hours of data entry time for segments that do not vary from test to test. The manual forms went through several revisions to accommodate NTP requirements, and a new segment—Responsible Parties—was added to the forms and the data base.

The Experiment Information System (EIS) was revised to include several enhancements and modifications which make this EIS version much more user oriented. A number of reports are now available at each laboratory site which provide information on experiments, e.g., dosing, food consumption.

Reports available only via the mainframe were modified in accordance with NTP's request. Provisions were made for batch submission and for running reports to accommodate users with or without memorex type terminals. Also, additional selection criteria options enable the user to specify a range of dates and/or a range of cages to run the report against.

The Administrative System (Diskette Control Subsystem) was modified to include the following functions: (1) Creation and verification of new floppy diskettes that can be introduced into the system; (2) backup of all floppy diskettes, along with the means of disk recovery for a backup in case of disk loss or failure; (3) an automated method of transmitting data from the remote microcomputer to the host system. Additionally, reports and software may be sent from the host system to the proper floppy diskette on the remote microcomputer; and (4) managment of transaction files including retransmissions in case of transmission error and deletion after the data had been received and verified by the host computer.

Software Development Support—The Micropathology System portion of the Post Experiment Information System (PEIS) will collect, store, and report microscopic pathology data. This system is currently being modified to include the NTP requirements for version 2, which includes site accountability, expanded target and other organ requirements. A version 2 design document was produced and reviewed by NTP and TDMS personnel. After receiving the revised pathology protocol for chronic studies, it was necessary to review the original design for handling target organ processing.

After defining an NTP tentative standard pathology protocol for prechronic experiments, the micropathology system was implemented at Southern Research Institute (SORI).

During the final review of the Pathology Code Table (PCT), several changes were made. To implement the NTP requirement of forced qualification to a specific qualifier group and to allow sorting of the observations, it was necessary to regroup the qualifiers into a more logical grouping sequence. New PCT micropathology reports were generated to reflect the changes. The gross pathology glossary received an intensive review by NTP pathologists and the resulting changes were implemented in PCT. All of the PCT reports have been designed and programmed with the exception of the gross lesion report. In addition to a series of mainframe reports on neoplastic and non-neoplastic pathology, a number of local (microcomputer) reports have been developed.

The pathology manual forms were sent to SORI to begin data collection during the necropsy process. At the request of the NTP, these forms were revised to more closely reflect the type of animal data to be collected for NTP studies.

The internal review process was begun on the pathology terminal operators guide. After the necessary revisions are made the manual will be ready for an external review.

The Gross Pathology System of the PEIS will collect, store and report gross (necropsy, trimming and receiving) pathology data. The external design document has been prepared and includes descriptions for data collection, pathology code table, protocol entry and validation, download, mainframe receipt and storage, and transmission. Report formats and descriptions for all aspects were also included. It is important to note that, after review by NTP, there are some possible changes in the design philosophy regarding data entry.

An analysis is being conducted which will determine the definition of a system to provide mechanisms and reports to fulfill the following primary functions: (1) Assure experimental protocol has been established before a study is initiated; (2) monitor experimental activity during the study; (3) verify and validate data for consistency and accuracy; and (4) provide summarization and analysis of data for evaluation of the study upon completion.

Central Computer Support—Procedures were developed and implemented for updating the animal room system data base separate from the other bases. Procedures for updating the pathology system data base have been developed and implemented. Currently in planning is a process which will make validation a separate job step from update. A feasibility study is also being conducted of commercially available data base management system products with regard to TDMS needs.

The Software Control System is currently in the requirements phase, with the objectives having been developed. This system will control all software elements, developmental or productional, with the main objective being that no software, either newly developed or just enhanced, will become productional without having passed through the Software Control System.

Fiscal Year 1983 Program Plans

Plans for the TDMS for FY 1983 include an expansion in both the number of laboratory sites and the number of studies being supported by TDMS. All new chronic study starts on existing contracts will be fully supported by TDMS as well as all chronic studies from newly awarded bioassay contracts. In accordance with NTP direction, TDMS will be implemented for support of selected 90-day prechronic studies. In addition, for certain ongoing chronic studies selected by NTP, support will be implemented for collection and management

of the pathology data generated by those studies. Among new initiatives requested by NTP will be the development of TDMS modules for support of hematology and clinical chemistry data. (CONTACT PERSON: Mr. A. Konvicka)

Laboratory Animal and Quality Control

The laboratory animal production program provides genetically defined rodents for the NTP bioassay and other testing studies. This resource is designed to assure the use of high quality, disease free rodents for chemical testing. The production of animals is facilitated via interaction between animal production facilities, contract bioassay laboratories, and the NTP.

Three breeding laboratories are currently under contract to provide F-344 rats and B6C3F$_1$ hybrid mice for the NTP bioassay programs. Rodents are also supplied by the Division of Cancer Treatment, NCI, at Frederick Cancer Research Facility (FCRF). Disease monitoring continues to be a major priority of this program. Two diagnostic laboratories are responsible for monitoring the production facilities. The sentinel animal program, initiated in FY 1980, continues to serve as the monitoring source for viral diseases in each animal room at testing laboratories under contract to the NTP.

NIEHS

FY 1982 Accomplishments

Genetic integrity of the production and test rodents is monitored by histocompatability (tail graft) or biochemical (isozyme electrophoresis) means under two contracts to FCRF. At the beginning of this year, it was discovered that the C3H production mice at one breeding facility were not homozygous at all loci. The heterogeneous production stock were killed and replaced with genetically homogeneous C3H breeder stock. Importantly, the rate at which chemicals were placed on test was not altered due to unavailability of test animals.

The use of detergents containing essential oils has been eliminated in chemical test animal rooms at contract laboratories, thereby removing a potential source of toxic reactions in the experimental animals. A new and innovative approach to diagnosing mycoplasma and mouse hepatitis virus infections was instituted in conjunction with the sentinel animal program. Using the ELISA method, we can now diagnose these infections with a much greater degree of precision and accuracy. Information from these and other assays over the past two to three years are currently being entered into a data file for future analyses.

FY 1983 Program Plans

The animal care and production resource will continue to produce quality rodents for the NTP testing programs. Additionally, achievement of three major objectives is planned:

1. Reduce animal production to approximately 60% of FY 1982 levels, while maintaining, and improving, the quality of animals.

2. Correlate information from the sentinel animal data file with result of the bioassay. For example, Sendai virus-pulmonary tumor associations can be ascertained.

3. A biochemical and immunochemical genetic monitoring program at both production and testing facilities will be continued and upgraded through institution of a support contract to the Program Resources Branch, TRTP/NIEHS.

Each of these objectives extends the overall goal of the animal resources program to produce sufficient numbers of healthy rodents to serve as NTP bioassay test systems. (CONTACT PERSON: Dr. C. K. Grieshaber)

Chemical Health and Safety

The scope of activities in the NTP is necessarily broad and involves research and testing of diverse types of potentially hazardous materials. The safety program serves to guard against excessive exposure of laboratory personnel and the surrounding environment to test materials, metabolites, and degradation products. In addition, every effort is made to integrate and coordinate the NTP health and safety requirements and guidelines with the operational work practices used in toxicity testing procedures to minimize any impact on the timeliness, efficiency and effectiveness of performing NTP research and testing.

Each contract laboratory develops and implements their own health and safety and environmental protection programs. The NTP chemical health and safety program sets standards, establishes guidelines and recommendations and ensures that pertinent local, State, and Federal regulations are followed. In addition, the chemical health and safety program has responsibility for monitoring and evaluating the effectiveness of individual laboratories' compliance to established standards, and renders advice in the event of emergency situations. The evaluation of chemical specific health and safety guidelines, safe handling documents and emergency procedures documents for all NTP test chemicals also constitutes a significant part of the program's functions.

The NTP chemical health and safety concerns differ considerably from those of academic or production facilities and require basic understanding and experience in chemistry, industrial hygiene, engineering control, non-routine specialized analytical chemistry, biological monitoring and medical surveillance, human factors and ergonomics, personal protective equipment evaluation and development, sampling strategies and biological testing procedures.

NIEHS

FY 1982 Accomplishments

Annual health and safety program reviews and site visits were conducted at all carcinogenesis bioassay contract laboratories. An evaluation as well as a description of action items were submitted to each laboratory with recommendations for corrections.

Two laboratories were monitored for specific test chemicals during industrial hygiene surveys. Five laboratories were monitored for formaldehyde levels involved in necropsy and tissue trimming operations observed during baseline health and safety surveys. A study was initiated using fluorescein to compare weighing procedures commonly used in *in vitro* research utilizing balances placed in hoods versus placement on open laboratory benches. The results were used as a basis for formulation of NTP minimum health and safety requirements for cellular and genetic toxicology laboratories. Gaseous marker chemicals representing chemicals scheduled for cellular and genetic toxicology testing were monitored at the repository and the test laboratory prior to testing of the more hazardous compounds (e.g., hydrogen cyanide). As a result a revised protocol was suggested.

Waste disposal procedures at all carcinogenesis bioassay laboratories were surveyed and reviewed for consistency and compliance with RCRA regulations. The high temperature system used for incineration of NTP surplus carcinogenesis bioassay chemicals was evaluated for efficacy in addition to evaluation of procedures used for disposal of chemicals not amenable to incineration. An on-site bioassay contract incinerator was evaluated for possible use in combustion of polybrominated biphenyls and determined to be inadequate for this use; alternate disposal recommendations were provided. NTP requirements were instituted for shipment to the repository of surplus bioassay chemicals scheduled for disposal.

Preliminary development studies have been completed for chemical-specific biological monitoring using 15 test chemicals as markers to assist medical surveillance of carcinogenesis bioassay laboratory personnel. Additional work is under consideration pending review of the results and recommendations of the study.

Approximately 40 cellular and genetic toxicology, carcinogenesis bioassay, pathology and program resources contract laboratories have been visited and baseline health and safety surveys were conducted with recommendations provided. Mechanisms are continuing for the health and safety evaluation, onsite inspection and monitoring, where necessary, of NTP laboratories which handle potentially hazardous materials. Plans have been instituted for evaluation and inspection of new laboratories as they join the program as well as periodic reinspection of current contractors. Guidelines and minimum requirements have been approved for all NTP programs except systemic toxicology, which is planned for FY 1983. These minimum requirements will be used in support of NIH Guidelines for Laboratory Use of Chemical Carcinogens, OSHA requirements, and other pertinent Federal, State and local regulations.

Approximately 25 chemical-specific health and safety guidelines have been prepared, reviewed and evaluated for new test chemicals and have been distributed to the respective chemical managers and other pertinent personnel.

A project was initiated to improve the fundamental design of tissue trimming stations in order to provide better capture of formaldehyde, fixatives and trace quantities of potentially hazardous test chemicals. The resultant design incorporated ventilation and ergonomics and can be applied to related work stations such as histopathology and necropsy.

An extensive study of the complex local exhaust ventilation system employed at one bioassay laboratory was undertaken as a result of potentially hazardous conditions. Modifications necessary to improve and rectify existing problems were suggested. Rapid response to an emergency situation was initiated to alleviate potentially hazardous conditions at a cellular and genetic toxicology contract laboratory.

FY 1983 Program Plans

The evaluation, program reviews, site visits, inspections, monitoring and other programs described as FY 1982 accomplishments will be continued. Health and safety evaluations and on-site inspections of all NTP contract laboratories are planned. Chemical-specific health and safety guidelines for new NTP test chemicals will be prepared and reviewed as necessary in addition to evaluation and inspection of new NTP contract laboratories. Efforts to improve and finalize guidelines and minimum requirements for all NTP contract laboratories will be completed for existing programs. A program for in-house NIEHS/NTP research laboratories to be visited, evaluated and, where necessary, monitored, will be instituted with close coordination with NIEHS safety personnel. Plans for the formulation of health and safety guidelines and requirements for in-house research will be considered. In addition, plans call for inspection of all systemic toxicology contract laboratories and formulation of health and safety guidelines and minimum standards for these laboratories. Waste management procedures for surplus NTP chemicals will be closely monitored to ensure that all potentially hazardous waste products are disposed of properly and in accordance with RCRA regulations. Studies will continue on program specific human factors and ergonomic evaluations at particular laboratories in seeking ways to improve worker safety coupled with worker effectiveness. A survey of NTP training efforts will be conducted and plans to assist and fulfill training needs will be initiated. (CONTACT PERSON: Dr. D. Walters)

Information Generation and Dissemination

Scientific information and communication about toxic and potentially toxic chemicals remains a critical aspect for program success. The National Toxicology Program must ascertain the toxicology of selected chemicals and assure that results will have scientific and regulatory significance. The end product is information—scientific information necessary in deciding social issues relative to public health and the environment. To provide that information, the NTP identified two important aspects; first, information must be disseminated to other scientists so that peer review and feedback assure scientific quality; second, since the scientific product helps society evaluate identified toxicological risks, information must be disseminated to not only the regulators responsible for protecting against potentially hazardous risks, but also to those exposed to the risks. Thus, the NTP has established and uses a coordinated communications network to disseminate toxicological information.

The value of information produced by NTP depends in part upon the quality and timeliness of information the Program receives. The NTP therefore actively seeks information from many sources: Federal, state and local governments; trade assoications; industry; labor; academia; professional societies; public interest groups; the press; individuals; other countries; and other interested parties. This includes nominations of chemicals to be tested; critiques and questions about scientific procedures, policies, priorities, and resource allocations; suggestions for program improvement; and most importantly, information about planned, ongoing, and recently completed studies on chemicals being considered or being tested by the NTP.

Scientific Coordination and Information Dissemination—To encourage public participation in the Program, the NTP holds public meetings to introduce the current year's program plans and to solicit comments and advice. The fourth NTP Open Meeting is in the planning stage and further information will be published in the *NTP Technical Bulletin*. Additionally, the NTP Board of Scientific Counselors convenes three times a year in open forum, as does the Board's Technical Reports Review Subcommittee and its *ad hoc* Panel of Experts to conduct peer review of technical reports on toxicology and carcinogenesis bioassays.

NTP must be aware of scientific procedures and results produced by other laboratories. Part II of the *Annual Plan*, the *Review of Current DHHS, DOE and EPA Research Related to Toxicology*, a major contribution towards this goal, provides overviews of research programs as well as extensive tabular information on chemical testing and test methods development and validation activities in the various agencies. Active efforts to learn about work in progress and to establish better communication links among investigators worldwide are integrated with many national and international organizations and are being pursued with others.

Fundamental to current awareness is the provision to NTP staff scientists and administrators of comprehensive searches and reviews of the world's scientific and technical literature on a given compound, in advance of decisions about priorities and experimental test designs. This is of special importance for the carcinogenesis bioassay program, where the testing process for each chemical represents a major commitment of time, labor, materials and funds for up to a five-year period.

Toxicologic research and testing require comprehensive scientific coordination for information generation and dissemination. To better utilize the concepts and the latest retrieval systems of information science, the on-line services available to the NTP from the National Library of Medicine (NLM) are particularly valuable: CHEMLINE, TOXLINE, RPROJ (Research Projects), MEDLINE, CANCERLINE, TOXICOLOGY DATA BANK, RTECS (Registry of Toxic Effects of Chemical Substances), and others. These and other sources are used by the Toxicology Information Response Center (TIRC) at the Oak Ridge National Laboratory (ORNL) to prepare dossiers on chemicals nominated for test and to provide information for the design of test protocols. Also, new information services will need to be located or developed for toxicology specialties not yet covered adequately in existing systems, for example, neurotoxicology, chemical immunotoxicology, ecotoxicology and chemical-chemical interactions. (CONTACT PERSONS: Dr. P. Craig, NLM, and Ms. J. Chase, NIEHS)

The Environmental Mutagen Information Center (EMIC), supported by the NTP, collects, organizes, and disseminates, primarily, published information on chemicals tested for mutagenicity. Located since its inception in 1969 at the ORNL, the EMIC computerized data file contained (as of May 1982) 40,841 records on 13,325 unique chemicals, 34,798 of which are available on-line from TOXLINE (at the NLM) and 40,115 from RECON (at the ORNL). Each record contains bibliographic information, assay systems, and keywords defining agents tested and organisms studied. (CONTACT PERSONS: Dr. J. Huff, NIEHS; Dr. P. Craig, NLM; and Mr. J. S. Wassom, ORNL)

The Environmental Teratology Information Center (ETIC), established in 1975 at ORNL and also supported by the NTP, maintains a computerized collection of published information on 5,407 chemicals tested for or known to induce teratogenic effects. The ETIC file contains references to 25,799 literature citations; 24,899 records are available from TOXLINE and from RECON. (CONTACT PERSONS: Ms. F. Jordan, NIEHS; Dr. P. Craig, NLM; and Ms. E. von Halle, ORNL)

The NTP, and in particular technical information specialists in cooperation with the various agencies' libraries, supplies information to Congress, scientists, the public, regulatory agencies, consumer advocates, labor, legal organizations, industry, and others.

Application of Structure-Activity Toxicity Estimation Programs—In FY 1982, on an experimental basis for NIP, the NLM/NIP group has prepared estimates of the probability of carcinogenesis, mutagenesis, teratogenesis, and of rat oral LD_{50} values for almost 200 chemicals which were nominated to NTP for consideration in various testing programs. The estimation programs used are those developed by Craig and Enslein for NIOSH and NCI. Where no published reports of experimental test values have been located, or when conflicting results have been reported, these estimates were included by the Chemical Evaluation Committee in its evaluation of about fifty chemicals in FY 1982. (CONTACT PERSON: Dr. P. Craig)

Technical Report Preparation and Dissemination—The NTP Toxicology Information and Scientific Evaluation Group has the major responsibility of providing the Program's chemical managers (toxicologists) with the most relevant information necessary to design experiments and to oversee the progress of a compound from selection through toxicology and carcinogenesis testing to final report preparation and distribution. Preparation of the technical report begins with selection of a chemical for testing and the appointment of a chemical manager. Each

manager is responsible for recommending and designing the appropriate experiment, for records management throughout the test/research period, for preparation of the draft toxicology and carcinogenesis bioassay reports, and for presenting/defending these reports before the Peer Review Panel. While experiments are in progress, the chemical manager interacts with other Government agencies and serves as resource person for scientific inquiries concerning the chemical and its possible adverse effects. Lists of chemicals nominated and scheduled for testing, those on test, and those completed are published routinely in the **Federal Register**, the NTP *Annual Plan*, an the *NTP Technical Bulletin* as well as being distributed to a variety of newsletters and scientific magazines.

An important activity within the Program centers on preparation, interpretation, and evaluation of the toxicology and carcinogenesis technical reports. Data from the toxicologic characterization studies and the chronic exposure experiments are collected into comprehensive and evaluative technical reports. These compilations receive considerable staff attention during generation, initial data analyses, and draft report preparation; further intense focus is devoted to the draft report by the NTP staff as an iterative review process. After the draft receives internal approval, copies are sent for external peer review to the NTP Board of Scientific Counselors' Technical Reports Review Subcommittee (Peer Review Panel). At this stage draft reports are made available by the Toxicology Information and Scientific Evaluation Group to any individual or organization seeking or requesting copies as long as supplies last. The *ad hoc* panel, comprised of non-government scientists, then reviews critically these draft reports and voices their opinions and findings in sessions open to the public. [Routinely, comments and questions are requested from the individuals or groups attending these open meetings.] When the draft reports are considered by staff and the peer review panel to be scientifically acceptable and soundly based, the technical reports undergo a final technical and style edit prior to printing and distribution.

Meetings to perform peer review of NTP draft bioassay technical reports are held three times yearly either in Bethesda, MD or Research Triangle Park, NC. A list of the reports to be reviewed, reviewer assignments, review forms, and other information about a particular meeting are sent to Peer Review Panel members at least one month prior to the meeting date. At the same time notices about the meeting are published in the **Federal Register** and in the *NTP Technical Bulletin*. [Draft reports are also made available to anyone upon request.] (CONTACT PERSON: Ms. J. Chase, NIEHS)

Members of the Peer Review Panel receive copies of *all* reports to be reviewed during the designated meeting. Two and sometimes three principal reviewers are assigned for each report and each gives an oral critique at the meeting accompanied by written comments. Panel members are asked to provide the NTP with a critical review of each report in advance of the meeting. Deficiencies in design, conduct, or interpretation of the study should be identified, and errors or omissions in the draft report should be stated. Further, panel members are requested to read all reports scheduled for a particular meeting and to contribute their opinions and other criticisms during the discussion period on each report. The recommendations of the reviewers and summary comments recorded at the meeting are incorporated where appropriate and relevant in the final revision of the report.

Following the meeting, draft summary minutes for each report review are prepared and are sent to the reviewers for any necessary corrections and alterations. The edited minutes are then made available for distribution to any interested party. Likewise, soon after the peer review, reports are readied for publication. Subsequently reports are printed, and made available for distribution and sale by the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161. (Telephone: 703–487–4650). Also, the Public Information Office maintains a mailing list of those who wish to receive all technical reports as published. A limited number of technical reports are available without charge by writing the NTP Public Information Office, MD–B2–04, P.O. Box 12233, Research Triangle Park, NC 27709. (CONTACT PERSON: Mr. S. d'Arazien, NIEHS)

Further, NTP uses various toxicological information resources for extensive literature searching and acquistion of scientific papers. Included are a number of information organizations in the private sector which extend the capability of the NTP, and these organizations are available on short notice through interagency or basic ordering agreements. Comprehensive literature searches and quarterly updates to those searches were performed for the chemical manager by the Toxicology Information Response Center (TIRC). From these, the most important references are selected for inclusion in an experimental design package sent to reviewers for generating the protocols for carcinogenesis bioassay testing. (CONTACT PERSONS: Ms. J. Chase and Ms. F. Jordan, NIEHS)

Tracking of Chemical and Test Status—The Program Resources Branch updates the computerized status file for chemicals in various stages of carcinogenicity testing, producing a computerized listing of all chemicals. These lists are distributed quarterly on an individual basis to those who want to know about progression of chemicals through the Program.

Records from the carcinogenesis bioassay data system may be obtained from the Toxicology Information and Scientific Evaluation Group. These include protocols for the various bioassays and individual animal pathology tables as these are verified and entered into the system, often before the final report has been released. (CONTACT PERSONS: Ms. J. Chase and Ms. L. Juodeika, NIEHS)

A chemical management and tracking system (CHEMTRACK) has been developed that will provide information on NTP chemical nomination, selection, test status, and summary results. This is described further in the Data Management and Analysis section.

Among the activities of the NLM/NTP information group related to chemical tracking were the following:

Assignment of NTP numbers reached 1,300 in FY 1982, an increase of some 200 from the number assigned in FY 1981. The data concerning test assignments were computerized and merged with the NTP numbers and Chemical Abstracts Service (CAS) Registry Numbers to generate the tables contained in the FY 1981 and FY 1982 NTP *Annual Plans*. The first edition of the *NTP Chemical Registry Handbook* was completed and distributed to senior NTP personnel in FY 1981. The *Handbook* contains for each NTP chemical the CAS registry number, structure, molecular formula, tests being conducted, and synonyms. Copies are available from the National Technical Information Service (NTIS) for sale and distribution (NTIS, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, Va 22161, 703/487–4150; Order No. PB. 82–142977).

The toxicology testing tables and indexes for the FY 1982 *Review of Current DHHS, DOE and EPA Research Related to Toxicology* were prepared by the NLM/NTP group. A "Master List of Chemicals of Concern as Possible Carcinogens" which will list chemicals regulated by U.S. agencies as carcinogens or which are under consideration for possible regulation is being constructed for NTP at ORNL under NLM direction. Printed listings will become available early in FY 1983. (CONTACT PERSON: Dr. P. Craig)

International Coordination—In partnership with the international community, the NTP strives to formulate a universally-based communication network of toxicologic information, and in particular, in the area of chemical carcinogenesis. Concomitantly, the NTP is seeking active participation from toxicologists throughout the world. The NTP will continue to expore and develop liaison with foreign agency counterparts. For instance, contacts have been established with the World Health Organization (WHO), with the International Program on Chemical Safety (IPCS), with the International Agency for Research on Cancer (IARC), with the International Registry of Potentially Toxic Chemicals (IRPTC), with the United Nations Environment Program (UNEP), with the European Chemical Industry Ecology and Toxicology Center (ECETOX), and with governments and individual scientists throughout the world. As an example, in July 1981, an agreement was entered into with the IARC to establish and maintain an international registry of persons exposed to phenoxy herbicides and contaminants, particularly the chlorinated dibenzodioxins and dibenzofurans. This registry will complement the national effort under the guidance of NIOSH.

An NTP/EPA interagency effort has been initiated to establish a worldwide clearinghouse on phthalate research activities. Information is being collected, catalogued, and stored, primarily about ongoing research and testing efforts; an international registry of scientists engaged in

phthalates research is being assembled, and in certain voluntary instances preliminary or recently completed research and testing results will be received and made available. In FY 1982, a data form was sent to persons involved in phthalate testing or research. In addition, a form was inserted in the April 1982 issue of the Technical Bulletin to encourage all parties not reached by the separate mailing to report work recently completed, in progress, or contemplated. (CONTACT PERSONS: Ms. J. Chase, NIEHS, and Dr. D. Canter, NIEHS)

Public Awareness and Inquiry Responses—Public awareness of the NTP increased during FY 1982. NTP meetings, Program results, and other activities were reported widely in the trade press and occasionally in the general media. The mailing list for the NTP *Annual Plan, Annual Report on Carcinogens, Technical Bulletin* and Technical Reports includes 6,300 names and addresses. Results from surveys of those receiving the *NTP Annual Plan* and the *Annual Report on Carcinogens* indicate that users are concentrated among: industry (28 percent), research or consulting (17 percent), academic or educational (17 percent), Federal Government (15 percent), health care (6 percent), labor and public interest (6 percent), state government (5 percent), trade or professional associations (3 percent) law firms (2 percent), and local governments (1 percent). This mailing list contains names of about 200 media representatives and over 500 foreign addressees.

A readership survey was sent to those receiving Volume II of *The 1981 NTP Annual Plan, (Review of Current DHHS, DOE, and EPA Research Related to Toxicology),* and the responses are being considered in preparation of current and future volumes. The Public Information Office (PIO) will periodically survey NTP readership to update mailing lists and to determine how information is used to make the Program more responsive to the needs of environmental health researchers and public health professionals.

The PIO, working with the Toxicology Information and Scientific Evaluation Group, answers public inquiries and conducts an outreach program to assure that the results of NTP testing and test methods development programs reach those involved in toxicology and public health policy. The PIO prepares press releases and **Federal Register** notices detailing NTP activities and program results.

The PIO has produced a 20-page pamphlet explaining the NTP's mission to the general public. This pamphlet was distributed with the *Second Annual Report on Carcinogens.* As resources become available, it is hoped that other general interest publications can be made available and outreach activities can be broadened. The PIO is also responsible for the Program's contact with the press. (CONTACT PERSON: Mr. S. d'Arazien, NIEHS)

The PIO maintains the NTP mailing list and distributes the following documents:

- The *NTP Annual Plan* (including Volume II, *Review of Current DHHS, DOE, and EPA Research Related to Toxicology);*
- The *NTP Technical Bulletin* (a quarterly publication which presents the latest program plans and results);
- A summary of the *Annual Report on Carcinogens;*
- NTP Technical Reports

Requests should be sent to: NTP Public Information Office, MD B2–04, P.O. Box 12233, Research Triangle Park, NC 27709.

Annual Report on Carcinogens

The *Third Annual Report on Carcinogens* will be published in the first half of FY 1983. The report was prepared by the NTP staff and its member agencies pursuant to a 1978 amendment (Section 301(b)(4)) to the Public Health Service Act which requires that the Secretary of the Department of Health and Human Services publish annually a list of "all substances which are either known to be carcinogens or which may reasonably be anticipated to be carcinogens and to which a significant number of persons residing in the United States are exposed * * *." Each annual report also contains available information on the nature and degree of exposure to such carcinogens and on the extent to which Federal regulations are effective in reducing the risk to public health.

The *Third Annual Report on Carcinogens* includes 116 entries on substances, chemicals, or manufacturing processes (Table 43). Included is information on 88 entries in last year's second annual report. These entries are included because the International Agency for Research on Cancer (IARC) has determined that there is "sufficient evidence of carcinogenicity in experimental animals" to classify them as animal carcinogens, because they are regulated by the Federal government as carcinogens, because they have been found to cause cancer in bioassays conducted by the National Cancer Institute or the NTP, or because their inclusion was suggested by the agencies involved in preparing the *Annual Report.*

Among the entries are naturally-occurring substances, additives to food or cosmetics, pesticides, pharmaceuticals, and many which are either associated with industrial production or are by-products of manufacture.

The fact that a substance is not included in the report does not mean that the agent is not a confirmed or suspected carcinogen. There are additional substances which represent potential health hazards to the population. The available data are being examined and these agents will be added to future reports.

Each of the entries includes information on the human and animal evidence for carcinogenicity, on production and occurrence and use, and on what is known about the route and amount of human exposure. The specific regulations promulgated by various Federal agencies are included as well.

The *Annual Report* also contains an extensive list of the common synonyms for the chemicals included, a glossary of terms and acronyms and, as required by law, a list of requests to the Department of Health and Human Services for information about carcinogens.

The information provided in the *Third Annual Report on Carcinogens* was developed by the following Federal regulatory and research agencies: The Centers for Disease Control/National Institute for Occupational Safety and Health; the Consumer Product Safety Commission; the Environmental Protection Agency; the Food and Drug Administration; the National Cancer Institute; the National Institute of Environmental Health Sciences; the National Library of Medicine; and the Department of Labor/Occupational Safety and Health Administration. (CONTACT PERSON: Dr. R. Shapiro, NIEHS)

Copies of the summary of the *Third Annual Report on Carcinogens* may be obtained without charge by contacting: NTP Public Information Office, MD B2–04, P.O. Box 12233, Research Triangle Park, NC 27709. Telephone: (919) 541–3991; FTS 629–3991.

Copies of the complete *Third Annual Report on Carcinogens* will be made available for a fee from the National Technical Information Service (NTIS) (NTIS, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, VA 22161, 703/407–4150).

Tables

To conserve space and minimize cost, results are not given in the tables. Results are available in the bound version of the NTP Fiscal Year 1983 Annual Plan which may be ordered from: NTP Public Information Office, P. O. Box 12233, Research Triangle Park, NC 27709, (919) 541–3991 or (FTS) 629–3991.

Questions or Additional Information

Questions or requests for information about the Annual Plan and the National Toxicology Program should be addressed to: Dr. Larry Hart, National Toxicology Program, P.O. Box 12233, Research Triangle Park, NC 27709; (919–541–3971; FTS 629–3971).

If readers of the Annual Plan are aware of planned or ongoing studies on chemicals mentioned in the Plan, they are encouraged to make such information known to the NTP, so that unnecessary duplicative studies can be avoided or minimized.

Errors or Omissions

Although every effort is made to ensure that the Annual Plan is error free, mistakes may occur. Any errors or omissions noted by the reader in the body of the Annual Plan, or the index, should be called to the attention of Dr. Larrry Hart (see above for address).

Index

Numbers in the index refer to the number of the table in which the chemical is listed *except* where prefixed with a P. These entries are found in the text and P refers to the page number in the bound version of the Plan.

BILLING CODE 4140–41–M

TABLE 1

CHEMICALS TESTED FOR MUTAGENICITY IN SALMONELLA ASSAYS
IN FY 1982 FOR WHICH RESULTS ARE AVAILABLE FROM NTP

Acetonitrile
AF-2
Allyl isothiocyanate
9-Aminoacridine HCL H20
2-Aminoanthracene
P-Aminobenzoic acid
2-Amino-4-nitrophenol
2-Amino-5-nitrophenol
Ampicillin trihydrate
N-Amylamine
Anethole
P-Anisidine
Anthracene
Benzethonium chloride
Benzidine
Benzophenone
O-Benzyl-p-chlorophenol
4-Biphenylamine
2,2-Bis(bromomethyl)-1,3-propanediol
Bis(2-chloroethyl)ether
N,N'-Bis(1,4-dimethylpentyl)-p-phenylenediamine
1,2-Bis(2,4,6-tribromophenoxy)ethane
Boric acid
Bromoacetonitrile
Bromodichloromethane
2-bromo-4,6-dinitroaniline
Brucine
1,4-Butanediol diglycidyl ether
Tert-Butylamine
n-Butylamine
Butyl anthranilate
Butyl(2,4-dichlorophenoxy) acetate
Butyl methacrylate
o-sec-Butylphenol
Butyl(2,4,5-trichlorophenoxy) acetate
Butyraldehyde
gamma-Butyrolactone
Cadmium oxide
Carvyl acetate
Chlorambucil
Chlordane
Chlordecone (Kepone)
Chlordecone alcohol
Chloroacetonitrile
2-Chloroethyltrimethyl-ammonium chloride
2-Chloromethylpyridine hydrochloride
4-Chloro-2-nitroaniline
Chlorothen
3-Chloro-p-toluidine
5-Chloro-o-toluidine
Chlorpheniramine maleate
Choline chloride
C.I. Acid Red 114
C.I. Direct Blue 218
C.I. Direct Blue 1
C.I. Direct Blue 15

C.I. Vat Blue 1
C.I. Vat Brown 3
C.I. Vat Yellow 4
1,8- Cineol
Citral
Colchicine
Cresyl diphenyl phosphate
Curcumin
Cyclohexane
Cyclohexylamine
Diallylamine
Diallyl phthalate
1,4-Diamino-2,6-dichlorobenzene
4,4'-Diaminodicyclohexylmethane
1,3-Diaminopropane
Di-n-amylamine
Diarylanilide Yellow
Dibromoacetonitrile
2,3-Dibromo-2-butene-1,4-diol
Dibromomannitol
2,3-Dibromopropylmethacrylate
2,3-Dibromopropyl acrylate
Dibutyl phthalate
Dibutyltin diacetate
3,3'-Dichlorobenzidine dihydrochloride
2,7-Dichlorodibenzo-p-dioxin
Dichloroisocyanuric acid
1,3-Dichloropropene
2,3-Dichloroquinoxaline
Dicyclohexyl phthalate
Dicyclopentadiene
Diesel fuel marine
DI(2-ethylhexyl) phthalate
Diethylamine
(Diethylamino)ethanol
Diethylene glycol
Diethylenetriamine
DI(2-ethylhexyl)sebacate
DI(p-ethylphenyl)dichloroethane
N,N'-Diethylthiourea
Diglycidyl resorcinol ether
2,2'-Dihydroxy-4-methoxy-benzophenone
Diisobutyl phthalate
Diisodecyl phthalate
Diisononyl phthalate
Diisopropylamine
Dimenhydrinate
3-Dimethylamino-propylamine
N,N'-Dimethylaniline
Dimethylcarbamoyl chloride
Dimethylethanolamine
Dimethyl hydrogen phosphite
Dimethyloldihydroxyethyleneurea
Dimethyl phthalate
Dimethyl terephthalate
2,4-2,4-Dinitroaniline
2,4-Dinitrotoluene
Dioctyl phthalate
Dioxathion
DI(n-hexyl)phthalate
Ditridecyl phthalate
Diundecyl phthalate
Divinylbenzene
Dodecenylsuccinic anhydride
Endosulfan
Epibromohydrin
Epichlorhydrin
1,2-Epoxyhexadecane
1,2-Epoxy-3,3,3-trichloropropane
Erythromycin stearate
Monoethanolamine
2-2-Ethoxyethyl p-methoxy-cinnamate
Ethyl anthranilate
N,N'-Ethylene-bis(tetrabromo-phthalimide)
Ethylene thiourea
2-Ethylhexanol
Mono(2-ethylhexyl) adipate
2- Ethylhexyl 2-cyano-3,3-diphenylacrylate
2-Ethylhexyl diphenyl phosphate
2-Ethylhexyl-p-methoxycinnamate
Mono(2-ethylhexyl)phthalate
Ethylidenenorbornene
Ethyl ethanesulfonate
Ethylvanillin
4-Fluoro-dl-phenylalanine
5-Fluorouracil
Furfuryl acetate
Gibberellic acid
Glutaraldehyde
Halothane
Heptachlor
Hexabromocyclododecane
Hexamethyl-p-rosaniline chloride
Hexanamide
N-Hexane
1,6-Hexanediamine
Hexylresorcinol
Hydrochlorothiazide
Hydroquinone monomethyl ether
2-Hydroxy-4-methoxybenzophenone
L-5-Hydroxytryptophan
3.3'-Iminobis(propylamine)
Indomethacin
Beta-Ionone
Isoamyl nitrite
Isobutylamine
Isobutyl anthranilate
Isobutyl nitrite
Isobutyraldehyde
Isoeugenol
Isoprene
Isopropyl glycidyl ether
Isoproterenol hydrochloride

TABLE 1

CHEMICALS TESTED FOR MUTAGENICITY IN SALMONELLA ASSAYS
IN FY 1982 FOR WHICH RESULTS ARE AVAILABLE FROM NTP (CONT.)

Lead dioxide
Linoleic acid
Malathion
Mercaptobenzothiazole
Mercuric chloride
p-Methane-1,8-diamine
Methoxychlor
alpha-Methylbenzyl alcohol
alpha-Methyl cinnamaldehyde
N-Methyldiethanolamine
4,4'-Methylenebis(2-chloroaniline)
N-Methylethanolamine
Methyleugenol
O-Methylhydroxylamine HCL
Methyl isocyanate
Methyl methanesulfonate
N-Methyl-2-pyrrolidone
Mirex
Monoethylamine
Monuron
Myleran
o-Nitroacetophenone
p-Nitroacetophenone
p-Nitroaniline
o-Nitroanisole
4-Nitroanthranilic acid
p-Nitrobenzoyl chloride
p-Nitrobenzyl chloride
o-Nitrobenzyl chloride
o-Nitrophenethyl alcohol
o-Nitrophenol
4-Nitro-o-phenylenediamine
Oleic acid
O,O-Diethyl S-(1,1-dimethylethyl) thioOmethyl)phoshorodithioate
Parathion
Pentabromodiphenyl oxide
2,3,4,5,6-Pentabromoethylbenzene
Pentabromophenol
Pentabromotoluene
Phenthiazine
o-Phenanthroline
Pheniramine maleate
Phenolphthalein
D-Phenylalanine
N-Phenylhydroxylamine
1-Phenyl-3-methyl-5-pyrazolone
Phthalamide
Phthalic anhydride
Pichloram
Piperazine
Piperonalacetone
Potassium chloride
Prednisone
Promethazine hydrochloride
Propiolactone
Propionaldehyde
Propylenediamine
Pyrilamine
p-Quinone
Resorcine blue
Saccharin
Sodium diethyldithiocarbamate
Stannous chloride
Sulfamethazine
Sulfamethizole
Sulfamethoxazole
Sulfan blue
Sulfathiazole
Tetrabromobisphenol A
Tetrabromophthalic anhydride
1,2,4,5-Tetrachlorobenzene
1,1,1,2-Tetrachloroethane
Tetracycline hydrochloride
Tetraethylenepentamine
Tetraethylthiuram disulfide
N,N,N',N'-Tetramethyl-1,3-butanediamine
N,N,N',N'-Tetramethylethylenediamine
4,4-Thiobis(6-tert-butyl-m-cresol)
Thonzylamine hydrochloride
Toluene diisocyanate
Toxaphene
Triamylamine
S-Triazine-2,4,6(1H,3H,5H)-trione, 1,3-dichloro-, potassium salt
2,4,6-Tribromophenol
Trichloroacetonitrile
Trichloroethylene
Trichlorofluoromethane
2,4,5-Trichlorophenol
2,4,5-T isobutyl ester
Triethylamine
Triethylenetetramine
Triethyllead chloride
Triethyl phosphate
Triisopropanolamine
Trimellitic anhydride
Trimetacresyl phosphate
Trimethoprim
2,4,5-Trimethoxybenzaldehyde
Trimethylamine
3,3,5-Trimethylcyclohexyl
Trimethylthiourea
Tripelennamine
Triphenyl phosphate
Tris(2-chloroethyl)phosphite
Tris(1,3-dichloro-2-propyl) phosphate
Trixylenyl phosphate mixed isomers
Turmeric oil
Vanillin
Veratraldehyde
Vinyl cyclohexene dioxide
Witch hazel
Wollastonite calcium silicates
Zinc pyrithione
Zirconium oxychloride

TABLE 2

CHEMICALS SELECTED FOR MUTAGENICITY TESTING IN SALMONELLA IN FY 1983

Acetaldehyde
Acetanilide
Acetic anhydride
Acetoacetanilide
2-Acetylamino-4-methylphenol
N-Acetyl-m-aminophenol
1-Acetyl-2-phenyl hydrazide
N-Acetyl-m-Toluidine
N-Acetyl-p-Toluidine
Acrylamide
Acrylic acid
Acrylonitrile
Adiponitrile
Agaritine
Alloxan
Allyl acrylate
Allylamine
Allyl anthranilate
Allyl propyl disulfide
Allylthiourea
p-Amino acetanilide
m-Aminoacetanilide
2-Aminoacetanilide
5-(4-Aminobenzamido)-2,3-cresotic acid
2-Aminobenzenesulfonic acid
3-Aminobenzenesulfonic acid
4-Aminobenzenesulfonic acid
2-Aminobenzimidazole
2-Amino-4-chloro-5-nitrophenol
2-Amino-4-chloro-6-nitrophenol
2-Amino-6-chloro-4-nitrophenol
2-Amino-4-chlorophenol
6-Amino-4-chloro-1-phenol-2-sulfonic acid
2-Amino-4,6-dichlorophenol
2-Amino-4,6-dinitrophenol
4-Amino-4'-hydroxy-3-methyldiphenylamine
2-Amino-4-methylphenol
3-Amino-6-methylphenol
3-Amino-4-methylphenol
2-Amino-4-(methylsulfonyl)phenol
2-Amino-6-nitrobenzothiazole
2-Amino-5-nitro-4-methylphenol
2-Amino-3-nitro-4-methylphenol
4-Amino-2-nitrophenol
6-Amino-4-nitro-1-phenol-2-sulfonic acid
2-Amino-6-nitro-1-phenol-4-sulfonic acid
3-Aminophenol
4-Aminophenol
2-Amino-1-phenol-4-sulfonic acid
2-Aminopyridine
5-Amino-3-sulfosalicylic acid
3-Amino-5-sulfosalicylic acid
3-Aminotriazole

TABLE 2

CHEMICALS SELECTED FOR MUTAGENICITY TESTING IN SALMONELLA IN FY 1983 (CONT.)

2-Amino-3,4,6-trichlorophenol
Amphetamine sulfate
Amphotericin B
Amyl nitrite
Antergan hydrochloride
Anthralin
o-Anthranilic acid
Atrazin
Azathioprine
Azinphosmethyl
Benomyl
Benzamide
Benzene sulfonic acid
Benzimidazole
Benzimidazol-2-ylurea
Benzonitrile
Benzo(f)-quinoline
p-Benzoquinone monooxime
Benzothiazole, 2,2'-dithiobis
Benzotriazole
Benzoyl chloride
Benzoyl peroxide
Benzyl chloride
Benzyltrimethyl ammonium chloride
2-Biphenylol, sodium salt
2,4-Bis(p-aminobenzyl) aniline
1,3-Bis(2-benzothiazolylmercapto-methyl) urea
1,3-Bis(tert-butyldioxyiso-propyl)benzene
Bismuth subsalicylate
Bisphenol A diglycidyl ether
Bis(tributyltin)oxide
N-Bromoacetamide
p-Bromoaniline
3-Bromo-2,2-bis(bromomethyl) propanol
Bromochloroacetaldehyde
Bromochloroacetonitrile
2-Bromo-1-ethanol
2-Bromoethyl acrylate
Beta-bromo-beta-nitrosostyrene
3-Bromo-1-propanol
1-Bromo-2-propanol
2,3-Butanedione 2-oxime
Mono-sec-butanolamine
N-Butyl acrylate
sec-Butylamine
tert-Butyl chromate
Butyl cyclohexyl phthalate
tert-Butyl perbenzoate
tert-Butylphenyl diphenyl phosphate
Butyltin-tris(isooctyl-mercaptoacetate)
tert-Butyltoluene
Butyric acid
Cadinene
Caprolactam
Carbarsone
4-(3-Carbazoylamino)phenol
Carbendazim
((O-Carboxyphenyl)thio)ethyl-mercury sodium salt
Carisoprodol
Carminic acid
Carveol
Castor oil
Chloral
Chloramphenicol sodium succinate
Chlorinated trisodium phosphate
Chloroacetophenone (CN)
N-(3-Chloroallyl)hexaminium chloride
m-Chloroaniline
o-Chloroaniline
o-Chlorobenzalmalononitrile
4-Chloro-2-(2,4-dinitroanilino) phenol
Chloroethyl acrylate
3-Chloromethylpyridine hydrochloride
Chloroneb
4-Chloro-O-phenylenediamine
3-Chloro-1,2-propanediol
2-Chloro-1,3-propanediol
1-Chloro-2-propanol
2-Chloro-1-propanol
3-Chloro-1-propanol
o-Chlorostyrene
Chlorotrianisene
2-Chloro-6-(trichloro-methyl)pyridine
Chlorotrimethylsilane

Cinnamaldehyde ethylene glycol acetal
Citral diethyl acetal
Clonitralid
Coconut diethanolamide
Codeine
Copper acetoarsenite
p-Cresidine
p-Cresol glycydyl ether
Cumene hydroperoxide
4-Cumylphenyldiphenyl phosphate (CPDPP mixed isomers)
Cyclohexanone cyanohydrin cyclohexim1de
Cyclohexyl anthranilate
Cytarabine
Cytarabine hydrochloride
Cytembena
Dacarbazine
Decyl methacrylate
Dehydroemetine hydrochloride
Diaminomaleonitrile
Diazoaminobenzene
Dibromoacetaldehyde
Dibromochloropropane
1,2-Dibromo-4-(1,2-dibromoethyl) cyclohexane
Dibromodulcitol
2-(Dibutylamino)ethanol
Di-tert-butyl peroxide
Dibutyl phenyl phosphate
Dibutyltin-bis(laurylmercaptide)
Dibutyltin dilaurate
Dichloran
Dichloroacetaldehyde
2,5-Dichloroaniline
3,4-Dichloroaniline
1,2-Dichloroethane
4,5-Dichloro-6-methyl-2-methyl-sulfonylpyrimidine
1,1-Dichloro-1-nitroethane
1,3-Dichloro-2-propanol
2,3-Dichloro-1-propanol
Dichlorvos
Dicumyl peroxide
Dicyclohexylamine
Dicyclohexylamine nitrite
5-Diethylamino-2-nitroso-4-methylphenol
5-Diethylamino-2-nitrosophenol
3-Diethylaminophenol
N,N-Diethyl aniline
Diethylbutylamine
Diethyldichlorosilane
Diethylene glycol bis-glycidyl ether
Diethylstilbestrol
2,4-Difluoroaniline
Dihexylamine
1,2-Dihydro-2,2,4-trimethyl-quinoline
3,3'-Dihydroxybenzidine
1,8-Dihydroxy-4,5-dinitro-anthraquinone
Dihydroxyurea
Diisobutylamine
2,6-Diisocyanatotoluene
Diisopropanolamine
Di(isopropylphenyl)phenyl phosphate (DIPP)
N,N-Dimethylacetamide
2-(Dimethylamino)ethyl acrylate
3-Dimethylamino-4-methylphenol
5-Dimethylamino-2-nitroso-4-methylphenol
3-Dimethylaminophenol
3,3'-Dimethylbenzidine
2,5-Dimethyl-2,5-bis(tert-butyl-peroxy)hexane
1,3-Dimethylbutylamine

TABLE 2

CHEMICALS SELECTED FOR MUTAGENICITY TESTING IN SALMONELLA IN FY 1983 (CONT.)

N-(1,3-Dimethibutyl)-n-phenyl -p-phenylenediamine
Trans-1,3-Dimethylcyclopentane
1,1-Dimethyl-1-(2-hydroxpropyl- amine)methacrylimide
1,1-Dimethyl-1-(2-hydroxypropyl- amine)tetradecanimide
Dimethyl morpholinophosphonate
Dimethyl sulfoxide
2-(2,4-Dinitroanilino)phenol
4-(2,4-Dinitroanilino)phenol
2,4-Dinitro-6-(1-methyl- heptyl)phenol
2,4-Dinitrophenol
Di(n-octyl)tin-S,S'-bis (isooctylmercaptoacetate)
Di(n-octyl)tin maleate
1,3'-Diphenylguanidine
Diphenylurea
Di-n-Propylamine
Direct Violet 32
Di-sec-butanolamine
Dodecyl alcohol, ethoxylated
N-Dodecylmercaptan
Doxylamine succinate
Econazole
Emetine hydrochloride
Ephedrine sulfate
Epinephrine
2,3-Epoxy-1,4-dichlorobutane
1,2-Epoxy-1,1,2,3,3,3- hexafluoropropane
Ergotamine tartrate
Estragole
N-(3-Ethoxyphenyl)acetamide
3-Ethylamino-4-methylphenol
3-Ethylaminophenol
N-Ethyl aniline
Ethylbenzene
Ethyl chloride
S-Ethyl dipropylthiocarbamate
2-Ethylhexyl acrylate
Ethyl methacrylate
N-Ethylmorpholine
N-Ethyl-N-phenyl benzylamine
Ethyl 3-phenylglycidate
N-Ethyl-O-toluenesulfonamide
FD and C Red No. 32
Formulated fenaminosulf
Formamide
Formanilide
Fumaric acid
Furfuralacetone
Furfuryl alcohol
Furosemide
beta-2-Furylacrolein
Glycidol
Griseofulvin
Halazone
HC Blue 1
HC Blue 2
HC Red 3
2-Heptadecyl-3-hydroxyethyl- imidazoline
1,2,3,6,7,8-Hexachloro- dibenzo-p-dioxin
Hexachloronaphthalene
Hexadecylamine
Hexafluoroacetone
Hexafluoro-1-propanol
Hexahydro-1,3-tris(2-hydroxy- ethyl)triazine
1,6-Hexamethylene diacrylate
1,3,6-Hexanetricarbonitrile
n-Hexyl methacrylate
Hycanthone methanesulfonate
Hydrocyanic acid
Hydroxyacetonitrile
2-Hydroxybenzamide
N-Hydroxybenzamide
alpha-Hydroxybenzeneacetonitrile
N-(Hydroxyethel)ethylenediamine
Hydroxylamine, hydrochloride
2-Hydroxy-2-methylpropanenitrile
2-Hydroxy-1,4-naphthoquinone
3-Hydroxy-n-phenylaniline
2-Hydroxypropanenitrile
3-Hydroxypropanenitrile
8-Hydroxyquinoline sulfate
Iodinated glycerol
Iodoacetic acid
Iodochlorohydroxyquinoline
beta-Ionone
Isatin-5-sulfonic acid
Isobutyl acrylate
Isobutyl methacrylate
Isodecyl diphenyl phosphate
Isophorone diisocyanate
Monoisopropanolamine
Isopropylamine
N-Isopropylaniline
Isopropyl methacrylate
Isopropyl phenyl diphenyl phosphate (IPDP mixed isomers)
N-Isopropyl-N'-phenyl-p- phenylenediamine
Lauric acid
Lauric acid diethanolamine
Laurylethanolamide
Linalyl anthranilate
Malaoxon
Maleic hydrazide diethanolamine
Malonic dinitrile
Maltol
Manganese sulfate
para-Menthane hydroperoxide
2-Mercaptobenzimidazole
Methacrylonitrile
Methapyrilene hydrochloride
Methdilazine hydrochloride
3-((Methoxycarbonyl)amino)phenyl N-(3-methylphenyl)carbamate
O-Methoxycinnamaldehyde
Methoxyethyl mercury chloride
Methoxyflurane
4-Methoxy-3-nitro-N-phenyl- benzamide
Methyl acrylate
Monomethylamine
3-Methylamino-4-methylphenol
N-Methyl aniline
Methyl anthranilate
N-Methylbenzamide
2-Methylbenzamide
cis-2-Methyl-2-butenenitrile
trans-2-Methyl-2-butenenitrile
2-Methyl-3-butenenitrile
Methyl 2-cyanoacrylate
Methyl demeton
Methyldopa
N,N'-Methylenebisacrylamide
Methylenebis(4-cyclohexyl isocyanate)
Methylenedianiline
Methylglutaronitrile
Methyl mercuric chloride
Methylmercury hydroxide
Methyl methacrylate
4-Methyl-4-methoxy-2-pentanone
N-Methylolacrylamide
Methylphenidate
N-Methyltaurine
Methyltin-tris(isooctylmercapto- acetate)
Methyltrifluoromethanesulfonate
Metronidazole
Mexacarbate
Mezerein
Monosodium glutamate
Musk ambrette
Musk ketone
Nalidixic acid
1,4-Naphthalenediamine
4-(2-Naphthylamino)phenol
2-Naphthyl lactate
Neohesperidin dihydrochalcone
N-Ethyl-N-butylamine
Nickel carbonyl
Ninhydrin
NTA(Nitrilotriacetic acid)
m-Nitroacetophenone
o-Nitroaniline
m-Nitroaniline
m-Nitrobenzamide
p-Nitrobenzamide
o-Nitrobenzamide
p-Nitrobenzoic acid
o-Nitrobenzoic acid
m-Nitrobenzoic acid
m-Nitrobenzoyl chloride
o-Nitrobenzoyl chloride
m-Nitrobenzyl chloride
p-Nitrophenethyl alcohol
p-Nitrophenethyl alcohol, acetate
o-Nitrophenethyl alcohol, acetate
m-Nitrophenol
(o-Nitrophenyl)acetonitrile
1-(4-Nitrophenyl)-2-chloropropane
N-Nitrosodiethanolamine
N-Nitroso-N-ethylurethane
Nonamethyleneimine
Nonanal
Nonylphenyl diphenyl phosphate (NPDPP mixed isomers)
Noscapine
Ochratoxin A
Octachlorodibenzodioxin
Octachloronaphthalene
Octadecylamine
N-Octyl methacrylate
Oleic acid diethanolamine

TABLE 2

CHEMICALS SELECTED FOR MUTAGENICITY TESTING IN SALMONELLA IN FY 1983 (CONT.)

Olivetol
Oxethazaine
Papaverine hydrochloride
Pentabromochlorocyclohexane
Pentachloroanisole
Pentaerythritol triacrylate
Pentaethylenehexamine
cis-2-Pentenenitrile
trans-2-Pentenenitrile
3-Pentenenitrile
p-tert-Pentylphenol
Peracetic acid
Perchloromethyl mercaptan
Phenamiphos
Phenesterin
Phenethyl anthranilate
o-Phenetidine
p-Phenetidine
m-Phenetidine
Phenformin hydrochloride
Phenoxybenzamine hydrochloride
Phenylacetonitrile
N-Phenylbenzenamine
Phenylephrine hydrochloride
2-Phenyl-2-ethylmalondiamide
Phenylphosphine
Photodieldrin
Piperonyl acetate
2-Pivalyl-1,3-indandione
Polyethylene glycol 200
Polyethylpotassium 2-benzyl-4-chlorophenate
Polyvinylchloride latex
Polyvinylpyrrolidone polymers
Potassium p-tert amylphenate
Primaclone
Procarbazine hydrochloride
Propanedial, ion(1-), sodium
2-Propanol, 1-chloro-, phosphate (3:1)
Propantheline bromide
Propionitrile
Propylene
Propylene cyanohydrin
1,3-Propylene oxide
3-Propylidenephthalide
N-Propyl methacrylate
Quaternary ammonium compounds, benzyl-C8-18-alkyldimethyl, chlorides
Quinacrine dihydrochloride
Quinacrine mustard
Quinidine
D & C Red 9
Rhodamine 6G
Riddelline
Roxarsone
Salicylazosulfapyridine
Scopolamine
Senecphylline
Sodium arsenilate
Sodium cyanurate
Sodium iodomethanesulfonate
Sodium mercaptobenzothiazole
Monosodium methane arsenate
Sodium methohexital
Stearatochromic chloride complex
Succinic anhydride
Succinonitrile
5-Sulfoanthranilic acid
Sunset Yellow FCF 6
L-Taurine
1,2,4,5-Tetrabromo-3,6-dimethylbenzene
O-Tetrabromoxylene
Tetrachlordiphenylethane
Tetrachloronaphthalene
Tetrachlorvinphos
Tetraethyldithiopyrophosphate
Tetraethylene glycol diacrylate
Tetrafluoroethylene
1-trans-Delta-9-tetrahydrocannabinol
Tetramethylsuccinonitrile
1,1,3,3-Tetramethyl-2-thiourea
Thenyldiamine hydrochloride
Theophylline
Thiabendazole
Thiazole
2,2'-Thiobis(4-chlorophenol)
2,2'-Thiobis(4,6-dichlorophenol)
Thiocid
Thioglycolic acid
Thiophanate M
Thiophen
Thiourea
D-alpha tocopheryl succinate
Tolazamide
o-Tolualdehyde
o-Toluidine
m-Toluidine
m-Toluidine hydrochloride
p-Toluidinium chloride
o-Tolunitrile
p-Tolunitrile
m-Tolunitrile
Tolytriazole
Triallylamine
Triamiterene
Tribromoacetonitrile
2,4,6-Tribromophenyl carbonate
Tri-sec-butanolamine
Tributylamine
Trichlorfon
4,4,4-Trichloro-1,2-epoxybutane
Trichloromelamine
Triclorcarban
Triethanolamine stearate
Triethylene glycol diglycidyl ether
Trifluorothymidine
Triisobutylamine
Trimethyloxonium hexachloroantimonate
2,4,6-Trinitroaniline
2,4,6-Trinitrotoluene
Trioctyl phosphate
1,3,5-Trioxane (9Cl)
Triphenylamine
Triphenyl phosphite
Tri-n-Propylamine
Urethane
Urotropine
Valeronitrile
Vinylidene Fluoride
Vinyl Toluene
Vitamin D
Xylenes, commercial mixture
2,3-Xylidine
2,4-Xylidine
2,5-Xylidine
3,4-Xylidine
3,5-Xylidine
Zinc potassium chromate
Zineb

TABLE 3

CHEMICALS TESTED FOR MUTAGENICITY IN L5178Y MOUSE LYMPHOMA CELLS IN FY 1982 FOR WHICH RESULTS ARE AVAILABLE FROM NTP

Aldicarb
4-Amino-2-nitrophenol
2-Amino-5-nitrothiazole
Aniline
Anthracene
Benzo(e)pyrene
4,4'-Bis(dimethylamino) benzophenone
p-Chloroaniline
3-Chloromethylpyridine hydrochloride
C.I. Basic Red 9
N,N'-dicyclohexylthiourea
Diethylstilbestrol
Ethylene dibromide
Lead acetate
Lithocholic acid
Methyl carbamate
4,4'-Methylenebis(N,N'-dimethylaniline)
3-Nitropropionic acid
p-Phenylenediamine dihydrochloride
Pyrene
Sucrose
Thioacetamide
Thiourea

TABLE 4

CHEMICALS SELECTED TO BE TESTED FOR MUTAGENICITY
IN L5178Y MOUSE LYMPHOMA CELLS IN FY 1983

2-Amino-4-nitrophenol
2-Amino-5-nitrophenol
Ampicillin trihydrate
Anilazine
o-Anthranilic acid
Benzidine, dihydrochloride
Benzyl alcohol
Bromoform
2-Butanone peroxide
Beta-Cadinene
Chloramphenicol sodium succinate
Monochloroacetic acid
p-Chloroaniline
o-Chlorobenzalmalononitrile
Chloroform
3-Chloro-2-methylpropene
2,4-Diaminophenol dihydrochloride
Dichlorodiphenyltrichloroethane
2,4-Dichlorophenol
Dichlorvos
3,3'-Dimethoxybenzidine dihydrochloride
4-Dimethylaminoazobenzene
3,3'-Dimethylbenzidine
Dimethylcarbamoyl chloride
Dimethylformamide
Dimethyl methylphosphonate
Dimethyl morpholinophosphonate
Dimethylvinyl chloride
Erythromycin stearate
Ethylene glycol
Ethylene thiourea
Fluorene, 2-nitro
Furfural
Geranyl acetate
Glutaraldehyde
Hexylresorcinol
Hydrochlorothiazide
Hydroquinone
Hydroxylamine, hydrochloride
Mercuric chloride
Methylazoxymethanol acetate
Methyl carbamate
Methyl methacrylate
Nalidixic acid
2-Naphthylamine
Nitrofurazone
p-Nitrosodiphenylamine
Oxytetracycline hydrochloride
Penicillin VK
Phenacetin
Phenylbutazone
o-Phenylphenol
Potassium chloride
Progesterone
Resorcinol
Safrole
Sodium fluoride
Tetrachloroethylene
Tetracycline hydrochloride
3,3',5,5'-tetramethylbenzidine
Titanium oxide
Toluene
Triamterene
1,1,1-Trichloroethane
1,1,2-Trichloroethane
Trichloroethylene
Triphenyltin hydroxide
Trisodium nitrilotriacetate monohydrate
Vinyl cyclohexene dioxide
Vinyl toluene

TABLE 5

CHEMICALS TESTED FOR CYTOGENETIC EFFECTS IN CHINESE HAMSTER
OVARY CELLS IN FY 1982 FOR WHICH RESULTS ARE AVAILABLE FROM NTP

Acetonitrile
Acrolein
11-Aminoundecanoic acid
Benzidine
o-Benzyl-p-chlorophenol
Bis(2-chloro-1-methylethyl) ether
Bromobenzene
Bromoform
Butyraldehyde
Beta-Cadinene
Chlordecone (kepone)
Monochloroacetic acid
p-Chloroaniline
4-Chloro-2-nitroaniline
4-Chloronitrobenzene
m-Chloronitrobenzene
Choline chloride
C.I. Direct Blue 15
C.I. Direct Blue 6
Cinnamaldehyde
Cinnamyl anthranilate
Croton oil
2,4-Diaminophenol dihydrochloride
1,4-Dichlorobenzene
Dichlorodiphenylethylene
cis & trans 1,2-Dichloroethylene
2,4-Dichlorophenoxyacetic acid
1,2-Dichloropropane
3,3'-Dimethylbenzidine
Diphenylhydantoin
2-Ethoxyethanol
Formaldehyde
Glutaraldehyde
Halothane
Hydrazobenzene
Hydroquinone
Isoproterenol hydrochloride
Maleic hydrazide
Melamine
Methdilazine hydrochloride
p-Nitroaniline
o-Nitroanisole
2-Nitropropane
m-Nitrotoluene
p-Nitrotoluene
o-Nitrotoluene
Pentachlorophenol
Phthalic anhydride
Piperonyl butoxide
Promethazine hydrochloride
Propantheline bromide
Quinoline
Reserpine
2,3,7,8-Tetrachlorodibenzo-p-dioxin
1,1,2,2-Tetrachloroethane
2,3,5,6-Tetrachloronitrobenzene
Thiocarbanilide
Triamterene
Trichloroethylene
2,4,6-Trichlorophenol
2,4,5-Trichlorophenoxyacetic acid
1,2,3-Trichloropropane
Tricresyl phosphate
Triethanolamine
Trifluralin
Trimethoprim

TABLE 6

CHEMICALS SELECTED TO BE TESTED FOR CYTOGENETIC EFFECTS IN CHINESE HAMSTER OVARY CELLS IN FY 1983

Acetaldehyde
Acrylonitrile
Allyl isothiocyanate
2-Amino-4-nitrophenol
2-Amino-5-nitrophenol
Aniline
o-Anisidine
p-Anisidine
m-Anisidine
Benzoin
Benzo(a)pyrene
Benzyl acetate
Bisphenol A
2-Butanone peroxide
Butylated hydroxytoluene
Cadmium chloride
Caprolactam
Carbon disulfide
Chlordecone alcohol
Chlorobenzilate
2-Chloromethylpyridine hydrochloride
3-Chloromethylpyridine hydrochloride
2-Chloronitrobenzene
Chlorothalonil
3-Chloro-p-toluidine
5-Chloro-o-toluidine
4-Chlor-o-toluidine hydrochloride
Chlorpromazine hydrochloride
C.I. Acid Red 114
C.I. Direct Blue 218
C.I. Direct Brown 95
1,8-Cineol
Colchicine
Coumarin
Cyclophosphamide
o.p'-DDD
1,1-Dichloroethylene
1,1-Dichloroethylene
Dicofol
Dieldrin
N,N'-Diethylthiourea
Dimethoate
2,5-Dithiobiurea
Ethylene thiourea
2-Ethylhexanol
Ethyl-3-methyl-3-phenylglycidate
Ethyl tellurac
Eugenol
Fenthion
Geranyl acetate
Hexachlorobenzene
Hexachlorocyclopentadiene
Hexachloroethane
Hexamethyl-p-rosaniline chloride
Hexylresorcinol
Hydrochlorothiazide
Iodoform
Isoamyl nitrite
Isobutyl nitrite
Lead dimethyldithiocarbamate
Lindane
Malathion
Methyl parathion
Mirex
Monuron
N-(1-Naphthyl)ethylenediamine dihydrochloride
Nickelocene
4-Nitroanthranilic acid
Nitrobenzene
p-Nitrobenzoyl chloride
Nitrofurazone
1-Nitronaphthalene
4-Nitro-o-phenylenediamine
Parathion
Pentachlorobenzene
Pentachloroethane
Pentachloronitrobenzene
Phenazopyridine hydrochloride
Pheniramine maleate
Phenylbutazone
Piperonyl sulfoxide
Propionaldehyde
Pyrimethamine
Succinic acid 2,2-dimethyl-hydrazide
Sulfanilamide
4,4'-Sulfonyldianiline
1,1,1,2-Tetrachloroethane
Tetrachlorophthalic anhydride
Tetraethylthiuram disulfide
Tetrahydrofuran
O-Toluidine hydrochloride
1,1,1-Trichloroethane
tris(2-Chloroethyl) phosphate
Witch hazel
2,6-Xylidine
Zearalenone

TABLE 7

CHEMICALS TESTED FOR HERITABLE GENETIC EFFECTS IN DROSOPHILA IN FY 1982 FOR WHICH RESULTS ARE AVAILABLE FROM NTP

Acetoin
Allyl glycidyl ether
9-Aminoacridine HCL H20
o-Aminophenol
11-Aminoundecanoic acid
Aniline
o-Anisidine
Azodicarbonamide
p-Benzoquinone dioxime
tert-Butyl hydroperoxide
Calcium cyanamide
Chloral hydrate
Chlorobenzilate
Chlorothalonil
C.I. Direct Brown 95
Coumarin
Cyclophosphamide
Dibromochloropropane
2,3-Dibromo-1-propanol
3,4-Dichloronitrobenzene
2,4-Dichloronitrobenzene
2,3-Dichloronitrobenzene
Di(2-ethylhexyl) phthalate
3,3'-Dimethoxybenzidine
Dimethylcarbamoyl chloride
2,6-Dimethyl morpholine
N,N-Dimethyl-p-nitrosoaniline
1,4-Dioxane
1,2-Epoxybutane
1-fluoro-2,4-dinitrobenzene
Glutaraldehyde
Hydrazine sulfate
Hydrazobenzene
Lasiocarpine
Lead dimethyldithiocarbamate
Maleic hydrazide
2-Methyl-1-nitroanthraquinone
3-Nitro-p-acetophenetide
5-Nitro-o-anisidine
N-Nitrosopiperidine
Promethazine hydrochloride
Propanthelline bromide
Streptomycin sulfate
Sulfacetamide
2,3,5,6-Tetrachloronitrobenzene
Triethanolamine
Trifluralin
2,4,5-Trimethylaniline

TABLE 8

CHEMICALS SELECTED TO BE TESTED FOR HERITABLE GENETIC EFFECTS IN DROSOPHILA IN FY 1982

Acetaldehyde
Acetamide
Acetonitrile
AF-2
Alloxan
Allyl isothiocyanate
Allyl isovalerate
Amiben
2-Aminoanthracene
3-Amino-4-ethoxyacetanilide
3-Amino-9-ethylcarbazole
3-Aminotriazole
1-Aziridineethanol
Benomyl
Benzaldehyde
2-Biphenylamine
Bis(2-chloro-1-methylethyl) ether
Bromoform
Butyl benzyl phthalate
Butyraldehyde
Cadmium chloride
Carbendazim
Chlorambucil
2-Chloromethylpyridine HCL
3-Chloromethylpyridine HCL
Chloroneb
4-Chloro-2-nitroaniline
Chloropicrin
C.I. Acid Red 114
C.I. Acid Yellow 73
C.I. Direct Blue 15
C.I. Direct Blue 6
C.I. Direct Blue 53
Cinnamaldehyde
Colchicine
Crotonaldehyde
Croton oil
Cytembena
Diallyl phthalate
Dibromoacetonitrile
Dibutyltin diacetate
Dichloran
Dichloroacetonitrile
1,3-Dichloro-5,5-dimethyl-hydantoin
Dichlorodiphenylethylene
1,2-Dichloropropane
1,3-Dichloropropene
Dicofol
Di(2-ethylhexyl)adipate
N,N'-Diethylthiourea
Diglycidyl resorcinol ether
1,8-Dihydroxy-4,5-dinitro-anthraquinone
Dimenhydrinate
Dimethoxane
3,3'-Dimethylbenzidine
Dimethylformamide
Dimethyl hydrogen phosphite
2,4-Dinitroaniline
Diphenylhydantoin
1,2-Epoxypropane
1,2-Epoxy-3,3,3-trichloropropane
2-Ethoxyethanol
Ethyl acrylate
S-Ethyl dipropylthiocarbamate
Ethylene chlorohydrin
Ethylene thiourea
Ethyl tellurac
2-Fluorobenzoyl chloride
5-Fluorouracil
Formaldehyde
Furfural
Halothane
HC Yellow 4
Hexachlorobutadiene
Hexamethyl-p-rosaniline chloride
Hydrochlorothiazide
Iodoacetic acid
Isobutyl nitrite
Isobutyraldehyde
Isoproterenol hydrochloride
Manganese sulfate
3-Methylcholanthrene
2'-Methyl-4-dimethylaminobenzene
4,4'-Methylenebis(2-chloro-aniline)
Methylhydrazine
Methyl mercuric chloride
Mezerein
N-(1-Naphthyl)ethylenediamine dihydrochloride
Nickelocene
NTA(Nitrilotriacetic acid)
5-Nitroacenaphthene
P-Nitroaniline
4-Nitroanthranilic acid
5(6)-Nitrobenzimidazole
1-Nitronaphthalene
P-Nitrosodiphenylamine
Phenazopyridine hydrochloride
Phenol
O-Phenylphenol
Pichloram
Piperonyl sulfoxide
Propanedial, ion(1-), sodium
Pyridine
Quinacrine dihydrochloride
Riddelline
Sodium azide
Sodium (2-ethylhexyl)alcohol sulfate
Sulfanilamide
1,1,2,2-Tetrachloroethane
Tetrachloroethylene
Tetrachlorophthalic anhydride
Tetrahydrofuran
Titanocene dichloride
2,4,6-Trichlorophenol
1,2,3-Trichloropropane
Triethyllead chloride
Trihydroxybutyrophenone
Trimethoprim
Trimethylthiourea
Tris(2-chloroethyl)phosphite
Witch hazel

TABLE 9

HERITABLE TRANSLOCATION ASSAY - RESULTS OF THE POSITIVE CONTROL STUDY WITH TEM

FERTILITY TEST RESULTS
Tester Strains

	ØN	ØR
N(x≥11)	308	311
(x>6)	27	29
(x≤6)	36	31
S(x=0)	26/397	26/397

CYTOGENETIC TEST RESULTS FOR MALES MATED TO ØN TESTER FEMALES

	Cyto Pos	Cyto Neg
N(x≥11)	4	304
(x>6)	14	13
PS (x≤6)	36	0
S(x=0)	26*/80	0/317

*5 of the 25 sterile males are suspected to be TH's but cytogenetic evaluations are inconclusive due to an absence of meiotic figures and incomplete mitotic analysis.

a-error = 13/317 = 0.033

b-error = 4/80 = 0.05

CYTOGENETIC TEST RESULTS FOR MALES MATED TO ØR TESTER FEMALES

	Cyto Pos	Cyto Neg
N(x≥11)	2	309
(x>6)	21	8
PS (x≤6)	31	0
s(x=0)	26*/80	0/317

*5 of the 26 sterile males are suspected to be TH's but cytogenetic evaluations are inconclusive due to an absence of meiotic figures and incomplete mitotit analysis.

a-error = 8/317 = 0.025

b-error = 2/80 = 0.025

TABLE 10

TOXICOLOGY AND CARCINOGENESIS BIOASSAYS COMPLETED
IN FY 1982 FOR WHICH RESULTS ARE AVAILABLE FROM NTP

Allyl isovalerate
Asbestos, amosite
L-Ascorbic acid
Benzyl acetate
Bis(2-chloro-1-methylethyl) ether
Diallyl phthalate
Geranyl acetate
D-Mannitol
Melamine
Methylene chloride
4,4'Methylenedianiline dihydrochloride
Ortho-dichlorobenzene
Propyl gallate
Sodium (2-ethylhexyl) alcohol sulfate
1,1,1,2-Tetrachloroethane
Toluene diisocyanate
Tremolite
Trichloroethylene
2,6-Xylidine
Zearalenone
Ziram

TABLE 11

CHEMICALS IN PRECHRONIC PHASE OF TOXICITY TESTING AT THE END OF FY 1982

Acetonitrile
1-Amino-2,4-dibromoanthraquinone
Azodicarbonamide
o-Benzyl-p-chlorophenol
2,2-Bis (bromomethyl)-1,3-propanediol
Caffeine
Chloramphenicol sodium monosuccinate
C.I, Acid Red 114
C.I, Direct Blue 15
C.I. Direct Blue 218
1,8-Cineol (eucalyptol)
Cinnamaldehyde
3,3'-Dimethoxybenzidine
3,3'-Dimethylbenzidine
Dimethyloldihydroxyethyleneurea
Dimethyloldihydroxyethyleneurea
Doxylamine
HC Yellow 4
Isobutyl nitrite
Isoproterenol hydrochloride
Manganese sulfate
Mercuric chloride
Methapyrilline (acidified water)
Methapyrilline (neutral water)
Methdilazine
o-Nitroanisole
p-Nitroaniline
Nitrobenzene
Nitrobenzene
Palladium (II) chloride
Pentachloroanisole
Polybrominated biphenyl (FF-1)
Promethazine
Propantheline bromide
Pyrilamine
Riddelliine
Tetrahydrofuran
Thenyldiamine
Titanocene dichloride
Triamterene
1,2,3-Trichloropropane
Tricresyl phosphate
Trimellitic anhydride
Tripelennamine
Turmeric, oleoresin (curcumin)

TABLE 12

CHEMICALS IN THE CHRONIC PHASE OF THE BIOASSAY AT THE END OF FY 1982

Allyl glycidyl ether
2-Amino-4-nitrophenol
2-Amino-5-nitrophenol
Amphetamine sulfate
Ampicillin trihydrate
Asbestos, chrysotile (SR) + (IR)
Asbestos, crocidolite
Benzaldehyde
Benzene
Benzofuran
Benzyl alcohol
Benzyl chloride
Boric acid
Bromodichloromethane
Bromoform
1,3-Butadiene
2-Butanone peroxide
t-Butyl alcohol
n-Butyl chloride

TABLE 30

NTP CHEMICAL SELECTION PRINCIPLES

The NTP Executive Committee operates under the principle that industry will test chemicals for health and environmental effects as intended and mandated by the Congress under legislative authorities. Therefore, the NTP, acting under its chemical selection principles, will test:

1. Chemicals found in the environment that are not closely associated with commercial activities;

2. Desirable substitutes for existing chemicals, particularly therapeutic agents, that might not be developed or tested without Federal involvement;

3. Chemicals that should be tested to improve scientific understanding of structure-activity relationships and thereby assist in defining groups of commercial chemicals that should be tested by industry;

4. Certain chemicals tested by industry, or by others, the additional testing of which by the Federal government if justified to verify the results;

5. Previously tested chemicals for which other testing is desirable to cross-compare testing methods;

6. "Old chemicals" with the potential for significant human exposure which are of social importance but which generate too little revenue to support an adequate testing program (some of these may be "grandfathered" under FDA laws);

7. Two or more chemicals together, when combined human exposure occurs (such testing probably cannot be required of industry if the products of different companies are involved); and

8. In special situations, as determined by the Executive Committee, marketed chemicals which have potential for large-scale and/or intense human exposure, even if it may be possible to require industry to perform the testing.

The selection of a chemical by the Executive Committee does not automatically commit the NTP to testing the chemical. The NTP is committed to ascertain the specific toxicologic and regulatory concerns; evaluate the adequacy of existing data or current efforts in government, academic, or private laboratories; and then propose and conduct specific tests that are needed. Occasionally new information is obtained that answers the questions posed in the nomination and selection process. Sometimes testing is not done because chemicals are withdrawn by the nominator, because others are or will be testing the chemical, or because the chemical is not available, or no longer produced.

Part III

Department of Labor

Occupational Safety and Health Administration

Occupational Exposure to Ethylene Oxide; Proposed Rule

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1910

[Docket No. H-200]

Occupational Exposure to Ethylene Oxide

AGENCY: Occupational Safety and Health Administration (OSHA), Department of Labor.

ACTION: Proposed rule and notice of hearing.

SUMMARY: By this notice, the Occupational Safety and Health Administration (OSHA) is proposing to amend its existing occupational standard that regulates employee exposure to ethylene oxide (EtO). The basis for this action is a determination by the Assistant Secretary, based on animal and human data, that exposure to EtO at OSHA's current permissible exposure limit (PEL) of 50 parts EtO per million parts of air (50 ppm) as an eight (8)-hour time-weighted average (TWA) is inadequate for employee health protection. OSHA proposes to reduce the PEL for EtO to a TWA of 1 ppm. An "action level" of 0.5 ppm as a TWA is included in the proposal as a mechanism for exempting an employer from the obligation to comply with certain requirements, such as employee exposure monitoring and medical surveillance, in instances where the employer can demonstrate that the employees exposures are at very low levels. The proposal would provide for among other requirements certain methods of exposure control, personal protective equipment, measurement of employee exposures, training, medical surveillance, signs and labels, regulated areas, emergency procedures and recordkeeping.

DATES: Comments concerning the proposed standard and notices of intention to appear at the informal rulemaking hearing must be postmarked on or before June 17, 1983. Parties requesting more than 10 minutes for their presentations at the hearing, and parties submitting documentary evidence at the hearing, must submit the full text of their testimony and all documentary evidence no later than July 1, 1983. The informal public rulemaking hearing is scheduled to begin July 19, 1983.

ADDRESSES: Comments are to be submitted to the Docket Officer, Docket No. H-200, Room S-6212, U.S. Department of Labor, Third and Constitution Avenue, N.W., Washington, D.C. 20210.

Notices of intention to appear at the informal rulemaking hearing, testimony and documentary evidence are to be sent to: Tom Hall, OSHA Division of Consumer Affairs, Docket No. H-200, Room N-3635, U.S. Department of Labor, Third Street and Constitution Avenue, N.W., Washington, D.C. 20210; telephone 202-523-8024. The informal public hearing will begin July 19, 1983, at 10:00 A.M. in the Auditorium, Frances Perkins Building, Third and Constitution Avenue, N.W., Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT: Mr. James F. Foster, OSHA, U.S. Department of Labor, Office of Public Affairs, Rm. N-3641, 200 Constitution Avenue, N.W., Washington, D.C. 20210, Telephone (202) 523-8151.

SUPPLEMENTARY INFORMATION:

I. General

The preamble to the proposed standard on occupational exposure to ethylene oxide (EtO) discusses the events leading to the proposal, physical properties of EtO, manufacture and use of EtO, health effects of exposure to EtO, comments received in response to the Advance Notice of Proposed Rulemaking (ANPR) (47 FR 3566 January 26, 1982), and an analysis of the technological and economic feasibility and impact, and the rationale behind the specific provisions set forth in the proposed standard.

This proposed standard would apply to all employments in all industries covered by the Act, namely "general industry," construction, and maritime.

Public comment on the data discussed in this Notice and other relevant issues is requested for the purpose of assisting OSHA in its reevaluation of the adequacy of the present standard and the development of a new standard for exposure to EtO. OSHA also requests that interested parties submit any pertinent health data not discussed in this notice.

Comment is requested on the following issues relating to health effects, technological and economic feasibility, and provisions which should be considered for inclusion in a final EtO standard. Specifically, scientific and technical data and expert analysis and opinion are sought on the following issues:

1. Would the proposed provisions provide adequate worker protection from all health hazards associated with EtO exposure?

2. Are there additional, data or information on health care providers concerning the feasibility of complying with the proposed standard?

3. Is a short-term or ceiling exposure limit for EtO exposure necessary for the PEL or action level in view of recent information regarding increased spontaneous abortions and chromosome changes in workers exposed to EtO? What monitoring methods and control technology are available to meet such a short-term limit and what would be the economic burdens, if any, of such a limit?

4. What are the most suitable methods for determining compliance with EtO exposure permissible exposure limits (PEL's) of 0.5 and 1 ppm as 8-hour time-weighted averages and for ceilings ranging from 5 to 50 ppm for 30 minutes or less? What are the problems associated with such monitoring methods? Do they require special training or experience? Are there serious limitations as to the accuracy or precision of the available sampling techniques?

5. Are there other risk assessments besides that developed by OSHA that specifically deal with the risk of cancer or other disease at 50 ppm and the proposed PEL of 1 ppm? Can the risk of adverse reproductive effects resulting from exposure to 1 ppm or less be adequately quantified?

6. Is there any group of workers who, because of lifestyle, concurrent exposure to other chemicals, or physiological makeup, are likely to have an increased sensitivity to ethylene oxide? If so, what consideration, if any, should be provided for such workers in the final standard?

7. Are the proposed medical surveillance provisions, including the suggested examinations found in Appendix D to the proposal, adequate for the purpose of providing protective medical monitoring of affected employees? Should an examination also be required to be offered at the termination of employment? Should the standard be more specific in the elements required for medical examinations of exposed employees?

8. Specific provisions for skin and eye protection against contact with liquid EtO are not included in the proposal. Requirements found in § 1910.132 and 1910.133 require the employer to provide protective equipment (gloves, goggles, etc) where skin and eye exposure to hazardous liquids may occur. Is reliance on these two general provisions sufficient for protecting against potential dermal and eye hazards for liquid EtO? If not, explain and specify what additional provisions are necessary?

9. Should genetic screening, chromosome analysis, male fertility testing and pregnancy testing be provided as part of the routine physical examination? Should these tests be offered to employees exposed to emergency situations, or provided for these persons wishing to procreate? Should medical removal, protection (i.e., the employers shall maintain the earnings, seniority and other benefits and employment rights of an employee removed from exposure to EtO due to the risk of materials impairment to health; see OSHA lead standard 29 CFR 1910.1025) be provided for those wishing to procreate and, if so, under what circumstances?

10. In view of the uncertainty as to what constitutes an appropriate physical examination, should a mult-physician review be required if requested by the employee? Should employees who believe that they are suffering from symptoms associated with EtO overexposure be offered an interim medical examination?

11. What is the incidence of persistence of quadriradial or other chromosomal aberrations and sister chromated exchanges in peripheral lymphocytes over time after exposure to EtO ceases? Is this persistence or lack of persistence a function of dose and/or duration of exposure?

12. What length of time is needed for affected employers to reduce employee exposure to the proposed PEL through engineering and work practice controls? What technical and economic considerations form the basis for these time frames?

13. To what extent are hopitals and other health care facilities able to commit resources to obtain state-of-the-art monitoring equipment and plans?

14. Is it necessary for affected employers to develop written compliance plans as specified in paragraph (1)(2)(ii) of the proposal? Should only those employers with a large number of exposed employees (what number) or with high exposure conditions in the workplace be required to develop written compliance plans?

15. Are there conditions under which respirator use should be permitted in addition to those proposed? What respirator fit testing requirements should be included in the final standard and when should such testing be performed?

16. What additional information is available regarding the economic and technological feasiblity of complying with the proposal for small entities using EtO in the medical products manufacturing sector?

17. What has industry experience been in complying with the application and use requirements imposed by the Environmental Protection Agency's pesticides labeling? To what extent would those requirements conflict or overlap with the provisions of OSHA's proposed standard? What procedures are currently followed in complying with the requirements set forth on the labels for EtO pesticides?

II. Pertinent Legal Authority

Authority for issuance of this standard is found primarily in sections 6(b), 8(c), and 8(g)(2) of the Occupational Safety and Health Act of 1970 (the Act), 29 U.S.C. 655 (b), 657(c), and 657(g)(2). Section 6(b)(5) governs the issuance of occupational safety and health standards dealing with toxic materials or harmful physical agents. Section 3(8) of the Act, 29 U.S.C. 652(8), defines an occupational safety and health standard as:

> (A) standard which requires conditions, or the adoption or use of one or more practice, means, methods, operations, or processes, reasonably necessary or appropriate to provide a safe or healthful employment and places of employment.

The Supreme Court has said that section 3(8) applies to all permanent standards promulgated under the Act and requires the Secretary, before issuing any standard, to determine that it is reasonably necessary and appropriate to remedy a significant risk of material health impairment. *Industrial Union Department* v. *American Petroleum Institute*, 448 U.S. 607 (1980).

The "significant risk" determination constitues a finding that, absent the change in practices mandated by the standard, the workplaces in question would be "unsafe" in the sense that workers would be threatened with a significant risk of harm. *Id.* at 642. This finding is not unlike the threshold finding that a substance is toxic or a physical agent is harmful. *Id.* at 643, n. 48. A significant risk finding, however, does not require mathematical precision or anything approaching scientific certainty if the "best available evidence" does not warrant that degree of proof. *Id.* at 655–656; 29 U.S.C. 665(b)(5). Rather, the Agency may base its finding largely on policy considerations and has considerable leeway with the kinds of assumptions it applies in interpreting the data supporting it. *Id.* The Court's opinion indicates that risk assessments, which may involve mathematical estimates with some inherent uncertainties, are a means of demonstrating the existence of significant risk.

After OSHA has determined that a significant risk exists and that such risk can be reduced or eliminated by the proposed standard, it must set the standard "which most adequately assures, to the extent feasible on the basis of the best available evidence, that no employees will suffer material impairment of health * * *." Section 6(b)(5) of the Act. The Supreme Court has interpreted this section to mean that OSHA must enact the most protective standard possible to eliminate a significant risk of material health impairment, subject to the constraints of technological and economic feasibility. *American Textile Manufacturers Institute, Inc.* v. *Donovan*, 452 U.S. 490 (1981). The Court held that "cost-benefit analysis is not required by the statute because feasibility analysis is." *Id.* at 509.

Authority to issue this standard is also found in section 8(c) of the Act. In general, this section empowers the Secretary to require employers to make, keep, and preserve records regarding activities related to the Act. In particular, section 8(c)(3) gives the Secretary authority to require employers to "maintain accurate records of employee exposures to potentially toxic materials or harmful physical agents which are required to be monitored or measured under section 6." Provisions of OSHA standards which require the making and maintenance of records of medical examinations, exposure monitoring, and the like are issued pursuant to section 8(c) of the Act.

The Secretary's authority to issue this proposed standard is further supported by the general rulemaking authority granted in section 8(g)(2) of the Act. This section empowers the Secretary "to prescribe such rules and regulations as he may deem necessary to carry out (his) responsibilities under the Act"—in this case as part of or ancillary to, a section 6(b) standard. The Secretary's responsibilities under the Act are defined largely by its enumerated purposes, which include:

> Encouraging employers and employees in their efforts to reduce the number of occupational safety and health hazards at their places of employment, and to stimulate employers and employees to institute new and to perfect existing programs for providing safe and healthful working conditions (29 U.S.C. 651 (b)(l);
>
> Authorizing the Secretary of Labor to set mandatory occupational safety and health standards applicable to business affecting interstate commerce, and by creating an Occupational Safety and Health Review Commission for carrying out adjudicatory functions under the Act; (29 U.S.C. 651 (b)(3);
>
> Building upon advances already made through employee and employer initiative for providing safe and health working conditions (29 U.S.C. 651(b)(5);

By providing for the development and promulgation of occupational safety and health standards; providing for appropriate reporting procedures with respect to occupational safety and health which procedures will help achieve the objectives of this Act and accurately describe the nature of the occupational safety and health problem; exploring ways to discover latent diseases, establishing causal connections between diseases and work in environmental conditions * * *. (29 U.S.C. 651 (b)(6);

Encouraging joint labor-management efforts to reduce injuries and diseases arising out of employment (29 U.S.C. 651 (b)(13);

And developing innovative methods, techniques, and approaches for dealing with occupational safety and health problems (19 U.S.C. 651(b)(5).

Because the ethylene oxide standard is reasonably related to these statutory goals, the Secretary finds that this standard is necessary to carry out his responsibilities under the Act. In addition to its status as a section 6(b) standard, therefore, it also falls within the broader class of section 8 regulations.

In addition, section 4(b)(2) of the Act provides for OSHA standards to apply to construction and other work places where the secretary determines these standards to be more effective than existing standards which otherwise apply to those workplaces.

III. Physical Properties, Manufacture and Uses of Ethylene Oxide

Ethylene oxide (EtO), also known as 1, 2-epoxyethane, oxirane, and dimethylene oxide, is a colorless gas with a characteristic ether-like odor. Its chemical formula is C_2H_4O, molecular weight is 44.06 and CAS Registry Number is 75–21–8. Although several processes exist for the production of EtO, all United States producers currently manufacture EtO through the catalytic oxidation of ethylene in the presence of a silver catalyst. EtO is completely miscible with water, alcohol, acetone, benzene, ether, carbon tetrachloride and most organic solvents. It is also highly reactive and potentially explosive when heated or when in the presence of alkali metal hydroxides and highly active catalytic surfaces. EtO is relatively stable in aqueous solutions or when diluted with carbon dioxide (CO_2) or halocarbons. In order to reduce explosion hazards when EtO is used as a fumigant or sterilant, it is often used in gaseous mixtures (such as 10% EtO and 90% CO_2, or 12% EtO and 88% halocarbon).

Since its first domestic production in 1925, EtO has developed into a major industrial chemical and is presently one of the 25 chemicals of highest production volume in the United States. During the period from 1967 to 1978, for example, the average rate of growth in the EtO industry was 6.7 percent. In 1980, over 5.2 billion pounds of EtO were produced domestically. Current production capacity is about 6.7 billion pounds per year (Ex. 2–14).

The primary use of EtO is as an intermediate in the manufacture of other products. Over 99% of total EtO production is used in the manufacture of other products, and almost 90% is consumed by the EtO manufacturers themselves. On a volume basis, the largest use of EtO is as an intermediate in the production of ethylene glycol, a major component of automotive and other anti-freeze products and as an intermediate in the production of polyethylene terephthalate (PET) polyester fibers, bottles and films. Approximately 70% of all domestically produced EtO goes into the manufacture of ethylene glycol.

EtO is also widely employed in the production of non-ionic surface-active agents which are used in household detergents and as industrial surfactants. Other products manufactured from EtO include: (1) Ethanolamines, used in sweetening natural gas and in the production of specialty chemicals, detergents and cosmetics; (2) glycol ethers, utilized as a jet fuel additive and in the formulation of coatings, cleaners, automotive brake fluids and inks; (3) diethylene and triethylene glycol, used in drying natural gas and in the manufacture of polyester resins, emulsifiers, lubricants and plasticizers; (4) tetraethylene glycol, utilized to extract aromatic hydrocarbons from nonaromatic hydrocarbons; (5) polyethylene glycols, from which cosmetics, plasticizers, lubricants and dispersants are created; (6) polyethylene glycols, used for water-soluble packaging and for warp sizing, and (7) crown ethers, used for extraction of liquids.

A small fraction of EtO production (less than 0.5 percent) is consumed by sterilant or fumigant users. EtO is utilized as a sterilizing agent for heat and/or moisture sensitive materials by various facets of the health care industry and is employed as a fumigant for a number of miscellaneous items, such as spices, black walnut meats, books, furniture, textiles, empty bin equipment, empty cargo holds, cosmetics and dairy packaging.

IV. Events Leading to the Proposed Standard

The present OSHA standard for EtO (29 CFR 1910.1000, Table Z–1) requires employers to ensure that the level of employee exposure to EtO does not exceed 50 parts per million parts of air (50 ppm), determined as an 8-hour time-weighted average (TWA). This standard was adopted in 1971 from an existing Walsh-Healey Federal standard. The source of the Walsh-Healey standard was the Threshold Limit Value (TLV) recommended in 1968 by the American Conference of Governmental Industrial Hygienists (ACGIH) (Ex. 2–2).

The documentation for the exposure level recommended by the ACGIH in 1968 consisted of limited data from 6 month inhalation animal studies which showed no adverse effects at levels below 50 ppm and one study of employees exposed for more than 10 years to EtO at levels of 5 to 10 ppm with no reported effects (Ex. 2–3). No indications of potential carcinogenicity were available at that time. Since that time, however, a substantial number of new studies have become available that have added significantly to the body of knowledge regarding potential health effects related to EtO exposure.

In 1977, the National Institute for Occupational Safety and Health (NIOSH) issued a "Special Occupational Hazard Review" (Ex. 2–5) on EtO, in which it recommended the adoption of a ceiling limit of 75 ppm (based on a 15-minute sampling period) for EtO in addition to the 50 ppm TWA (Ex. 2–4). Based upon observations of changes in the genetic material of cells in at least 13 biological species following EtO exposure and covalent chemical bonding between EtO and DNA, NIOSH also concluded that occupational exposure to EtO might increase the frequency of mutations in exposed populations. Although these observations raised concern regarding the potential carcinogenicity of EtO, no epidemiologic studies or long-term animal bioassays were available to assess it carcinogenic potential for humans.

In 1979, ACGIH published a Notice of Intended Change for EtO to 10 ppm TWA, with no proposal for a short-term exposure limit (STEL) (Ex. 2–6). This change was adopted in 1981. ACGIH based its recommendation on a number of short-term, *in vitro* studies which provided positive mutagenic responses for EtO, and on a 1979 case report by Hogstedt et al. (Ex. 2–8) regarding the occurrence of 3 cases of leukemia in a group of 230 workers (more fully discussed below).

The 1981 ACGIH publication (Ex. 2–7) also designated EtO as a substance suspected of having carcinogenic potential in humans, and proposed to further lower the TLV for EtO to 5 ppm, based on the positive results from a two

year inhalation study on rats conducted at the Bushy Run Research Center (Ex. 2–9) (discussed below). On June 10, 1982, ACGIH adopted a proposal to lower the TLV to 1 ppm, such change to be effective in 1984. At that time, ACGIH decided not to recommend the adoption of an STEL.

On May 22, 1981, NIOSH issued a "Current Intelligence Bulletin" (Ex. 2–10) to inform employees and employers about the potential carcinogenic hazard of exposure to EtO. NIOSH recommended that EtO be regarded as a potential occupational carcinogen and that the current OSHA standard be reexamined in light of the information which had become available subsequent to the original adoption of that standard.

On January 26, 1982, OSHA published an ANPR (47 FR 3566) announcing its intention to conduct a reevaluation of the EtO standard. Interested parties were invited to submit data, views and comments with respect to the development of a new standard for EtO and particularly with respect to a number of specified questions. Responses to the ANPR are discussed in detail in Section VIII of this preamble. The data and views obtained through the ANPR as well as other information obtained by OSHA were used to develop this proposal.

In August 1981, prior to publication of the ANPR, Public Citizen Health Research Group (Public Citizen) petitioned OSHA to issue an Emergency Temporary Standard (ETS) reducing the permissible exposure limit for EtO to an eight-hour time-weighted average of 1 ppm (Ex. 2–11). OSHA denied Public Citizen's petition in September 1981 on the grounds that the available evidence did not indicate that an emergency situation existed to trigger the issuance of an ETS in accordance with section 6(c) of the Act (Ex. 2–12). Prior to the denial of the petition, Public Citizen brought suit in U.S. District Court for the District of Columbia to obtain an order requiring the Agency to issue an ETS *(Public Citizen Health Research Group et al.* v. *Auchter, D.C. Civil Action No. 81–02343). On January 5, 1983, the District Court Judge ruled that OSHA's determination not to issue an ETS represented a "clear error of judgment," and ordered the Agency to promulgate an ETS within 20 days of the Court's decision (Ex. 6–1). OSHA then sought and obtained a temporary stay of the District Court order pending review on the merits by the U.S. Court of Appeals for the District of Columbia Circuit.*

On March 15, 1983, the Court of Appeals rendered its decision on the merits in *Public Citizen Health Research Group et al.* v. *Auchter et al.*, No. 83–1071 (Ex. 6–2). In that decision, the Court ruled that the District Court had "impermissibly substituted its evaluation for that of OSHA" in ordering an ETS to be issued. Slip op. at p. 6. However, the Court then determined that because in the Court's terms a "significant risk of grave danger" exists with regard to EtO exposures, the failure of the Agency to publish a proposed standard on EtO for 18 months after the Advance Notice of Proposed Rulemaking constituted rulemaking action "unreasonably delayed," under section 6(g) of the OSH Act (29 U.S.C. 655(g)), and sections 555(b) and 706(1) of the Administrative Procedure Act (5 U.S.C. 555(b), 706(1)). Therefore, the Court ordered the Agency to expedite its development of a proposed rule on EtO, and to issue its proposal within 30 days of the Court decision. The publication of this proposed standard has been duly expedited to comply with the timeframe established by the Court.

In its January 5 decision, the District Court considered OSHA's assertions that the Environmental Protection Agency (EPA) had exercised its statutory authority over working conditions involving the application and use of EtO as a sterilant and fumigant under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), 7 U.S.C. 136 *et seq.*, and that this exercise served to preempt OSHA regulation of these same working conditions pursuant to section 4(b)(1) of the OSHA Act. The District Court determined, and the Court of Appeals subsequently agreed, that OSHA coverage of EtO was not preempted in "areas—such as the health care industry—where EPA has apparently exercised *minimal, if any regulatory authority in an overlapping manner."* (emphasis added) (District Court slip op. pp. 14–15; Court of Appeals slip op. p. 13, fn 23).

Pursuant to the court decision, the proposed rule being published today is intended to cover EtO exposures resulting from the application of EtO as a sterilant or fumigant, including hospital and health care uses.

In determining that OSHA retains authority to regulate working conditions involving the use of EtO as a pesticide, the Court stated that EPA's exercise of authority over working conditions under FIFRA did not "overlap" sufficiently to preempt OSHA regulation Because of OSHA's concern as to the interelationship between EPA pesticide labeling and OSHA regulation of EtO, the Issues section of this preamble contains several questions which are relevant to resolution of the problem. Comments and data on matters related to the interaction of EPA and OSHA regulation in this area are solicited for the rulemaking record.

V. Health Effects

The ACGIH's TLV of 50 ppm was established in 1968 on the basis of toxic effects to EtO encountered in industry resulting from cutaneous contact with aqueous solutions of the compound (Ex. 6–3). These solutions cause primary irritation and sensitization of the skin. Chronic human intoxication of humans by EtO had not been reported up to 1968.

The 1966 documentation did discuss several experimental studies with laboratory animals that showed that exposure to high concentrations of EtO vapor (204–841 ppm) caused irritation of the respiratory passages, growth depression, and injury to various organs. Repeated exposures for 6 or 7 months (at 113 and 49 ppm) in rats caused no effects except for a growth depression and a moderate increase in lung weight at 113 ppm. The 1966 documentation also noted that repeated exposure of dogs, rats and mice at 100 ppm for six months caused no significant effects except for slight anemia in the dogs. The ACGIH's 1971 documentation for EtO (Ex. 6–4), however, described a 10 year study in an EtO production unit. Exposure concentrations were reported as ranging from 5–10 ppm with very few exposures exceeding 50 ppm. No adverse effects from exposure to EtO were seen in this study. The ACGIH concluded in 1966 and in 1971 that "the results from * * * these investigations of the chronic toxicity of ethylene oxide indicate that a threshold limit value of 50 ppm offers an adequate margin of safety from ostensible systemic effects."

New information regarding the possible occupational hazards of EtO has emerged over the past few years. These reports regarding the chronic toxicity, carcinogenicity, mutagenicity and possible reproductive hazards of EtO have been rviewed by OSHA to ascertain the extent to which any of these possible hazards may exist for employees exposed at the current PEL of 50 ppm to determine whether the current risks, if any, need to be reduced, and to estimate the effectiveness of various exposure limits in reducing risks. OSHA presents its review of the recent studies below.

a. *Carcinogenicity.* Morgan et al. (Ex. 6–5) reported on a mortality study of a cohort of 767 production workers potentially exposed to EtO. Industrial hygiene measurements revealed no detectable EtO levels in the production area. At the sources of EtO (pump,

valve, pipe flanges, spigots, and gauges), less than 10 ppm was recorded. Only during tank car loading operations were levels of approximately 6,000 ppm EtO recorded. All other measurements were below 50 ppm. The researchers saw fewer than expected deaths from all causes and fewer than expected deaths from total malignancies. The standardized mortality ratios were 58 and 79, respectively. No death from leukemia was observed as compared to 0.70 expected. There were, however, a total of 8 deaths reported for pancreatic cancer, bladder cancer, brain and CNS cancer and Hodgkin's disease compared to 2.16 expected for this group.

Hogstedt et al. (1979) (Ex. 2–8) reported 3 cases of leukemia, between 1972 and 1977, among 230 Swedish workers in a factory where a mixture of EtO and methyl formate had been used to sterilize hospital equipment; 0.2 cases would have been expected based on age- and sex-specific Swedish national rates for 1972. Though exposures were not well characterized, two of the cases (females) were estimated to have been exposed to EtO at an estimated eight-hour TWA of 20 ppm. The exposure history of the third case (male) was not specified, but he was also known to have had some occupational exposure to benzene in his laboratory work. The cases of leukemia were classified as acute myeloid leukemia and acute myelogenic leukemia in the women, and as macroglobulinemia in the man. The study is limited by the small size of the worker population, co-exposure of one of the cases to benzene (a human leukemia-inducing agent), and poor exposure histories.

Hogstedt et al. (1979) (Ex. 2–22) also reported the results of an historical prospective mortality investigation of workers in an EtO production facility. Workers who had been employed in 1961, had a minimum of one year of employment or exposure, and had achieved at least a ten year latency period from the start of exposure to EtO and the beginning of the observation period, were followed through 1977. Among the 89 full time workers in the EtO produciton areas, an excess of total mortality was observed (23 deaths observed, 13.5 expected, p less than 0.05). Significant excesses total cancer mortality (9 observed, 3.4 expected, p less than 0.01) and in deaths from diseases of the circulatory system (12 observed, 6.3 expected, p less than 0.05) were also reported. Site specific excess cancer mortality was noted for leukemia (2 observed, 0.14 expected, p less than 0.01) and stomach cancer (3 observed, 0.4 expected, p less than 0.01). No statistically significant excess mortality was noted among 86 maintenance workers from the same facility who had intermittent EtO exposure or among the 66 workers who never worked in EtO production areas, however, the statistical power to detect an effect was very low. One leukemia death was noted among the maintenance workers. Exposure to EtO in the EtO production areas was estimated to range up to the odor threshold of 700 ppm in the 1940's, 6–28 ppm during the 1950's and 1960's, and 0.6–6 ppm in the 1970's. Average exposure was believed to be below 14 ppm during the 1950's and 1960's.

The workers who were exposed to EtO were also exposed to ethylene, ethylene dichloride, ethylene chlorohydrin and bis 2-chloroethyl ether. Because of these multiple exposures, the authors were unable to attribute the excess cancer incidence to a specific chemical, although they speculated that EtO and ethylene dichloride were prime suspects.

After reviewing the two Hogstedt studies, NIOSH, in its Current Intelligence Bulletin on EtO concluded:

> These epidemiological investigations cannot be cited as definitive evidence of an excess risk of cancer resulting from ETO exposure, but they should be considered evidence that excess risk of cancer may exist for the EtO workers studied.

Taken singly, the two studies by Hogstedt and the study by Morgan are not remarkable. They attempted to characterize relatively rare events in small populations and might be disregarded because of small numbers regardless of statistical significance. Taken together with all their limitations, however, OSHA believes they suggest that exposure to EtO may increase the risk of malignancies, particularly leukemia.

The final report on the results of an inhalation toxicity study of EtO conducted at the Bushy Run Research Center was released in January 1981 (Ex. 2–9). This was a chronic two year inhalation study in which three groups of male and female Fischer 344 rats (120 rats per sex per group) were exposed to EtO concentrations of 100, 33 and 10 ppm, for 6 hours per day, 5 days per week. Two groups of rats were exposed to air only and served as controls.

Based on histological evaluation, the Bushy Run researchers concluded that the incidences of mononuclear cell leukemia and of peritoneal mesothelioma were significantly increased as a result of exposure to EtO. The incidence of mononuclear cell leukemia in female rats was dose-related, increasing with exposure concentration. A statistically significant increase in mononuclear cell leukemia was observed only in the group of female rats exposed at 100 ppm. For females exposed at 33 ppm, the cumulative percentage of animals developing leukemia was significantly higher than that for one control group and for both control groups combined, but was not higher than the incidence for the second control group. However, the incidence for the females exposed at 33 and 10 ppm did indicate a dose response. The regression analysis of leukemia incidence versus exposure concentration was significant with a correlation coefficient of +0.99, indicating that induction of the leukemia was highly correlated to exposure at each concentration.

An increase in peritoneal mesothelioma was reported in the male rats exposed at 33 and 100 ppm. Among the males exposed at 100 ppm, the cumulative percentage developing a tumor of this type was reported to be statistically significantly higher than that of the controls beginning with the 21st month of exposure. The incidence of these tumors in males exposed at 33 ppm was not appreciably higher than in the controls until the final month of the study. These peritoneal tumors originated in the testicular mesothelium and were confined to the abdominal cavity.

In addition, the Bushy Run investigators reported that EtO exposure was associated with a higher frequency and/or earlier onset of mononuclear cell leukemia in male rats. The researchers also reported that a mortality-adjusted trend analysis indicated that the normal occurrence of pituitary adenoma in male and female rats was significantly accelerated by exposure to EtO. They also concluded there was a dose-related increase in all other combined cancers.

Preliminary results from a two-year, NIOSH-conducted chronic inhalation study on male rats and male monkeys were reported at the 1982 meeting on the Society of Toxicology (Ex. 6–6). In that study, groups of 80 male Fischer 344 rats and 12 male Cynomolgus monkeys were exposed to 50 ppm and 100 ppm of EtO. Two groups, 80 rats and 12 monkeys, were used as controls and exposed to conditioned, filtered ambient air. During the study, all of the rat groups became infected with *Mycoplasma pulmonis* which, beginning with the sixteenth month, caused the death of a large segment of the rat population.

The preliminary results of the available histopathological evaluations of the spleen indicate an exposure-related increase of mononuclear cell

leukemia in male rats exposed to EtO at 50 ppm but not at 100 ppm. NIOSH has acknowledged that these preliminary results must be interpreted in light of the known spontaneous incidence of leukemia in Fischer 344 rats. It should be noted, however, that excess mortality has occurred in the 100 ppm group (19% survived as compared to 49% of the controls). At the terminal kill a significant higher frequency of leukemia was found only in the group exposed to 100 ppm of EtO. Of equal or greater importance, however, is the apparent dose-related finding of gliomas in the rats of the NIOSH study. This tumor is rare in Fischer 344 rats. Gliomas were found in 5 of 79 rats exposed at 100 ppm and 2 of 77 rats exposed at 50 ppm. There were none in the 76 control rats. A significant association of exposure and an occurrence of peritoneal mesothelioma was found for rats exposed to 100 ppm EtO, but not to 50 ppm EtO. These results parallel those from the Bushy Run study. A more comprehensive evaluation of the chronic studies is planned by NIOSH, but only after all of the data are statistically analyzed and interpreted.

None of the monkeys in the NIOSH study have demonstrated any evidence of leukemia. Two of the monkeys in each exposure group were sacrificed for neuropathological evaluation. The only significantly finding was an increase of axonal dystrophy in the nucleous gracilis of the experimental monkey as compared to the two controls and demyelination of portions of the gracile tract in one of the monkeys in each of the low and high dose groups. Based on this limited evidence, the researchers were not able to reach any conclusions as to the cause or significance of these findings, but they remain noteworthy in view of the findings of gliomas in the rats.

In 1979, Dunkelberg (Ex. 2–16) reported preliminary results of a long-term carcinogenicity bioassay in mice, in which EtO was administered by subcutaneous injection to 100 female NMRI mice in weekly dosages of 0.1, 0.3, or 1.0 mg per animal. Two control groups, 200 untreated and 100 tricaprylin treated mice, were used. After 91 weeks of treatment, it was reported that the number of sarcomas at the injection site increased in the experimental groups, but not in the control groups. The first tumor appeared in the fiftieth week of treatment. The number of subcutaneous tumors at sites distant from the injection sites were not significantly greater in the treated groups than in the control groups.

Three earlier studies of EtO carcinogenicity should also be noted. Walpole (1957) (Ex. 2–20) subjected 12 "stock" rats to repeated subcutaneous injections of a dose of 1 g/kg EtO in Archis oil for 94 days. The small sample of animals was observed for their lifetime and no tumors were observed. Van Duuren et al. (1955) Ex. 2–21) applied 0.1 ml of a 10% EtO solution in acetone to the dorsal skin of 30 female Swiss Millerton mice three times per week for life. No tumors were observed.

Reyniers et al. (1964) (Ex. 2–19) reported tumors in 63 of 83 female mice accidentally exposed to EtO-treated bedding for 150 days and then moved to untreated bedding for the remainder of their lifespans. In contrast, no tumors were reported in 83 female mice that had not been exposed to the EtO-treated bedding. This report was not of a scientifically designed study.

In summary, OSHA has determined that EtO is carcinogenic in laboratory animals and that a significant cancer risk exists for employees exposed to EtO. This finding is supported by the available epidemiological evidence of the effects of EtO in the workplace.

The Bushy Run study clearly indicates that EtO is carcinogenic in both male and female rats. This finding is buttressed by the epidemiological studies of Hostedt et al. which are considered to strongly suggest that excess risk of cancer may exist for workers exposed to EtO. The work of Morgan et al. is also supportive of this conclusion. In addition, other animal studies, though not necessarily as well reported or documented as the Bushy Run study, confirm the carcinogenic hazard of EtO. For example, the preliminary reports from the NIOSH rat study confirms the Bushy Run study results and indentifies the brain as another possible target site for cancer in animals. NIOSH has asked that the investigators at the Bushy Run Research Center review their slides with this finding in mind.

In the following section, reports on the mutagenic effects of EtO have been reviewed. The positive findings of a mutagenic hazard support the findings of potential risk by identifying the mechanism of cancer induction by EtO to be genotoxic in nature.

b. *Evidence of Reproductive Effects and Mutagenicity.* In 1982, Hemminki et al. (Ex. 6–7) published a report which suggests that women occupationally exposed to ethylene oxide may be at an increased risk of spontaneous abortion. With a postal questionnaire, women employed during 1980 in chemical sterilization of instruments using ethylene oxide, glutaraldehyde and formaldehyde were identified by nursing supervisors in all Finnish general hospitals (about 80 hospitals). Later, questionnaires were sent to all hospital staff engaged in sterilizing instruments and to an equal number of unexposed nurse auxiliaries (controls) who were selected from the same hospital's staff by the supervising nurses. The response rate was greater than 90% for both groups. Information collected on the questionnaires permitted the researchers to adjust the data for age, parity, decade of reported pregnancy, coffee and alcohol consumption, and smoking habits using a linear logistic regression model.

No effect on spontaneous abortion rate was observed when the crude rate for the entire sterilizing staff was compared to the crude rate for the nurse auxiliary controls. A significant increase (p less than 0.001) in the spontaneous abortion rate was observed when the experience of sterilizing staff exposed to sterilizing agents during pregnancy (adjusted rate 15.1) was compared to the experience of the sterilizing staff without exposure during pregnancy (adjusted rate 4.6). The controls had an intermediate spontaneous abortion rate (adjusted rate 10.5).

Hemminki et al. were able to stratify the sterilizing staff by exposure to specific sterilizing agents during pregnancy. Although the numbers in some of the categories were relatively small, significant increases (p less than 0.05) were observed in the adjusted spontaneous abortion rates for total pregnancies exposed to ethylene oxide (with and without other agents), ethylene oxide (or glutaraldehyde) or ethylene oxide alone compared to total pregnancies not exposed to these chemicals. (In the papers, the category "ethylene oxide (with glutaraldehyde)" should read "ethylene oxide (or glutaraldehyde)". Correction explained in "exhibit No. 6–25.)

The authors also noted that the rate of spontaneous abortion (adjusted for parity) among non-exposed sterilizing staff during the calendar time period 1961–70 was significantly lower than the rate for nurse auxiliary controls over the entire study period 1951–81. However, the analysis is not considered appropriate as adjustment for calendar time period of reported pregnancy, a factor associated with spontaneous abortion, was not made in this analysis. There did appear to be a slightly lower rate of spontaneous abortion among the non-exposed sterilizer operators as compared to the nurse auxiliary controls during each decade of pregnancy. This

difference was not explained by the authors. The appearance of a significantly reduced adjusted rate among the non-exposed sterilizers, which could not be determined from the study, might lead one to conclude that the control group was not comparable to the sterilizer operators.

Finally, the authors ascertained data on pregnancy outcome from the Finnish hospital discharge register for sterilizing staff and controls for the years 1973–79. The data demonstrated a significant excess in the crude rate of spontaneous abortion among only EtO exposed staff as compared to controls (22.6% vs. 9.2%, p less than 0.05). Since spontaneous abortion is known to affect subsequent pregnancy outcome, data were then eliminated for women who had more than one spontaneous abortion. One woman in the EtO exposed group and two women in the control group had two spontaneous abortions. When the data for these women were eliminated from the analysis, the crude abortion rates was 17.2% for EtO exposed as compared to 8.2% for the controls (Ex. 6–25). While these rates are based on small numbers, they indicate that the elimination of data for women with more than one spontaneous abortion did not change the trend seen in the analysis of the total data set. These findings from a second independent source tends to corroborate the findings observed in the questionnaire aspect of the study.

In response to OSHA's request for further information concerning the of the nature of EtO exposure, Dr. Hemminki responded:

> * * * ethylene oxide concentrations in sterilization units of the Finnish hospitals, measurements have been carried out only since 1976, independently from our study. In many hospitals, it was noted that immediately after opening of the sterilizing chamber, a 20 min average ethylene oxide concentration of 5 to 10 ppm was measured. This would amount to an 8 h TWA of probably less than 1 ppm. Some supervisors of sterilizing activity assume that in early 1970's the gas concentrations could have been higher, even though the same procedures and, in many instances, the same instruments were used. (Ex. 6–8)

Therefore, the available information suggests that the excess in spontaneous abortion among sterilizing staff exposed to EtO may have resulted from one short-term peak exposure per day, though the information on exposure is sparce.

The Hemminki et al. data provide suggestive evidence of increased risk of spontaneous abortions in women exposed to EtO. Other reproductive problems, such as decreased fertility, were not addressed by this study.

EtO has been evaluated for toxic and teratogenic effects in New Zealand white rabbits (Ex. 6–9). When EtO was administered intravenously at 0, 9, 18, or 36 mg/kg/day on gestation days 6–9, maternal toxicity was minimal and no evidence of fetotoxicity or teratogenicity was found. This may be because implantation in the rabbit does not occur until gestation day 7 or 8. Administered daily on gestation days 6–14 by intravenous injection, EtO at doses of 0, 9, 18, or 36 mg/kg/day failed to produce evidence of an exposure-related teratogenic effect, even at levels producing maternal and fetal toxicity. There was evidence of fetotoxicity directly related to increasing dose, including increases in the percentage of resorptions and nonlive fetuses per litter, and decreases in live litter size and in the percentage of males per litter. This study supports the work of Hemminki et al., in that it confirms the potential fetotoxicity of EtO.

The final report of a one-generation reproduction study in rats conducted at the Bushy Run Research Center (Ex. 2–23) is also available. Both male and female rats were exposed to EtO vapor at air concentrations of 100, 33, or 10 ppm for 6 hours per day, 5 days per week for 12 weeks prior to mating and for 6 hours per day, 7 days per week for two weeks during and after mating. The major treatment related adverse effect was that significantly fewer pups were born per litter for rats exposed to 100 ppm EtO. A dose-related decrease in fertility was observed at the 100 ppm and 33 ppm exposure levels, while no effect occurred following exposure to 10 ppm EtO.

Snellings et al. (Ex. 2–23) of the Bushy Run Research Center, also reported that no developmental effects occurred when female Fischer 344 rats were exposed by inhalation to 10, 33, and 100 ppm EtO for 6 hr/day on days 6 through 15 of gestation.

In a similar type of study sponsored by NIOSH, female rats and rabbits were exposed to 150 ppm ETO, 7 hr/day (Hackett et al. 1982, Ex. 6–10). There were no adverse reproductive effects observed in the rabbits. In litters from female rats exposed prior to mating and during gestation, there was an increase in fetal deaths (resorptions). Fetal growth indices were reduced in the ethylene oxide exposed rats, particularly those receiving both pregestational and gestational exposure. Reduced ossification in fetal skulls and sternebrae were higher in the EtO exposed rats than in the controls. These effects may be related to inhibited fetal growth which could have been caused secondarily by maternal toxicity.

LaBorde and Kimmel (Ex. 2–24) reported evidence of a teratogenic effect in CD–1 mice from intravenous exposure to EtO. They found that EtO was toxic to pregnant mice at doses of 150 mg/kg when administered intravenously during days 4–6, 8–10 or 10–12 of gestation, but not when administered during days 6–8. A significant increase in the percentage of malformed fetuses was noted as a result of EtO administration during days 6–8 and 10–12 of gestation.

Embree et al. (1977)(Ex. 2–35) have shown that EtO causes mutation in Long-Evans rats in the dominant-lethal assay. Male rats were exposed to 1000 ppm of EtO for 4 hours and each male was mated to 2 females each week for 10 weeks. A significant increase was observed in post-inplantation deaths at 1, 2, 3 and 5 weeks after treatment, indicating that gametes in various stages of development from spermatocyte through mature sperm were adversely affected.

Generoso et al. (1980) (Ex. 2–36) reported the induction of dominant-lethal effects in rats resulting from a single intraperitoneal injection of 150 mg/kg of EtO (maximum tolerated dose). In a heritable translocation assay, male rats were given intraperitoneal EtO injections of either 60 or 30 mg/kg body weight 5 days a week for 5 weeks. In addition to observed dominant lethal effects, an increased frequency of heritable translocation was reported or groups exposed to EtO.

An inhalation study on mice performed by Cummings et al. (1981) (Ex. 2–37) found that unscheduled DNA synthesis in the testis was increased after male (101 x C3H) F1 hybrid mice were exposed at 300 or 500 ppm EtO in a work-week type exposure regimen (8 hours per day for 5 days). EtO at doses of 600 and 800 ppm was found to inhibit the repair of DNA damage, as measured by a reduction in unscheduled DNA synthesis after 4 hours of exposure.

The mutagenicity of EtO has been observed or reported in a wide range of biological systems, including submammalian and mammalian species. An increased frequency of cell mutations has been reported in 13 different species, including *Salmonella*, *Neurospora*, barley, *Tradescantia*, *Drosophila*, and *E. Coli*. While these tests are not definitive determinants of chemical carcinogenesis, it is recognized that correlative and functional relations have been demonstrated between these two end points. For example, McCann et al. (1975) (Ex. 6–11) showed an extremely good correlation between the results of microbial mutagenesis tests and *in vivo* rodent carcinogenesis

assays. Futhermore, these types of studies establish that EtO acts directly on DNA and is to be considered genotoxic. Thus, the level of human exposure must be stringently evaluated.

The 1982 NIOSH chronic study on rats and monkeys (previously discussed) was also designed to explore the cytogenic effects from EtO exposure in the monkeys. Specifically, groups of Fischer 344 rats and Cynomolgus monkeys were exposed by inhalation to ethylene oxide for 7 hours/day, 5 days/week for 24 months. Each experimental group consisted of 80 rats and 12 monkeys. One group was exposed at 50 ppm ethylene oxide, a second group at 100 ppm ethylene oxide, and a third group, not exposed to ethylene oxide, was used for comparison to the exposed animals. Cytogenetic and spermatogenic evaluation of the monkeys was performed after the twenty-fourth month. Peripheral lymphocytes were cultured and examined for chromosomal aberrations and sister chromatid exchange.

NIOSH reported that exposure to ethylene oxide significantly increased the frequency of chromosomal aberrations in peripheral lymphocytes of monkeys in both exposed groups. In animals exposed at 100 ppm, 4.2 percent of the cells were found to be abnormal. At 50 ppm. the percent of abnormal cells was 2.2. This is about a 3 fold increase in abnormal cells for animals exposed at 50 ppm, and about a 5.6 fold increase in animals exposed at 100 ppm, compared to the rate of aberrations found in the unexposed animals.

NIOSH reported that the prevalence of sister chromatid exhanges (SCE) was also significantly increased in ethylene oxide exposed monkeys. The mean number of SCEs per 42 chromosomes was 5.7 in the unexposed group compared to 10.2 SCEs per 42 chromosomes in animals exposed at 50 ppm, and 16.8 SCEs per 42 chromosomes in monkeys exposed at 100 ppm ethylene oxide. There was also an increase in micronuclei in the polychromatic erythrocytes from bone marrow of EtO exposed monkeys (5 per 1000 cells) as compared to controls (1–2 per 1000 cells) in the monkeys examined per dose level. NIOSH stated that these results support the cytogenetic toxicity of ethylene oxide. The total sperm count and the percentage of motile sperm was reduced and sperm drive range was increased in primates exposed to either 50 or 100 ppm EtO for 24 months.

Pero et al. (1982) (Ex. 6–12) examined the effects of EtO exposure on unscheduled DNA synthesis, a step in the enzymatic repair of DNA lesions. Peripheral blood lymphocytes were obtained from five male workers expose to EtO at TWA concentrations of 0.5–1 ppm for 0.3–5 years. Control samples were obtained from 12 men employed in a nearby industry where no known mutagens were in use. The controls were matched for age and smoking habits. A significant decrease in DNA repair proficiency was associated with EtO exposure, indicating that EtO is genotoxic.

In another study, Pero et al. (1981) (Ex. 6–13) examined the effects of exposure to EtO on unscheduled DNA synthesis induced by N-acetoxy-2-acetylaminofluorene and on chromosomal aberrations in peripheral lymphoctyes of female employees at a Swedish factory manufacturing disposable medical equipment. Seventeen workers and 11 matched controls working at the same plant were examined. Group A consisted of 12 packers (mean age 40.6 years) exposed to an average of 0.5–1 ppm for 1–8 years. Group B was composed of 5 sterilizer/technicians (mean age 32.0 years) who had been exposed for 0.8–3.0 years for 1 hour/day at concentrations of 5–10 ppm. Chromosomal aberrations were scored for both breaks and gaps. A significant increase in both total aberrations and breaks was found for group B and for groups A and B combined as compared to controls. Unscheduled DNA synthesis was inhibited significantly in group A. When this test was repeated 9 months after measures had been taken to lower exposure to EtO to 0–0.5 ppm, results for the group of exposed workers had returned to normal. From these tests and *in vitro* studies of EtO, the authors suggested that EtO, inhibits DNA repair.

Johnson and Johnson submitted preliminary results of an ongoing chromosome study being conducted at three of their facilities (Ex. 4–17) The worksites selected were chosen on the basis of potential exposure to EtO prior to September 1980, with one site representing high exposure (5–200 ppm, 8-hour TWA), another representing moderate exposure (1–10 ppm, 8-hour TWA) and the third low exposure (less than 1 ppm, 8-hour TWA). All participants exposed to EtO were employed in sterilizing areas and they were classified within each plant according to whether their potential for exposure to EtO was high or low. Controls were randomly selected from other areas of the plant on the basis of sex and age. At two plants, a dose related trend was observed for increases in sister chromatid exchanges, and at the highest exposure plant, the increase in the frequency of complex aberrations was also dose-related.

After preliminary experimental studies with rats, Ehrenberg and Hallstrom (1967) (Ex. 2–38) conducted hematologic studies among personnel of a factory manufacturing and using ethylene oxide. In 1960, they conducted medical examinations and compared the results of hematologic studies for 31 EtO exposed personnel with those for 26 unexposed employees from other departments of the same factory. Significantly lower ($p=0.05$) hemoglobin values were found for the exposed group. Three cases of anisocytosis and one case of chronic lymphatic leukemia were identified in the EtO exposed group, whereas none were identified among the controls. When currently ill persons were excluded from the analysis, the EtO exposed group had a significantly higher average white cell count. Subsequent to these findings, ventilation and safety measures in the factory were improved, and in 1961, further study was conducted. Lymphocyte counts were still significantly higher in the exposed than in the unexposed group among those persons who had participated in the 1960 study, indicating that the control measures were inadequate or that the effects were persistent. When additional employees were added to the study, including those who were intermittently exposed to EtO or had been exposed to EtO at some time in the past, the overall differences between the enlarged exposed and control groups in lymphocyte counts decreased so that they were not significantly different from each other. This effect would be expected with the addition of persons with poorly defined EtO exposure to the exposed group.

Ehrenberg and Hallstrom (1967 also examined blood values for 8 factory workers accidentally exposed to high concentrations of EtO. Exposure that resulted when a tube burst in the factory during repair work led to acute adverse health effects, with two persons hospitalized for respiratory difficulties. Blood values were followed for these 8 subjects for six weeks after the accident. Large variations in the numbers of lymphocytes and neutrophils were noted. No control group was studied. Eighteen months after the accident, chromosome studies were conducted for seven of the acutely exposed persons and ten unexposed personnel from the same factory. The authors concluded that acute exposure to EtO for approximately two hours induced significantly greater numbers of chromosomal aberrations (breaks, gaps, and exchanges) than in a comparable control group (p less than 0.05). It was

not stated whether the accidentally exposed workers had additional exposures to EtO prior to or subsequent to the accident.

Garry et al. (1979) (Ex 6–14)) studied a group of 15 employees who worked in an EtO sterilization facility. Most of these employees reported clinical symptoms of the upper respiratory tract and central nervous system. Twelve exposed employees and 12 unexposed individuals were studied for SCE's. Four chronically exposed persons who reported upper respiratory and neurologic symptoms showed a significantly increased number of sister chromatid exchanges at 3 weeks and again at 8 weeks after the last known exposure. Another group of eight persons with fewer complaints studied as late as the ninth week of exposure showed a significant increase in the number of exchanges. The measured concentrations of ethylene oxide were repeated to be less than 50 ppm.

A company using EtO in manufacturing and distributing health care products has reported the results of a medical examinations that included cytogenetic evaluations, of 75 workers with potential EtO exposure at nine facilities (Abrahams, 1980) (Ex. 2–39)). Workers were exposed for an average of 2.9 years. A group of 37 workers with no known EtO exposure served as a comparison group for the cytogenetic evaluation. The data indicated that the facilities had complied with the OSHA PEL of 50 ppm as an 8-hour TWA, although there were instances then the NIOSH recommendation for a maximum 15-minute exposure of 75 ppm had been exceeded. The physical examination revealed no unusual findings among exposed persons. A statistically significant increase in the number of chromosome abberrations in peripheral lymphocytes among the exposed workers was noted when compared to the number in the nonexposed group. Some workers had an increased incidence of sister chromatid exchanges compared to nonexposed workers. Data from the sperm analysis were inconclusive.

The significance of this investigation is difficult to evaluate because of the manner in which the data are presented and the design of the study. However, the chromosomal aberrations in exposed workers included quadriradial chromosomes; the occurrence of this rare type of aberration should be viewed with concern.

Conclusion

OSHA's determination that EtO is a potential occupational carcinogen was generated by the positive findings of the chronic inhalation study performed at the Bushy Run Research Center. This is supported by the strongly suggestive epidemiological findings of Morgan et al. and Hogstedt et al. Many positive effects from *in vitro* mutagenic investigations establish the genotoxic mechanism of cancer induction. The work of Callaman et al. suggest that EtO may elicit this action by alkylation of DNA.

The work of Pero et al. and the data submitted by Johnson and Johnson establish that EtO exposure at relatively low levels produce effects in man related to its probable carcinogenic mechanism.

The recent report of Hemminki et al. suggests the EtO exposure may cause an increase in spontaneous abortions. The fetotoxic hazard of EtO with regard to exposure of the female is supported by positive findings in the animal studies performed by Hackett et al., Jones-Price et al., and La Borde and Kimmel. This type of an effect could be induced by changes in the DNA and many alkylating agents are known to induce them. OSHA feels that the adverse spermatogenic effects of EtO on the primates alone, which are consistent with effects on DNA, are suggestive of an effect on the male reproductive capacity. This conclusion is supported by the one generation study in rats conducted at the Bushy Run Research Center. Furthermore, the establishment of the dominant lethal effect by Embree et. al., the heritable translocations by Generoso et al., and alteration of DNA in testes of experimental animals establish the hazard of heritable changes following exposure to the male.

In summary, findings in humans and experimental animals exposed to EtO are indicative of damage to the genetic material (DNA). These include hemoglobin alkylation, unscheduled DNA synthesis, sister chromatid exchange, chromosomal aberrations, and functional sperm abnormalities. In addition, evidence from *in vivo* studies shows that in animals and man, DNA damage may occur in the form of increased incidence of cancer, mutation in offspring, and spontaneous abortions following exposure to EtO.

c. *Risk Assessment.* The United States Supreme Court, in the recent *Benzene* and *Cotton Dust* cases, (*Industrial Union Department, AFL–CIO* v. *American Petroleum Institute*, 448 U.S. 607 (1980); and *American Textile Manufacturers Institute* v. *Donovan*, 452 U.S. 490 (1981), respectively), has ruled that OSHA may not promulgate a standard unless it has determined, based on substantial evidence in the record considered as a whole, that there is a significant risk of health impairment at existing permissible exposure levels and that issuance of a new standard is necessary to achieve a significant reduction in that risk. Although the Court in the *Cotton Dust* case rejected the use of cost-benefit analysis in setting OSHA standards, it reaffirmed its earlier holding in *Benzene* that a risk assessment relating to worker health is not only appropriate, but is in fact required in order to identify a significant worker health risk and to determine whether a proposed standard will achieve a reduction in that risk. Although the Court did not require OSHA to perform a *quantitative* risk assessment in every case, the Court implied, and OSHA as a policy matter agrees, that such assessments should be put in quantitative terms to the extent possible.

1. *Preliminary Quantitative Risk Assessment: Data Base for Quantitative Risk Assessment.* In order to estimate the potential risk of cancer to workers exposed to EtO, OSHA performed a quantitative risk assessment. OSHA extrapolated the data from the two year inhalation study on rats performed at the Bushy Run Research Center (Snellings et al., 1981, Ex. 2–9) in an effort to quantify the lifetime excess risk of cancer to humans. OSHA chose lifetime EtO exposure levels of 50, 10, 5, 1, and 0.5 ppm as possible scenarios to examine. The following discussion summarizes the data and conclusions of OSHA's preliminary quantitative risk assessment. The full text of the assessment, including technical appendices, has been placed in the EtO docket, and is available for review and copying at the OSHA docket office (Ex. 6–18).

In the Bushy Run study, Fischer 344 rats were exposed to airborne concentrations of 100, 33 or 10 ppm of ethylene oxide vapor for 6 hours per day, 5 days per week for approximately two years. Two control groups were exposed to air only under similar conditions. Initially, 120 rats per sex per group were exposed, and at each 6-month interval a portion of the animals was sacrificed to determine possible treatment-related effects. Interim evaluations included hematology, serum clinical chemistry, urinalysis, body weight, organ weight, bone marrow cytogenetic, and gross and histologic examinations.

Two different neoplastic lesions were observed to have significantly increased incidence over the controls: peritoneal

mesothelioma in the male rats, and mononuclear cell leukemia in the females. No other types of malignant neoplasms were observed. The investigators employed two independent control groups (air only) in the study to gain a better assessment of variability in the non-treated animals. Results in the two control groups (for the tumors of interest) were not significantly different and the two groups were combined for purposes of the quantitative risk assessment.

The Bushy Run study was selected for the quantitative risk assessment because it provided, by far, the best quantitative information available from any study on EtO and it had the following characteristics:

1. There was a statistically significant increase in the incidence of malignant neoplastic changes.
2. A dose-response relationship was observed.
3. The study was run with a concurrent control group.
4. The dosing regimen was completely specified including route of exposure, duration of exposure, observation period and age of animals.
5. This study had the added advantage that the routes of exposure are identical for both the animal experiments and the major occupational exposure.

General Assumptions

The following general assumptions were carried through in performing the quantitative risk assessment:

1. The mathematical model fit to the measured data is assumed to hold for doses outside the range of measurement.
2. There is no threshold effect assumed.
3. The absorption rate for both rats and humans is assumed to be 100 percent.
4. Estimation of risk factors for a particular malignancy in animals is not assumed to correlate directly to a risk for that particular tumor in humans. The predicted risk simply indicates an excess risk of cancer to humans at a given level.
5. Experimental doses were scaled to "equivalent human doses" using milligrams of EtO inhaled per kilogram of body weight per day (mg/kg/day). This scaling procedure has been shown empirically to accurately predict human carcinogenic potency for several chemical substances (Crump and Howe, 1980, Ex. 6–17). Additional scaling factors were applied to correct for differences in length of lifetime exposure, though, calculations on the length of exposure also show that the rats and humans are exposed for approximately the same proportion of their lives (approximately 18% of the lifetime). Details of the calculations of scaling factors can be found in Appendix B of the Preliminary Quantitative Risk Assessment which has been submitted to the OSHA docket.

Incidence and dose data are presented in Table 1.

TABLE 1.—PATHOLOGIES IN RATS AFTER EXPOSURE TO ETHYLENE OXIDE

Tumor type	Animal	100 ppm [1]	33 ppm	10 ppm	Control I + II
Peritoneal Mesothelioma	Males	22/96 [2]	7/82	3/88	4/187
	P value [3]	<.0001*	.0213	.3963	
	Females [4]				
Mononuclear cell Leukemia	Males	25/98	25/77	21/77	38/193
	P value	.1192	.0202	.1163	
	Females	28/73	24/72	14/71	22/186
	P value	<.0001*	.0001*	.0791	

[1] Dose used in risk assessment was expressed in mg/kg/day. Dose was calculated as d(mg/kg/day) = d(ppm) x S, where S is a scaling factor. For male rats S = 0.1930324; for female rats S = 0.2393601; for humans S = 0.129698.
[2] Number of tumor-bearing animals/Effective number of animals at risk.
[3] P value from Fisher's Exact test, (upper tail probability) when compared to combined controls. A Bonferroni correction was used in evaluating the significance at the .05 level of the probabilities for use in the quantitative risk assessment * indicates P less than .05/r where r is the number of test doses.
[4] Data not available.

TABLE 2.—EXCESS LIFETIME RISK OF CANCER PER 10,000 WORKERS FROM EXPOSURE TO ETHYLENE OXIDE [1]

Exposure level [5]	Multistage [2]		One hit [3]		Multistage [4]	
	MLE [6]	UCL [7]	MLE	UCL	MLE	UCL
50	634	1,008	746	1,018	1,093	1,524
10	118	211	154	213	229	326
5	58	106	77	107	115	164
1	12	21	15	21	23	33
0.5	6	11	8	11	12	16
χ^2 [8]	0.0579(1)		0.2360(2)		4.3255(2)	
P [9]	0.81		0.89		0.12	

[1] Extra risk per 10,000 workers [$P_E = (P(d)-P(0))/(1-P(0))$]. Lifetime exposure is assumed to be 8 hours per day, 5 days per week, 46 weeks per year for 45 years in a 54 year lifespan since initial exposure.
[2] Multistage model with 3 parameters: $q_0 = 0.020965$, $q_1 = 0.008905$, $q_2 = 0.000184$. Extrapolated from male rats.
[3] One hit model with parameters $q_0 = 0.019682$, $q_1 = 0.011943$. Extrapolated from male rats.
[4] The multistage model fit a one hit model in this case, with parameters $q_0 = 0.14700$ and $q_1 = 0.017841$. Extrapolated from female rats.
[5] ppm.
[6] Maximum Likelihood Estimate of Excess Risk.
[7] 95% Upper Confidence Limit On Excess Risk.
[8] One-tailed Chi-squared goodness-of-fit test. (Degrees of freedom are in parentheses)
[9] -value associated with χ^2.

Statistical Methods and Predictions

The predictions of risk from two mathematical models for cancer initiation are presented in Table 2. The multistage model is a mathematical model for carcinogenesis based on the biological theory that carcinogens induce cancer through a series of stages. The multistage theory was proposed by Armitage and Doll in 1916 and is in wide use for performing quantitative risk assessments. The onehit model is a special case of the multistage model where there is only one stage. The estimates were produced using the computer program GLOBAL 82, a program used to extrapolate dichotomous animal carcinogenicity data to low doses (Howe and Crump, 1982, Ex. 6–17).

The curvefitting and predictions of risk are based on assumptions discussed above and a worker's lifetime exposure scenario of 8 hours per day, 5 days per week, 46 weeks per year for 45 years. Predictions of risk from the male and female rats are listed separately, and can be used to formulate a range of predicted risk. As can be seen from the table, the multistage model predicts a lifetime excess risk of cancer from occupational exposure to ethylene oxide at the current PEL of 50 ppm as 634 to 1093 per 10,000 workers, with 95% upper confidence limits on the excess risk of 1008 to 1524 deaths per 10,000 workers. Upper confidence limits are useful in assessing the amount of statistical variation found in the data being used for the quantitative risk assessment. A reduction in the PEL from 50 ppm to 1 ppm would constitute a 98% reduction in the estimated risk. lastly, Chi-squared goodness-of-fit test results are given in order to judge the fit of a given model to the data. The closer the P value

associated with a chi-square goodness-of-fit statistic is to one, the better the fit. (The lack of fit of the multistage model (and other models) to the female rat data is discussed in more detail in the full text, Exhibit 6–18.)

Other Models

In addition to the multistage and onehit models, four other models were considered for the data: the probit, logit, Weibull, and gamma multihit models. Each of these curves is signoid in shape and was formulated in terms of tolerance to a given toxic agent. These models have the property that, at lower doses, the curves tend to approach zero more quickly than the multistage model, though the probit model, by far, most strongly exhibits this characteristic.

The estimates of risk from the other models agree generally with those from the multistage model (a three-fold difference in estimates from different models falls well within the range of "acceptable" discrepancy. See Tables V(i) and V(ii) of Preliminary Risk Assessment). Thus, the estimates from the multistage model, though slightly conservative, generally represent the level of risk predicted by all of the models but the probit model.

Information and comment are sought on all aspects of the quantitative risk assessment, including aspects of risk assessment not explicitly addressed in this proposal.

Other Risk Assessments

Calleman and colleagues (1978 Ex. 6–19) have presented a risk assessment for ethylene oxide based on a comparison of the degree of alkylation of histidine in hemoglobin in EtO-exposed workers and workers exposed to ionizing radiation. By such comparisons the authors calculated the "rad-equivalence" for certain alkylating agents, that is, the number of rads of acute gamma radiation that gives the same effect as a unit dose of the chemical.

Calleman et al. employed data from epidemiologic studies of populations exposed to EtO and those exposed to ionizing radiation. The authors speculated that compounds such as EtO would induce a "spectrum of cancers similar to that observed following whole body exposure to penetrating low-LET [linear energy transfer] radiation." Since radiation-induced leukemias tend to have shorter latency times (approximately 10 years) than most solid tumors median latency of 25 years) the authors recommend that special attention should be directed toward the incidence of leukemia in EtO-exposed populations.

Based on EtO exposure profiles, Calleman and his co-workers estimated that exposure to 1 ppm per hour of ethylene oxide resulted in a risk of 10 mrad-equivalents of effects in a genetic mechanism. Thus, in industrial work environments with an average exposure level in the range of 5–10 ppm of EtO, Calleman et al. estimated that the mid-point of the range would correspond to approximately 120 rad-equivalents per year. On this basis they predicted that a group of 100 workers exposed at the 5–10 level for 10 years could expect 3.6 cases of leukemia, one of which would be expected to appear before the end of the 10-year period.

Expanding upon these findings, Rantanen et al. (1982, Ex. 6–20) point out that the limit of occupational risk recommended by the International Commission on Radiological Protection corresponds to whole body exposure of 5 rads per year of low LET radiation. The comparative exposure dose of EtO would be an average concentration of 0.25 ppm (using conversion formula of Calleman et al.).

The EPA Carcinogen Assessment Group (CAG) performed a preliminary risk assessment (October 16, 1979, Ex. 6–21) based on the report of leukemia in three out of 230 workers in Sweden (Hogstedt et al., 1979, Ex 2–8).

The CAG estimated the lifetime probability of death from leukemia from breathing 1 ppm of EtO is:

$$P=[a(R-1)X_1]/X_2$$

where a is the background lifetime probability of dying from leukemia in the U.S., R is the relative risk, X_1 is the exposure at 1 ppm and X_2 is the exposure experienced by the workers. After converting from ppm to mg/m^3 (1 ppm = 1.80 mg/m^3), the CAG predicted a lifetime probability of dying from leukemia from breathing 1 mg/m^3 of EtO as 0.00012 (.12 per 1000) based on an occupational exposure of 9 years as reported in the study.

The CAG noted that this might be an underestimate of the risk for two reasons: (1) There might have been insufficient latency in the study to detect the total number of potential cancers (only 9 years); and (2) since the number of person-years of exposure was not reported, the CAG assumed that all workers were exposed for 9 years, an assumption which also underestimates the risk of exposure over a working lifetime. In making its estimates the CAG noted that it could not definitively judge the effect that the mixed exposures to EtO and methyl formate reported in the Swedish study would have on the CAG risk estimates for EtO alone.

2. *Dose-Response Analysis.* OSHA performed its preliminary quantitative risk assessment on the carcinogenic response in the Bushy Run animal study. OSHA believes this study provided the most appropriate data on which to base the risk assessment, particularly since most low-dose extrapolation methods currently in use rely on theories of carcinogensis.

The data on other adverse health effects discussed earlier were determined to be not as suitable for quantitative risk assessment for a variety of reasons including: (1) Lack of a well-defined endpoint, suitable for risk determination; (2) exposure levels are not defined well enough for predictive purposes; and (3) the small numbers of subjects limit determination of statistical significance and generalizations to a larger worker population. Nonetheless, the demonstration of a dose-response relationship for such adverse health effects in these studies can be used as qualitative supportive evidence in establishing a potential hazard.

There are several studies in humans and other species which demonstrate strong positive dose-response relationships between exposure and noncarcinogenic effects. Such relationships have been displayed within the range of current exposure including adverse effects at and below the current PEL of 50 ppm. Details of the dose-response analysis can be found in Exhibit 6–18. Some observations are summarized below.

In humans, a strong dose-response relationship has been shown between exposure to EtO and the frequency of sister chromatid exchange (Yager, 1982, Ex. 4–61, and Yager, 1983, (Ex. 6–15)). In addition, the Johnson and Johnson (Ex. 4–17) data also showed a dose-effect relationship with mean complex chromosomal aberrations. A similar result has been demonstrated in monkeys exposed to 50 and 100 ppm (NIOSH, 1982 Ex. 6–16). The findings of chromosomal aberrations are qualitative evidence supporting the epidemiologic demonstration of leukemia in EtO-exposed worker populations.

Strong dose-response relationships were also displayed with adverse reproductive effects in rats (Bushy Run Reproductive study Ex. 2–23). Again, this finding comports with a demonstrated association between EtO-exposed sterilizer workers and spontaneous abortion (Hemminki, et al., 1982, Ex. 6–7).

d. *Significance of Risk.* OHSA's overall analytic approach for setting worker health standards is a four-step

process consistent with recent court interpretations of the OSH Act and rational, objective policy formulation. In the first step, quantitative risk assessments are performed where possible and considered with other relevant factors to determine whether the substance to be regulated poses a significant risk to workers. In the second step, OSHA considers which, if any, of the proposed standards being considered for the substance will substantially reduce the risk. In the third step, OSHA looks at the best available data to set the most protective exposure limit that is both technologically and economically feasible. In the fourth and final step, OSHA considers the most cost-effective way to achieve the objective.

In the Benzene decision, the Supreme Court indicated when a reasonable person might well consider the risk significant and take steps to decrease it. The Court stated:

> It is the Agency's responsibility to determine in the first instance what it considers to be a "significant" risk. Some risks are plainly acceptable and others are plainly unacceptable. If, for example, the odds are one in a billion that a person will die from cancer by taking a drink of chlorinated water, the risk clearly could not be considered significant. On the other hand, if the odds are one in a thousand that regular inhalation of gasoline vapors that are 2% benzene will be fatal a reasonable person might well consider the risk significant and take the appropriate steps to decrease or eliminate it. (*IUD* V. API 448 U.S. at p. 655).

The Supreme Court's language indicates that the examples given were of excess risk over a lifetime. It speaks of "regular inhalation" which implies that it takes place over a substantial period of time and refers to the "odds * * * that a person will die," obviously a once in a lifetime occurrence.

The Court indicated, however, that the significant risk determination required by the OSH Act is "not a mathematical straitjacket," and that "OSHA is not required to support its finding that a significant risk exists with any thing approaching scientific certainly." The Court ruled that "a reviewing court [is] to give OSHA some leeway where its findings must be made on the frontiers of scientific knowledge [and that] * * * the Agency is free to sue conservation assumptions in interpreting the data with respect to carcinogens, risking error on the side of overprotection rather than underprotection" (488 US at pp. 655, 656).

In this proposed standard, OSHA has presented data establishing a dose response relationship with regard to cancer in experimental animals, chromosomal changes in man and experimental animals, and reproductive effects in experimental animals. Unlike the data on carcinogenesis, however, OSHA is not confident that the data on mutagenic and reproductive effects have established a sufficient dose response relationship to enable OSHA to perform a *quantitive* risk assessment for effects of EtO exposure other than cancer. Nonetheless, OSHA believes that there is sufficient qualitative evidence of an experimental or laboratory nature to demonstrate that EtO acts to cause alterations in the cellular genetic material and that sufficient clinical evidence is present to indicate that these changes may or do produce adverse reproductive effects, chromosomal changes, as well as cancer.

As discussed in detail earlier, OSHA has performed a quantitive risk assessment for EtO based on the Bushy Run inhalation study on rats. The risk assessment performed resulted in a maximum likelihood estimate of risk of 63 to 109 cancer cases per 1,000 workers exposed at the current permissible exposure limit (50 ppm) assuming such employees have regular exposure to EtO for the period of a working lifetime. Furthermore, upper 95 percent estimates of risk at the current exposure limit were 100 to 152 cancer cases per 1,000 workers. OSHA feels that this upper 95 percent estimate is a conservative assumption allowing error on the side of maximum worker protection.

These estimates of risk for EtO at the current exposure limit are well above the one per thousand guideline suggested by the Supreme Court in the Benzene Decision as representing a "significant risk". The risk for EtO at the current PEL is also comparable to the risk of byssinosis of approximately 13 cases per hundred workers exposed to cotton dust. By comparison, the recent supplemental statement of reasons for the final rule for occupational exposure to arsenic, (43 FR 19548) OSHA determined that the risk at the former permissible exposure levels of 148–425 cases of cancer was significant. The upper confidence limits for risk from EtO exposure are within this range. The risks from EtO exposure are, in turn, far higher than those for coke oven workers (over 10 cancer cases per 1,000 workers) which OSHA determined were sufficient to justify lowering the standard.

While OSHA ultimately relied on the multistage and one hit model to determine risk from exposure to EtO at the current and proposed permissible exposure limit, the Agency did explore the results from other mathematical models. At the current exposure limits, the other models used all gave maximum likelihood estimates from 63 to 173 cancer cases per 1,000 workers. The agency points out that with regard to the estimates of risk based on the finding of leukemia in female rats, these models gave a higher maximum likelihood estimate of risk that the one hit model. These models support OSHA's determination that significant risks exist from exposure to EtO at the current PEL.

Public response to the ANPR indicated general agreement that the current permissible exposure limit for EtO should be lowered and that, indeed, many industries have already voluntarily established limits well below 50 ppm. OSHA believes that these industries have reduced exposures on the basis of recommendations from their scientific staff and on basis of available health data. The agency thus believes that the voluntary action taken by industry and their having recommended a reduction in OSHA's PEL indicate an acceptance by the scientific community of OSHA's determination that there is a significant risk to the health of employees exposed at the current PEL.

OSHA's risk assessment projects that a maximum likelihood estimate of risk of 1 to 2 cancer cases per 1,000 workers will occur from regular occupational exposure at 1 ppm over a working lifetime. The upper confidence limit of this assessment is 2 to 3 cases per 1,000 workers. In addition, at least one study (Hemminki, et at.) has suggested that spontaneous abortions in women may occur when they are exposed to approximately half of the proposed PEL, or 0.5 ppm. OSHA believes that the proposed exposure limit of 1 ppm will not totally eliminate risk from cancer and perhaps not the risk of fetal death, although with regard to the latter, OSHA seeks additional information on these and other health effects and the risk to which employees are exposed.

OSHA's preliminary conclusion is that significant risk is not eliminated at a 1 ppm PEL, with a projected 1 to 2 excess cases of cancer per 1,000 exposed workers. Guidance for the Agency in evaluating significant risk is provided by an examination of occupational risk rates and legislative intent. For example, in the high risk occupations of fire fighting and mining and quarrying the average risk of death from an occupational injury or an acute occupationally related illness from a lifetime of employment (45 years) is 27.45 and 20.16 per 1,000 employees respectively. Typical risk in occupations of average risk are 2.7 per 1,000 for all manufacturing and 1.62 per 1,000 for all

service employment. Typical risks in occupations of relatively low risk are 0.48 per 1,000 in electric equipment and 0.07 per 1,000 in retail clothing. These rates are derived from 1979 and 1980 Bureau of Labor Statistics data from employers with 11 or more employees adjusted to 45 years of employment for 48 weeks per year.

There are relatively few data on risk rates for occupational cancer as distinguished from occupational injury and acute illness. The estimated cancer fatality rate from the maximum permissible occupational exposure to ionizing radiation is 17 to 29 per 1,000. (47 years at 5 rems; Committee on the Biological Effects of Ionizing Radiation (BEIR) III predictions.) However, most radiation standards require that exposure limits be reduced to the lowest level reasonably achievable below the exposure (the ALARA principle). Approximately 95% of radiation workers have exposures less than one-tenth the maximum permitted level. This risk at one-tenth the permitted level is 1.7 to 2.9 per 1,000 exposed employees. (BEIR I estimates are 30 to 60 per 1,000 at 5 rem per year and 3 to 6 per 1,000 at one-tenth that level.)

Congress passed the Occupational Safety and Health Act of 1970 because of a determination that occupational safety and health risks were too high. Based on this it is clear that Congress gave OSHA authority to reduce risks of average or above average magnitude when feasible. OSHA believes that the proposed standard for EtO will reduce risk from a hundred per thousand to nearly one per thousand and, therefore, the Agency is carrying out the Congressional intent within the limits of feasibility and is not attempting to reduce insignificant risks.

Under both the congressional intent and the Supreme Court rationale, OSHA must, if it feasible, seek to reduce risks below those estimates by the risk assessment to persist at a PEL of 1 ppm. However, OSHA expects that the proposed rule as drafted can be expected to reduce the risks of EtO below those estimated using the mathematical model. The estimates of risk only consider the PEL, and do not take into account the other protective provisions of the proposed standard such as respirators and medical surveillance. The decrease in risk to be achieved by these additional provisions cannot be adquately quantified beyond a determination that they will add to the protection provided by the lower PEL alone. OSHA has determined that employers who fulfill the provisions of the standard as proposed will provide protection for their employees from the hazards presented by occupational exposure to EtO well beyond those which would be indicated solely by reduction of the PEL.

In determining the level to which the permissible exposure limit should be lowered, several alternative 8-hour TWA's (10, 5, 1 and 0.5 ppm) were considered by the Agency. OSHA currently believes that compliance with a 1 ppm TWA is technologically and economically feasible based on data that indicate that several industries or industry segments are presently controlling exposures to or very near this level. Regarding the feasibility of compliance with a PEL of 0.5 ppm, however, OSHA does not have sufficient data to demonstrate that a substantial portion of the EtO industry could control exposures to that level. In addition, OSHA is unable to determine what the economic impact would be of establishing a 0.5 ppm PEL. OSHA's preliminary analysis of technological and economic feasibility of the proposal is discussed in the following section of the preamble.

VI. Summary of Regulatory Impact and Regulatory Flexibility Analysis

Introduction

Executive Order 12291 (46 FR 13197, February 19, 1981) requires that a regulatory analysis be conducted for any rule having major economic consequences on the national economy, individual industries, geographical regions, or levels of government. The Regulatory Flexibility Act (5 U.S.C. 601 seq.) similarly requires the Occupational Safety and Health Administration (OSHA) to consider the impact of the proposed regulation on small entities.

In accordance with these requirements, OSHA has prepared a Preliminary Regulatory Impact and Regulatory Flexibility Analysis for the proposed EtO standard. This analysis describes the industries affected by the standard, the non-regulatory environment and regulatory alternatives considered, the costs of compliance with the proposed standard, the technological feasibility of the proposed provisions, and some of the potential benefits that will occur to employees exposed to EtO at their places of work.

The Secretary has determined that this action would not be major as defined by Section 1(b) of Executive Order 12291. The Secretary also certifies that this action would not have a significant impact on a substantial number of small entities as defined by the Regulatory Flexibility Act. The Preliminary Regulatory Impact and Regulatory Flexibility document is available in the rulemaking docket for inspection and copying.

Under Executive Order 12291, OSHA is required, in general, to submit notices of proposed rulemaking for "all rules other than major rules" to the Director of the Office of Management and Budget (OMB) at least ten days prior to publication in the **Federal Register**. However, section 8(a)(2) of the Executive Order provides an exemption from this requirement under the following circumstances:

> (a) The procedures prescribed by this order shall not apply to: * * * (2) Any regulation for which consideration or reconsideration under the terms of this Order would conflict with deadlines imposed by statute or by judicial order, *provided that*, any such regulation shall be reported to the Director together with a brief explanation of the conflict, the agency shall publish in the **Federal Register** a statement of the reasons why it is impracticable for the agency to follow the procedures of this Order with respect to such a rule, and the agency, in consultation with the Director, shall adhere to the requirements of this Order to the extent permitted by statutory or judicial deadlines.

As was discussed in the Background section of this preamble, OSHA has expedited the publication of its proposed EtO standard pursuant to an order issued by the U.S. Court of Appeals for the D.C. Circuit in *Public Citizen Health Research Group* v. *Auchter*, No. 83–1071 (March 15, 1983), which directed the Agency to issue a proposed rule within 30 days. For this reason, it is impracticable for OSHA to submit the notice of proposed rulemaking to OMB for consideration ten days prior to its publication in the **Federal Register**. To the extent permitted by judicial deadlines, OSHA will comply with the Executive Order in the assessment of the regulatory impact of the proposal, and in the development of the final rule.

On March 31, 1983, the Office of Management and Budget published a new 5 CFR Part 1320, implementing the information collection provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* (48 FR 13666). Part 1320, which becomes effective on April 30, 1983, sets forth procedures for agencies to follow in obtaining OMB clearance for collection of information requirements in proposed and final rules. In particular, §1320.13 requires agencies to submit information requirements contained in proposed rules to OMB not later than the date of publication of the proposal in the **Federal Register**. It also requires agencies to include a statement in the

notice of proposed rulemaking, indicating that such information requirements have been submitted to OMB for review under Section 3504 (h) of the Paperwork Reduction Act.

In accordance with the abovementioned provisions of both Paperwork Reduction Act and the regulations issued pursuant thereto, OSHA certifies that it has submitted the information collection requirements contained in its proposed rule on occupational exposure to ethylene oxide to OMB for review under section 3504(h) of that Act. Comments on these information collection requirements may be submitted by interested persons to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for OSHA.

Summary of Industry and Exposure Profiles

OSHA estimates that the proposed EtO standard would cover approximately 80,000 directly exposed employees and 144,000 incidentally exposed workers in five industry sectors. Directly exposed workers are defined as those exposed to EtO as part of their regular work assignments. Incidentally exposed employees are defined as those exposed only occasionally. For example, an incidental exposure would occur when an employee inhales airborne EtO that is off-gassing from a product previously sterilized with EtO, or when a poorly functioning ventilation system permits EtO to accumulate in an area normally free of EtO.

The employees covered by the proposed standard work in five industry sectors: EtO producers, EtO ethoxylators (firms using EtO to manufacture other chemical products), health care providers (hospitals that use EtO as a sterilant) manufacturers and sterilizers of medical products (hereafter termed medical products manufacturers), and spice manufacturers. The producer industry is comprised of 13 large firms, only 3 of which had annual sales under $1 billion. OSHA has identified 36 of the 50 firms estimated by the Ethylene Oxide Industry Council (EOIC) (Ex. 4–33) to be in the ethoxylator industry. The 36 ethoxylator firms and 13 producers identified use approximately 98 percent of all EtO produced in the United States to synthesize other chemicals, such ethylene glycol used in antifreeze, and polyester resins and fibers. The smallest ethoxylator firm by revenue had annual sales of $15 million and employs 350 workers. A total of 3,676 employees are currently directly exposed in the producer and ethoxylator sectors.

Three of the industries affected by the proposed standard use EtO to sterilize or fumigate other products: hospitals, medical products manufacturers, and spice manufacturers. Approximately 2 percent of all EtO produced is used to sterilize or fumigate other products but this 2 percent results in most of the employee exposures to EtO. OSHA estimates that EtO is used as a sterilant in 7,700 sterilizers in 6,300 hospitals. Approximately 62,370 employees are estimated to be directly exposed and 25,000 are estimated to be incidentally exposed in U.S. hospitals.

In addition, 14,000 and 116,900 employees are directly and incidentally exposed to EtO, respectively, in the 300 to 400 medical products manufacturing firms that are estimated to use EtO. According to the Health Industry Manufacturers' Association (HIMA), 8 to 10 firms are dominant in this sector. OSHA could not determine the number of small firms in this industry sector and solicits additional information on small business users of EtO in this industry sector. Finally, an estimated 27 spice manufacturing firms use EtO to fumigate spices. These firms have a total of 160 directly exposed employees. Sixty percent of the firms identified in this industry sector have more than 1,000 employees. The two smallest firms identified have 28 and 95 employees and annual sales of $20 and $14 million, respectively.

Summary of Costs

OSHA has examined both the annualized and present value costs (in 1982 dollars) of compliance with the following regulatory alternatives for EtO permissible exposure limits (PELs): 10 ppm, 5 ppm, 1 ppm, and 0.5 ppm. (Ex. 6–22). These costs were determined for all affected industry sectors. The present value of the costs were estimated using a 10 percent discount rate and a 50-year time period. Costs are presented in the regulatory analysis both for the engineering controls necessary to achieve exposure levels of 1 and 0.5 ppm and for other provisions of the standard, such as medical surveillance, exposure monitoring, training, and recordkeeping. This summary presents combined costs only for the proposed 1 ppm PEL and the remaining provisions of the proposed standard.

OSHA estimates that total annualized costs for the proposed standard would be $72.4 million. The total annualized costs for the five industry sectors are: producers, $1.56 million; ethoxylators, $1.03 million; health care providers, $23.65 million; manufacturers of medical products, $45.99 million; and spice manufacturers, $0.17 million. The present value of the costs of the proposed standard over the next 50 years, assuming a 10-percent discount rate, is estimated to be $720.19 million for all affected industry sectors.

The average annualized cost per directly exposed employee by industry sector are: health care providers, $379; producers, $594; ethoxylators, $980; spice manufacturers, $1,050; and medical product manufacturers, $3,282. Most of the employees in the medical manufacturing industry are incidentically exposd. The average annualized cost per employee (including both directly and incidentally exposed employees) for medical product manufacturers is estimated to be approximately $400 per year.

It is not expected that the cost of this proposed standard would have a negative impact on the viability of firms in these five industries or on employment, balance of payments, inflation, or any specific communities.

Summary of Benefits

The reduction in the occurence of occupational illnesses that would result if the proposed EtO standard is promulgated represent the fundamental benefit of the proposed standard. Some aspects of these benefits can be qualified, such as the excess risk of cancer due to direct exposure to EtO. Other impacts, such as the effect of chromosome damage, cannot be quantified due to limited data.

Among the non-quantifiable health impairments attributable to EtO exposure are several types of chromosomal damage including sister chromatid exchanges (faulty exchanges of genetic material among chromosomes), chemical alteration of DNA caused by unscheduled DNA synthesis (a failure of the DNA repair mechanism), and quadriradials (a visually detectable, rare, and complex chromosome aberration). Mutagenic and reproductive effects of EtO exposure that have been observed in experimental animal studies include increases in the frequency of resorption, stillbirths, and deformed offspring. In addition to these animal studies, increases in the number of spontaneous abortions have been observed in an epidemiological study of exposed hospital sterlizer technicians in Finland.

Using a quantitative risk assessment, OSHA has estimated the number of excess cancer cases that are expected to occur among directly exposed workers during the next 50 years. The risk assessment assumes exposures of 6 hours a day, 5 days per week, and 46 weeks a year for 45 years. The directly

exposed population accounts for approximately 80,000 of the estimated 224,000 employees exposed to EtO. OSHA estimates that compliance with its proposed 1 ppm PEL would reduce the number of excess EtO-related cancers over the next 50 years from 958, based on current exposures, to 95, a 90 percent reduction.

This regulatory action would significantly reduce the number of EtO-related cancer cases and the occurrence of the other EtO-related health impairments such as spontaneous abortions and chromosomal abnormalities.

Technological Feasibility

OSHA had determined that the proposed standard is technologically feasible. The methods that can be used to reduce employee exposure to EtO are conventional technology such as air monitoring, exhaust ventilation, double mechanical seals, leak detection, and use of respiratory protection for intermittent exposures. This technology is commonly known and presently used by the affected industries and is discussed in detail in the section of the Regulatory Impact document dealing with costs of compliance.

Regulatory Flexibility Analysis

OSHA has evaluated the expected cost of compliance for relatively small firms in each affected industry sector. In all cases, the annualized cost per firm, expressed as a percent of its annual sales, is less than 0.5 percent. The producers and ethoxylators are generally large chemical corporations. Differential size impact is therefore not a factor in these industries. Because of the price-inelasticity of demand for products that require the use of EtO as a sterilant and fumigant, it is expected that the costs of compliance for the medical product manufacturer, health care provider, and spice manufacture industries would be passed forward to consumers.

Because few medical manufacturers responded to OSHA's ANPR for EtO, little information on the relative impacts on small entities in this sector could be obtained. OSHA expects to obtain additional information on the potential impacts on small entities in the medical product manufacturing industry during this rulemaking.

Pursuant to the Regulatory Flexibility Act, OSHA certifies that the proposed standard would not have a significant adverse economic impact on a substantial number of small entities.

VII. Environmental Assessment—Finding of No Significant Impact

In OSHA's January 26, 1982 AMPR for occupational exposure to EtO, information was solicited from the public on a variety of issues including possible environmental impacts of a proposed revised standard. The information and comments submitted in response to the ANPR have been reviewed in accordance with the requirements of the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 4321, et seq.), the Guidelines of the Council on Environmental Quality (40 CFR Part 1500), and OSHA's DOL NEPA Procedures (29 CFR Part 11). As a result of this review, the Assistant Secretary has determined that the proposed rule will not have a significant impact on the external environment. Impacts on the workplace environment are discussed in other portions of this preamble.

EtO is used primarily as an intermediate in the production of several industrial products, such as antifreeze, polyester fibers, films, and bottles. EtO is also used as a pesticide, fumigant, and antimicrobial sterilant for medical products and spices, and in limited applications for items such as cosmetics, books, railcars, etc.

The Environmental Protection Agency (EPA) has the authority to regulate the use and application of sterilant and fumigants under the Federal insecticide, Fungicide and Rodenticide Act (FIFRA) as amended (7 U.S.C. 136 et seq.). EPA regulations on the enforcement of FIFRA are founded in 40 CFR Part 162. As a sterilant or fumigant, EtO is regulated under FIFRA, and formulations of EtO pesticides are registered with EPA and are required to be labelled properly as to their toxicity to humans, their particular hazards, their route(s) of exposure, and the precautions to be taken to avoid accident, injury, or damage. Application of these pesticides may only be performed in accordance with the precautions set forth on the label. Under the Clean Air Act (42 U.S.C. 1857 et seq.), and the National Ambient Air Quality Standards for Total Suspended Particulated, EPA is responsible for maintaining ambient air quality by preventing or controlling air pollution. Under the proposed OSHA standard, the current PEL of 50 ppm would be reduced to 1 ppm as an 8-hour, time-weighted average (TWA). This reduction in the exposure limit is not anticipated to impact significantly on the external environment because: (1) The process equipment containing EtO generally consists of tightly closed and highly automated systems; (2) any emissions that occur to the external atmosphere would dissipate and disperse rapidly; and (3) no solid waste is directly associated wht EtO fumigation and sterilization.

Although the removal of increased amounts of EtO from the workplace air might seem to contribute to the pollution of ambient air surrounding EtO operations and applications, this is not anticipated because direct exhaust to the external environment is regulated under EPA air quality standards. In cases where worker exposure is reduced by the use of improved control methods such as chamber ventilation and purge systems, atmospheric emissions of EtO would remain constant, having an insignificant impact on the external environment.

Only mimimal amounts of EtO are released from manufacturing processes as wastewater effluents. Treatment of EtO containing wastes usually involves degradation in water (producing ethylene glycol). Wastewater treatment must comply with the requirements of the Clean Water Act of 1977, and under this standard, conventional biological wastewater treatment would effectively remove EtO from water effluents.

In cases where liquid EtO is transported or stored, there may be some potential for spills or leaks. Because of the nature of EtO, however, such occurrences are not anticipated to impact on the environment, since EtO quickly volatilizes and dissipates. Although instances of waste disposal have not been presented to the record, such disposal would be covered by EPA regulations and transportation would be regulated by the Department of Transportation. The requirements of the proposed standard, therefore, will not alter present methods for waste disposal or transportation of EtO.

Based on this discussion and other information presented in this Notice, OSHA concludes that there will be no significant impact on the general quality of the human environment external to the workplace, particularly in terms of ambient air quality, water quality, or solid waste disposal. OSHA, of course, reserves the right to perform additional environmental analyses based on the information and comments received in response to this Notice.

VIII. Response to the Advance Notice of Proposed Rulemaking (ANPR)

OSHA's ANPR for EtO sought public comment on issues such as appropriate permissible exposure levels, health effects, feasibility of available control methods, current exposures, number and classification of workers exposed,

available exposure measurement methods, and appropriateness of requirements for medical surveillance, protective clothing and equipment, respirators, hygiene facilities, training, and signs and labels. The comments on the ANPR's major issues are summarized briefly in the section. Not every comment received will be alluded to in this discussion. However, for each issue several representative comments will be cited by exhibit number.

There was widespread agreement from commentors that OSHA's existing standard should be revised based on available health data dealing with carcinogenic, reproductive, and cytogenic effects (Exs. 4–9, 13, 17, 19, 21, 23, 24, 25, 26, 28, 38, 47, 52, 60). Concern was expressed by some, however, that the preponderance of data was from high-dose animal experiments rather than human studies (Exs. 4–5, 22, 23, 31, 37). New human and other data have become available to OSHA since publication of the ANPR, however, and are discussed in the "Health Effects" section in this preamble.

Recommendations for a revised permissible exposure limit for EtO generally ranged from 0.5 ppm (Exs. 4–52, 58) to 10 ppm (Exs. 4–2, 23, 45). In addition, many commentors reported that their firms had voluntarily established internal exposure limits below OSHA's existing exposure limit of 50 ppm. For example, Lincoln General Hospital (Ex. 4–2), St. Joseph Hospital (Ex. 4–6), and 3M (Ex. 4–23) have adopted a 10 ppm internal limit; Shell (Ex. 4–28), Union Carbide (Ex. 4–39), and BASF Corp. (Ex. 4–53) have adopted a 5 ppm limit; UpJohn (Ex. 4–46) a 3 ppm limit; Texaco (Ex. 4–46) a 2 ppm limit; and Johnson & Johnson (Ex. 4–17), Dow (Ex. 4–31), the University of Arizona (Ex. 4–36), Celanese (Ex. 4–40), Monsanto (Ex. 4–41), the Smithsonian Institute (Ex. 4–43), and Lederle Laboratories, (Ex. 4–55) have adopted an internal exposure limit of 1 ppm.

The feasibility of achieving compliance with an exposure limit at or below 10 ppm is detailed elsewhere in this preamble and is based on public comment and JRB Associates study of the EtO industry (Ex. 6–20). The views of industry representatives who responded to the ANPR on this issue were generally similar to those expressed in the submission of the Ethylene Oxide Industry Council (EOIC) (Ex. 4–33). The EOIC, a broad based coalition of producers and users of EtO, surveyed its member companies on many issues regarding regulation of EtO, including feasibility. Their conclusions on feasibility, as reflecting by the survey results, were presented as follows:

> With respect to technological feasibility, several producers and non-producer converters have achieved targets of 1 pm (TWA) or below, so that level may be technologically feasible for most producers and converters if respirator protection can be used for certain operations. With respect to the non-producer converters, however, it must be emphasized that the EOIC survey responses constitute a relatively small sample of a diverse industry and that 1 ppm may not be technologically feasible for some members of that industry. There is considerable doubt among most producers and converters as to whether 0.5 ppm (TWA) is technologically feasible and whether available monitoring equipment is sufficiently reliable at that level to determine compliance.
>
> The majority of health product manufacturers have achieved levels of 10 ppm (TWA) or below, so that level may be technologically feasible for most health product manufacturers, if respirator protection can be used for certain operations. There is substantial doubt among most health product manufacturers as to whether 1 ppm (TWA) is technologically feasible by engineering controls alone.

The Health Industry Manufacturers Association (HIMA), a trade organization representing 270 domestic medical device and diagnostic product manufacturers, distributed the EOIC's questionnaire to its members interested in EtO. Regarding prevailing exposure limits in the industry HIMA indicated that:

> 25 out of 28 companies (90%) stated that they have an internal standard. 17 out of 25 companies (68%) are at 10 ppm or below. 18 companies with internal standards (ranging from 1 ppm to 50 ppm) indicated that their internal ETO standard is under review. 3 companies at 1 ppm were not reviewing their internal standard. Of the 18 companies reviewing their internal standard, 10 anticipate lowering that standard. (Ex. 4–51).

HIMA also noted that a total capital cost of $44 million and a period of 3 to 4 years were reported by 17 responding companies as being necessary to achieve compliance with a 1 ppm TWA (Ex. 4–51).

Lederle Laboratories (Ex. 4–55), a major producer of pharmaceutical products, provided specific exposure data for employees engaged in sterilization operations and for other employees present who were not engaged in the actual application of EtO. Lederle reported that the exposure levels of 218 directly exposed employees ranged from 0.2 to 1 ppm for various sterilant operations where exposure duration ranged from 1 to 8 hours per day, 5 days per week. These operations include: chamber operations, maintenance, and validation (use of air supplied respirators which effectively reduces exposure to less than 1 ppm was noted for operation personnel engaged in these activities); sterile room operations (0.5 to 1 ppm); finishing and sterile kitchen operations (0.2 to 1 ppm); surgical supplies packaging (0.2 pmm); and quality control (1 ppm). for incidentally exposed employees Lederle stated that:

> Approximately 165 employees may be exposed to EtO but not engaged in the actual application of the EtO. These employees may be exposed up to 8 hours per day, on normal work shifts to EtO concentrations ranging 0.2 to 1.0 ppm. The work environment is controlled through general ventilation and local exhaust, degassing of sterilized products prior to introduction to the work areas, and administrative controls and schedules to ensure unloading of sterilization chambers during off-shifts to reduce possible exposure to adjacent non-applicators.

A number of commentors provided data on the ability of hospitals and other health care providers to control exposure where EtO was being used as a sterilant in their facilities. St. Annes' Hospital reported that its chamber sterilizer, processing 3 loads per week, resulted in 8-hour TWA readings averaging 2.5 ppm (Ex. 4–8). St. Joseph's Hospital (Ex. 4–6) and Lincoln General Hospital (Ex. 4–2) stated that they have voluntarily adopted an internal exposure limit of 10 ppm. Council Shared Services (CSS) (Ex. 4–14) conducted an EtO hazard survey from 1978 to 1982 in 100 southern California hospitals. Of a total of 278 surveys at 121 different sites in 100 hospitals, CSS reported that personal breathing zone 8-hour TWA exposures were below 5 ppm in all but 7 of the 121 sites. Doylestown hospital (Ex. 4–18) reported that their sterilizer operation TWA exposures ranged from 3 to 6 ppm. The Veterans Administration reported exposure in many of their medical centers to be below 5 ppm (Ex. 4–35). ECRI, an independent nonprofit corporation, provided exposure data from 27 hospitals they surveyed (Ex. 4–53). ECRI reported only 5 out of the 27 hospitals had 8-hours TWA's exceeding 10 ppm during sterilant operations. Nine of the 27 were found to have TWA's at or below 1 ppm. Breathing zone concentrations for aeration activities ranged from 0 to 10 ppm, with one exposure of 19 ppm. Sixteen of the 27 hospitals surveyed revealed exposures to be below 4 ppm. The highest exposure found (19 ppm) was described as involving use of an aerator vented directly into the room surveyed.

Though hospital and health care facility exposure data discussed above

alludes primarily to 8-hour TWA's, it is evident that the exposure profile for their sterilant operations is greatly influenced by the pattern and frequency of EtO sterilization. It is relatively common for sterilizer operators to be exposed to very high breathing zone concentrations of EtO for very brief periods while unloading freshly sterilized materials. The data suggest that stringent control of brief exposures of this nature through engineering or work practice controls may be critical if the health care industry is to reduce their TWA's to a level approaching 1 ppm or below.

Comment regarding the issue of the necessity of establishing a short-term or ceiling limit varied widely. Reasons given in support of inclusion of a short-term exposure limit varied. One commentor suggested that a short-term limit should be established for all carcinogens (Ex. 4–47). Others suggested that such a limit is necessary in order to reduce background exposures for all employees (Exs. 4–28, 36, 55). One commentor (Ex. 4–24) stated that a short-term limit based on the concept of one equivalence (concentration times exposure duration) to the 8-hour TWA may be appropriate in establishing a limit and acceptable duration of exposure. This participant, who has established an internal workplace exposure limit of 3 ppm stated:

> We believe that a short-term exposure limit (STEL) of 40–50 ppm averaged over any 15 minute period in an 8-hour workday, and allowing for no more than two of these 15 minute periods would be sufficient to protect our employees from any adverse health effects due to exposure to EtO.
>
> This STEL is based on the concept of dose equivalence which is the product of concentration (ppm) times exposure duration (minutes). Therefore:
>
> 3 ppm (8-hour TWA) × 8 hrs. (480 min.) = 1440 ppm minutes.
>
> 50 ppm (STEL) × 15 min. × 2 (# of 15 min. periods in 8 hrs.) = 1500 ppm minutes.

A 5 ppm ceiling for 15 minutes was also suggested based on available health data (Ex. 4–52). Additional rationale for establishment of a short-term limit was suggested by the Amalgamated Clothing and Textile Workers Union as follows:

> ACTWU strongly recommends that a protective short term limit be established as part of the standard. Such a limit is needed to allow proper assessment of the intermittent exposure conditions that characterize most EtO user situations. It is doubtful that employer will be able to successfully control their TWA exposures unless they fully understand the contribution made by peak exposures. Glasser (1980) recommended that a ceiling value be used in describing EtO exposures because of the inadequacies of a TWA to indicate the exposure situation. He provides an example where a typical sterilizer operator TWA of 3.18 ppm was produced through a 2 minute, 600 ppm peak; along with some residual exposure and 7 hours at 0 ppm. However, without the 2 minutes of 600 ppm exposure, the resulting TWA is 0.7 ppm. This illustrates the lack of sensitivity of a TWA.
>
> A ceiling limit is also justified in light of the known health effects of EtO. Darby, Martis, and Northrup (1980) note that because of its solubility in blood, it is likely that *all* inhaled ethylene oxide is taken up by the body. Ehrenberg and Hallstrom (1967) report chromomsomal aberrations in humans accidentally exposed to high concentrations of EtO. A TWA standard of 1 ppm without a short-term limit would allow 15 minute exposures as high as 96 ppm. Given the carcinogenic risk from EtO, it is important that exposures be kept as low as possible. A short-term limit is the most effective way to insure that worker health is protected. (Ex 4–25).

Those opposing establishment of a short-term limit contended that the need was not indicated by the health data inasmuch as no acute effects from exposure to EtO have been demonstrated (Exs. 4–31, 33, 40), and that the control necessary to achieve a TWA as low as 5 ppm (or 1 ppm) would tend to preclude the occurrence of high excursions for most EtO operations (Ex. 4–39).

Participants who indicated uncertainty over the appropriateness of a short-term limit suggested that the need and level for such a limit should be based on quantitative assessment of risk of associated health effects.

Though OSHA has not proposed to include a short-term exposure limit for EtO, the Agency is not convinced that there is no need for such a limit. OSHA is closely scrutinizing the implications of the results of the study by Hemminki et al. which reports an increased incidence of spontaneous abortions with high short-term exposures but low 8-hour exposures (see health effects section), and the suggestion by Yager et al. that the increases in observed sister chromatid exchanges among another group of workers may have been caused by high short-term exposures. OSHA is also aware of the common occurrence of high, short duration exposure during sterilization operations. In addition, for some operations, short-term limits may be a good practical engineering and compliance approach for controlling the overall exposure OSHA is seeking full discussion on this issue from all interested parties.

The issue of which work practice and engineering controls are available to the EtO industry for exposure reduction was raised in the ANPR. Comments discussed a variety of controls available to control different EtO operations.

Production and ethoxylation processes were reported to utilize double mechanical seals, double seated valves, check valves, local exhaust systems, recovery systems, pump seal vents, flanged leak seals, plugged vents, closed loop quality control, scrubbers, vent treating systems, nitrogen purge, low temperature storage, emergency dilution, all welded construction where possible, and magnetic level gauges and recovery systems for tank car operations.

Engineering and work practice controls available for use for sterilization and fumigation operations were described by commentors as including: local exhaust above the chamber door; continuous purge after end of cycle; post-vacuum purge; liquid gas separator; 6–10 room air changes per hour; one-way tank connection line valve; exhaust to outside of building; containerization of loads; remote material handling; conveyer system from chamber to off-gassing area; use of isolated sterilization area under negative pressure; ventilation of off-gassing areas; automatic remote chamber door opening devices; automatic chamber door locks until after flushing; preconditioned temperature and humidity in room or chamber; handling of sterilized items with gloves; keeping employees upwind of cart when moving sterilized items; and if manual opening of the door of the sterilization chamber is necessary, opening the door only at the end of cycle and having employees leave the area for several minutes prior to removing items from the chamber.

Regarding the issue of respiratory protection, air supplied respirators and self-contained breathing apparatus (SCBA) were acknowledged by participants as being available for use with EtO (Exs. 4–25, 31, 33, 47). NIOSH-approved air purifying (chemical cartridge/canister) respirators are not available. Commentors expressed concern that air supplied and "SCBA" may not be feasible where extended wearing time or mobility are major considerations, and that employers would be placed in a difficult position if the use of air-purifying respirators were not permitted due to lack of NIOSH approval (Ex. 4–40, 55). (As discussed in the section dealing with respirators under "Summary and Explanation of the Standard" below, however, the proposal would allow for the use of such respirators under certain exposure conditions were stringent sorbent replacement requirements are followed).

The question of the availability of measurement and analytical methods for determining the level of employee exposure to EtO was also raised in the ANPR. Commentors have indicated that methods available for measuring EtO concentrations include the use of charcoal tubes, passive dosimeters, gas sampling bags, impingers, detector tubes, and direct reading instruments. Charcoal tube methods appear to be the most frequently used. As indicated in the EOIC survey (Ex. 4–33) and the HIMA survey (Ex. 4–51), however, all of the methods are employed to some extent.

The proposed standard would permit the use of any of the methods described above or any other method if the employer can demonstrate that the method chosen is capable of determining an employees' 8-hour TWA (breathing zone) with an accuracy of within plus or minus 25% at the PEL (1 ppm) and plus or minus 35% at the action level of 0.5 ppm.

A discussion of EtO sampling methodology was presented in Chicago, Illinois, October 4 and 5, 1982, at the Ethylene Oxide Worker Safety Seminar sponsored by HIMA and EOIC. Edward Zimowski, of the OSHA Health Response Team, attended the seminar and provided a report on the advantages and disadvantages of presently available procedures (Ex. 6–24).

Many commentors provided a description of the sampling methodology and devices they were presently using and, in some cases, a statement of their experience with such devices. The concerns over the deficiencies in the available sampling methods were alluded to by a number of participants who also noted that charcoal tube methodology represents the most throughly validated and accurate method for personal monitoring of EtO exposure (Ex. 4–24, 28, 39, 47). OSHA is aware that industrial hygiene services or commerical sampling devices that are capable of accurately determining an employee's exposure at the proposed PEL of 1 ppm must be available in sufficient quantities in order for the standard to be effective. The OSHA charcoal method (See Appendix D) has been validated at 1 ppm. Submissions to the record indicate that at least two other methods also may be capable of measuring an employees personal 8-hour TWA exposure with acceptable accuracy at the 1 ppm level. Union Carbide reports that its charcoal tube method developed in 1977 (Qazi-Ketchem) has been validated in the laboratory over a range of 0.5–5.00 ppm (Ex. 4–39). 3M Company reports that its passive diffusion monitor is also capable of accurately measuring 1 ppm (Ex. 4–23). 3M states that the method using its monitor has a detection limit of 0.3 ppm for an 8-hour TWA with a working range of up to 75 ppm. Laboratory validation tests performed by 3M were reported as demonstrating the recovery precision of the method to be plus or minus 5% with a mean value of 100% when 14 spiked monitors were compared to 14 matching standards. Field test comparison of the 3M monitor to jumbo charcoal tubes with pumps in a plant environment that was very humid with high ambient temperatures resulted in the charcoal tube/pump method giving much lower values than the 3M monitors.

Some commentors, however, have expressed reservations about passive diffusion samplers. The EOIC states: "This monitoring method using diffusion samplers is subject to the same interference and break through problems as charcoal tubes" (Ex. 4–33). One company stated in the EOIC submission, without discussion, that it had investigated using the 3M diffusion monitor and "was not pleased with them."

Problems associated with charcoal tube methods were also alluded to by other commentors. They included: interference from vinyl chloride, acetaldehyde above 50 ppm, and other organic compounds; limited sample size (affects flow rate and time) because of breakthrough; high relative humidity reducing usable sample volumes, charcoal tubes being large and inconvenient for workers; samples requiring refrigeration to avoid EtO loss; the need to analyze tubes in 3 to 7 days; difficulty of calibration and desorption; and complexity of analysis requiring sophisticated training of laboratory personnel (Ex. 4–33). Comment on the experience of those employing these devices to determine employee exposure and the ability of these and other sampling devices to meet the requirements of the proposed standard is solicited by OSHA.

Finally, as noted previously, OSHA is evaluating the necessity of including a short-term exposure limit for EtO. The Agency's judgment at this time is that such a limit, if established, would probably be between 5 and 50 ppm as measured over a period of up to 30 minutes. The capability of available measurement methodology would be one element in the determination of an appropriate specific short-term limit and sampling duration. Thus, OSHA is seeking data and comment on monitoring methods that reliably characterize an employee's exposure for periods less than 30 minutes at levels ranging up to 50 ppm.

IX. Summary and Explanation, of the Proposed Standard

The proposed requirements set forth in this notice are those which, based on currently available data, OSHA believes are necessary and appropriate to provide adequate protection to employees exposed to EtO. In the development of the proposal, OSHA has considered all recommendations received in response to the ANPR as well as numerous reference works, journal articles, and other data accumulated by OSHA since initiation of this rulemaking.

1. *Paragraph(a). Scope and application.* This proposed standard would apply to all workplaces in all industries, including construction and maritime as well as general industry, where EtO is produced, released, stored, handled, used, or transported, and over which OSHA has jurisdiction. An exemption provision, however, has been provided in the proposal.

This section does not apply to the processing, use, and handling of products containing EtO where objective data demonstrate that the product cannot release EtO above the action level under the expected conditions of processing, use, and handling which will cause the greatest possible release. It is likely that in a number of products made from, containing, or treated with EtO, there may be insignificant residual EtO present to the extent that minimal exposure would be expected. This determination (that air concentrations will not exceed the action level) need not be based on data generated by the processor but may, for example, be based upon information provided by the manufacturer. The provision enables fabricators or users of products made from, containing, or treated with EtO to avoid the burdens of compliance with the standard where exposures are minimal.

It should be noted that where objective data are not available to satisfy the condition for exemption, the employer is required to perform, at the very least, initial monitoring of employee exposures to EtO. If the results of initial monitoring indicate employee exposures are below the action level, the employer may discontinue monitoring for those employees and is relieved of other obligations under the proposal. Thus, even if operations are not specifically exempted from the proposal, exposure

levels below 0.5 ppm will relieve many employers from further duties under the standard, except with respect to labelling. This provision has been incorporated in a number of OSHA standards (acrylonitrile, arsenic).

2. *Paragragh (b). Definitions.* An "action level" of 0.5 ppm (8-hour time-weighted average), is provided in the proposal. The purpose of the action level is to relieve the burden on employers by providing a cut-off point for required compliance activities under the standard. The broad scope of the proposal necessarily encompasses many employers whose employees are exposed to levels of EtO below the permissible exposure limit. Such employers are required either to perform initial monitoring to determine to determine the extent of their employees' exposure to EtO or otherwise to document the employees' exposure by other objective data. If, on the basis of the results of the initial monitoring or other data, an employer can demonstrate that an employee is exposed to EtO below the action level, the employer may then discontinue compliance activities for that employee. The action level concept thus provides an objective means for an employer to determine what further actions are required for compliance with the standard.

The statistical basis for determining the action level has been discussed in connection with several other OSHA health standards (see, for example, acrylonitrile). In brief, although all measurements on a given day may fall below the permissible exposure limit, some possibility exists that on unmeasured days the employee's actual exposure may exceed the permissible limit. Where exposure measurements are above one-half of the permissible exposure limit, i.e. the action level, the employer cannot reasonably be confident that the employee may not be overexposed. (Leidel, N.A. et al., "Exposure Measurement Action Level and Occupational Environmental Variability." DHEW, PHS, DCD, NIOSH, DLCK (August 1975)) (Ex. 6–26). Therefore, requiring periodic employee exposure measurements to begin at the action level provides the employer with a reasonable degree of confidence in the results of his measurement program.

A definition of the term "emergency" is included in the proposed standard. For the purposes of the standard, emergencies are occurrences such as, but not limited to, equipment failure, rupture of containers, or failure of control equipment which are likely to, or do, result in unexpected high exposure to EtO.

3. *Paragrah (c). Permissible exposure limit.* OSHA proposes to revise the PEL for EtO by deleting the current 50 ppm standard contained in 29 CFR 1910.1000, Table Z–1 and setting an 8-hour exposure limit of 1 ppm in paragraph (c) of section 1910.1047. This proposed PEL is based on underlying findings by OSHA that occupational exposure to EtO under current permissible exposure levels presents a significant risk to employees and that the new standard will achieve a significant reduction in that risk.

In making a determination of significant risk, it is appropriate for OSHA to consider a number of different factors. The Supreme Court in the *Benzene* decision provided some general guidance as to the process, stating that "while the Agency must support its finding that a certan level of risk exists with substantial evidence, we recognize that its determination that a particular level of risk is 'significant' will be based largely on policy considerations." 448 U.S. at 655, 656 n. 12. Consistent with rational policy judgment, OSHA has recently identified the following factors as being among those which should be considered: (1) the quality of the underlying data; (2) the reasonableness of the risk assessment; (3) the statistical significance of the findings; (4) the type of risk presented, and (5) the significance of the numerical risk relative to other risk factors. 47 FR 15358, 15365 (April 9, 1982).

These factors have been considered with respect to the EtO risk assessment performed (see Risk Assessment section of this preamble).

OSHA has determined that exposure to EtO at the present standard of 50 ppm clearly presents a significant risk of material impairment to employees. The significance of this risk has already been informally acknowledged by industry, which had reacted to the developing information regarding the potential health effects of EtO by voluntarily reducing exposure among its employees. As previously noted, all producers currently maintain internal exposure guidelines of 5 ppm (TWA) or less, and most converters and other industry segments are also well below the current 50 ppm PEL.

OSHA must also give consideration to the economic and technological feasibility of the proposed new PEL. In order to obtain the information necessary to allow OSHA to perform this analysis, OSHA contracted for the services of JRB Associates of McLean, Virginia. Based on this data, and data provided to the record in response to the ANPR, OSHA believes that achieving compliance with a PEL of 1 ppm is both economically and technologically feasible. (see Regulatory Analysis section).

4. *Paragraph (d). Exposure monitoring.* The exposure monitoring provisions require the employer to determine the exposure for each employee exposed to EtO. This does not require separate measurements for each employee. If a number of employees perform essentially the same job under the same conditions, it may be sufficient to monitor a fraction of such employees to obtain data that are representative of the remaining employees. Representative personal sampling for employees engaged in similar work and exposed to similar EtO levels can be achieved by measuring that member of the exposed group reasonably expected to have the highest exposure. This result would then be attributed to the remaining employees of the group.

In many specific work situations, the representative monitoring approach can be more cost-effective in identifying the exposures of affected employees. However, employers may use any monitoring strategy which correctly identifies the extent to which all employees are exposed.

Because of the nature of the EtO exposure hazard, it is necesary that the scope of the proposal be as broad as possible to protect potentially exposed employees. However, many employers will be required only to perform initial monitoring to determine employee exposures. If the results of initial monitoring demonstrate that an employee's exposure to EtO is below the action level (0.5 ppm), the employer may discontinue monitoring and other activities under the standard for that employee. OSHA anticipates that this provision will greatly reduce the burden on employers, while providing them with an objective means of determining whether they must take additional steps for compliance with the standard.

Where exposure measurements are determined to be above the permissible exposure limit, the employer must monitor every 3 months. Where exposure measurements are above the action level but below the PEL, monitoring need only be repeated at 6 month intervals. "Exposure" here means the airborne concentration in the employee's breathing zone, with no adjustment for the protection provided by any respirator the employee may be wearing.

The employer is also required to perform monitoring again for a

particular job position if any changes in production, processes, control measures, or personnel may result in new or additional exposure to EtO.

A primary concern connected with any health standard is the availability of methods of monitoring and analysis of employee exposures. It is clear from data in the record in that there are several off-the-shelf methods of monitoring for EtO in the range of exposures addressed by the proposal and that many employers are already carrying out periodic monitoring activities. Among methods which have been noted in the comments are the use of charcoal tubes, personal badge-type dosimeters, gas bag "grab samples," detector tubes, and fixed point monitoring systems. The proposal does not require the use of one specific monitoring method, but it does specify that whatever method is chosen must meet the criteria for sensitivity and accuracy set forth in the standard.

The proposed standard requires an employer to notify each employee in writing of his/her exposure within ten (10) working days of obtaining the results of measurement. This requirement can be a written communication to each employee, or other means, such as posting of monitoring results in an appropriate location, so that the employee will definitely be advised of his/her exposures.

5. *Paragraph (e)—Regulated areas.* Where EtO concentrations are in excess of permissible exposure limits, the employer must establish a regulated area. The purpose of establishing regulated areas is to limit EtO exposure to as few employees as possible.

The proposal requires the employer merely to identify, by the posting of signs, for example, and to control access to regulated areas. Comment is requested as to whether demarcation and sign posting of the regulated area are sufficient to restrict access to authorized personnel.

6. *Paragraph (f)—Methods of compliance.* The proposed standard would require the employer to institute engineering and work practice controls to reduce employee exposures to or below the permissible limit. In situations where engineering and work practice controls that can be instituted immediately will not reduce exposures to the permissible exposure limit, these controls must nonetheless be used to reduce exposures to the lowest feasible level and be supplemented by the use of respirators. In addition, a compliance program to reduce exposures to within the permissible exposure limits solely by means of engineering and work practice controls must be developed and implemented. Written plans for this program must be developed and furnished upon request for examination and copying to representatives of the Assistant Secretary, representatives of the Director, and affected employees. These plans must be reviewed and updated annually to reflect the current status of the program. OSHA solicits comments on whether an annual review of the program will be sufficient to assure that engineering and work practice controls are implemented as they become available.

Engineering controls are the preferred means of compliance because they reduce exposure hazards in the workplace environment by removing the airborne contaminant. Engineering controls may include the installation of local exhaust ventilation, modification of a process so as to reduce emission of the contaminant into the workplace, or substitution of another substance. Work practices are often necessary for the effective operation of engineering controls, and they are also a preferred means of controlling exposures.

Respirators are the least satisfactory means of control because of certain difficulties inherent in their use. Respirators are capable of providing adequate protection only if they are properly selected for the concentrations of airborne contaminants present, properly fitted to the employee, properly worn by the employee, properly maintained, and replaced when they have ceased to provide adequate protection. While theoretically it is possible for all of these conditions to be met, it is more often the case that they are not. As a consequence, the protection of employees by respirators is not always effective.

OSHA recognizes that there are certain activities, often involving certain maintenance and repair operations, as well as in emergency situations in which the use of engineering controls to control exposures will not be feasible, regardless of the permissible exposure limits in the standard. Where the employer can show that engineering controls for such operations are not feasible, respirators shall be permitted as a primary means of control.

It has been OSHA policy to require that employers use feasible engineering and work practice controls to prevent excessive employee exposures and that respirators be used as an alternative only when other methods are not adequate, are not feasible, or have not yet been installed. This policy is, in particular, stated in the OSHA Respiratory Protection Standard, 29 CFR 1910.134(a)(1), which applies to all exposures to airborne toxins, and in the Air Contaminant Standard, 29 CFR 1910.1000(e), which applies to exposures to all substances listed in Tables Z–1, Z–2, and Z–3. The policy was inherent in national consensus standards which were adopted by OSHA in 1971 pursuant to the section 6(a) rulemaking provisions of the OSH Act 1970, without public comment.

All of the other health standards in Subpart Z, which were developed through section 6(b) rulemaking proceedings reflect the same preference for engineering and work practice controls over respirators. Each of these latter standards applies only to a specific substance and was developed on the basis of a public record. OSHA recently published an ANPR (48 FR 7473) requesting comments on all relevant issues related to whether OSHA should allow greater reliance on respirators. Comment on the issue of respirators to control EtO exposures is also requested by OSHA.

7. *Paragraph (g). Respiratory protection.* The proposal provides that where respirators are necessary to limit employee exposures to below the permissible exposure limit, the employer must provide the respirators at no cost to the employee, and assure that the employees use them.

Most companies working with EtO are aware of the high toxicity of this chemical, and many have developed respiratory protection programs to deal with the exposure hazard. OSHA has determined, on the basis of information in the record concerning these on-going respirator programs that the provisions in the proposal concerning respirators should pose no undue burden to companies in their compliance efforts, particularly in light of the ready availability of the prescribed equipment.

In the proposal, OSHA has included a table of respirators for use with EtO. The primary basis for the selection and evaluation of respirators in this table (Table I) is experience gained during other rulemakings (e. g., acrylonitrile) regarding this issue. In addition to the table, several other requirements for respirator usage are included concerning approval of respirators, replacement of sorbents and cleaning of respirators.

The proposal does not require, as do some other OSHA standards that where air-purifying respirators are to be used, they must be jointly approved by NIOSH and MSHA specifically for use with EtO. NIOSH does not grant such approval for substances with poor warning qualities. It is not possible for the respirator wearer to detect leakage or breakthrough within the facepiece

until clearly overexposed and there are no end-of-service indicators presently available for use with air-purifying respirators. OSHA has determined, however, that air-purifying respirators, when used in a rigidly controlled program of proper fitting and frequent sorbent replacement, should be permitted for protection against low concentrations of EtO, as prescribed in Table 1 of the standard. When the protection factors in the respirator table are followed, organic vapor canisters may provide adequate protection for employees.

Therefore, under these conditions the proposal would permit full facepiece organic vapor respirators to be used for EtO in concentrations up to 50 ppm. These respirators must be approved by NIOSH for use with organic vapors. We must note however, that there are numerous factors which affect the performance of air-purifying respirators, including the sorbent material itself and the fit of the facepiece on the wearer. Other important factors include wearer acceptance and training.

Proper fit of the respirator is critical. A negative pressure is created within the facepiece when the wearer breathes. This may result in workplace air entering the facepiece through gaps and leaks in the facepiece seal, instead of passing through the sorbent material. Obtaining a proper fit on each employee may require the employer to provide two or three different mask sizes so the employee can select the facepiece with the least leakage around the faceseal.

The employee must be properly trained to wear the respirator, to know why the respirator is needed, and to understand the limitations of the respirator. An understanding of the hazard involved is necessary to enable the employee to take steps for his or her own protection. The respiratory protection program implemented by the employer must conform to that set forth in 29 CFR 1910.134 which contains basic requirements for proper selection, use, cleaning, and maintenance of respirators.

Under § 1910.134, the employer must check to see that the employees' respirators fit properly and that leakage is at a minimum. A rapid simple fit-test can be performed at the start of each shift by each employee wearing a negative-pressure respirator. This test can be either a positive pressure test, in which the exhalation valve is closed and the wearer exhales into the facepiece to produce a positive pressure, or a negative pressure test, in which the inlet is closed and the wearer inhales so that the facepiece collapses slightly. Employees must be trained to perform this test. OSHA requests comments on whether the standard should provide specific quantative or qualitative fit testing provisions to supplement the general requirements of § 1910.134.

The critical issue of frequency of replacement of cartridges and canisters not approved for a specific substance (such as EtO), was discussed in the preamble to the final standard for acrylonitrile (AN) (43 FR 45803). As with EtO, no air-purifying respirators had been approved by NIOSH specifically for use with acrylonitrile for similar reasons that there are no ETO approved cartridges and canisters. Therefore, the discussion in the acrylonitrile standard replacement frequency appears relevant to this proposal and is presented below (record citations are to exhibits in the AN rulemaking record):

> Perhaps the most controversial element of the proposed respirator section involved the frequency of replacement of cartridges or canisters. It was contended by many in industry that the daily replacement of cartridges or canisters was wasteful, particularly if they were only used briefly during the workshift. A system of labeling of cartridges, it was argued, would assure that cartridges and canisters were replaced before the expiration of their service life (Ex. 92). OSHA does not agree with these contentions. As noted earlier, the very use of organic vapor cartridges and canisters for AN, which does not have good warning properties, runs totally counter to the respirator decision logic, and to good industrial hygiene practice. However, OSHA has determined that it is necessary to allow their use under a limited set of circumstances, provided that use is very narrowly restricted. The lack of end-of-service-life indicators for organic vapor cartridges used with AN makes it necessary for OSHA to require the replacement of the sorbent at the completion of each shift (Ex. 11:(6)).
>
> It should be noted, in addition, that even changing the sorbent container each shift may not assure protection. Testing data submitted by a respirator manufacturer and by NIOSH indicate that some organic vapor cartridges used for AN may not last for 8 hours, and that they may last for only 4 hours under humid conditions (Ex. 11:(12L); 11:(13L); 11:(14L)). This finding is particularly important in the context of this standard, since there are numerous monomer and polymer production facilities which operate under conditions of high humidity. It is clear that where the service life of a cartridges or canister is less than 8 hours, that cartridge or canister may have to be replaced again at some time during the workshift. The standard allows for such a situation by requiring the employer to replace cartridge or canisters before the end of their service life or at the completion of each shift, whichever comes first. The employer has the obligation to ascertain the service life of the cartridges and canisters to be used in his workplace, in order to assure that they are replaced as required by the standard.

Again, this discussion relative to the situation with acrylonitrile parallels the case with EtO and serves as the rationale for the requirement in this proposal. It is emphasized that the employer must carefully evaluate the conditions under which air-purifying respirators would be used. Relative humidity, temperature, exposure level, presence of other organic vapors, and employee activity level all act to affect the service life of the canister or cartridge being used. Workplace environmental conditions may render the respirator canister or cartridges ineffective after a relatively short period of use. For example, test data gathered by OSHA (Ex. 6–27) on the service life of MSA canisters designed for EtO use showed breakthrough in less than 8 hours in some instances. The canisters were evaluated at 25°C, 85% relative humidity, and at a flow rate of 64 liters per minute. Two chin style canisters (one with an end-of-service life indicator window) and 2 supersize canisters (one also with an indicator window) were tested. MSA is planning to submit the indicator canisters to NIOSH for approval in the near future. The chin style canister with the indicator, challenged with a 100 ppm EtO test atmosphere, showed a 1% breakthrough at 90–120 minutes with the indicator changing color at 60–70 minutes. The other chin style canister challenged at 10 ppm EtO has a 1% breakthrough after 6 hours. The supersize canister with a window indicator showed a 1% breakthrough after 480 minutes when challenged with 1,000 ppm EtO; the indicator changed color at 300 minutes. The other super size canister also tested at 1,000 ppm, had a 1% breakthrough at 12–13 hours. It is apparent from data such as this that employers who choose to use air purifying respirators must fully evaluate and monitor their conditions of use in order to assure that they are adequately protecting the employee.

OSHA is interested in receiving canister test data such as that described above as well as additional comment regarding experiences in using air-purifying respirators and the efficacy of permitting the use of such respirators in the EtO standard.

Finally, the proposal requires that respirators required for protection from exposure to EtO shall be provided at no cost to the employee. OSHA views this allocation of costs to control employee exposure to EtO as being necessary to effectuate the purposes of the Act. The requirement makes explicit an agency position which has long been implicit in

health standards proceedings under section 6(b) of the Act.

8. *Paragraph (h). Emergency situations.* Available health data suggest that elevated short-term exposure to EtO should be viewed with concern. OSHA believes that an unexpected high exposure must be viewed as an emergency situation. The proposed requirements include development of a written plan where there is a possibility of an emergency and means to alert employees in the event that an emergency occurs. Employees involved in correcting the emergency conditions would be required to be provided with appropriate respirators and other protective equipment. Employees not involved in correcting the emergency conditions must be evacuated from area.

OSHA believes that these minimal requirements will provide the necessary means to ensure that affected employees are substantially protected against hazardous exposures.

9. *Paragraph (i). Medical surveillance.* The proposal requires, in paragraph (i)(1), each employer to institute a medical surveillance program for all employees who are or will be exposed at or above the action level for at least 30 days per year. Providing medical surveillance for employees exposed at or above the action level in consistent with other health standards which incorporate an action level and is considered by OSHA to be appropriate for monitoring the adequacy of the exposure limit specified.

Some employees may be assigned to work areas where they may be exposed to EtO at or above the action level on a temporary or short term basis. A cut-off point is, therefore, needed for the required medical surveillance program, since it would not be practical to require medical surveillance for every employee regardless of duration of exposure. It is important that the surveillance period selected be sufficiently inclusive but not administratively impractical. As a result of OSHA's experience gained in the inorganic arsenic and coke oven proceedings, the Agency has determined that 30 exposure days per year is an appropriate cut-off point for deciding which employees will be included in the medical surveillance program.

The proposal requires that the medical surveillance program provide each covered employee with an opportunity for a medical examination. Paragraph (i)(1)(ii) provides that all examinations and procedures be performed by or under the supervision of a licensed physician and be provided without cost to the employee. Clearly, a licensed physician is the appropriate person to be supervising and evaluating a medical examination. However, certain parts of the required examination do not necessarily require the physician's expertise and may be conducted by another person under the supervision of the physician.

The proposal requires that exams must be given at a reasonable time and place. It is necessary that exams be convenient and be provided without loss of pay to the employee to assure that they are taken.

The proposal allows the examining physician to prescribe the specific tests to be included in the medical surveillance program. Information presently available to OSHA is insufficient for the Agency to justify specification of the precise tests to be administered. Thus, it is believed that the examining physician is best qualified to make this judgment. Certain elements of an examination, however, are suggested in Appendix C as being appropriate considering the health data regarding carcinogenic, mutagenic, and reproductive effects. Thus, the proposal lists these elements and suggests that the physician consider their inclusion.

These elements include the following:

(i) Comprehensive medical and work histories with special emphasis directed to symptoms related to eyes, blood, blood forming organs, lungs, nervous and reproductive systems, and skin;

(ii) Comprehensive physical examination, with particular emphasis given to pulmonary, neurologic, reproductive, and ophthalmologic systems, blood forming organs, and the skin;

(iii) Complete blood count to include at least a white cell count, a differential count, hemoglobin, and hematocrit;

(iv) Screening for chromosome damage.

It is important to note that the employer is required to make any prescribed tests available more often than specified if recommended by the examining physician.

The proposal requires the employer to provide physician-recommended examinations to any employee exposed to high EtO exposures under emergency conditions. While little is known about the effects of high short-term exposures, it appears prudent to monitor such affected employees in light of existing health data.

The employer is required, in paragraph (i)(6), to provide the physician with the following information: a copy of this standard and its appendices; a description of the affected employee's duties as they relate to the employee exposure level; and information from the employee's previously medical examinations which is not readily available to the examining physician. Making this information available to the physician will aid in the evaluation of the employee's health in relation to assigned duties and fitness to wear personal protective equipment, when required.

The employer is required to obtain a written opinion from the examining physician containing the results of the medical examinations; the physician's opinion as to whether the employee has any detected medical conditions which would place the employee at increased risk of material health impairment from exposure to EtO; any recommended restrictions upon the employee's exposure to EtO or upon the use of protective clothing or equipment such as respirators; and a statement that the employee has been informed by the physician of the results of the medical examination and of any medical conditions which require further explanation or treatment. This written opinion must not reveal specific findings or diagnoses unrelated to occupational exposure to EtO, and a copy of the opinion must be provided to the affected employee.

The purpose in requiring the examining physician to supply the employer with a written opinion is to provide the employer with a medical basis to aid in the determination of initial placement of employees and to assess the employee's ability to use protective clothing and equipment. The requirement that a physician's opinion be in written form will ensure that employers have had the benefit of this information. The requirement that an employee be provided with a copy of the physician's written opinion will ensure that the employee is informed of the results of the medical examination. The purpose in requiring that specific findings or diagnoses unrelated to occupational exposure to EtO not be included in the written opinion is to encourage employees to take the medical examination by removing the concern that the employer will obtain information about their physical condition that has no relation to present occupational exposures.

10. *Paragraph (j). Employee information and training.* The proposed standard requires that all employers provide a training program for all employees exposed to airborne EtO at or above the action level.

OSHA has determined during other rulemakings that an information and training program is essential to inform employees of the hazards to which they are exposed and to provide employees with the necessary understanding of the

degree to which each employee can contribute toward minimizing health hazard potentials.

The content of the training program is intended to inform employees of: (1) The hazards to which they are exposed; (2) the necessary steps to protect themselves, including those to be taken during emergency situations; (3) limitations and the proper use of respirators and protective equipment; (4) a description of medical examinations and their purpose; (5) implementation of work practices and the use of available engineering controls; and (6) the contents of this standard. Section 6(b)(7) of the Act makes it clear that these are appropriate goals for an employee training program, and the proposed standard includes such provisions.

The employer is required to make a copy of the standard and its appendices available to affected employees and their representatives. This requirement, in combination with the review provided for as part of the training program, is intended to ensure that employees understand their rights and duties under this standard.

The employer is also required to provide, upon request, all materials relating to the training program to the Assistant Secretary and Director. This is intended to provide an objective check of compliance with the requirements under this paragraph.

OSHA recognizes that EtO may be only one of a number of substances to which an employee may be exposed simultaneously in the workplace. The education and training requirements in this standard contain those elements OSHA has determined to be basic. The format and content of the required training and information program are neither rigid nor extensive. An employer, may, if desired, incorporate the required information for EtO into a comprehensive program of training and education to be provided to employees.

The proposed standard requires that the training program be provided at least annually. OSHA believes that an annual training program is both necessary and sufficient to ensure that employees maintain a continuing awareness of the hazards of EtO and their rights and duties under the standard.

To increase the effectiveness of training goals the proposed standard requires that the training material be made available, without cost, to all affected employees or their representatives.

11. *Paragraph (k). Precautionary labels and signs.* The proposed standard requires that regulated areas be posted with signs stating: "Danger, Cancer and Reproductive Hazard, Authorized Personnel Only, Respirators and Protective Clothing May Be Required To Be Worn In This Area". The proposal also requires labelling of containers of EtO except when the EtO content is such as to make unlikely the possibility of exposure to EtO at or above the action level under the conditions of use likely to cause the highest possible exposure. The labels must state, "Danger, Contains Ethylene Oxide, Cancer and Reproductive Hazard" and must provide other appropriate warning against breathing airborne concentrations and contacting liquid EtO.

These requirements are consistent with section 6(b)(7) of the Act, which prescribes the use of labels or other appropriate forms of warning to apprise employees of the hazards to which they are exposed.

It is proposed that required labels would remain affixed to containers leaving the workplace. The purpose of this requirement is to assure that all affected employees, not only those of a particular employer, are apprised to the hazardous nature of EtO exposure where exposure could exceed the action level.

It is OSHA's view that informing employees of the hazards to which they are exposed is an important element in reducing occupational disease and injury, and one of the significant purposes of the Act. Section 6(b)(7) of the Act does not limit an employer's obligation to inform employees of hazardous conditions, to the employer's own employees. When an employer manufactures, formulates, or sells a product, the employer may create exposures not only to his or her own employees, but also to the employees of other employers involved in handling, transporting or using the product. The extent of the obligation to inform should be commensurate with the extent of the exposure. This is especially true where the manufacturer, formulator or seller will, in many cases, be the only employer capable, through his knowledge of the product, of providing the information necessary for protection of employees. A narrower reading of the statutory authority would defeat the protective purposes of the Act by effectively preventing the downstream employee from obtaining adequate information about the hazard Furthermore, the use of labels required by the standard will alert other employers who would not otherwise know of the presence of EtO in their workplace or their obligation to comply with the standard. OSHA therefore feels that this requirement is necessary and appropriate.

The proposal sets forth the specific legend to be used on the label. This language is adoted to provide uniformity with other OSHA standards and to indicate to employers precisely what is required. Requiring the label to include the statement "Cancer and Reproductive Hazard" is proposed as being appropriate in light of the available health data. These proposed requirements would be in addition to those mandated by the OSHA hazard communication standard proposed at 47 FR 12092 (March 19, 1982).

A number of EtO products which are utilized as sterilants are registered by the EPA as pesticides, in accordance with FIFRA. EPA must establish terms and conditions for the registration of such products which are sufficient to ensure that use of the products "will not generally cause unreasonable adverse effects on the environment." These terms and conditions may include restrictions and limitations on use which are specified on the label and which all users are obligated by law to comply with. For these reasons OSHA is proposing that the labeling requirements under this paragraph not apply to any EtO product registered as a pesticide, as such term is defined under FIFRA, for which labeling is required by EPA under FIFRA and regulation issued pursuant there to. OSHA feels that this provision is appropriate to mitigate any dual regulatory requirements pesticide registrants may face with regard to container labeling. It is OSHA's understanding, however, that EPA is presently developing EtO labelling requirements that will provide health warnings similar to those on the OSHA label (e.g., cancer and reproductive hazard).

The standard requires the posting of warning signs to demarcate regulated areas. These signs are intended to supplement the training which employees are required to receive under the standard. Even trained employees will need to be reminded of the locations of regulated areas and the dangers of entering these areas. In addition, other personnel, such as employees of independent maintenance contractors authorized to enter regulated areas, need to be reminded of the locations of regulated areas, the dangers of entering these areas, and the need to use protective equipment. OSHA believes that both signs and training are necessary to apprise employees adequately of the hazards associated with EtO exposure.

The standard specifies the wording of the warning signs for regulated areas to assure that the proper warning is given to employees. The word "Danger" is used to attract the attention of workers, to alert them to the fact that they are in a hazardous area (i.e., an area where the EtO airborne concentration exceeds the PEL) and to emphasize the importance of the message that follows. In addition, the use of the word "Danger" is consistent with recent OSHA health standards dealing with carcinogens. The proposed sign legend: "Respirators and Protective Clothing May Be Required to Be Worn In This Area," recognizes that there may be a difference between the EtO concentration in air, the basis used to determine when a regulated area must be established, and a particular employee's exposure. For example, there may be areas in which EtO concentrations exceed 5 pm but an employee's 8-hour TWA exposure might not exceed that level, because the employee may spend only a short time in that area.

In such instances, the employee may not be required to wear a respirator under the provisions set forth in paragraph (g). (As noted earlier, the proposal does not include any short-term exposure limit for EtO. The use of an STEL could affect many other provisions of the standard including signs and labels and the warnings to be listed thereon).

12. *Paragraph (1): Recordkeeping.* Section 8(c)(3) of the Act provides for the promulgation of regulations requiring employers to maintain accurate records of employee exposures to potentially toxic or harmful physical agents which are required to be monitored or measured.

The proposed standard requires that employers who rely on objective data to be exempted from the standard (paragraph (a)(2)) shall maintain records of such information to demonstrate that employees are not exposed to airborne EtO concentrations at or above the action level. In this respect, the objective data substitute for the initial monitoring requirements.

The proposal provides that records be kept to identify the employee monitored and to reflect the employee's exposure accurately. Specifically, records must include the following information: (a) The names and social security numbers of the employees sampled; (b) the number, duration, and results of each of the samples taken, including a description of the representative sampling procedure and equipment used to determine employee exposure where applicable; (c) a description of the operation involving exposure to EtO which is being monitored and the date on which monitoring is performed; (d) the type of respiratory protective devices, if any, worn by the employee; and (e) a description of the sampling and analytical methods used, and evidence of their accuracy.

The proposed standard also requires that the employer keep an accurate medical record for each employee subject to medical surveillance. Section 8(c) of the Act authorizes the promulgation of regulations requiring any employer to keep such records regarding the employer's activities relating to the Act as are necessary or appropriate for the enforcement of the Act or for developing information regarding the causes and prevention of occupational illnesses. OSHA believes that medical records, like exposure monitoring records, are necessary and appropriate to both the enforcement of the standard and the development of information regarding the causes and prevention of illness.

As explained above, it is necessary to relate employees' medical conditions to their exposures to develop information regarding cause and prevention. Medical records are necessary and appropriate for this purpose. In addition, medical records are necessary for the proper evaluation of the employee's health.

The proposed standard requires that all records required to be kept shall be made available upon request to the Assistant Secretary and the Director of NIOSH for examination and copying. Access to these records is necessary for the agencies to monitor compliance with the standard. These records may also contain essential information which is necessary for the agencies to carry out their other statutory responsibilities.

The proposal provides for employees, former employees, and their designated representative to have access to mandated records upon request. Section 8(c)(3) of the Act explicitly provides "employees or their representative with an opportunity to observe monitoring and to have access to the records of monitoring and exposures to toxic substances; and several other provisions of the Act contemplated that employees and their representatives are entitled to play an active role in the enforcement of the Act. Employees and their representatives need to know relevant information concerning employee exposure to toxic substances and their health consequences if they are to benefit fully from these statutory created rights. OSHA requests information as to whether details on monitoring procedures should be provided to employees who observe monitoring activities under this paragraph.

In addition, the proposal specifies that access to exposure and medical records by employees, designated representatives, and OSHA shall be in accordance with 29 CFR 1910.20. Section 1910.20 is OSHA's recently promulgated generic standard for access to employee exposure and medical records (45 FR 35212). By its terms, it applies as to records required by specific standards, such as this EtO standard, as well as records which are voluntarily created by employers. In general, it provides for unrestricted employee and designated representative access to exposure records. Access to medical records is also provided for employees and, if the employee has given specific written consent, for the employee's designated representatives. OSHA retains unrestricted access to both kinds of records, but its access to personally identifiable records is made subject to rules of agency practice and procedure concerning OSHA access to employee medical records, which have been published at 29 CFR 1913.10. An extensive discussion of the provisions and rationale for § 1920.20 may be found at 45 FR 35312; the discussion of § 1913.10 may be found at 45 FR 35384. It is noted that revisions to the access to records standard are being developed in an ongoing rulemaking proceeding (45 FR 35212). The EtO standard may be affected by any changes which result from that rulemaking effort.

It is necessary to keep records for extended periods because of the long latency periods commonly observed for carcinogens. Cancer often cannot be detected until 20 or 30 more years after onset of exposure. The extened retention period is therefore needed for two purposes. Diagnosis of disease in employees in assisted by having present and past exposure data as well as the results of the medical exams. Retaining records for extended periods also makes it possible at some future date to review the adequacy of the standard.

The time periods proposed for retention of exposure records and medical records are thirty years, and period of employment plus thirty years, respectively. These retention periods are consistent with those in the OSHA records access standard. Comment is requested as to whether the retention periods for exposure records and medical records should be the same, and if so, what those periods should be.

The proposal requires employers to notify the Director in writing at least 3 months prior to the disposal of the records. Section 1910.20(h) also contains

requirements regarding the transfer of records. Therefore, the employer is also required to comply with any additional requirements set forth in that standard.

13. *Paragraph (m). Observation of monitoring.* Section 8(c) of the Act requires that employers provide employees and their representatives with the opportunity to observe monitoring of employee exposures to toxic subtances or harmful physical agents. In accordance with this section, the proposal contains provisions for such observation of monitoring of EtO exposures.

The observer, whether an employee or a designated representative, must be provided with, and is required to use, any personal protective equipment required to be worn by employees working in the area that is being monitored, and must comply with all other applicable safety and health procedures.

14. *Paragraph (n). Effective date*—As proposed, the final rule would become effective thirty (30) days following publication in the **Federal Register**. OSHA requests comment on whether additional time should be privided. The Agency also solicits information and supporting data on "start-up periods" and delayed implementation dates which may be necessary for various provisions of the standard.

15. *Appendices.* Four appendices have been included in this proposed standard. These appendices have been included primarily for purposes of information. None of the statements contained therein should be construed as establishing a mandatory requirement not otherwise imposed by the standards, or as detracting from an obligation which the standard does impose.

The information contained in Appendices A and B is designed to aid the employer in complying with requirements of the standard. The information in Appendix C primarily provides information needed by the physician to evaluate the results of the medical examination. It should be noted that paragraph (i) specifically requires that the information contained in Appendices A and B be provided to employees as part of their information and training program.

Appendix D gives details of the OSHA sampling method for use in monitoring employee exposures to EtO.

28. *References.* The studies and other data listed below as well as the additional material referred to in this document represent the primary sources upon which the proposal is based. A complete set of the references is available for examination and copying at the OSHA Technical Data Center, Docket Office, Room S6212, U.S. Department of Labor, Third Street and Constitution Avenue NW., Washington, D.C. 20210, between 8:30 am. and 4:30 pm, Monday through Friday, legal holidays excepted.

VI. Public Participation—Notice of Hearing

Interested persons are invited to submit written data, views, and arguments with respect to this proposed standard. These comments must be postmarked on or before June 17, 1983, and submitted in quadruplicate to the Docket Officer, Docket No. H–200, Room S–6212, U.S. Department of Labor, Third Street and Constitution Avenue N.W., Washington, D.C. 20210. Written submissions must clearly identify the provisions of the proposal which are addressed and the position taken with respect to each issue.

The data, views, and arguments that are submitted will be available for public inspection and copying at the above address. All timely written submissions will be made a part of the record of the proceeding.

Pursuant to section 6(b)(3) of the Act, an opportunity to submit oral testimony concerning the issues raised by the proposed standard including economic and environmental impacts, will be provided at an informal public hearing scheduled to begin at 10:00 A.M. on July 19, 1983, in the Auditorium, Frances Perkins Building, U.S. Department of Labor, Third Street and Constitution Avenue, N.W., Washington, D.C. 20210.

Notice of Intention To Appear

All persons desiring to participate at the hearng must file in quadruplicate a notice of intention to appear, postmarked on or before June 17, 1983, addressed to Mr. Tom Hall, OSHA Division of Consumer Affairs, Docket No. H–200, Room N–3635, U.S. Department of Labor, Third Street and Constitution Avenue NW., Washington, D.C. 20210; telephone 202–523–8024.

The notices of intention to appear, which will be available for inspection and copying at the OSHA Technical Data Center-Docket Office (Room S6212), telephone 202–523–7895, must contain the following information:

(1) The name, address, and telephone number of each person to appear;

(2) The capacity in which the person will appear;

(3) The approximate amount of time requested for the presentation;

(4) The specific issues that will be addressed;

(5) A detailed statement of the position that will be taken with respect to each issue addressed; and

(6) Whether the party intends to submit documentary evidence, and if so, a brief summary of that evidence.

Filing of Testimony and Evidence Before Hearing

Any party requesting more than 10 minutes for a presentation at the hearing, or who will submit documentary evidence, must provide in quadruplicate the complete text of his testimony, including any documentary evidence to be presented at the hearing, to the OSHA Division of Consumer Affairs. This material must be received by July 1, 1983 and will be available for inspection and copying at the Technical Data Center-Docket Office. Each such submission will be reviewed in light of the amount of time requested in the notice of intention to appear. In those instances where the information contained in the submission does not justify the amount of time requested, a more appropriate amount of time will be allocated and the participant will be notified of that fact.

Any party who has not substantially complied with this requirement may be limited to a 10-minute presentation, and may be requested to return for questioning at a later time.

Conduct of Hearing

The hearing will commence at 10:00 a.m. on Tuesday, July 19, 1983, with resolution of any procedural matters relating to the proceeding. The hearing will be conducted in accordance with 29 CFR Part 1911. In view of the nature of this rulemaking proceeding, the hearing will be conducted in as expedited a manner as possible with a full development of the record and the rights of the parties.

The hearing will be presided over by an Administrative Law Judge who will have all the powers necessary or appropriate to conduct a full and fair informal hearing as provided in 29 CFR Part 1911. Following the close of the hearing or of any posthearing comment period, the presiding Administrative Law Judge will certify the record to the Assistant Secretary of Labor for Occupational Safety and Health. The proposed permanent standard will be reviewed in light of all oral and written submissions received as part of the record, and a permanent standard for occupational exposure to ethylene oxide will be issued, based upon the entire record in this proceeding.

Authority

This document was prepared under the direction of Thorne G. Auchter, Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, Third Street and Constitution Avenue N.W., Washington D.C. 20210.

Pursuant to sections 6(b) and 8 of the Occupational Safety & Health Act (29 U.S.C. 655, 657), it is hereby proposed to amend Part 1910 of 29 CFR by adding new § 1910.1047 as set forth below and delete the reference to ethylene oxide from Table Z–1 of section 1910.1000. In addition, pursuant to section 4(b)(2) of the Act, OSHA has determined that this new standard would be more effective than the corresponding standards now in Subpart B of Part 1910, and in Parts 1915, 1918, and 1926 of Title 29, Code of Federal Regulations. Therefore, these corresponding standards would be superseded by this new section 1910.1047. This determination, and the application of the new standard to the maritime and construction industries, would be implemented by adding a new paragraph (h) to § 1910.19.

List of Subjects in 29 CFR Part 1910

Ethylene oxide, Occupational safety and health, Chemicals, Cancer, Health risk—assessment.

(Secs. 4, 6, and 8, of the Occupational Safety and Health Act of 1970 (29 U.S.C. 653, 655, 657); Secretary of Labor's Order 8–76 (41 FR 25059); 29 CFR Part 1911)

Signed at Washington, D.C., this 15th day of April 1983.

Thorne G. Auchter,

Assistant Secretary of Labor.

Part 1910 of Title 29 of the Code of Federal Regulations is therefore proposed to be amended as follows:

1. By adding a new paragraph (h) to § 1910.19 to read as follows:

§ 1910.19 Special provisions for air contaminants.

* * * * *

(h) *Ethylene oxide.* Section 1910.1047 shall apply to the exposure of every employee to ethylene oxide in every employment and place of employment covered by § 1910.12, § 1910.13, § 1910.14, § 1910.15, or § 1910.16, in lieu of any different standard on exposure to ethylene oxide which would otherwise be applicable by virtue of those sections.

§ 1910.1000 [Amended]

2. By removing the entry "Ethylene oxide . . . 50 ppm . . . 90 mg/m ^{3}" from Table Z–1 of § 1910.1000.

3. By adding a new § 1910.1047 to read as follows:

§ 1910.1047 Ethylene oxide.

(a) *Scope and application.* (1) This section applies to all occupational exposures to ethylene oxide (EtO),

Chemical Abstracts Service Registry No. 75-21-8, except as provided in paragraph (a)(2) of this section.

(2) This section does not apply to the processing, use, and handling of products containing EtO where objective data are reasonably relied upon that demonstrates that the product is not capable of releasing EtO in excess of the action level under the expected conditions of processing, use, and handling which will cause the greatest possible release.

(3) Where products containing EtO are exempted under paragraph (a)(2) of this section, the employer shall maintain records of the objective data supporting that exemption and the basis for the employers' reliance on the data, as provided in pargraph (l)(1) of this section.

(b) *Definitions:* For the purpose of this section, the following definitions shall apply:

"*Action level*" means a concentration of airborne EtO of 0.5 ppm calculated as an eight (8)-hour time-weighted average.

"*Assistant Secretary*" means the Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, or designee.

"*Authorized person*" means any person specifically authorized by the employer whose duties require the person to enter a regulated area, or any person entering such an area as a designated representative of employees for the purpose of exercising the right to observe monitoring and measuring procedures under paragraph (m) of this section, or any other person authorized by the Act or regulations issued under the Act.

"*Director*" means the Director of the National Institute for Occupational Safety and Health, U.S. Department of Health and Human Services, or designee.

"*Emergency*" means any occurrence such as, but not limited to, equipment failure, rupture of containers, or failure of control equipment which is likely to, or does result in an unexpected massive release of EtO.

"*Employee exposure*" means exposure to airborne EtO which would occur if the employee were not using respiratory protective equipment.

"*Ethylene oxide*" or "EtO" means the three-membered ring organic compound with chemical formula C_2H_4O.

(c) *Permissible exposure limit (PEL).* The employer shall assure that no employee is exposed to an airborne concentration of EtO in excess of one part of EtO per million parts of air (1 ppm) as an eight (8)-hour time-weighted average (8-hour TWA).

(d) *Exposure monitoring.* (1) *General.* (i) Determinations of employee exposure shall be made from breathing zone air samples that are representative of each employee's exposure to airborne EtO over an eight (8) hour period.

(ii) Representative employee exposure shall be determined on the basis of at least one sample or consecutive samples covering the full shift for each shift for each job classification in each work area.

(iii) Where the employer can document that exposure levels are equivalent for similar operations in different work shifts, the employer shall only be required to determine representative employee exposure for that operation during one shift.

(2) *Initial monitoring.* Each employer who has a workplace or work operation covered by this standard shall perform monitoring to determine accurately the airborne concentrations of EtO to which employees may be exposed, except as provided for in paragraph (a)(2) of this section.

(3) *Monitoring frequency (periodic monitoring).* (i) If the monitoring required by paragraph (d)(2) of this section reveals employee exposure at or above the action level but at or below the PEL, the employer shall repeat such monitoring for each such employee at least every 6 months.

(ii) If the monitoring required by paragraph (d)(2) of this section reveals employee exposure above the PEL, the employer shall repeat such monitoring for each such employee at least every 3 months.

(iii) The employer may alter the monitoring schedule from quarterly to semianually for any employee for whom two consecutive measurements taken at least 7 days apart indicate that the employee exposure has decreased to the PEL or below.

(4) *Termination of monitoring.* (i) If the initial monitoring required by paragraph (d)(2) of this section reveals employee exposure to be below the action level the employer may discontinue the monitoring for that employee.

(ii) If the periodic monitoring required by paragraph (d)(3) of this section reveals that employee exposures, as indicated by at least two consecutive measurements taken at least 7 days apart, are below the action level the employer may discontinue the monitoring for that employee.A

(5) *Additional monitoring.* The employer shall institute the exposure monitoring required under paragraphs (d)(2) and (d)(3) of this section when there has been a change in the production, process, control equipment, personnel or work practices which may result in new or additional exposures to EtO or when the employer has any reason to suspect a change which may result in new or additional exposures.

(6) *Accuracy of monitoring.* Monitoring shall be accurate, to a confidence level of 95 percent, to within plus or minus 25 percent for airborne concentrations of EtO at 1 ppm and to within plus or minus 35 percent for airborne concentrations of EtO at the action level of 0.5 ppm.

(7) *Employee notification of monitoring results.* (i) The employer shall, within 10 working days after the receipt of the results of any monitoring performed under this standard, notify the affected employee of these results in writing either individually or by posting of results in an appropriate location that is accessible to affected employees.

(ii) The written notification required by paragraph(d)(7)(i) of this section shall contain the corrective action being taken by the employer to reduce employee exposure to or below the PEL, wherever the PEL is exceeded.

(3) *Regulated Areas.* (1) The employer shall establish a regulated area wherever the airborne concentration of EtO is above 1 ppm calculated as an 8-hour time-weighted average.

(2) Access to regulated areas shall be limited to authorized persons.

(3) Regulated areas shall be demarcated in any manner that minimizes the number of employees exposed to EtO within the regulated area.

(f) *Methods of compliance.* (1) *Engineering controls and work practices.* (i) The employer shall institute engineering controls and work practices to reduce and maintain employee exposure to or below the PEL, except to the extent that the employer can establish that such controls are not feasible.

(ii) Wherever the feasible engineering controls and work practices which can be instituted are not sufficient to reduce employee exposure to or below the PEL, the employer shall use them to reduce employee exposure to the lowest levels achievable by these controls and shall supplement them by the use of respiratory protection which complies with the requirements of paragraph (g) of this section.

(2) *Compliance program.* (i) The employer shall establish and implement a written program to reduce employee exposure to or below the PEL solely by means of engineering and work practice controls, as required by paragraph (f)(1) of this section. The program shall

include a schedule for periodic leak detection surveys.

(ii) Written plans for such a program shall be developed and furnished upon request for examination and copying to the Assistant Secretary, the Director, affected employees and designated employee representatives. Such plans shall be reviewed at least every 12 months to reflect the current status of the program and revised as necessary.

(g) *Respiratory protection.* (1) *General.* The employer shall provide respirators, and assure that they are used, where required by this section. Respirators shall be used in the following circumstances.

(i) During the interval necessary to install or implement feasible engineering and work practice controls;

(ii) In work operations, such as maintenance and repair activities or vessel cleaning, for which the employer establishes that engineering and work practice controls are not feasible;

(iii) In work situations where feasible engineering and work practice controls are not yet sufficient to reduce exposure to or below the PEL; and

(iv) In emergencies.

(2) *Respirator selection.* (i) Where respirators are required under this section, the employer shall select and provide, at no cost to the employee, the appropriate respirator as specified in Table 1, and shall assure that the employee uses the respirator provided.

(ii) The employer shall select respirators from among those jointly approved for protection against ethylene oxide by the Mine Safety and Health Administration (MSHA) and by the National Institute for Occupational Safety and Healath (NIOSH) under the provisions of 30 CFR Part 11. *Exception:* Air-purifying respirators shall be selected by the employer from those with joint MSHA/NIOSH approval for protection against organic vapors.

(3) *Respirator program.* (i) The employer shall institute a respiratory program in accordance with 29 CFR 1910.134(b), (d), (e), and (f).

(ii) Where air-purifying respirators are used, the air-purifying element shall be replaced prior to the expiration of their service life or at the completion of each shift, whichever occurs first. A label shall be attached to the air-purifying element to indicate the date and time at which it is first installed on the respirator.

TABLE 1.—MINIMUM REQUIREMENTS FOR RESPIRATORY PROTECTION FOR AIRBORNE ETO

Condition of use or concentration of airborne EtO (ppm)	Minimum required respirator
Equal to or less than 50.	(a) Full facepiece respirator with organic vapor gas mask canister, front- or back-mounted.
Equal to or less than 2,000.	(a) Positive-pressure supplied air respirator, equipped with full facepiece, hood, or helmet, or (b) Continuous-flow supplied air respirator (positive pressure) equipped with hood, helmet or suit.
Concentration above 2,000 or unknown concentration (such as in emergencies).	(a) Positive-pressure self-contained breathing apparatus (SCBA), equipped with full facepiece, or (b) Positive-pressure full facepiece supplied air respirator equipped with an auxiliary positive-pressure selfcontained breathing apparatus.
Firefighting	(a) Positive pressure self-contained breathing apparatus equipped with full facepiece.
Escape	(a) Any respirator described above.

(h) *Emergency situations.* (1) *Written plan.* (i) A written paln for emergency situations shall be developed for each workplace where there is a possibility of an emergency. Appropriate portions of the plan shall be implemented in the event of an emergency.

(ii) The paln shall specifically provide that employees engaged in correcting emergency conditions shall be equipped with respiratory protection as required in paragraph (g) of this section until the emergency is abated.

(2) *Alerting employees.* Where there is the possibility of employees exposure to EtO due to an emergency, means shall be developed to alert potentially affected employees of such occurrences promptly. Affected employees shall be immediately evacuated in the event that an emergency occurs.

(i) *Medical Surveillance.* (1)*General.* (i) *Employees covered.* (A) The employer shall institute a medical surveillance program for employees who are or will be exposed to EtO at or above the action level, without regard to the use of respirators, for at least 30 days in the year;

(B) Employees who have been exposed to an emergency shall be provided medical examinations as set forth in paragraph (i) (5) of this section.

(ii) *Examination by physician.* The employer shall assure that all medical examinations and procedures are performed by or under the supervision of a licensed physician, and are provided without cost to the employee, without loss of pay and at a reasonable time and place.

(2) *Initial examinations.* At the time of initial assignment to an area where the employee is likely to be exposed at or above the action level for 30 days or more in the year, and for all employees who have been exposed to an emergency by paragraph (i)(1)(i) of this section, the employer shall provide each employee an opportunity for a medical examination comprised of tests deemed appropriate by the examining physician. It is recommended that the physician consider including at least the elements suggested in Appendix C to this section in the examination:

(3) *Periodic examinations.* The employer shall provide the examinations deemed appropriate by the examining physician as specified in paragraph (i)(2) of this section at least annually for all employees specified in paragraph (i)(1)(i)(A) of this section.

(4) *Additional examination.* If the examining physician determines that any of the examinations should be provided more frequently than specified, the employer shall provide such examinations to affected employees at the frequencies recommended by the physician.

(5) *Examinations upon occurrence of an emergency.* (i) The employer shall provide appropriate medical examinations as described in paragraph (i)(2) of this section to each employee exposed to EtO due to the occurrence of an emergency.

(ii) The physician shall determine the frequency of any periodic examinations and recommend any additional examinations beyond those required by paragraph (i)(2) of this section, if deemed necessary, for each employee exposed the EtO because of an emergency.

(iii) The employer shall provide the examinations recommended by the physician at the frequencies determined necessary by the physician.

(6) *Information provided to the physician.* The employer shall provide the following information to the examining physician:

(i) A copy of this standard and Appendices A, B, and C;

(ii) A description of the affected employee's duties as they relate to the employee's exposure;

(iii) The employee's representative exposure level or anticipated exposure level;

(iv) A description of any personal protective equipment used or to be used; and

(v) Information from previous medical examinations of the affected employee which is not otherwise available to the examining physician.

(7) *Physician's written opinion.* (i) The employer shall obtain a written opinion from the examining physician which shall include:

(A) The physician's opinion as to whether the employee has any detected medical conditions which would place the employee at increased risk of material health impairment from exposure to EtO;

(B) Any recommended limitations on the employee's exposure to EtO or upon the use of personal protective equipment such as clothing or respirators; and

(C) A statement that employee has been informed by the physician of the results of the medical examination and any medical conditions resulting from EtO exposure which require further explanation or treatment.

(ii) The employer shall instruct the physician not to reveal in the written opinion given to the employer specific findings or diagnoses unrelated to occupational exposure.

(iii) The employer shall provide a copy of the physician's written opinion to the affected employee within 15 days from its receipt.

(j) *Employee information and training.* (1) *Training program.*

(i) The employer shall provide a training program for all employees exposed to EtO at or above the action level.

(ii) The training program shall be provided at the time of initial assignment, or upon institution of the training program, and at least annually thereafter. The employer shall assure that each employee is informed of the following:

(A) The information in the substance data sheets for EtO, which are contained in Appendices A and B;

(b) The nature of operations which could result in exposure to EtO above the PEL, includling potential emergency situations and any necessary protective steps;

(C) The purpose, proper use, and limitations of respirators the employee may be required to use;

(D) The purpose and a description of the medical surveillance program required by paragraph (i) of this section and the information contained in Appendix C;

(E) Emergency procedures required by paragraph (h) of this section;

(F) The proper use of engineering and work practice controls, including their functions and the employee's relationship to these controls; and

(G) The content of this standard.

(2) *Access to training materials.* (i) The employer shall make readily available to all affected employees and their representatives, without cost to the employee, a copy of this standard and its appendices and all materials relating to the employee information and training program.

(ii) All materials relating to the employee information and training program shall be provided upon request to the Assistant Secretary and the Director.

(k) *Precautionary labels and signs.* (1) *General.* (i) The employer may use labels or signs required by other statutes, regulations, or ordinances in addition to or in combination with signs and labels required by this paragraph.

(ii) The employer shall assure that no statement appears on or near any sign or label required by this paragraph which contradicts or detracts from the meaning of the required sign or label.

(2) *Labels.* (i) The employer shall assure that precautionary labels are affixed to all containers or EtO, whose contents are capable of causing employee exposure at or above the action level, and that the labels remain affixed when the containers of EtO leave the workplace. For the purposes of this paragraph, reaction vessels, storage tanks, and pipes or piping systems are not considered to be containers.

(ii) Precautionary labels shall bear at least the following legend and information:

(A) DANGER
CONTAINS ETHYLENE OXIDE
CANCER AND REPRODUCTIVE HAZARDS; and

(b) A warning statement against breathing airborne concentrations of EtO.

(iii) The labeling requirements under this section do not apply where EtO is used as a pesticide, as such term is defined in the Federal Insecticide, Fundicide, and Rodenticide Act (7 U.S.C. ss136 et seq.), when it is labeled pursuant to that Act and regulations issued under that Act by the Environmental Protection Agency;

(3) *Signs.* (i) The employer shall post and maintain legible signs demarcating regulated areas and entrances or accessways to regulated areas.

(ii) The sign shall bear the following legend:
DANGER
ETHYLENE OXIDE
CANCER AND REPRODUCTIVE HAZARD
AUTHORIZED PERSONNEL ONLY
RESPIRATORS AND PROTECTIVE CLOTHING MAY BE REQUIRED TO BE WORN IN THIS AREA

(l) *Recordkeeping.* (1) *Objective data for exempted operations.*

(i) Where the processing, use, and handling of products made from or containing EtO are exempted from other requirements of this section under paragraph (a)(2) of this section, the employer shall establish and maintain an accurate record of objective data reasonably relied upon in support of the exemption.

(ii) This record shall include at least the following information:

(A) The product qualifying for exemption;

(B) The source of the objective data;

(C) The testing protocol, results of testing, and/or analysis of the material for the release of EtO;

(D) A description of the operation exempted and how the data support the exemption; and

(E) Other data relevant to the operations, materials, and processing covered by the exemption.

(iii) The employer shall maintain this record for the duration of the employer's reliance upon such objective data.

(2) *Exposure measurements.* The employer shall keep an accurate record of all measurements taken to monitor employee exposure to EtO as prescribed in paragraph (d) of this section.

(i) This record shall include:

(A) The date of measurement;

(B) The operating involving exposure to EtO which is being monitored;

(C) Sampling and analytical methods used and evidence of their accuracy;

(D) Number, duration, and results of samples taken;

(E) Type of protective devices worn, if any; and

(F) Name, social security number and exposure of the employee monitored.

(ii) This record shall be maintained for at least thirty (30) years.

(3) *Medical surveillance.* (i) The employer shall establish and maintain an accurate record for each employee subject to medical suveillance under paragraph (i) of this section.

(ii) The record shall include:

(A) The name and social security number of the employee;

(B) Physican's written opinions;

(C) Any employee medical complaints related to exposure to EtO;

(D) The A copy of the information provided to the physican as required by paragraph (i)(6) of this section; and

(E) The results of the medical examination and tests performed.

(iii) The employer shall assure that this record is maintained for the duration of employment plus thirty (30) years.

(4) *Availability.*

(i) The employer shall make all records required to be maintained by this section available, upon written request, to the Assistant Secretary and the Director for examination and copying.

(ii) Exemption and exposure records required by paragraphs (1)(1) and (1)(2)

of this section shall be provided upon request, for examination and copying, to the affected employees, former employees, designated representatives and the Assistant Secretary.

(iii) Employee medical records required by paragraph (1)(3) of this section shall be provided upon request, for examination and copying, to the subject employee, anyone having the specific written consent of the subject employee, and the Assistant Secretary.

(iv) The employer shall provide the records required under this section in accordance with § 1910.20.

(5) *Transfer of records.* (i) When the employer ceases to do business, the employer shall transfer such records to the successor employer, who shall receive and retain all records required to be maintained by this section for the prescribed period.

(ii) Whenever the employer ceases to do business and there is no successor employer to receive and retain the records required to be maintained by this section for the prescribed period, these records shall be transmitted to the Director.

(iii) At the expiration of the retention period for the records required to be maintained by this section, the employer shall notify the Director in writing at least 3 months prior to the disposal of such records and shall transmit these records to the Director within that period, if so requested by the Director.

(iv) The employer shall also comply with any additional requirements concerning transfer of records set forth in 29 CFR 1910.20(h).

(m) *Observation of monitoring.* (1) *Employee observation.* The employer shall provide affected employees or their designated representatives an opportunity to observe any monitoring of employee exposure to EtO conducted in accordance with paragraph (d) of this section.

(2) *Observation procedures.* When observation of the monitoring of employee exposure to EtO requires entry into an area where the use of protective clothing or equipment is required, the observer shall be provided with and required to use such clothing and equipment and shall comply with all other applicable safety and health procedures.

(n) *Effective date.* This section shall become effective thirty (30) days following publication.

(o) *Appendices.* The information contained in the appendices is not intended by itself to create any additional obligations not otherwise imposed or to detract from any existing obligation.

APPENDIX A—SUBSTANCE SAFETY DATA SHEET FOR ETHYLENE OXIDE

I. Substance Identification

A. *Substance:* Ethylene oxide (C_2H_4O).

B. *Synonyms:* Anprolene, dihydrooxirene, dimethylene oxide, EO, 1,2-epoxyethane, EtO, ETO, oxacyeloropropane, oxane, oxidoethane, alpha/beta-oxidoethane, oxiran, oxirane.

C. Ethylene Oxide can be found as a liquid or vapor.

D. EtO is used in the manufacture of ethylene glycol, polyester fibers, bottles and films, sufacants, ethanolamines, glycol ethers, and other organic chemicals. EtO is also used as a sterilant and fumigant.

E. *Appearance and odor:* Colorless liquid below 10.4°C (50.7°F) or colorless gas with ether-like odor detected at 500 parts EtO per million parts of air (500 ppm).

F. *Permissible Exposure:* Exposure many not exceed 1 part EtO per million parts of air (1 ppm) averaged over the 8-hour work day.

II. Health Hazard Data

A. Ethylene oxide can affect your body if you inhale the vapor (breathing), if it comes in contact with your eyes or skin, or if you swallow it.

B. *Effects of over exposure:*

1. *Short-term exposure:* Ethylene oxide in liquid form can cause eye irritation and injury to the cornea, frostbite, and severe irritation and blistering of the skin upon prolonged or confined contact. Ingestion of EtO can cause gastric irritation and liver injury. Acute effects from inhalation of EtO vapors include respiratory irritation and lung injury, headache, nausea, vomiting, diarrhea, dyspnea and cyanosis.

2. *Long-term-exposure:* EtO has been shown to cause cancer in laboratory animals and has been associated with higher incidences of cancer in humans. Adverse reproductive effects and chromosome damage may also occur from EtO exposure.

3. *Reporting signs and symptoms:* You should inform your employer if you develop any signs or symptoms and suspect that they are caused by exposure to EtO.

III. Emergency First Aid Procedures

A. *Eye exposure:* If EtO gets into your eyes, wash your eyes immediately with large amounts of water, lifting the lower and upper lids occasionally. Get medical attention immediately. Contact lenses should not be worn when working with this chemical.

B. *Skin exposure:* If EtO gets on your skin, immediately wash the contaminated skin with water. If EtO soaks through your clothing, especially you shoes, remove the clothing immediately and wash the skin with water. If symptoms occur after washing, get medical attention immediately. Thoroughly wash the clothing before reusing. Contaminated leather shoes or other leather articles should be discarded.

C. *Inhalation:* If you or any other person breathes in large amounts of EtO, move the exposed person to fresh air at once. If breathing has stopped, perform artificial respiration. Keep the affected person warm and at rest. Get medical attention as soon as possible.

D. *Swallowing:* When EtO has been swallowed, give the person large quantities of water immediately. After the water has been swallowed, try to get the person to vomit by having him touch the back of his throat with his finger. Do not make an unconscious person vomit. Get medical attention immediately.

E. *Rescue:* Move the affected person from the hazardous exposure. If the exposed person has been overcome, notify someone else and put into effect the established emergency procedures. Do not become a casualty yourself. Understand your emergency rescue procedures and know the location of the equipment before the need arises.

F. *Special first aid procedures:* When a person is suspected of receiving an overexposure to EtO, immediately remove that person from the contaminated area using established rescue procedures. Contaminated clothing must be removed and the EtO washed from the skin immediately. Artificial respiration should be started at once if breathing has stopped. Medical aid should be obtained immediately

IV. Respirators and Protective Clothing

A. *Respirators:* You may be required to wear a respirator for nonroutine activities, in emergencies, while your employer is in the process of reducing EtO exposures through engineering controls or where engineering controls are not feasible. If air-purifying respirators are worn, they must have a joint Mine Safety and Health Administration (MSHA or MESA) and National Institute for Occupational Safety and Health (NIOSH) label of approval for use with organic vapors. For effective protection, respirators must fit your face and head snugly. Respirators should not be loosened or removed in work situations where their use is required.

EtO does not have a detectable odor except at levels well above the permissible exposure limits. Do not depend on odor to warn you when a respirator canister is exhausted. Canisters must be labeled as to when they are first put into service and must be changed daily or before the end-of-service life, whichever comes first. Reuse of these may allow gradual penetration of EtO through the filter and cause exposures which you cannot detect by odor. If you can smell EtO while wearing a respirator, proceed immediately to fresh air. If you experience difficulty breathing while wearing a respirator, tell your employer.

B. *Protective clothing:* You may be required to wear impervious clothing, gloves, face shield, or other appropriate protective clothing to prevent skin contact with liquid EtO. Where protective clothing is required, your employer is required to provide clean garments to you as necessary to assume that the clothing protects you adequately.

Replace or repair impervious clothing that has developed leaks.

EtO should never be allowed to remain on the skin. clothing and shoes which are not impervious to EtO should not be allowed to become contaminated with EtO, and if they do, the clothing and shoes should be promptly removed and decontaminated. The

clothing should be laundered or discarded after the EtO is removed. Once EtO penetrates shoes or other leather articles, they should not be worn again.

C. *Eye protection:* You must wear splashproof safety goggles in areas where liquid EtO may contact your eyes. In addition, contact lenses should not be worn in areas where eye contact with EtO can occur.

V. Precautions for Safe Use, Handling, and Storage

A. EtO is a flammable liquid, and its vapors can easily form explosive mixtures in air.

B. EtO must be stored in tightly closed containers in a cool, well-ventilated area, away from heat, sparks, flames, strong oxidizers, strong bases, acetylide-forming metals such as copper, silver, mercury and their alloys, alkalines, and acids.

C. Sources of ignition such as smoking and open flames are prohibited wherever EtO is handled, used, or stored in a manner that could create a potential fire or explosion hazard.

D. You should use non-sparking tools when opening or closing metal containers of EtO, and containers must be bonded and grounded when pouring or transferring liquid EtO.

E. You should immediately remove any nonimpervious clothing that becomes wetted with EtO, and this clothing should not be reworn until the EtO is removed from the clothing.

F. Impervious clothing wet with liquid can be easily ignited. This clothing should be washed down with water before you remove it.

G. If your skin becomes wet with liquid, you should promptly and thoroughly wash or shower with soap or mild detergent to remove any EtO from your skin.

H. You should not keep food, beverages, or smoking materials, nor are you permitted to eat or smoke in regulated areas where EtO concentrations are above the permissible exposure limits.

I. Fire extinguishers and quick drenching facilities must be readily available, and you should know where they are and how to operate them.

J. Ask your supervisor where EtO is used in your area and for any additional plant safety and health rules.

VI. Access to Information

A. Each year, your employer is required to inform you of the information contained in this Substance Safety Data Sheet for EtO. In addition, your employer must instruct you in the proper work practices for using EtO emergency procedures, and the correct use of protective equipment.

B. Your employer is required to determine whether you are being exposed to EtO. You or your representative has the right to observe employee measurements and to record the results obtained. Your employer is required to inform you of your exposure. If your employer determines that you are being overexposed, he or she is required to inform you of the actions which are being taken to reduce your exposure to within permissible exposure limits.

C. Your employer is required to keep records of your exposures and medical examinations. These exposure records must be kept by the employer for at least thirty (30) years. Medical records must be kept for the period of your employment plus thirty (30) years.

D. Your employer is required to release your exposure and medical records to your physician upon your written request.

APPENDIX B—SUBSTANCE TECHNICAL GUIDELINES FOR ETHYLENE OXIDE

I. Physical and Chemical Data

A. Substance identification

1. *Synonyms:* Anprolene, dihydrooxirene, dimethylene oxide, EO, 1,2-epoxyethane, EtO, ETO oxacyclopropane, oxane, oxidoethane, alpha/beta-oxide ethane, oxiran, oxirane.
2. *Formula:* (C_2H_4O).
3. *Molecular weight:* 44.06

B. Physical data

1. Boiling point (760 mm hg): 10.4°C (50.7°F);
2. *Specific gravity (water = 1 at 4°):* 0.87 (at 20°C or 68°F);
3. *Vapor density (air = 1):* 1.49;
4. *Vapor pressure (at 20°C):* 1,095 mm Hg;
5. *Solubility in water:* complete;
6. *Appearance and odor:* Colorless liquid or gas (above 10.4°C or 50.7°F) with ether-like order above 500 ppm.

II. Fire, Explosion, and Reactivity Hazard Data

A. Fire

1. *Flash point:* less than 0°F (open cup)
2. *Stability:* decomposes violently at temperatures above 800°F;
3. *Flammable limits in air, percent by volume:* Lower: 3, Upper: 100
4. *Extinguishing media:* Carbon dioxide for small fires, polymer or alcohol foams for large fires;
5. *Special fire fighting procedures:* Dilution of ethylene oxide with 23 volumes of water renders it non-flammable;
6. *Unusual fire and explosion hazards:* Vapors of EtO will burn without the presence of air or other oxidizers. EtO vapors are heavier than air and may travel along the ground and be ignited by open flames or sparks at locations remote from the site at which EtO is being used.
7. For purposes of compliance with the requirements of 29 CFR 1910.106, EtO is classified as a flammable gas. For example, 7,500 ppm, approximately one-fourth of the lower flammable limit, would be considered to pose a potential fire and explosion hazard.
8. For purposes of compliance with 29 CFR 1910.157, EtO is classified as a Class B fire hazard.
9. For purpose of compliance with 29 CFR 1919.307, locations classified as hazardous due to the presence of EtO shall be Class I.

B. Reactivity

1. *Conditions contributing to instability:* EtO will polymerize violently if contaminated with aqueous alkalies, amines, mineral acids metal chlorides, or metal oxides. Violent decomposition will occur at temperatures above 800°F;
2. *Incompatibilities:* Alkalines and acids;
3. *Hazardous decomposition products:* Carbon monoxide and carbon dioxide.

III. Spill, Leak, and Disposal Procedures

A. If EtO is spilled or leaked, the following steps should be taken:

1. Removal all ignition sources.
2. The area should be evacuated at once and re-entered only after the area has been thoroughly ventilated and washed down with water.
3. If liquid EtO, collect for reclamation or wash down with water into process sewer system.

B. Persons not wearing protective equipment should be restricted from areas of spills or leaks until cleanup has been completed.

C. Waste disposal methods

Waste material shall be disposed of in a manner that is not hazardous to employees or to the general population. Spills of EtO and flushing of such spills shall be channeled for appropriate treatment or collection for disposal. They shall not be channeled directly into the sanitary sewer system. In selecting the method of waste disposal, applicable local, State, and Federal regulations should be consulted.

IV. Monitoring and Measurement Procedures

A. Exposure above the Permissible Exposure Limit

1. Eight-hour exposure evaluation: Measurements taken for the purpose of determining employee exposure under this section are best taken with consecutive samples covering the full shift. Air samples must be taken in the employee's breathing zone (air that would most nearly represent that inhaled by the employee.)

2. Monitoring techniques: The sampling and analysis under this section may be performed by collection of the EtO vapor on charcoal adsorption tubes or other composition adsorption tubes, with subsequent chemical analysis. Sampling and analysis may also be performed by instruments such as real-time continuous monitoring systems, portable direct reading instruments, or passive dosimeters. Analysis of resultant samples should be by gas chromatograph.

Appendix D lists the validated method of sampling and analysis which has been tested by OSHA for use with EtO. The employer has the obligation of selecting a monitoring method which meets the accuracy and precision requirements of the standard under his unique field conditions. The standard requires that the method of monitoring must be accurate, to a 95-percent confidence level, to plus or minus 25 percent for concentrations of EtO at 1 ppm, and to plus or minus 35 percent for concentrations at 0.5 ppm. In addition to the method described in Appendix D, there are numerous other methods available for monitoring for EtO in the workplace. Details on these other methods have been submitted by various companies to the rulemaking record, and are available at the OSHA Docket Office.

B. Since many of the duties relating to employee exposure are dependent on the

results of monitoring and measuring procedures, employers shall assure that the evaluation of employee exposures is performed by a competent industrial hygienist or other technically qualified person.

Employees shall be provided with, and required to wear appropriate protective clothing to prevent any possibility of skin contact with liquid EtO. Protective clothing shall include impermeable coveralls or similar full-body work clothing, gloves, head coverings, as appropriate to protect areas of the body which may come in contact with liquid EtO.

Employers should ascertain that the protective garments are impermeable to EtO. Non impermeable clothing and shoes should not be allowed to become contaminated with liquid EtO. If permeable clothing does become contaminated, it should be promptly removed, placed in a regulated area for removal of the EtO and not worn again until the EtO is removed. If leather footwear or other leather garments become wet from EtO they should be replaced and not worn again, due to the ability of leather to absorb EtO and hold it against the skin.

Any protective clothing which has developed leaks or is otherwise found to be defective should be repaired or replaced. Clean protective clothing should be provided to the employee as necessary to assure its protectiveness. Whenever impervious clothing becomes wet with liquid EtO, it should be washed down with water before being removed by the employee. Employees are also required to wear splash-proof safety goggles where there is any possibility of EtO contacting the eyes.

VI. Housekeeping and Hygiene Facilities

A. The workplace should be kept clean, orderly, and in a sanitary conditons. The employer should institute a leak and spill detection program for operations involving EtO in order to detect sources of fugitive EtO emissions.

B. Adequate washing facilities with hot and cold water are to be provided, and maintained in a sanitary condition. Suitable cleansing agents should also be provided to assure the effective removal of EtO from the skin.

VII. Miscellaneous Precautions

A. Store EtO in tightly closed containers in a cool, well-ventilated area and take all necessary precautions to avoid any explosion hazard.

B. High exposure to EtO can occur when transferring the liquid from one container to another.

C. Non sparking tools must be used to open and close metal containers. These containers must be effectively grounded and bonded prior to pouring.

D. Do not incinerate EtO cartridges, tanks or other containers.

E. Employers shall advise employees of all areas and operations where exposure to EtO could occur.

VIII. Common Operations

Common operations in which exposure to EtO is likely to occur include the following: Manufacture of EtO; synthesis of polyester fibers, bottles and films, surfactants, ethanolamines, glycol ethers, and specialty chemicals, and use as a fumigant and sterilant in the hospital, health product and spice industries.

APPENDIX C—MEDICAL SURVEILLANCE GUIDELINES FOR ETHYLENE OXIDE

I. Route of Entry

Inhalation.

II. Toxicology

Findings in humans and experimental animals exposed to airborne concentrations of EtO are indicative of damage to the genetic material (DNA). These include hemoglobin alkylation, unscheduled DNA synthesis, sister chromatid exchange, chromosomal aberration, and functional sperm abnormalities. Clinical evidence of adverse effects associated with exposure to EtO is present in the form of increased incidence of cancer in laboratory animals (leukemia, stomach), mutation in offspring in animals, and spontaneous abortions in animals and human populations.

Ethylene oxide in liquid form can cause eye irritation and injury to the cornea, frostbite, severe irritation, and blistering of the skin upon prolonged or confined contact. Ingestion of EtO can cause gastric irritation and liver injury. Acute effects from inhalation of EtO vapors include respiratory irritation and lung injury, headache, nausea, vomiting, diarrhea, dyspnea and cyanosis.

III. Signs and Symptoms of Acute Overexposure

Symptoms of overexposure include eye irritation, headache, nausea and vomiting, weakness, and diarrhea. Information is available to suggest that spontaneous abortions may be caused by exposure to high concentrations of EtO. Skin contact with liquid EtO, especially if prolonged or confined, can cause severe irritation and blistering. Irritation and injury to the eye can also occur from contact with liquid EtO.

IV. Surveillance and Preventive Considerations

A. As noted above, exposure to EtO has been linked to an increased incidence of leukemia, stomach cancer, chromosomal damage, and reproductive effects. It has been suggested that acute exposure to EtO is causally related to spontaneous abortion. The physician should be aware of the findings of these studies in evaluating the health of employees exposed to EtO.

Most reported acute effects of occupational exposure to EtO are due to contact with EtO in liquid phase. The liquid readily penetrates leather, and will produce blistering if clothing or footwear contaminated with EtO are not removed.

It is important for the physician to become familiar with the operating conditions in which exposure to EtO may occur. Those employees with skin diseases may not tolerate the wearing of whatever protective clothing may be necessary to protect them from exposure. In addition, those with chronic respiratory disease may not tolerate the wearing of negative-pressure respirators.

The employer is required to institute a medical surveillance program for all employees who are or will be exposed at or above the action level (0.5 parts EtO per million parts of air) for at least 30 days per year, without regard to the use of respirators.

The medical surveillance program must provide each covered employee with an opportunity for medical examination. All examinations and procedures must be performed by or under the supervision of a licensed physician and be provided without cost to the employee.

The examining physician is free to prescribe the specific tests to be included in the medical surveillance program. Information presently available to OSHA is insufficient for the Agency to justify the specification of the precise tests to be administered. Thus, it is believed that the examining physician is best qualified to make this judgment. Certain elements of an examination, however, are suggested as being appropriate by the health data regarding carcinogenic, mutagenic, and reproductive effects. These elements include the following:

(i) comprehensive medical and work histories with special emphasis directed to symptoms related to eyes, blood forming organs, lungs, nervous and reproductive systems, and skin.

(ii) comprehensive physical examination, with particular emphasis given to pulmonary, neurologic, reproductive, and ophthalomolgic systems, blood forming organs, and the skin.

(iii) complete blood count to include at least a white cell count, a differential count, hemoglobin, and hematocrit.

(iv) screening for chromosome damage.

The employer is required to make any prescribed tests available more often than specified if recommended by the examining physician.

The employer is required to provide physician recommended examinations to any employee exposed to emergency conditions. While little is known about the effects of high short-term exposures, it appears prudent to monitor such affected employees closely in light of existing health data.

The employer is required to provide the physician with the following information: a copy of this standard and its appendices; a description of the affected employee's duties as they relate to the employee exposure level; and information from the employee's previous medical examinations which is not readily available to the examining physician. Making this information available to the physician will aid in the evaluation of the employee's health in relation to assigned duties and fitness to wear personal protective equipment, when required.

The employer is required to obtain a written opinion from the examining physician containing the results of the medical examinations; the physician's opinion as to whether the employee has any detected medical conditions which would place the employee at increased risk of material impairment of his or her health from exposure to EtO any recommended restrictions upon the employee's exposure to EtO; or upon the use of protective clothing or equipment such as respirators; and a statement that the employee has been informed by the physician

of the results of the medical examination and of any medical conditions which require further explanation or treatment. This written opinion must not reveal specific findings or diagnoses unrelated to occupational exposure to EtO, and copy of the opinion must be provided to the affected employee.

The purpose in requiring examining physician to supply the employer with a written opinion is to provide the employer with a medical basis to aid in the determination of initial placement of employees and to assess the employee's ability to use protective clothing and equipment.

APPENDIX D—SAMPLING AND ANALYTICAL METHODS FOR ETHYLENE OXIDE

There are a number of methods available for monitoring employee exposures to EtO. Most of these involve the use of charcoal tubes and sampling pumps, with analysis by gas chromatograph. The essential differences between the charcoal tube methods include, among others, the use of different desorbing solvents, the use of different lots of charcoal, and the use of different equipment for analysis of the samples.

Besides charcoal, methods using passive dosimeters, gas sampling bags, impingers, and detector tubes have been utilized for determination of EtO exposure. In addition, there are several portable gas analyzers and monitoring units, available on the open market.

This appendix contains details for the method which has been tested at the OSHA Analytical Laboratory in Salt Lake City. This does not indicate that this method is the only one which will be satisfactory. Copies of the descriptions of other methods available to OSHA are available in the rulemaking record, and may be obtained from the OSHA Docket Office. These include the Union Carbide, Dow Chemical, 3M, and DuPont methods, as well as NIOSH Method S–286.

Employers who note problems with sample breakthrough should try larger charcoal tubes. Tubes of larger capacity are available. In addition, lower flow rate and shorter sampling times should be beneficial in minimizing breakthrough problems.

Whatever method the employer chooses, he must assure himself of the method's accuracy and precision under the unique conditions present in his workplace.

Ethylene Oxide

Method No.: 30.

Matrix: Air.

Target Concentration: 1.0 ppm (1.8 mg/m³).

Procedure: Samples are collected on two charcoal tubes in series and desorbed with 1% CS_2 in benzene. The samples are derivatized with HBr and treated with sodium carbonate. Analysis is done by gas chromatography with an electron capture detector.

Recommended Air Volume and Sampling Rate: 1 liter and 0.05 Lpm.

Detection Limit of the Overall Procedure: 13.3 ppb (0.024 mg/m³). (Based on 1.0 liter air sample.)

Reliable Quantitation Limit: 52.2 ppb (0.094 mg/m ³). (Based on 1.0 liter air sample.)

Standard Error of Estimate: 6.59% (see Backup Section 4.6).

Special Requirements: Samples must be analyzed within 15 days of sampling date.

Status of Method: The sampling and analytical method has been subjected to the established evaluation procedures of the Organic Methods Evaluation Branch.

Date: August, 1981.

Chemist: Wayne D. Potter, Organic Solvents Branch, OSHA Analytical Laboratory, Salt Lake City, Utah.

1. General Discussion

1.1. Background

1.1.1. History of Procedure—Ethylene oxide samples analyzed at the OSHA Laboratory have normally been collected on activated charcoal and desorbed with carbon disulfide. The analysis is performed with a gas chromatograph equipped with a FID (flame ionization detector) as described in NIOSH Method S286 (Ref. 5.1). This method is based on a PEL of 50 ppm and has a detection limit of about 1 ppm.

Recent studies have prompted the need for a method to analyze and detect ethylene oxide at very low concentrations (See Toxic Effects 1.1.2.).

Several attempts were made to form an ultraviolet (UV) sensitive derivative with ethylene oxide for analysis with HPLC. Among those tested that gave no detectable product were: p-anisidine, methylimidazole, aniline, and 2,3,6-trichlorobenzoic acid. Each was tested with catalysts such as triethylamine, aluminum chloride, methylene, chloride and sulfuric acid but no detectable derivative was produced.

The next derivatization attempt was to react ethylene oxide with HBr to form 2-bromoethanol. This reaction was successful. An ECD (electron capture detector) gave a very good response for 2-bromoethanol due to the presence of bromine. The use of carbon disulfide as the desorbing solvent gave too large a response and masked the 2-bromoethanol. Several other solvents were tested for both their response on the ECD and their ability to desorb ethylene oxide from the charcoal. Among those tested were toluene, xylene, ethyl benzene, hexane, cyclohexane and benzene. Benzene was the only solvent tested that gave a suitable response on the ECD and a high desorption. It was found that the desorption efficiency was improved by using 1% CS_2 with the benzene. The carbon disulfide did not significantly improve the recovery with the other solvents. SKC Lot 120 was used in all tests done with activated charcoal.

1.1.2 Physical Properties (Ref. 5.4.–5.6.)

Synonyms: oxirane; dimethylene oxide; 1,2-epoxy ethane; oxane; C_2H_4O; ETO;

Molecular Weight: 44.06

Boiling Point: 10.7° C

Melting Point: −111° C

Description: Colorless, flammable gas

Vapor Pressure: 1095 mm. at 20° C

Odor: Ether-like odor

Lower Explosive Limit: 3.0% (by volume)

Flash Point (TOC): Below 0° F

Molecular Structure: CH_2-CH_2 (with O bridging)

1.2 Limit Defining Parameters

1.2.1. Detection Limit of the Analytical Procedure—The detection limit of the analytical procedure is 12.0 picograms of ethylene oxide per injection. This is the amount of analyte which will give a peak whose height is five times the height of the baseline noise. (See Backup Data Section 4.1 and Figure 4.1).

1.2.2 Detection Limit of the Overall Procedure—The detection limit of the overall procedure is 24.O ng of ethylene oxide per sample (13.3ppb/.024mg/m³). This is the amount of analyte spiked on the sampling device which allows recovery of an amount of analyte equivalent to the detection limit of the analytical procedure

1.2.3. Reliable Quantitation Limit—The reliable quantitation limit is 94.0 nanograms of ethylene oxide per sample (52.2 ppb/0.094 mg/m³). This is the smallest amount of analyte which can be quantitated within the requirements of 75% recovery and 95% confidence limits of ± 25%.

It must be recognized that the reliable quantitation limit and detection limits reported in the method are based upon optimization of the instrument for the smallest possible amount of analyte. When the target concentration of an analyte is exceptionally higher than these limits, they may not be attainable at the routine operating parameters. In this case, the limits reported on analyis reports will be based on the operating parameters used during the analysis of the samples.

1.2.4. Sensitivity—The sensitivity of the analytical procedure over a concentration range representing 0.5 to 2 times the target concentration based on the recommended air volume is 34105 area units per μg/mL. The sensitivity is determined by the slope of the calibration curve (See Backup Data Section 4.3). The sensitivity will vafy somewhat with the particular instrument used in the analysis

1.2.5. Recovery—The recovery of analyte from the collection medium must be 75% or greater. The average recovery from spiked samples over the range of 0.5 to 2 times the target concentration is 88.0% (See backup Section Table 4.4.). At lower concentrations the recovery appears to be non-linear.

1.2.6. Precision (Analytical Method Only)—The pooled coefficient of variation obtained from replicate determination of analytical standards at 0.5X, 1X and 2X the target concentration is 0.036 (See Backup Data Section 4.5.).

1.2.7. Precision (Overall Procedure)—The overall procedure must provide results at the target concentration that are ±25% or better at the 95% confidence level. The precision at the 95% confidence level for the 15 day storage test is ±14.8% (See Backup Data Section 4.6.). This includes an additional ±5% for sampling error.

1.3. Advantages

1.3.1. The sampling procedure is convenient.

1.3.2. The analytical procedure is very sensitive and reproducible.

1.3.3. Reanalysis of samples is possible.

1.3.4. Samples are stable for at least 15 days at room temperature.

1.3.5 Interferences are reduced by the longer GC retention time of the new derivative.

1.4. Disadvantages

1.4.1. Two tubes in series must be used because of possible breakthrough.

1.4.2. The precision of the sampling rate may be limited by the reproducibility of the pressure drop across the tubes. The pumps are usually calibrated for one tube only.

1.4.3. The use of benzene as the desorption solvent increases the hazards of analysis because of the potential carcinogenic effects of benzene.

1.4.4. After repeated injections there can be a buildup of residue formed on the electron capture detector which decreases sensitivity.

1.4.5. Recovery from the charcoal tubes appears to be nonlinear at low concentrations.

2. Sampling Procedure

2.1. Apparatus

2.1.1. A calibrated personal sampling pump whose flow can be determined with ±5% of the recommended flow.

2.1.2. SKC Lot 120 Charcoal tubes: glass tube with both ends flame sealed, 7 cm long with a 6 mm O.D. and a 4-mm I.D., containing 2 sections of coconut shell charcoal separated by a 2-mm portion of urethane foam. The adsorbing section contains 100 mg of charcoal, the backup section 50 mg. A 3-mm portion of urethane foam is placed between the outlet end of the tube and the backup section. A plug of silylated glass wool is placed in front of the adsorbing section.

2.2. Reagents

2.2.1. None required.

2.3. Sampling Technique

2.3.1. Immediately before sampling, break the ends of the charcoal tubes. All tubes must be from the same lot.

2.3.2. Connect two tubes in series to the sampling pump with a short section of flexible tubing. A minimum amount of tubing is used to connect the two sampling tubes together. The tube closer to the pump is used as a backup. This tube should be identified as the backup tube.

2.3.3. The tubes should be placed in a vertical position during sampling to minimize channeling.

2.3.4. Air being sampled should not pass through any hose or tubing before entering the charcoal tubes.

2.3.5. Seal the charcoal tubes with plastic caps immediately after sampling. Also, seal each sample with OSHA sealing tape lengthwise.

2.3.6. With each batch of samples, submit at least one blank tube from the same lot used for samples. This tube should be subjected to exactly the same handling as the samples (break, seal, transport) except that no air is drawn through it.

2.3.7. Transport the samples (and corresponding paperwork) to the lab for analysis.

2.3.8. If bulk samples are submitted for analysis, they should be transported in glass containers with Teflon-lined caps. These samples must be mailed separately from the container used for the charcoal tubes.

2.4. Breakthrough

2.4.1. The breakthrough (5% breakthrough) volume for a 3.0 mg/m ^{3} ethylene oxide sample stream at approximately 85% relative humidity, 22° C and 633 mm is 2.6 liters sampled at 0.05 liters per minute. This is equivalent to 7.8 μg of ethylene oxide. Upon saturation of the tube it appeared that the water may be displacing ethylene oxide during sampling

2.5. Desorption Efficiency

2.5.1. The desorption efficiency, from liquid injection onto charcoal tubes, averaged 88.0% from 0.5 to 2.0 X the target concentration for a 1.0 liter air sample. At lower ranges it appears that the desorption efficiency is non-linear (See Backup Data Section 4.2.).

2.5.2. The desorption efficiency may vary from one laboratory to another and also from one lot of charcoal to another. Thus, it is necessary to determine the desorption efficiency for a particular lot of charcoal.

2.6. Recommended Air Volume and Sampling Rate

2.6.1. The recommended air volume is 1.0 liter.

2.6.2. The recommended maximum sampling rate is 0.05 Lpm.

2.7. Interferences

2.7.1. Ethylene glycol and Freon 12 at target concentration levels did not interfere with the collection of ethylene oxide.

2.7.2. Suspected interferences should be listed on the sample data sheets.

2.7.3. The relative humidity may effect the sampling procedure.

2.8. Safety Precautions

2.8.1. Attach the sampling equipment to the employee so that it does not interfere with work performance.

2.8.2. Wear safety glasses when breaking the ends of the sampling tubes.

2.8.3. If possible, place the sampling tubes in a holder so the sharp end is not exposed while sampling.

3. Analytical Method

3.1. Apparatus

3.1.1. Gas chromatograph equipped with a linearized electron capture detector.

3.1.2. GC column capable of separating the derivative of ethylene oxide (2-bromoethanol) from any interferences and the 1% CS_2 in benzene solvent. The column used for validation studies was: 10 ft x ⅛ inch stainless steel 20% SP–2100, .1% Carbowax 1500 on 100/120 Supelcoport.

3.1.3. An electronic integrator or some other suitable method of measuring peak areas.

3.1.4. Two milliliter vials with Teflon-lined caps.

3.1.5. Gas tight syringe—500 uL or other convenient sizes for preparing standards.

3.1.6. Microliter syringes—10 uL or other convenient sizes for diluting standards and 1 uL for sample injections.

3.1.7. Pipets for dispensing the 1% CS_2 in benzene solvent. The Glenco 1 mL dispenser is adequate and convenient.

3.1.8. Volumetric flasks—5 mL and other convenient sizes for preparing standards.

3.1.9. Disposable Pasteur pipets.

3.2. Reagents

3.2.1. Benzene, reagent grade.

3.2.2. Carbon Disulfide, reagent grade.

3.2.3. Ethylene oxide, 99.7% pure.

3.2.4. Hydrobromic Acid, 48% reagent grade.

3.2.5. Sodium Carbonate, anhydrous, reagent grade.

3.2.6. Desorbing reagent, 99% Benzene/1% CS_2.

3.3. Sample Preparation

3.3.1. The front and back sections of each sample are transferred to separate 2-mL vials.

3.3.2. Each sample is desorbed with 1.0 mL of desorbing reagent.

3.3.3. The vials are sealed immediately and allowed to desorb for one hour with occasional shaking.

3.3.4. Desorbing reagent is drawn off the charcoal with a disposable pipet and put into clean 2-mL vials.

3.3.5. One drop of HBr is added to each vial. Vials are resealed and HBr is mixed well with the desorbing reagent.

3.3.6. About 0.15 gram of sodium carbonate is carefully added to each vial. Vials are again are resealed and mixed well.

3.4. Standard Preparation

3.4.1. Standards are prepared by injecting the pure ethylene oxide gas into the desorbing reagent.

3.4.2. A range of standards ar prepared to make a calibration curve. A concentration of 1.0 μL of ethylene oxide gas per 1 mL desorbing reagent is equivalent to 1.0 ppm air concentration (all gas volumes at 25°C and 760 mm) for the recommended 1 liter air sample. This amount is uncorrected for desorption efficiency (see Backup Data Section 4.2. for desorption efficiency corrections).

3.4.3. One drop of HBr per mL of standard is added and mixed well.

3.4.4. About 0.15 grams of sodium carbonate is carefully added for each drop of HBr. (A small reaction will occur).

3.5. Analysis

3.5.1. GC Conditions
Nitrogen flow rate—10 mL/min.
Injector Temperature—250°C
Detector Temperature—300°C
Column Temperature—100°C
Injection size—0.8 μL
Elution time—3.9 minutes

3.5.2. Peak areas are measured by an integrator or other suitable means.

3.5.3. The integrator results are in area units and a calibration curve is set up with concentration vs. area units.

3.6. Interferences

3.6.1. Any compound having the same retention time of 2-bromoethanol is a potential interference. Possible interferences should be listed on the sample data sheets.

3.6.2. GC parameters may be changed to circumvent interferences.

3.6.3. There are usually trace contaminants in benzene. These contaminants, however, posed no problem of interference.

3.6.4. Retention time data on a single column is not considered proof of chemical

identity. Samples over the 1.0 ppm target level should be confirmed by GC/Mass Spec or other suitable means.

Calculations

3.7.1. The concentration in ug/mL for a sample is determined by comparing the area of a particular sample to the calibration curve, which has been prepared from analytical standards.

3.7.2. The amount of analyte in each sample is corrected for desorption efficiency by use of a desorption curve.

3.7.3. Analytical results (A) from the two tubes that compose a particular air sample are added together.

3.7.5. The concentration for a sample is calculated by the following equation:

$$\text{ETO, ppm} = \frac{AXB}{C}$$

Where:
A = ug/mL.
B = desportion volume in milliliters
C = air volume in liters.

3.7.6. To convert mg/m^3 to parts per million (ppm) the following relationship is used:

$$\text{ETO, ppm} = \frac{mg/m^3 \times 24.45}{44.05}$$

where:
mg/m^3 = results from 3.7.5.
24.45 = molar volume at 25°C and 760 mm Hg.
44.05 = molecular weight of ETO

3.8. Safety Precautions

3.8.1. Ethylene oxide and benzene are potential carcinogens and care must be exercised when working with these compounds.

3.8.2. All work done with the solvents (preparation of standards, desorption of samples, etc.) should be done in a hood.

3.8.3. Avoid any skin contact with all of the solvents.

3.8.4. Wear safety glasses at all times.

3.8.5. Avoid skin contact with HBr because it is highly toxic and a strong irritant to eyes and skin.

4. Backup Data

4.1. Detection Limit Data

The detection limit was determined by injecting 0.8 µL of a 0.015 µL standard of ethylene oxide into 1% CS_2 in benzene. The detection limit of the analytical procedure is taken to be 1.20×10^{-5} µg per injection. This is equivalent to 8.3 ppb (0.015 mg/m^3) for the recommended air volume.

4.2. Desorption Efficiency

Ethylene oxide was spiked onto charcoal tubes and the following recovery data was obtained.

Amount spiked (µg)	Amount recovered (µg)	Percent recovery
4.5	4.32	96.0
3.0	2.61	87.0
2.25	2.025	90.0
1.5	1.365	91.0
1.5	1.38	92.0
.75	.6525	87.0
.375	.315	84.0
.375	.312	83.2
.1875	.151	80.5
.094	070	74.5

At lower amounts the recovery appears to be non-linear.

4.3. Sensitivity Data

The following data was used to determine the calibration curve.

Injection	0.5 × .75 µg/mL	1 × 1.5 µg/mL	2 × 3.0 µg/mL
1	30904	59567	111778
2	30987	62914	106016
3	32555	58578	106122
4	32242	57173	109716
X	31672	59558	108408

Slope - 34,105

4.4. Recovery

The recovery was determined by spiking ethylene oxide onto lot 120 charcoal tubes and desorbing with 1% CS_2 in benzene. Recoveries were done at 0.5, 1.0, and 2.0 × the target concentration (1 ppm) for the recommended air volume.

PERCENT RECOVERY

Sample	0.5 ×	1.0 ×	2.0 ×
1	86.7	95.0	91.7
2	83.8	95.0	87.3
3	84.2	91.0	86.0
4	88.0	91.0	83.0
5	98.0	86.0	.....
		85.0	
X	86.5	90.5	87.0

Weighted average = 88.2.

4.5. Precision of the Analytical Procedure

The following data was used to determine the precision of the analytical method:

	0.5 ×	1 ×	2 ×
Concentration	[1].75	[1] 1.5	[1] 3.0
Injection	.7421	1.4899	3.1184
	.7441	1.5826	3.0447
	.7831	1.4628	2.9149
	.7753	1.4244	2.9185
Average	.7612	1.4899	2.9991
Standard Deviation	.0211	.0674	.0998
CV	0277	.0452	.0333

[1] Microgram per milliliter.

$$\overline{CV} = \sqrt{\frac{3(.0277)^2 + 3(.0452)^2 + 3(.0333)^2}{3+3+3}}$$

$\overline{CV} = 0.036$

4.6. Storage Data

Samples were generated at 1.5 mg/m^3 ethylene oxide at 85% relative humidity, 22°C and 633 mm. All samples were taken for 20 minutes at 0.05 Lpm. Six samples were analyzed as soon as possible and fifteen samples were stored at refrigerated (5°C) and fifteen samples were stored at ambient temperature (23°C). These stored samples were analyzed over a period of nineteen days.

PERCENT RECOVERY

Day analyzed	Refrigerated	Ambient
1	87.0	87.0
1	93.0	93.0
1	94.0	94.0
1	92.0	92.0
4	92.0	91.0
4	93.0	88.0
4	91.0	89.0
6	92.0	
6	92.0	
8		92.0
8		86.0
10	91.7	
10	95.5	
10	95.7	
11		90.0
11		82.0
13	78.0	
13	81.4	
13	82.4	
14		78.5
14		72.1
18	66.0	
18	68.0	
19		64.0
19		77.0

4.7. Breakthrough Data

Breakthrough studies were done at 2 ppm (3.6 mg/m^3) at approximately 85% relative humidity and 22°C (ambient temperature). Two charcoal tubes were used in series. The backup tube was changed every 10 minutes and analyzed for breakthrough. The flow rate was 0.050 Lpm.

Tube No.,	Time (min.)	Percent breakthrough
1	10	[1]
2	20	[1]
3	30	[1]
4	40	1.23
5	50	3.46
6	60	18.71
7	70	39.2
8	80	53.3
9	90	72.0
10	100	96.0
11	110	113.0
12	120	133.9

[1] None.

The 5% breakthrough volume was reached when 2.6 liters of test atmosphere were drawn through the charcoal tubes.

Part IV

Department of Agriculture

Animal and Plant Health Inspection Service

Citrus Canker; Imported From Mexico

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 319

[Docket No. 83-317]

Citrus Canker; Imported from Mexico

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Amendment to interim rule.

SUMMARY: This document amends the "Citrus Canker—Mexico" interim regulations to allow any importer to import restricted articles for movement to and use in certain northern parts of Louisiana and Texas in accordance with certain conditions, and to allow restricted articles to be culled and repacked under certain conditions in restricted areas in Texas. This action is warranted in order to lessen unnecessary restrictions with respect to restricted articles.

EFFECTIVE DATE: April 21, 1983.

FOR FURTHER INFORMATION CONTACT: Frank Cooper, Staff Officer, Regulatory Services Staff, Plant Protection and Quarantine, APHIS, USDA, Room 637 Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782; 301–436–8248.

Stephen Poe, Plant Pathologist, Emergency Programs, Plant Protection and Quarantine, APHIS, USDA, Room 609 Federal Building, Hyattsville, MD 20782; 301–436–6365.

SUPPLEMENTARY INFORMATION:

Background

This document amends the "Citrus Canker—Mexico" interim regulations (contained in 7 CFR 319.27 *et seq.* and referred to below as the regulations) based on a proposal published in the **Federal Register** on March 10, 1983 (48 FR 10286–10289).

The regulations were initially established on November 17, 1982, by a document published in the **Federal Register** on the same day (47 FR 51723–51729). The regulations were changed effective November 17, 1982, and this was announced in the **Federal Register** on December 2, 1982 (47 FR 54273–54275). The regulations were further changed effective January 20, 1983, by a document published in the **Federal Register** on January 5, 1983 (48 FR 387–393).

The document of March 10 proposed to amend the regulations further to allow any importer to import restricted articles for movement to and use in certain northern parts of Louisiana and Texas in accordance with certain conditions and to allow restricted articles to be culled and repacked under certain conditions in restricted areas in Texas. Based on the rationale set forth in this document and the proposal of March 10, the proposed amendments are adopted except as explained below.

The regulations were established to protect against the introduction of citrus canker disease, which is caused by the infectious bacterium *Xanthomonas campestris* pv. *citri* (Hasse 1915) Dye 1978. This was necessary because of the finding of citrus canker disease in the State of Colima and in the municipio of Coahuayana in the State of Michoacan in Mexico (these areas are referred to below as infected areas).

The regulations provide that any fruit or peel of Mexican lime *(Citrus aurantifolia)* from any area in Mexico, and any other fruit or peel of citrus or citrus relatives (fruit or peel of any genera, species, or varieties of the subfamilies Aurantioideae, Rutoideae, and Toddalioideae of the botanical family Rutaceae) from infected areas in Mexico offered for importation into the United States will be refused imporation unless imported by the U.S. Department of Agriculture for experimental or scientific purposes under certain conditions.

The regulations also designate as restricted articles fruit or peel of ethrog (*Citrus medica*), grapefruit (*Citrus paradisi*), lemon (*Citrus limon*), orange (*Citrus sinensis*), Persian lime (*Citrus latifolia*), and tangerine (*Citrus reticulata*) from uninfected areas in Mexico. Under the regulations any restricted article is allowed to be imported into the United States by the U.S. Department of Agriculture for experimental or scientific purposes under certain conditions and is allowed to be imported by any importer if imported in accordance with certain conditions.

Movement to and Use in Louisiana and Texas

Previously, the regulations provided that a restricted article may be imported only for movement to and use in locations other than Arizona, California, Florida, Hawaii, Louisiana, Puerto Rico, Texas, or the Virgin Islands of the United States. This document amends these provisions to allow restricted articles to be moved to and used in any part of Louisiana not included in that part of Louisiana more than 15 miles south of Interstate Highway 20 and to allow restricted articles to be moved to and used in any part of Texas not included in that part of Texas more than 15 miles south of the direct route from the Louisiana border to the New Mexico border beginning on Interstate Highway 20 and continuing on Interstate Highway 10.

Previously, the regulations also required that a restricted article bear on the outer container the statement "Not to be distributed within Arizona, California, Florida, Hawaii, Louisiana, Puerto Rico, Texas, or the Virgin Islands of the United States." Therefore, in accordance with the amendment to allow restricted articles to be moved to and used in parts of Louisiana and Texas, the regulations are also amended to change the required statement to read "Not to be distributed within Arizona, California, Florida, Hawaii, any part of Louisiana more than 15 miles south of Interstate Highway 20, Puerto Rico, any part of Texas more than 15 miles south of the direct route from the Louisiana border to the New Mexico border beginning on Interstate Highway 20 and continuing on Interstate Highway 10, or the Virgin Islands of the United States."

In addition, the regulations previously provided that a restricted article may be moved from the port of entry to locations other than Arizona, California, Florida, Hawaii, Louisiana, Puerto Rico, Texas or the Virgin Islands of the United States only pursuant to a restricted destination permit issued by an inspector. Therefore, in accordance with the proposed provisions explained above, the regulations are amended to provide that a restricted destination permit also may be issued for movement to locations in the northern parts of Louisiana and Texas decribed above.

Further, the regulations are amended to allow restricted articles to be moved from the port of entry to a wholesale or chain store distributor in the specified parts of northern Louisiana and Texas only if the distributor is operating under a valid compliance agreement whereby the distributor agrees not to reship the restricted articles to areas where they would not be eligible for distribution and use, and agrees not to reship restricted articles to any other wholesale or chain store distributor in a restricted area not operating under such a compliance agreement. Also, the regulations are amended to establish due process requirements for the withdrawal of such compliance agreements for noncompliance with the

regulations or any conditions imposed pursuant thereto.

Culling and Repacking

Previously, the regulations only allowed restricted articles to move from the port of entry to destination and did not allow restricted articles to be culled and repacked in the restricted areas where they would not be eligible for distribution and use.

This document amends the regulations to allow culling and repacking in restricted areas in Texas only if conducted pursuant to a compliance agreement between Plant Protection and Quarantine (the unit of the animal and Plant Health Inspection Service responsible for administering the regulations) and the person conducting the culling and repacking whereby it is agreed that these activities would be conducted under the following conditions:

(1) The culling and repacking, and any related activities would be subject to monitoring by inspectors;

(2) the culling and repacking would be conducted only under conditions found by an inspector as adequate to assure that the restricted articles would not be commingled with nonrestricted articles and would remain identifiable as restricted articles during such activities (i.e., restricted articles must be separated by partition, the equipment used for culling restricted articles may not be used for processing nonrestricted articles until all restricted articles which have been culled by the equipment have been repacked for distribution or put in containers for disposal);

(3) any water used on restricted articles would contain at least 200 parts per million active chlorine;

(4) the outer containers of the repacked restricted articles would plainly and correctly bear the general nature and quantity of the contents, the country or locality of origin, the name and address of repacker, the name and address of consignee, and the statement "Not to be distributed within Arizona, California, Florida, Hawaii, any part of Louisiana more than 15 miles south of Interstate Highway 20, Puerto Rico, any part of Texas more than 15 miles south of the direct route from the Louisiana border to the New Mexico border beginning on Interstate Highway 20 and continuing on Interstate Highway 10, or the Virgin Islands of the United States"; and

(5) any restricted articles taken out of their containers and not repacked for distribution and use in areas where they are elegible for distribution and use must be disposed of daily by returning them to Mexico, or be disposed of daily by incineration or burial in a landfill (the incinerator or landfill must have equipment and use procedures that are determined by the Deputy administrator to be adequate to prevent the dissemination of citrus canker disease and be certified by the responsible State or local official as currently complying with the applicable laws for environmental protection; the incinerator or landfill must also have sufficient fencing and be managed in such a way as to effectively prevent human scavenging); any restricted articles held or moved for disposal must be held or moved in covered containers adequate to prevent spillage of the articles and marked so as to identify them as culled restricted articles; and the return of restricted articles to Mexico and any movements of restricted articles to incinerators or landfills must be made only by persons conducting culling and repacking operations under a compliance agreement.

Also, the regulations are amended to establish due process requirements for the withdrawal of such compliance agreements for noncompliance with the regulations or any specified conditions imposed pursuant thereto.

Miscellaneous

In order to make the regulations more easily understood, the regulations are also amended to define the areas where restricted articles are not allowed to be distributed and used as "restricted areas" and to make certain other nonsubstantive editorial changes in the regulations.

Comments

The document of March 10, 1983, invited the submission of written comments on or before March 30, 1983. Pursuant to requests from fruit and vegetable associations, the comment period was reopened on April 1, 1983 and extended to April 11, 1983. Also, in accordance with the document of March 10, a public hearing concerning the proposal was held in McAllen, Texas on March 24, 1983.

Many of the comments received were fully or partially in favor of the proposed provisions; however, many of the comments opposed the proposed provisions in one or more respects and are discussed below.

Commenters asserted that the boundaries separating restricted areas in Louisiana and Texas from nonrestricted areas in these States are unclear and that it could be difficult to determine precisely where the boundary line is. Further, it was asserted that the boundaries should be clearly identified and demarcated on the ground, such as State boundaries or highways. No changes are made based on these comments. The highways described above are easily identifiable, and it should not be difficult to determine whether a location is less than or more than 15 miles south from the highways. Further, it is obvious that locating the boundary 15 miles south of the highways helps make the boundary more workable in that major urban areas would not be divided by the boundary line.

Commenters asserted that the boundary line to separate restricted areas in Louisiana and Texas from nonrestricted areas in these States should be Interstate Highway 10, and that this highway which runs from Florida to California should separate the restricted areas from nonrestricted areas for all of the United States. No changes are made based on these comments. The boundary lines in Louisiana and Texas were proposed in part because they are at least one hundred fifty miles from areas in Louisiana and Texas where citrus or citrus relatives are grown in significant amounts. This was intended to provide protection against shoppers purchasing restricted articles in areas where restricted articles are allowed and taking the articles back home to restricted areas. Using Interstate Highway 10 as the boundary line in Louisiana or Texas would not provide the same degree of protection because Interstate Highway 10 in some places runs through areas in which citrus is grown and in other places runs through areas within 30 miles of commercial citrus growing areas. Further, Interstate Highway 10 runs through citrus growing areas in Arizona, California, and Florida.

Commenters asserted that the proposal would not be adequate to regulate chain store distributors from moving restricted articles from nonrestricted areas in northern Louisiana and Texas into restricted areas in these States. It was intended that business entities that are in the business of reshipping fruit from restricted areas in Louisiana and Texas should be subject to special requirements in order to keep restricted articles from being reshipped to restricted areas. In this connection, the proposal contained special requirements for wholesale distributors. It was proposed that restricted articles be allowed to be moved from the port of entry to wholesale distributors in nonrestricted areas of northern Louisiana and Texas only if the wholesale distributor is operating under

a valid compliance agreement whereby the wholesale distributor agrees not to reship the restricted articles to areas where they would not be eligible for distribution and use, and agrees not to reship restricted articles to any other wholesale distributor in a restricted area not operating under such a compliance agreement. Since chain store distributors are also in the business of reshipping fruit it has been determined that these compliance agreement requirements should also apply to chain store distributors. Therefore, the provisions are changed accordingly.

Commenters asserted that sufficient personnel and resources are not available to ensure that tourists will not carry restricted articles from nonrestricted areas to restricted areas. No changes are made based on these comments. The regulations are designed to provide protection against the movement of restricted articles into restricted areas by shoppers and commercial distributors. There may be some risk that tourists might carry restricted articles into restricted areas. However, as fully explained in the January 5 document it is extremely unlikely that these restricted articles would cause citrus canker disease to become established (48 FR 389). Further, it appears that amounts of citrus taken to restricted areas by tourists would be negligible. Because of the well known availability of commercially produced fresh citrus in the restricted areas, tourists visiting these restricted areas would likely wait until they arrive in the restricted area before purchasing citrus.

One commenter opposed allowing restricted articles to be imported into the specified northern areas of Louisiana and Texas because of the possibility that "dooryard, homeowner" citrus is grown in these areas. No changes are made based on this comment. "Dooryard, homeowner" citrus is not grown in these areas. Typical winter temperatures in these areas reach below 20° F. All citrus species are subtropical and cannot be grown where winter temperatures routinely fall below 28° F. for more than a period of several hours.

Commenters asserted that the proposal to allow culling and repacking of restricted articles in restricted areas should be withdrawn because no request was made in writing in this regard and because no Rio Grande Valley packers presented testimony at the hearing for the need to allow culling and repacking in restricted areas. Additionally an official of the Texas State Department of Agriculture requested that the Department reconsider its proposal to allow culling and repacking of restricted articles in restricted areas because no Rio Grande Valley producers presented testimony at the hearing for the need to repack. No changes are made based on these comments. Several fruit packers from the Rio Grande Valley made such requests by telephone prior to the rulemaking proceeding. Further, many written comments from fruit packers received after the hearing supported this portion of the proposal.

One commenter questioned whether city garbage services could be depended upon for timely pickup and disposal of culled articles. It was intended that only the persons conducting the culling and repacking activities under a compliance agreement would be allowed to transport the culls for disposal. This is necessary in order to assure that persons moving the culled articles understand and agree to comply with the culling and repacking requirements which require timely disposal. Accordingly, the provisions are clarified in this respect.

Commenters asserted that culled articles should not be allowed to be disposed of at landfills because of possible sources of contamination by human scavengers at the dump site, and by birds or insects. No changes are made because of birds or insects since birds and insects that would be present at such landfills are not attracted to citrus fruit. Further, as fully explained in the January 5 document it is extremely unlikely that these culled restricted articles would cause citrus canker disease to become established (48 FR 389). However, it does appear that without precautions it would be possible for human scavengers to remove culled articles from incinerators or landfills. Accordingly, the provisions are amended to specify that incinerators or landfills must have sufficient fencing and be managed in such a way as to effectively prevent human scavenging.

One commenter asserted that disposal facilities might not be able to meet the requirements for the disposal of culled articles. No changes are made based on this comment. The regulations provide for culled articles to be disposed of by incineration or burial at a facility that has equipment and procedures that are determined by the Deputy Administrator to be adequate to prevent the dissemination of citrus canker disease and certified by the responsible State or local official as currently complying with the applicable laws for environmental protection. As explained above the regulations also provide that landfills must be fenced and managed in such a way as to effectively prevent human scavenging. APHIS agrees that some facilities may not meet these requirements. However, unless a facility meets these requirements it would not be authorized to be used for disposal of culled articles.

Commenters asserted that the provisions concerning culling and repacking should contain additional provisions to require decontamination of individuals, clothing, equipment, containers, and packages involved in the culling and repacking process. No changes are made based on these comments. As a condition of importation restricted articles are required to be treated to destroy any surface contamination by citrus canker bacteria. However, there is a possibility that the articles could contain citrus canker bacteria in pores or wounds of the fruit. Any bacteria trapped in the pores or wounds would be in extremely small numbers. Further the survival time for bacteria on individuals, clothing, equipment, containers, or packages would be very short, and therefore APHIS believes that new infections would not be caused by these means. In addition, bacteria released from wounds or pores of fruit would likely result from openings in the skin of the fruit sufficient to release juice, the natural acid of which will quickly kill the bacteria.

One commenter asserted that water provides an almost ideal medium for transmitting citrus canker bacteria from fruit to fruit, and that washing fruit during the culling and repacking process could spread bacteria from restricted articles destined for distribution in citrus producing areas. As a condition of movement into the United States from the port of entry, restricted articles are required to have been thoroughly wetted with a solution containing at least 200 parts per million active chlorine for a period of at least two minutes. This treatment is adequate to destroy any surface contamination of citrus canker bacteria. However, in order to destroy any bacteria from wounds or pores that might be released during any additional washing during the culling and repacking process, it has been determined that such water must contain at least 200 parts per million active chlorine. Therefore, the interim rule is amended accordingly.

Commenters asserted that restricted articles stored in restricted areas might contaminate other articles stored nearby. No changes are made based on these comments. As a condition of importation restricted articles are required to be treated to destroy any

surface contamination by citrus canker bacteria. This is adequate to prevent the spread of bacteria during storage.

Commenters asserted that on-sight inspections during all culling and repacking operations would be necessary to prevent inadvertent or deliberate commingling of restricted articles. Commenters also asserted that APHIS should exercise close supervision over disposal operations, and that the unsupervised return of restricted articles to Mexico for disposal should be prohibited. No changes are made based on these comments. Persons conducting any of the culling and repacking operations would be required to conduct the operations under a compliance agreement. This would assure that they understand and agree to comply with the provisions designed to prevent commingling of restricted articles with nonrestricted articles, and designed to assure proper disposal of culled articles. Further, inspectors will conduct unannounced monitoring for all of these activities. APHIS believes this is adequate to assure compliance with the regulations.

Commenters asserted that there are insufficient funds and personnel to conduct the necessary monitoring activities to ensure compliance with the provisions allowing restricted articles to be moved into and used in northern parts of Louisiana and Texas, and to be culled and repacked in restricted areas in Texas. No changes are made based on these comments. These comments in part appear to assume that additional personnel would be required to accomplish effective monitoring. It is not intended that additional personnel be hired to accomplish the monitoring, but rather that trained inspectors already stationed throughout Louisiana and Texas conduct whatever monitoring is required in their own areas. Further, APHIS does not believe that it is necessary to have inspectors present at all times for any of the activities. Many of the regulated activities would be conducted under compliance agreements. Further it is intended that monitoring will include unannounced inspections. APHIS believes that this system will be adequate to ensure compliance with the regulations.

It was asserted by a representative of the Texas Department of Agriculture that the APHIS District Field Office in Austin, Texas which is scheduled to be abolished should remain and that APHIS hire additional inspection staff to conduct the necessary enforcement activities, or that APHIS should provide funding so that Texas could hire extra inspection staff for enforcement activities. APHIS is taking action to abolish the District Field Office in Austin, Texas as part of an overall field reorganization plan. However, this will not lessen the number of APHIS inspection personnel available in the Austin area. Further, APHIS believes that adequate personnel are available in the affected areas to conduct the necessary inspection activities.

Commenters questioned the validity of statements in the document of March 10 indicating that the proposal was made, in part, based on requests from State officials. Although State officials did not make the initial request that the interim rule be amended, the information in the document of March 10 is correct, since they did request that if the regulations were to be amended that they contain certain precautionary measures. These requests were made in telephone conversations with APHIS officials prior to the publication of the proposed rule, by Mr. David A. Ivie, Director, Agriculture and Environmental Sciences, Texas Department of Agriculture, and by Dr. John W. Impson, State Entomologist, Office of Agricultural and Environmental Science, Louisiana Department of Argiculture.

Under the heading "Executive Order 12291 and Regulatory Flexibility Act" the proposal, among other things, provides that:

> It is necessary to complete this rulemaking proceeding as quickly as possible in order to take any warranted action to relieve unnecessary restrictions. The emergency nature of this action makes it impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this action.

Several commenters disagreed that this action was of an emergency nature. However, as discussed in the proposal APHIS believes that prompt action was warranted to relieve unnecessary restrictions.

One commenter questioned whether importers "who have no direct investment in citrus production" are allowed to petition for the type of changes specified in this rulemaking proceeding. In this connection, it should be noted that the provisions of 5 U.S.C. 553(e) provide that any interested person (regardless of whether the person has an investment in citrus production) has the right to petition for the issuance, amendment, or repeal of a rule.

One commenter asserted that instead of the imposition of restrictions the Department should take action to protect citrus growers and importers by "providing an insurance policy" to cover any losses. No changes are made based on this comment. The interim regulations are established under laws designed to prevent the introduction and spread of plant pests by the imposition of prohibitions and restrictions. These laws do not authorize insurance programs for losses because of citrus canker disease.

Many commenters asserted that the proposed amendments essentially were based on economic factors that favor a small number of importers of restricted articles. Other commenters asserted that comments in opposition to the proposal were essentially based on economic factors favoring domestic growers of fruit. Also, assertions were made that the adoption of the proposal would create a risk of introducing citrus canker disease that would be too great in comparison with the benefits that would accrue. No changes are made based on these comments. The amendments are designed to relieve unnecessary restrictions while providing adequate protection against the introduction and spread of citrus canker disease. The amendments are based upon sound biological data, not economic factors favoring either importers of restricted articles or domestic growers of fruit. It is the policy of APHIS to impose the least drastic requirements that would provide adequate protection against the introduction and spread of plant pests. It has been determined that the action taken by this document is consistent with this policy.

A number of the comments which were submitted in this rulemaking proceeding are the same as comments discussed in the document of January 5, 1983. These comments are as follows:

1. It was asserted that there is a likelihood that restricted articles would be infected with citrus canker disease (48 FR 390).

2. It was asserted that restricted articles could have bacteria trapped in the pores or wounds of the fruit (48 FR 390).

3. It was asserted that restricted articles should not be allowed to be imported into citrus producing areas in the United States (48 FR 390).

4. It was asserted that buffer zones should be established around citrus growing areas in the United States and that restricted articles should not be allowed to be shipped to areas in buffer zones (48 FR 390, 391).

5. It was asserted that not enough is known about citrus canker disease at this time to make a judgment concerning what measures should be taken to prevent its spread (48 FR 391).

6. It was asserted that Mexican limes would be prohibited from moving out of the infected areas (48 FR 391).

7. It was asserted that it is unknown what effect citrus canker disease would have on citrus or citrus relatives in the United States because of differences between temperature and rainfall levels in the areas in Mexico where citrus canker occurs and the citrus producing areas in the United States (48 FR 391).

8. It was asserted that bacteria causing this disease could mutate and attack the fruit of citrus or citrus relatives or attack additional plants of citrus or citrus relatives (48 FR 391).

9. It was asserted that the citrus canker disease in Mexico is a new strain and there has not been adequate field testing to determine what types of citrus or citrus relatives in the United States are susceptible to danger from this disease (48 FR 391).

10. It was asserted that there are no adequate control measures which could be taken if the citrus canker disease were to become established in citrus growing areas in the United States (48 FR 391).

11. It was asserted that Mexico may not have the capability and willingness to exercise controls, particularly to assure that adequate measures are taken and that the Mexican control program would be comprised by bribes (48 FR 392).

12. It was asserted that Mexico should be required to establish a feasible program to eradicate the citrus canker disease (48 FR 392).

13. It was asserted that Mexican limes should be prohibited from moving from the infected areas into the State of Veracruz, the principal Persian lime growing area in Mexico (48 FR 391).

14 It was asserted that citrus canker disease was observed in Colima on citrus other than limes (48 FR 392).

15. It was asserted that citrus canker disease could be transmitted by boxes, and equipment from Mexico (48 FR 391).

No changes are made based on these comments. The amendments made by this document will not cause a significant risk of causing the introduction of citrus canker disease. Except as otherwise explained in this document, the Department still adopts the rationale that was explained in the document of January 5, 1983, concerning these comments.

Assertions were made that restricted articles should not be allowed to be imported unless a buffer zone is established in northern Mexico into which Mexican limes and other restricted articles would not be allowed to move. No changes are made based on these comments. The issue of whether any of these articles should be allowed to move from infected areas to any noninfected areas in Mexico is fully discussed in the document of January 5, and APHIS still adopts the rationale explained in that document concerning the movement of these articles in Mexico.

Recent experiments conducted by USDA at Beltsville, Maryland, have indicated that it is possible under greenhouse conditions to artificially infect fruit of Mexican limes. This infection only occurs when the fruit is innoculated by artificial wounding and when the fruit is subsequently incubated in the greenhouse under optimum conditions. It should be noted that despite numerous surveys and inspections, infected fruit has not been found to occur in the field in Mexico. The rationale for the provisions of the interim regulations is based in part on the finding that citrus canker disease does not infect fruit in Mexico, and it still appears that citrus canker disease does not infect fruit in Mexico.

Executive Order 12291 and Regulatory Flexibility Act

This amendment to the interim rule is issued in conformance with Executive Order 12291 and Secretary's Memorandum No. 1512–1, and has been determined to be not a "major rule." Based on information compiled by the Department, it has been determined that this would not have a significant effect on the economy; would not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and would not cause significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign based enterprises in domestic or export markets. Also, it is necessary to complete this rulemaking proceeding as quickly as possible in order to relieve unnecessary restrictions. The emergency nature of this action makes it impracticable for the agency to follow the procedure of Executive Order 12291 with respect to this action.

It appears that the restricted articles that would be allowed to be distributed and used in northern parts of Louisiana and Texas would not constitute a significant portion of these types of articles distributed and used within the United States.

Further, it has been determined that the culling and repacking of restricted articles in accordance with the provisions of this amendment in areas in Texas would not constitute a significant portion of the culling and repacking of fruits in the United States and would not constitute a significant portion of these activities involving small entities.

James O. Lee, Jr., Acting Administrator of the Animal and Plant Health Inspection Service, has determined that, under the circumstances explained above, it is anticipated that this action will not have a significant economic impact on a substantial number of small entities.

Effective date

This rule lessens restrictions which have been found to be unnecessary. Accordingly, prompt action should be taken to delete the restrictions. Therefore, in accordance with the administrative procedure provisions of 5 U.S.C. 553, good cause is found for making this action effective less than 30 days after publication in the **Federal Register.**

List of Subjects in 7 CFR Part 319

Agricultural commodities, Citrus Canker, Fruit, Imports, Plant diseases, Plants (agriculture), Transportation.

PART 319—CITRUS CANKER—MEXICO

Under the circumstances referred to above, "Subpart—Citrus Canker—Mexico" in 7 CFR Part 319 is amended as follows:

1. Section 319.27–1 is amended by adding a definition of "Restricted area" in alphabetical order to read as follows:

§ 319.27–1 Definitions.

* * * * *

Restricted area. Any area listed as a restricted area in § 319.27–9.

§ 319.27–5 [Amended]

2. Paragraph (a)(8) of § 319.27–5 is revised to read as follows:

* * * * *

(8) The statement "Not to be distributed within Arizona, California, Florida, Hawaii, any part of Louisiana more than 15 miles south of Interstate Highway 20, Puerto Rico, any part of Texas more than 15 miles south of the direct route from the Louisiana border to the New Mexico border beginning on Interstate Highway 20 and continuing on Interstate Highway 10, or the Virgin Islands of the United States."

3. The provisions of §§ 319.27–9 and 319.27–10 are removed and new §§ 319.27–9 through 319.27–12 are added to read as follows:

§ 319.27–9 Restricted Areas.

The following areas are designated as restricted areas: Arizona, California,

Florida, Hawaii, any part of Louisiana more than 15 miles south of Interstate Highway 20, Puerto Rico, any part of Texas more than 15 miles south of the direct route from the Louisiana border to the New Mexico border beginning on Interstate Highway 20 and continuing on Interstate Highway 10, or the Virgin Islands of the United States.

§ 319.27-10 Destination Requirements.

Any restricted article may be imported only for movement to and use in an area not included as a restricted area except that restricted articles may be culled and repacked in restricted areas in Texas as provided in § 319.27-12.

§ 319.27-11 Restricted Destination Permits.

A restricted article may be moved from the port of entry to a location not in a restricted area only pursuant to a restricted destination permit issued by an inspector. A restricted destination permit will be issued for the movement of a restricted article only upon the presentation of evidence, such as a U.S. Customs bond, an invoice, or other shipping document indicating destination, sufficient to establish that the article would not be shipped in violation of this subpart and would be shipped to a location in the United States not in a restricted area.

§ 319.27-12 Culling and Repacking in Texas; Movement to Areas in Northern Parts of Louisiana and Texas; Compliance Agreements.

(a) Restricted articles may be culled and repacked in restricted areas in Texas in accordance with a valid compliance agreement between Plant Protection and Quarantine and the person conducting such activities whereby it is agreed that any culling or repacking would be conducted under the following conditions:

(1) The culling and repacking, and any related activities would be subject to monitoring by inspectors;

(2) The culling and repacking would be conducted only under conditions found by an inspector as adequate to assure that the restricted articles would not be commingled with nonrestricted articles and would remain identifiable as restricted articles during such activities (i.e., restricted articles must be separated from nonrestricted articles by being in separate rooms or by being separated by a partition, the equipment used for culling restricted articles may not be used for processing nonrestricted articles until all restricted articles which have been culled by the equipment have been repacked for distribution or put in containers for disposal);

(3) Any water used on restricted articles would contain at least 200 parts per million active chlorine;

(4) The outer containers of the repacked restricted articles would plainly and correctly bear the general nature and quantity of the contents, the country or locality of origin, the name and address of repacker, the name and address of consignee, and the statement "Not to be distributed within Arizona, California, Florida, Hawaii, any part of Louisiana more than 15 miles south of Interstate Highway 20, Puerto Rico, any part of Texas more than 15 miles south of the direct route from the Louisiana border to the New Mexico border beginning on Interstate Highway 20 and continuing on Interstate Highway 10, or the Virgin Islands of the United States"; and

(5) Any restricted articles taken out of their containers and not repacked for distribution and use in areas where they are eligible for distribution and use must be disposed of daily by returning them to Mexico, or be disposed of daily by incineration or burial in a landfill (the incinerator or landfill must have equipment and use procedures that are determined by the Deputy Administrator to be adequate to prevent the dissemination of citrus canker disease and be certified by the responsible State or local official as currently complying with the applicable laws for environmental protection; the incinerator or landfill must also have sufficient fencing and be managed in such a way as to effectively prevent human scavenging); any restricted articles held or moved for disposal must be held or moved in covered containers adequate to prevent spillage of the articles and marked so as to identify them as culled restricted articles; and the return of restricted articles to Mexico and any movements of restricted articles to incinerators or landfills must be made only by persons conducting culling and repacking operations under a compliance agreement.

(b) A restricted article may not be moved from the port of entry to any wholesale or chain store distributor of restricted articles in an area in Louisiana or Texas not designated as a restricted area, unless the distributor is operating under a valid compliance agreement between Plant Protection and Quarantine and the distributor whereby the distributor agrees not to reship restricted articles to any restricted area and agrees not to reship restricted articles to any other wholesale or chain store distributor in a restricted area not operating under such a compliance agreement.

(c) Any compliance agreement may be cancelled orally or in writing by the inspector who is supervising its enforcement whenever the inspector finds that such person has failed to comply with the provisions of this subpart or any conditions imposed pursuant thereto. If the cancellation is oral, the decision and the reasons therefor shall be confirmed in writing as promptly as circumstances permit. Any person whose compliance agreement has been cancelled may appeal the decision, in writing, to the Deputy Administrator within ten (10) days after receiving written notification of the cancellation. The appeal shall state all of the facts and reasons upon which the person relies to show that the compliance agreement was wrongfully cancelled. The Deputy Administrator shall grant or deny the appeal, in writing, stating the reasons for such decision, as promptly as circumstances allow. If there is a conflict as to any material fact, a hearing shall be held to resolve such conflict.

(Secs. 105, 106, and 107; 71 Stat. 32-34; 7 U.S.C. 150dd, 150ee, 150ff; secs. 5, 7, and 9; 37 Stat. 316-18; 7 U.S.C. 159, 160, 162; 7 CFR 2.17, 2.51, and 371.2(c).)

Done at Washington, D.C., this 20th day of April, 1983.

William F. Helms,

Acting Deputy Administrator, Plant Protection and Quarantine, Animal and Plant Health Inspection Service.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 48, No. 79
Friday, April 22, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

7 CFR Part 57

United States Standards for Hay and Straw

AGENCY: Federal Grain Inspection Service [1] USDA.
ACTION: Final rule.

SUMMARY: In accordance with the requirements established in Executive Order 12291 for the periodic review of regulations, the Federal Grain Inspection Service (FGIS) has reviewed the United States Standards for Hay and Straw and has determined that no substantive changes are to be made to these standards. In the May 26, 1981 issue of the **Federal Register** (46 FR 28170), FGIS proposed no change to the United States Standards for Hay and Straw. Based upon all information available including the comments received regarding the hay standards, this final rule makes no substantive changes to the standards as were proposed, except that certain nonsubstantive organizational and reference changes are being made to update the standards.

EFFECTIVE DATE: May 23, 1983.

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., Regulations and Directives management, USDA, FGIS, Room 0667 South Building, 1400 Independence Avenue, SW., Washington, D.C. 20250, telephone (202) 382–1738.

[1] Authority to exercise the functions of the Secretary of Agriculture contained in the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621–1627) concerning inspection and standardization activities related to grain and similar commodities and products thereof, has been delegated to the Administrator, Federal Grain Inspection Service (7 U.S.C. 75a; 7 CFR 68.2(e)).

SUPPLEMENTARY INFORMATION: The U.S. Standards for Hay and Straw were established under the authority of the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621 *et seq.*; the Act). Pursuant to Section 203(c) of the Act (7 U.S.C. 1622(c)), the Administrator is authorized to develop and improve standards for all assigned agricultural commodities.

Executive Order 12291

This final rule has been issued in conformance with Executive Order 12291 and Secretary's Memorandum 1512–1. The action has been classified as nonmajor because it does not meet the criteria for a major regulation established in the Order.

Regulatory Flexibility Act Certification

Kenneth A. Gilles, Administrator, FGIS, has determined that this final rule will not have a significant economic impact on a substantial number of small entities as defined in the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) because most users of hay and straw inspection services do not meet the requirement for small entities as defined in the Act.

Standards Review

In compliance with the requirements for the periodic review of existing regulations, FGIS reviewed the U.S. Standards for Hay and the U.S. Standards for Straw. This review included a determination of the continued need for the standards; a review of changes in marketing factors and functions affecting the standards; and a review of changes in technology and economic conditions in the area affected by the standards. The objective was to assure that the standards continued to serve the needs of the market to the greatest extent.

In the December 28, 1979, **Federal Register** (44 FR 76835) a notice requested comments regarding nine proposed grain standardization studies, one of which proposed studying the possible inclusion of objective testing procedures into the hay standards to provide information on the nutrient constituents in hay. Forty-seven comments were received which addressed the need to revise the hay standards. Thirty comments indicated opposition to any revision of the standards while seventeen comments indicated the hay standards should be revised to include objective testing of factors which denote nutrient content.

Many of the commenters who opposed a hay standards revision stated that the inclusion of objective factors in the standards would adversely affect the hay marketing system. It was noted that the use of objective testing procedures in the hay standards would, at that time, be too costly and time-consuming to benefit the hay industry.

The commenters who indicated the hay standards should be revised emphasized the value of analyzing hay for nutrient content when marketing and using hay. It was noted that inclusion of objective factors into the standards would assist in pricing hay according to its feed value and would provide information which could be used to balance a feed ration for livestock.

Based upon those comments received and other information available, FGIS did go forward with the hay standards study. After reviewing all information available including the comments received on the hay standards study, FGIS proposed in a May 26, 1981, **Federal Register** Notice (46 FR 28170) that no changes be made to the hay and straw standards. Eleven comments were received on this proposal. Ten comments opposed the proposal and indicated the hay standards should be revised. One commenter concurred with the proposal to make no changes to the hay standards. No specific comments were received on the straw standards.

The commenters who opposed the proposal indicated the hay standards should be revised to provide information on nutrient content which can be used to price hay and balance a feed ration. Many of these commenters previously commented on the proposed 1979 study. It was also stated that the absence of uniform analysis testing procedures had caused marketing problems in some areas where unofficial quality analysis was being used to market hay, and a revision of the hay standards was necessary to provide uniformity in determination of nutrient content. These areas are limited however.

The commenter who concurred with the proposal to make no changes to the hay and straw standards stated that the inclusion of objective testing procedures into the hay standards would introduce complicated measurements into the hay marketing system which could raise the price of hay.

Although the use of objective testing procedures to measure the nutrient constituents in hay is gaining acceptance in some limited hay marketing areas, opinions vary within the hay industry and research community on which factors and testing methods most accurately denote nutrient quality. Also, hay analysis by near infrared reflectance (NIR) instrumentation, which is the testing method preferred by most hay industry members, is still under evaluation by researchers. FGIS recognizes that various hay industry members may be presently experiencing some marketing problems as a result of nonuniform unofficial analysis procedures between members of the industry but this appears to be minimal at this time. Further, the hay standards should not be revised to permit official determination of objective factors without further industry support or prior to completion of research on analysis testing. At the present time there is no reliable testing procedure that would indicate nutrient constituents which could be included in the standards. Accordingly, no substantive changes are to be made to the U.S. Standards for Hay and Straw.

FGIS will monitor research programs related to hay and straw quality determination, including the development of acceptable correlations between NIR values and approved reference methods. Industry contacts will also be maintained to monitor changes in hay and straw marketing, especially changes related to marketing through the use of quality analysis.

The U.S. Standards for Hay and Straw will again be proposed for review in April, 1988; however, if deemed necessary the standards could be reviewed sooner if rapid and accurate testing methods are developed which would make the inclusion of objective testing procedures into the hay standards beneficial to the marketing system.

Nevertheless, nonsubstantive amendments to references in certain sections of the U.S. Standards for Hay and Straw are being made to reflect changes in organizational structure and responsibility and changes in title of FGIS handbooks.

List of Subjects in 7 CFR Part 57

Hay, Straw, and Export.

PART 57—[AMENDED]

Accordingly, nonsubstantive organizational and reference changes are being made in Subpart A, § 57.1(e), § 57.1(i) Note, § 57.2(a)(6) and (b)(2), § 57.12(a) Note, and Subpart B, § 57.51(a)(2) by removing the words "Grain Division, Consumer and Marketing Service" and inserting in their place the words "Federal Grain Inspection Service." Also, Subpart A, § 57.2(b)(4) is amended by removing the words "Service and Regulatory Announcement No. 147 (revised August 1941) issued by the Agricultural Marketing Service" and inserting in their place the words "Instructions published by the Federal Grain Inspection Service."

(Sec. 203 (c), (h), Pub. L. 79–733, 60 Stat. 1087 (c), (h), (7 U.S.C. 1622 (c), (h)))

Dated: April 8, 1983.

K. A. Gilles,

Administrator.

7 CFR Part 800

Regulation Review—Deceptive Practices

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Final rule, regulation review.

SUMMARY: The Federal Grain Inspection Service (FGIS or Service) is adopting without change as a final rule its proposed rule on Deceptive Practices published in the **Federal Register** on January 17, 1983 (48 FR 1979). This action amends the regulation on Deceptive Practices by substituting the term "agency" or "official agency", thereby clarifying that the regulation is applicable to delegated States as well as designated agencies and the Service.

EFFECTIVE DATE: May 23, 1983.

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., Regulations and Directives Management, USDA, FGIS, Room 0667 South Building, 14th Street and Independence Avenue, SW., Washington, D.C. 20250, telephone (202) 382–1738.

SUPPLEMENTARY INFORMATION: Information collection requirements contained in this regulation (section 800.60) have been approved by the Office of Management and Budget under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB #0580–0006.

Executive Order 12291

This final rule has been issued in conformance with Executive Order 12291 and Secretary's Memorandum 1512–1. The action has been classified as nonmajor, because it does not meet the criteria for a major regulation established in the Order.

Regulatory Flexibility Act Certification

Kenneth A. Gilles, Administrator, FGIS, has determined that this final rule will not have a significant economic impact on a substantial number of small entities as defined in the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) because most users of the inspection and weighing services do not meet the requirements for small entities, and this action poses no new or additional duties or obligations to business entities involved in the loading, weighing, handling, or sampling of grain.

Review of Regulation

The review of the regulation on Deceptive Practices included a determination of the continued need for and consequences of the regulation. An objective was to assure that the language of the regulation is clear and that the regulation is consistent with FGIS policy. FGIS determined that the regulation: is serving the best interest of the U.S. grain industry; affords protection from deceptive practices to buyers and sellers of U.S. grain; is consistent with FGIS policy; and should remain in effect. However, in the January 17, 1983, **Federal Register** (48 FR 1979), FGIS proposed to amend this regulation by substituting the term "agency" for "official agency," thereby clarifying that the regulation is applicable to delegated States as well as designated agencies and the Service. It was originally intended that delegated States would be subject to this provision. Strictly interpreted, the definition for official agency in § 800.0(b)(48) excludes delegated States. Agency is defined in § 800.0(b)(3) as a delegated State or a designated agency, as appropriate. FGIS received no comments to the proposed rule which allowed 60 days for public comment.

List of Subjects in 7 CFR Part 800

Administrative practice and procedure, Export, Grain.

PART 800—[AMENDED]

Accordingly, § 800.60 is revised by substituting the term "agency" for "official agency," to read as follows:

§ 800.60 Deceptive actions and practices.

In the absence of prior adequate notice to appropriate official personnel, any action or practice, including the loading, weighing, handling, or sampling of grain that knowingly causes or is an attempt to cause the issuance by official personnel of a false or incorrect official certificate or other official form, is deemed to be deceptive and, as such, is

a violation of Section 13(a)(3) of the Act. For the purposes of this paragraph, adequate notice is written or oral notice given to an agency or the Service, as applicable, before official personnel begin to perform official inspection or weighing services. If oral notice is given, it must be confirmed in writing within 2 business days. To be adequate, the notice must explain the nature and extent of the action or practice in question and must identify the grain, stowage container, equipment, facility, and the official personnel actually or potentially involved.

(Sec. 15, 18, Pub. L. 94–582, 90 Stat. 2883, 2884; (7 U.S.C. 87b, 87(e)).

Dated: April 11, 1983.

K. A. Gilles,

Administrator.

[FR Doc. 83–10801 Filed 4–21–83; 8:45 am]

BILLING CODE 3410–EN–M

Agricultural Marketing Service

7 CFR Part 910

[Lemon Reg. 408]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona lemons that may be shipped to market during the period April 24–30, 1983. Such action is needed to provide for orderly marketing of fresh lemons for the period due to the marketing situation confronting the lemon industry.

EFFECTIVE DATE: April 24, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291, and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. this action is designed to promote orderly marketing of the California-Arizona lemon crop for the benefit of producers, and will not substantially affect costs for the directly regulated handlers.

This final rule is issued under Marketing Order No. 910, as amended (7 CFR Part 910; 47 FR 50196), regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon recommendations and information submitted by the Lemon Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy for 1982–83. The marketing policy was recommended by the committee following discussion at a public meeting on July 6, 1982. The committee met again publicly on April 19, 1983, at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of lemons deemed advisable to be handled during the specified week. The committee reports the demand for lemons is good.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the act.

Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

PART 910—[AMENDED]

Section 910.708 is added as follows:

§ 910.708 Lemon Regulation 408.

The quantity of lemons grown in California and Arizona which may be handled during the period April 24, 1983, through April 30, 1983, is established at 285,000 cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: April 21, 1983.

D. S. Kuryloski,

Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 83–10805 Filed 4–21–83; 1:11 pm]

BILLING CODE 3410–02–M

7 CFR Part 1124

Milk in the Oregon-Washington Marketing Area; Order Suspending Certain Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rule.

SUMMARY: This action continues through August 1983 a previous suspension of certain provisions of the Oregon-Washington Federal milk order. The suspension removes the limit on the amount of milk not needed for fluid (bottling) use that may be moved directly from farms to nonpool manufacturing plants and still be priced under the order. The continuation of the earlier suspension for January through April 1983 is made pending the completion of a hearing proceeding that was convened on February 15, 1983. One of the proposals considered at the hearing covered this issue. Based on available information concerning the market's current supply conditions, continuation of the suspension is necessary to accommodate the efficient and orderly disposition of reserve milk supplies that are available to the market.

EFFECTIVE DATE: April 22, 1983.

FOR FURTHER INFORMATION CONTACT: Martin Dunn, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–7311.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established to implement Executive Order 12291 and has been classified as a "non-major" action.

It has been determined that the need for suspending certain provisions of the order on an emergency basis precludes following certain review procedures set forth in Executive Order 12291. Such procedures would require that this document be submitted for review to the Office of Management and Budget at least 10 days prior to its publication in the **Federal Register.** However, this would not permit the issuance of the suspension in time to include May 1983 in the suspension period. The request for this action was received on April 11, 1983.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that the action would not have a significant economic impact on a substantial number of small entities. This action lessens the regulatory impact of the order on certain milk handlers and would tend to ensure that dairy farmers will continue to have

their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and of the order regulating the handling of milk in the Oregon-Washington marketing area.

After considering all relevant information, it is hereby found and determined that for the months of May through August 1983, the following provisions of the order do not tend to effectuate the declared policy of the Act:

In the third sentence of pargraphs (a) and (b) of § 1124.11, the word "not".

Statement of Consideration

This action continues through August 1983 a similar suspension for January through April 1983 (47 FR 58216). The suspension removes the limit on the amount of producer milk that a cooperative association or other handlers may divert from pool plants to nonpool plants. The order now provides that during any month a cooperative association may divert a total quantity of producer milk not in excess of the total quantity received during the month from all member producers at pool plants. Similarly, the operator of a pool plant may divert a total quantity of producer milk not in excess of the total quantity received from producers (for which the operator of such plant is the handler during the month) at such pool plant.

A continuation of the suspension is needed because a continuing increase in milk supplies relative to Class I sales may require cooperatives to handle an increasing quantity of reserve milk supplies during the May–August 1983 period. These marketing conditions, and a proposal to amend the order to accommodate them, were considered at a public hearing at Portland, Oregon, on February 15, 1983. Participants at the hearing requested that the suspension be continued pending the completion of the proceeding. The request was reiterated on April 11, 1983.

Based on available information concerning the market's supply conditions, a continuation of the suspension for the months of May through August 1983 is warranted. The suspension will accommodate the pooling and efficient handling of milk supplies for the market pending the completion of the hearing proceeding cited above. In the absence of continuing the suspension, costly and inefficient movements of producer milk have to be made solely for the purpose of pooling the milk of dairy farmers who have been regularly associated with the market. Continuation of the suspension for the period of May through August 1983 will provide the necessary flexibility in the handling of the market's reserve milk supplies and thus prevent uneconomic movements of some milk through pool plants merely for the purpose of qualifying it for producer milk status under the order.

It is hereby found and determined that 30 days' notice of the effective date hereof is impractical, unnecessary, and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area in that the most efficient method of handling milk not needed for the fluid market is by direct movements from producers' farms to manufacturing outlets. This suspension allows for such economical movements of milk while the dairy farmers involved retain producer status;

(b) The suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) This suspension has been in effect since January 1983 and this action would continue such suspension pending amendatory procedures based on a public hearing held February 15, 1983.

Therefore, good cause exists for making this order effective upon publication in the **Federal Register.**

List of Subjects in 7 CFR Part 1124

Milk marketing order, Milk, Dairy products.

PART 1124—[AMENDED]

It is therefore ordered, That the aforesaid provisions in § 1124.11 (a) and (b) of the order are hereby suspended for May through August 1983.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674).

Effective date: Upon publication of this document in the **Federal Register.**

Signed at Washington, D.C., on April 17, 1983.

John Ford,

Deputy Assistant Secretary, Marketing and Inspection Services.

[FR Doc. 83–10724 Filed 4–21–83; 8:45 am]

BILLING CODE 3410–02–M

Commodity Credit Corporation

7 CFR Part 1446

General Regulations Governing 1979 and Subsequent Crops Peanut Warehouse Storage Loans and Handler Operations; Correction

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule; correction.

SUMMARY: This document corrects a section number contained in final regulations for the 1979 and Subsequent Crops Peanut Warehouse Storage Loans and Handler Operations which were published September 10, 1981 (46 FR 45114).

FOR FURTHER INFORMATION CONTACT: David Kincannon (ASCS), 202–382–0154.

SUPPLEMENTARY INFORMATION: At 46 FR 45114, September 10, 1981, former § 1446.15, Disposition and Liquidated Damages on Segregation 3 Peanuts (published at 44 FR 33829, June 13, 1979) was redesignated as § 1446.16. However, § 1446.16, Producer Transfers of Additional Loan Stocks to Quota Pools, was not redesignated as § 1446.17. As a result, two section headings were designated as § 1446.16.

PART 1446—[CORRECTED]

Accordingly, the Commodity Credit Corporation is correcting the title of 7 CFR 1446.16, Producer Transfers of Additional Loan Stocks to Quota Pools, to read as follows:

§ 1446.17 Producer transfers of additional loan stocks to quota pools.

* * * * *

C. Hoke Leggett,

Acting Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410–05–M

FEDERAL RESERVE SYSTEM

12 CFR Part 204

[Docket No. R–0459]

Regulation D; Reserve Requirements of Depository Institutions; Reporting Requirements

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board of Governors adopted in final form amendments to Regulation D—Reserve Requirements of Depository Institutions (12 CFR Part 204)

to reduce substantially the amount of reporting required from most depository institutions that have total reservable liabilities of $2.1 million or less. Such institutions generally will be required to submit either a six item report each calendar quarter, a two item report once each year, or no report at all, depending upon their total deposit levels. Currently, these institutions that have not previously been deferred from reporting requirements submit a report of at least 22 items either weekly or quarterly. The Board proposed this rule for public comment on March 10, 1983. Comments from the public generally favored adoption of the rule and the reporting procedures in the form proposed. The final rule is substantially identical to the proposed rule.

EFFECTIVE DATE: April 28, 1983.

FOR FURTHER INFORMATION CONTACT: Gilbert T. Schwartz, Associate General Counsel (202/452–3625); Paul S. Pilecki, Senior Counsel (202/452–3281); or Robert G. Ballen, Attorney (202/452–3265), Legal Division; or Cynthia A. Glassman, Section Chief (202/452–3829), Division of Research and Statistics; Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: Section 102 of the Monetary Control Act (Title I of Pub. L. 96–221) ("MCA") authorizes the Board to require reports from any depository institution as the Board may deem necessary or desirable to discharge its responsibility to monitor and control monetary and credit aggregates. In this regard, the Board is permitted to classify depository institutions and impose different reporting requirements on each class (section 11(a) of the Federal Reserve Act, 12 U.S.C. 248(a)).

Section 411 of the Garn-St Germain Depository Institutions Act of 1982 (Pub. L. 97–320; 96 Stat. 1520) ("Act"), which was approved on October 15, 1982, provides that a reserve requirement of zero percent shall apply to reservable liabilities of $2 million or less for each depository institution. The Act also requires that, consistent with the Board's responsibility to monitor and control monetary and credit aggregates, depository institutions with reservable liabilities of $2 million or less are to be subject to less overall reporting requirements than depository institutions that have total reservable liabilities greater than $2 million. The Board also is required to minimize the reporting necessary to determine whether depository institutions have total reservable liabilities of $2 million or less. This $2 million exemption amount is to be adjusted each year for the next succeeding calendar year by 80 per cent of the percentage increase in the total reservable liabilities of all depository institutions, measured on an annual basis as of June 30. No corresponding adjustment is to be made in the event of a decrease in total reservable liabilities of all depository institutions (12 U.S.C. 461(b)(11)). The Board has adjusted this $2 million figure to $2.1 million for 1983 in accordance with the Act.

The Board, on March 10, 1983, proposed for public comment a reporting plan that would reduce substantially the reporting required from most depository institutions that have total reservable liabilities of $2.1 million or less (48 FR 10796; March 14, 1983). Under current Regulation D, depository institutions that have not been deferred from deposit reporting and reserve maintenance requirements[1] submit a 22 item report (Report on Transaction Accounts, Other Deposits and Vault Cash—FR 2900) and a supplement to that report (FR 2900s) either quarterly (if total deposits are less than $15 million) or weekly (if total deposits are $15 million or more) (12 CFR 204.3 (a) and (d)).[2] Under the Board's proposal, a depository institution with total reservable liabilities of $2.1 million or less,[3] with certain exceptions, would be required to submit either a six item report quarterly, a two item report annually, or no report at all, depending upon its level of total deposits.

The Board received a total of 58 comments from the public, primarily from depository institutions and their trade groups. A substantial proportion (over 70 percent) of the comments expressed support for the Board's proposal without suggestion for modification. Many of these commenters noted that significant cost savings would result from implementation of the proposal. The remaining commenters generally supported the proposal but suggested certain modifications, including: reducing reporting requirements for certain depository institutions with more than $2.1 million in total reservable liabilities; exempting depository institutions with less than $2 million in reservable liabilities from all reporting requirements; raising the cutoff level of $15 million in total deposits between weekly, quarterly, and annual reporters to a higher amount such as $25 or $50 million, or eliminating the limit entirely; and making the ongoing adjustments of reporting categories more frequently than once per year.

These suggestions raise issues concerning whether reporting frequency would be sufficient to determine compliance by individual institutions with reserve requirements and whether the Board would be receiving adequate information to monitor and control the monetary aggregates. For example, it was suggested that annual reporting could apply to certain depository institutions with more than $2.1 million in reservable liabilities. However, since such institutions are not exempt from reserve requirements, the reporting of additional information from institutions with more than $2.1 million in reservable liabilities is necessary to assure compliance with reserve requirements. Similarly, without occasional reporting from institutions whose total deposits have approached or are above $2 million, the Federal Reserve would be unable to determine whether or not an institution's level of reservable liabilities remains at or below $2.1 million, thereby maintaining its status as fully exempt from reserve requirements and could allow a number of institutions that should be maintaining reserves to avoid reserve requirements. In addition, since many depository institutions with less than $2.1 million in reservable liabilities have far in excess of that amount of total deposits, an exemption from reporting for such institutions would impair to an unacceptable extent the quality of information obtained for monetary policy purposes.

With respect to raising other cutoff levels between annual, quarterly and weekly reporters, the Board notes that these amounts had been subject to extensive review and believes that the cutoffs are appropriate in view of the need for information for monetary policy purposes. However, the Board will review periodically the various cutoff levels taking into account experience with the reporting procedures regarding reporting burden versus monetary policy considerations.

Several suggestions were made concerning possible modifications to the procedures for ongoing panel adjustments for more frequent ongoing category adjustments so that aberrations on reporting dates would

---

[1] The Board previously had deferred most nonmember depository institutions, other than Edge and Agreement Corporations and U.S. branches and agencies of foreign banks, with less than $2 million in total deposits as of December 31, 1979, from deposit reporting and reserve maintenance requirements.

[2] Any institution that obtains funds from foreign sources or that has foreign branches must also submit a five item Report of Certain Eurocurrency Transactions (FR 2950/FR 2951).

[3] This $2.1 million amount will be adjusted annually in accordance with section 411 of the Garn-St Germain Act.

not lock the depository institution into a reporting category that may not reflect its actual deposit history. The Board believes that more frequent panel monitoring than proposed would greatly complicate panel maintenance and would likely lead to errors in measuring the monetary aggregates. The Board notes that panel maintenance procedures also will be reviewed in the future to determine if any institutions had been disadvantaged and consider whether any modifications are appropriate.

After consideration of the comments received, the Board has determined that the plan as proposed for public comment represents the appropriate balance between reducing reporting requirements for smaller depository institutions and obtaining sufficient information to ensure compliance with reserve requirements and to adequately construct, analyze, and control the monetary aggregates. Accordingly, the Board has adopted the reporting plan proposed for public comment as a final rule.

Reporting categories. The following five categories of reporting will be instituted: First, depository institutions with more than $2.1 million in total reservable liabilities and $15 million or more in total deposits will be required to submit form FR 2900 weekly, as under current procedures.[4] Second, institutions with more than $2.1 million in total reservable liabilities and less than $15 million in total deposits will be required to submit form FR 2900 quarterly. Third, institutions with $2.1 million or less in total reservable liabilities and $15 million or more in total deposits will be required to submit a six item report FR 2910q quarterly. All institutions that are required to report quarterly (either form FR 2900 or FR 2910q) shall file this report once each June, September, December, and March for the seven day period that begins on the third Thursday of the given month.[5] Fourth, institutions with $2.1 million or less in total reservable liabilities and $2 million or more but less than $15 million in total deposits will be required to submit a two item report (FR 2910a) annually. These institutions are to file this report as of a single day in June that corresponds to the last day of the seven day period for quarterly reporters. Fifth, institutions with less than $2 million in total deposits will not be required to submit any report if their total deposits or estimates thereof can be derived by the Federal Reserve from existing available sources of data such as Reports of Condition filed with a federal supervisory agency or reports filed with state regulators.[6] Once a year (including 1983), a depository institution may elect to report deposits and maintain reserves—as of the relevant reporting date in September—in accordance with any category requiring a more comprehensive form or the same form filed on a more frequent basis than required of the category in which the institution would otherwise be placed.

Institutions with $2.1 million or less in reservable liabilities that are not required to file the FR 2900 will not be required to submit a Report of Certain Eurocurrency Transactions (FR 2950). However, all institutions required to file the FR 2900 will continue to report Eurocurrency liabilities as under current procedures.

Initial determination of applicable category. Reserve Banks will determine the initial placement of institutions in the appropriate categories and so inform the institutions. The determinations will be made as follows: For an institution currently filing the FR 2900 weekly, if the institution's total reservable liabilities are more than $2.1 million for *any one* of the last 13 reserve computation periods of 1982, that institution will continue to submit the FR 2900, either weekly or quarterly, depending on the largest level of total deposits reported during these same 13 weeks. If an institution's total reservable liabilities are $2.1 million or less for *each* of these 13 weeks, the applicable reporting category (FR 2910q, FR 2910a, or no report at all) will be determined based upon the institution's largest level of total deposits reported during these same 13 computation periods. For an institution currently filing the FR 2900 quarterly, if the institution's total reservable liabilities are more than $2.1 million on either of the last two reports filed in 1982, then the institution must continue to submit the FR 2900. For purposes of determining quarterly or weekly FR 2900 reporting for an institution currently filing the FR 2900 quarterly, total deposits are based on the largest of the institution's last two deposit reports of 1982. If the institution's total reservable liabilities are $2.1 million or less for each of these two reports, the applicable reporting category also will be determined based upon the institution's largest report of total deposits for the last two deposit reports of 1982.

Depository institutions that currently report the FR 2900, but that did not begin reporting until after December 29, 1982, will be treated as follows: For such institutions currently reporting the FR 2900 on a quarterly basis, the procedures for the initial placement of quarterly FR 2900 reporters will be used; however, the particular category into which the institution will be placed will be based upon the institution's daily average total reservable liabilities and total deposits as reported on its one quarterly FR 2900 report submitted in 1983 (i.e. in January, February, or March). For any such institution currently reporting the FR 2900 on a weekly basis, the procedures for the initial placement of weekly FR 2900 reporters will be used; however, the particular category into which the institution will be placed will be based upon the institution's daily average total reservable liabilities and total deposits as reported for each week during 1983 for which the institution submitted the FR 2900.

For depository institutions that currently do not file the FR 2900 weekly or quarterly, the applicable category will be determined from information derived from Reports of Condition submitted to federal supervisory agencies. If no such reports are available, this information will be derived from other sources such as reports filed with state regulators. If the requisite information cannot be derived from any such sources, then the institution will be expected to submit in June 1983 the FR 2910a or FR 2910q as appropriate. The appropriate category for the institution will then be determined from the submitted report.

Institutions with $2.1 million or less in reservable liabilities that currently submit the FR 2900 weekly or quarterly will continue to report under current procedures through the week ending April 27, 1983, at which time they will be relieved of reporting under current procedures. All institutions will begin reporting under the new procedures as of the appropriate reporting date for the institution's category in June 1983 as described above.

Ongoing category adjustment. The Reserve Banks will determine the placement of institutions in the appropriate category and so inform the institutions. Movement to another category on an ongoing basis, beginning in 1984, will be determined as follows: An institution submitting the FR 2900 weekly will move to another category if,

[4] At the same time, the FR 2900 will be revised to incorporate items from the supplement (FR 2900s). The supplement will then be discontinued.

[5] After the implementation of contemporaneous reserve requirements on February 2, 1984, this seven day computation period will begin on the third Tuesday of the given month.

[6] A special filing of the FR 2910a would be required of institutions for which no data sources exist, and therefore whose deposit sizes are unknown. If they report less than $2 million in total deposits, they need not report reservable liabilities.

on the 13 reports ending the last full reporting week of June of a given year, the institution qualified for a different category under criteria described above for initial determinations. This institution will continue to submit the FR 2900 on a weekly basis until the reporting period that begins on the second or third Tuesday in September of that year depending on which is the first week of a reserve computation period under contemporaneous reserve requirements. An institution filing the FR 2900 quarterly or the FR 2910q will move to another category if on the two reports submitted as of March and June of a given year the institution qualified for a different category under the criteria described above for initial determinations. An institution submitting the FR 2910a will move to another category if on the June report of a given year the institution qualified for a different category. Institutions not reporting previously may be asked to submit the FR 2910a for the first time as of that June in order to determine their appropriate reporting category. In all circumstances, the Board may require any depository institution that is experiencing above-normal growth to report on the FR 2900 weekly prior to the annual determination of reporting status.

An institution that is reclassified into the category requiring the FR 2900 on a weekly basis will submit the FR 2900 weekly starting with the weekly reporting period that begins on the second or third Tuesday in September depending on which is the first week of a computation period under contemporaneous reserve requirements. An institution that is reclassified into a category requiring quarterly reports—either the FR 2900 on a quarterly basis or the FR 2910q—will submit the appropriate quarterly report starting with the September reporting date. An institution that is reclassified (on the basis of information through June) into the category requiring the FR 2910a annual report will submit the FR 2910a as of June of the following year.

Exception to the revised reporting procedures. The reporting procedures described above will not apply to Edge and Agreement Corporations and U.S. branches and agencies of foreign banks. These institutions will continue to report weekly as under current procedures. The continuation of the present reporting procedures for these institutions is consistent with the Board's responsibility to monitor and control monetary and credit aggregates in view of the nature of the liabilities of these institutions and the opportunities available to these institutions for the avoidance of reserve requirements. The Board also noted its broad supervisory authority over, including the authority to obtain reports from, Edge and Agreement Corporations pursuant to 12 U.S.C. 601 *et. seq* and 611 *et. seq.* and the specification in the International Banking Act of 1978 that U.S. branches and agencies be subject to the same reporting requirements as similarly situated member banks (12 U.S.C. 3105(a)). In this regard, U.S. branches and agencies, as parts of much larger institutions, should be viewed as similarly situated to large member banks that are required to report weekly under the proposal.

The reduced reporting requirements will not apply before February 2, 1984, to those member banks and former member banks that are subject to reserve requirements pursuant to the reserve requirement structure in effect prior to the passage of the Monetary Control Act of 1980 ("MCA"). These institutions will continue to report under current procedures even if they hold reservable liabilities of $2.1 million or less until the completion of the phase-in of reserve requirements of the MCA (currently scheduled for February 2, 1984), at which time the revised reporting requirements will be applied. Member banks and former member banks with $2.1 million or less in reservable liabilities are required under the MCA to maintain reserve requirements until completion of this phase-in (12 U.S.C. 461(b)(8)). The information that these institutions currently are reporting is necessary to continue to calculate these reserve requirements and to administer properly the phase-in of reserve requirements mandated by the MCA.

Effect on prior amendments and small entities. The Board is amending Regulation D to provide that depository institutions will report in accordance with the procedures described above. These procedures will remain in effect after the October 5, 1982 amendments to implement contemporaneous reserve requirements become effective on February 2, 1984.

The impact of these procedures on small entities has been considered in accordance with section 604 of the Regulatory Flexibility Act (Pub. L. 96-354; 5 U.S.C. 604). As described above, these procedures will reduce significantly the recordkeeping and reporting requirements imposed upon small depository institutions. The Board estimates that these procedures will reduce the net reporting burden of depository institutions by approximately 600,000 hours.

These amendments are being made effective in less than 30 days because they relieve a restriction by providing for a reduced reporting burden for depository institutions.

List of Subjects in 12 CFR Part 204

Banks, banking, Currency, Federal Reserve System, Penalties, Reporting requirements.

Pursuant to its authority under sections 11(a), 19, 25, and 25(a) of the Federal Reserve Act (12 U.S.C. 248(a), 461, 601 *et seq.*, 611 *et seq.*) and under section 7 of the International Banking Act of 1978 (12 U.S.C. 3105), the Board amends § 204.3 of Regulation D (12 CFR Part 204), effective April 28, 1983, as follows:

PART 204—[AMENDED]

1. By amending §204.3(c) by removing the first sentence, *"Computation of required reserves."*, and inserting in its place, *"Computation of required reserves for institutions that report on a weekly basis."*; and by revising the introductory text of paragraph (a) and paragraph (d) (in its entirety) as set forth below.

§ 204.3 Computation and maintenance.

(a) *Maintenance of required reserves.* A depository institution, a U.S. branch or agency of a foreigh bank, and an Edge or Agreement Corporation shall maintain reserves against its deposits and Eurocurrency liabilities in accordance with the procedures prescribed in this section and § 204.4 and the ratios prescribed in § 204.9. Penalties shall be assessed for deficiencies in required reserves in accordance with the provisions of § 204.7. Every depository institution, U.S. branch or agency of a foreign bank, and Edge or Agreement Corporation shall file reports of deposits in accordance with the instructions of the Board, based on the level of its deposits and reservable liabilities consistent with the Board's need for data to carry out its responsibility to monitor and control monetary and credit aggregates. For purposes of this part, the obligations of a majority owned (50% or more) U.S. subsidiary (except an Edge or Agreement Corporation) of a depository institution shall be regarded as obligations of the parent depository institution.

* * * * *

(d) *Computation of required reserves for institutions that report on a quarterly basis.* For a depository

institution that is permitted to report quarterly, required reserves are computed on the basis of the depository institution's daily average deposit balances during a seven-day computation period that begins on the third Thursday of March, June, September, and December. In determining the reserve balance that such a depository institution is required to maintain with the Federal Reserve, the average daily vault cash held during the computation period is deducted from the amount of the institution's required reserves. The reserve balance that is required to be maintained with the Federal Reserve shall be maintained during a corresponding period that begins on the fourth Thursday following the end of the institution's computation period and ends on the third Wednesday after the close of the institution's next computation period. Such reserve balance shall be maintained in the amount required on a daily average basis during each week of the quarterly reserve maintenance period.

* * * * *

2. The Board also amends § 204.3(c), published at 47 FR 44707, October 12, 1982, to become effective February 2, 1984, by removing the first sentence, *"Computation of required reserves.",* and inserting in its place, *"Computation of required reserves for institutions that report on a weekly basis.";* and by revising § 204.3(d), also published at 47 FR 44707, to become effective February 2, 1984, as set forth below:

* * * * *

(d) *Computation of required reserves for institutions that report on a quarterly basis.* For a depository institution that is permitted to report quarterly, required reserves are computed on the basis of the depository institution's daily average deposit balances during a seven-day computation period that begins on the third Tuesday of March, June, September, and December. In determining the reserve balance that such a depository institution is required to maintain with the Federal Reserve, the daily average vault cash held during the computation period is deducted from the amount of the institution's required reserves. The reserve balance that is required to be maintained with the Federal Reserve shall be maintained during a corresponding period that begins on the fourth Thursday following the end of the institution's computation period and ends on the fourth Wednesday after the close of the institution's next computation period.

By order of the Board of Governors, April 19, 1983.

William W. Wiles,

Secretary of the Board.

[FR Doc. 83-10827 Filed 4-21-83; 8:45 am]

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket No. 9128]

Ethyl Corp., et al.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Final order.

SUMMARY: This final order requires the nation's two leading producers of lead-based antiknock gasoline additives, among other things, to cease announcing price changes in advance of the period contractually required for advance notice to customers, and using a "most-favored-nation" clause in any contract for the sale or delivery of lead-based antiknock compounds. Further, when stating a delivered price for any lead-based antiknock compound, the companies must also quote the product's point of origin price, a separate price for shipment, and allow customers to arrange for their own shipping and delivery. While the order does not prohibit the companies when acting individually from selecting their own customers, establishing their own prices, and selling at a delivered price or point of origin in good faith to meet the equally low price of a competitor, it does not exempt the companies' pricing practices from antitrust law.

DATES: Complaint issued May 30, 1979. Final Order issued March 22, 1983.[1]

FOR FURTHER INFORMATION CONTACT: FTC/CS-3, Thomas Keary, Washington, D.C. 20580. (202) 724-1278.

SUPPLEMENTARY INFORMATION: In the Matter of Ethyl Corporation, a corporation, E.I. Du Pont de Nemours and Company, a corporation, PPG Industries, Inc., a corporation, and Nalco Chemical Company, a corporation. The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13 are as follows: Subpart—Aiding, Assisting and Abetting Unfair or Unlawful Act or Practice: § 13.290 Aiding, assisting and abetting unfair or unlawful act or practice. Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements: § 13.533-65 Renegotiation and/or amendment of contracts.

[1] Copies of the Complaint, Initial Decision, and Opinion of the Commission filed with the original document.

List of Subjects in 16 CFR Part 13

Gasoline additives, Trade practices.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

The Final Order, including further order requiring report of compliance therewith, is as follows:

[Docket No. 9128]

In the matter of Ethyl Corporation, a corporation, E. I. duPont de Nemours & Company, a corporation, PPG Industries, Inc., a corporation, and Nalco Chemical Company, a corporation.

Final Order

This matter, having been heard by the Commission upon the appeal of respondents and complaint counsel from the Initial Decision and upon briefs and oral agrument, and the Commission for the reasons stated in the accompanying Opinion having determined to deny the appeal of respondents and complaint counsel,

It is ordered that the Initial Decision of the administrative law judge be adopted as Findings of Fact and Conclusions of Law except to the extent inconsistent with the accompanying Opinion. Other Findings of Fact and Conclusions of Law of the Commission are contained in the accompanying Opinion. Pending motions are dismissed or otherwise resolved as provided in the Opinion.

It is further ordered that the following Order to Cease and Desist is hereby entered.

Order

I

Definitions

For the purpose of this Order, the following definitions shall apply:

A. "Lead-based antiknock compound" means additives to gasoline which increase its octane rating and which contain tetraethyl or tetramethyl lead.

B. "Delivered price" means a single undivided price inclusive of product and transportation charges.

C. "Point of origin price" means a price set by a respondent for a purchase by a customer at a mill or distribution point from which a delivered price is quoted to that customer. The point of origin price shall be no greater than the delivered price offered to the customer less the actual transportation costs which would have been incurred by the seller if the sale were made on a delivered basis.

D. "Customer" means any actual or potential purchaser of a lead-based antiknock compound.

E. "Most favored nation agreement" means any contractual provision or understanding that requires, or potentially requires, a price paid by one purchaser of lead-based antiknock compound be offered to one or more other purchasers of the seller.

F. "Respondents" shall mean Ethyl Corporation and E.I. DuPont de Nemours and Company, their successors and assigns, and their officers, agents, representatives and employees, acting directly or indirectly, through any corporation, subsidiary, division or other device, individually or in combination.

II

It is ordered that respondents, in connection with the sale or distribution of lead-based antiknock compound in the United States, shall forthwith cease and desist from:

A. Publishing, distributing or communicating in any manner notice to any person outside the company, other than persons under contract in connection with marketing or sales, concerning any change or modification in the list price of lead-based antiknock compound in advance of the period contractually required for advance notice to customers.

B. Entering into a contract for the sale or delivery of lead-based antiknock compound with any customer containing a most favored nation agreement; or maintaining or complying with a most favored nation agreement in any contract for the sale or delivery of lead-based antiknock compound.

Provided, that nothing in subpart A above, shall be construed to prohibit any respondent from (1) conveying to an actual or potential customer the information necessary to respond in good faith to a request to bid on or engage in negotiations regarding the purchase of any lead-based antiknock compound; (2) contracting to sell any lead-based antiknock compound at a price determined pursuant to such bid or negotiation which is effective on a specified future date subject to neither contingency nor condition; or (3) conveying information in compliance with any order, or in connection with participation in any proceeding, of a court, legislative body or administrative agency.

III

It is further ordered that whenever a respondent offers a delivered price to a customer for the purchase of lead-based antiknock compound, said respondent shall offer the customer the option of a point of origin price at the respondent's production facility from which shipment is to be made, and at the option of any actual or potential customer:

A. Allow any customer to arrange or furnish transportation for any purchased lead-based antiknock compound from the respondent's production facilities; or

B. Offer a separately-stated price for transportation furnished or arranged by the respondent.

IV

It is further ordered that each respondent, individually, shall forthwith make its lead-based antiknock compound sales contracts and other agreements consistent with this Order.

V

It is further ordered that nothing contained in this Order shall be interpreted as prohibiting a respondent when acting individually, (1) from establishing the price at which, and selecting the customers to which, it shall sell; or (2) from selling at a point of origin or delivered price established in good faith to meet the equally low price of a competitor. No pricing practice engaged in by a respondent shall be deemed immune or exempt from the antitrust laws by reason of anything contained in this Order.

VI

It is further ordered that each respondent shall forthwith deliver a copy of this Order to all present and (for a period of ten years from the entry of this Order) future personnel, agents and representatives of respondents having sales, distribution or policy responsibilities regarding lead-based antiknock compound, and each respondent shall forward a copy of this Order to each of its purchasers during the past twelve months of any lead-based antiknock compound in the United States.

VII

It is further ordered that each respondent notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporation which may affect compliance obligations arising out of this Order.

VIII

It is further ordered that each respondent shall, within sixty (60) days after service upon it of this Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this Order and such additional reports thereafter as the Commission may require.

By the Commission, Chairman Miller dissenting. Commissioner Douglas did not participate.

Issued: March 22, 1983.

Emily H. Rock,

Secretary.

DISSENTING STATEMENT OF CHAIRMAN JAMES C. MILLER III IN ETHYL CORP., ET AL.

[FTC Docket No. 9128]

Today the Commission embarks on a bold new adventure to the frontiers of antitrust law, clearing no path for those who follow, and leaving no signposts to guide the inexperienced traveler. I fear that such a journey is fraught with peril for both explorers and for those required by law to follow the trails we blaze. I therefore decline to join the majority, and hope that the future provides a compass to guide our way along the uncharted path the Commission pioneers.

The Commission's decision creates a new antitrust case of action that, while construed by the majority to be limited to the Commission's enforcement of Section 5 of the FTC Act, may nonetheless alter radically the scope of permissible business practices available to firms in so-called oligopolistic industries. Because I fear the implications of today's decision are potentially both far-reaching and harmful to competition, I must respectfully dissent. And, because of the many troubling aspects of the majority's lengthy opinion, I feel further compelled to abandon the cardinal virtue of civilized dissenters—brevity.

I. Introduction and Summary

In essence, the majority holds today that practices adopted unilaterally by individual firms in an oligopolistic industry may constitute "unfair methods of competition" in violation of Section 5 if such practices "facilitate" interdependent behavior among the oligopolists, even absent any collusive, monopolistic, or predatory conduct. (Maj.Op. at 3 28–29.) [1] In applying this new legal standard, the majority finds that all four U.S. producers of lead-based antiknock compounds ("antiknocks") have violated the antitrust laws by adopting—at different periods of time and for legitimate business reasons—differing combinations of three so-called "facilitating" practices. Specifically, the majority finds all four respondents—DuPont, Ethyl, PPG, and Nalco—liable under Section 5 for use of uniform delivered pricing.

---

[1] The following abbreviations are used in this opinion:
Maj. Op.—Majority Slip Opinion
ID—Initial Decision Page Number
IDF—Initial Decision Finding Number
Tr.—Transcript of Testimony Page Number
RDX—Respondent Dupont's Exhibit Number

(*Id.* at 2–3, 91–92, 101–02.) In addition, DuPont and Ethyl are also found to have violated Section 5 by using advance notice of price increases and "most-favored-nation" contract clauses ("MFN clauses"), which require the seller to offer a lower price to all buyers if it is offered to any. (*Id.* at 3, 91–92.)

Employing what it terms a "rule of reason" approach (*Id.* at 28.), the majority finds that the four respondents—which account for 100 percent of U.S. antiknock sales—have violated the "spirit" of Sherman Act Section 1's prohibition of conspiracies in restraint of trade, as enforced by the Commission through Section 5 of the FTC Act. They are held liable even though no agreement—explicit or implicit—was alleged or proven. Rather, the unilateral adoption by each respondent of one or more of the challenged practices is found to be an unfair method of competition under Section 5. The legal standard proposed as a basis for this finding of liability is that Section 5 empowers the Commission to find that practices, which otherwise may be lawful in and of themselves, may, when used at the same time by members of an oligopoly, facilitate a kind of interdependent behavior that leads to the anticompetitive result the framers of the Sherman and FTC Act sought to prevent.

In dissenting from the Commission's decision in this matter, I do not necessarily reject the general concept underlying the new cause of action created by the majority. At the outset of our review of this matter, I did not reject the idea that it may be both prudent antitrust policy and within the scope of this Commission's legal authority to establish an antitrust rule of law governing "facilitating practices" within an oligopoly. I envisioned such a rule as condemning "lock-step", long-term use by all members of an oligopoly of uniform practices that had no legitimate business reasons, and that could be proven to reduce the overall level of competition by facilitating reductions in industry output of a truly homogeneous product—reductions that could not be remedied either by an existing industry renegade, or by a destabilizing new entrant. While such a rule would face both formidable theoretical hurdles and practical problems of proof, the concept nevertheless seemed a plausible one.

The Commission's experience in deciding the instant matter has, however, served to heighten considerably my skepticism about the theoretical bases and practical utility of such a legal theory. Both the legal standard adopted by the majority and the manner of its application to the record evidence here cause me to question whether antitrust prosecutors and adjudicators are sufficiently sophisticated to surmount the obstacles presented by such a theory. Simply put, can the Commission generate more benefits by invoking the theory correctly than the mischief it can create by applying it erroneously?

I need not reach this difficult question today. Rather, laying my skepticism aside and accepting the theoretical possibility that, as the majority contends, the "collusive result" can occur in the absence of collusion, I would nevertheless reject a finding of liability for any of the respondents in this proceeding. I would do so because: (1) the particular legal standard established by the majority may itself be anticompetitive and contrary to the goals of the FTC and Sherman Acts; (2) that standard is too vague and unpredictable to serve as an understandable guide to businesses that must follow it; and (3) the majority has applied its own standard incorrectly to the facts in this record.

Before explaining further the basis for my dissent, several preliminary points bear mentioning. First, I concur in the majority's conclusion that respondents' (now-discontinued) use of press releases announcing future price increases does not violate Section 5. (Maj.Op.at 3, 65–68.) Second, while the majority merely "declines to adopt" the ALJ's conclusion of law (at ID 167.) that the remaining three challenged practices are unlawful as "unfair acts or practices" within the meaning of Section 5 (Maj.Op. at 3, 31.), I see no reason to pause there. I would go further and reverse the ALJ's gratuitous conclusion on this point. Although this alternative "unfairness" cause of action was (regrettably) pleaded in the Commission's 1979 Complaint (¶14), this case seems to me clearly to be an antitrust challenge focusing upon alleged harm to competition, not a consumer protection matter concerned with injury to individual consumers.

II. The Majority's Standard May Be Anticompetitive

The majority's standard may itself be anticompetitive because its focus is too narrow. It fails to capture the essence of a dynamic, competitive market. By focusing on price competition only—and almost exclusively on list-price competition—it ignores the most important elements of competitive rivalry in this and many other American industries. By finding successful entrants liable for using practices that buyers demand, the standard discourages entry into oligopolistic industries. By focusing on a period in which any incentive to expand and earn additional market share was severely constrained by government controls, the standard fails to allow a meaningful test of its inferences and ignores the historical bases for the challenged practices. By focusing solely on the motives and behavior of respondents, it ignores the important influences of their customers, themselves potential entrants via backward vertical integration.

A. The Standard Ignores Non-Price Competition

A standard that focuses exclusively on price competition may be harmful because it ignores other forms of competition that buyers value and that can shape a competitive result. For many years now, many economists have rejected the narrow view that only prices should matter in assessing competition. As Joseph Schumpeter said more than three decades ago:

> Economists are at long last emerging from the stage in which price competition was all they saw. As soon as quality competition and sales effort are admitted into the sacred precincts of theory, the price variable is ousted from its dominant position.[2]

The record here stongly indicates that in the antiknock industry the dominant form of competition is, in fact, along non-price dimensions. These include especially the provision of services related to the safe handling and the safe and efficient use of highly toxic and explosive liquid compounds in the production of high-octane leaded gasoline. Specifically, the ALJ found that safety services are provided because of the "explosive and toxic nature" of the product. (IDF 91.) In addition, complaint counsel's economist expert testified that some of those services are "almost an inevitable part of the [antiknock] product." (IDF 210.) One of the respondents attributed a 35 percent sales gain to ten important customers in 1975 to services it had rendered that year. (IDF 98.) Moreover, there is evidence that the leading firms "literally buried" their customers with services. (IDF 90; *see also* IDFs 91, 99, 102, and 151.) Further, the ALJ found that "the furnishing of services played a significant role in the competitive rivalry between the antiknock suppliers" (IDF 151.), and that "the record is clear that refiners valued the services furnished by respondents and much antiknock business was awarded based on services." (ID 140; *see also* Testimony of Complaint Counsel's Economist Expert, cited at IDF 210.) Remarkably, the majority concedes that this case involves "a market with an emphasis on service rather than price competition" (Maj. Op. at 38.), but ignores the implications of this fact throughout the remainder of its analysis. (*See*, e.g., *Id.* at 39: "The heart of this case is the need to properly analyze *pricing* behavior in the market for these products.")

Economic theory makes clear that such non-price competition cannot be ignored in assessing competitive performance. As Adam Smith noted in his classic treatise:

> In a free trade an effectual combination cannot be established but by the unanimous consent of every single trader, and it cannot last longer than every single trader continues of the same mind.[3]

In this industry the product *cum* services—the antiknock product "package"—varies substantially among the four respondents. One respondent provides very few services internally, hiring outside consultants to provide free advice on matters of health and safety and efficient use of antiknock compounds. (IDF 96.) Another respondent furnishes most of its services through "inhouse expertise", such as direct assistance in designing and building customers' plants. (IDF 91.) Another provides computer programming assistance and training of refiners' employees. (IDF 92.) Others innovated a "tolling" arrangement in which waste products from customers' refineries are recycled and used as "scavengers" to improve the "blend." (IDFs 32, 83; and ID 155.) Yet another respondent, in conjunction with a refiner, developed a new product—tetramethyl lead (TML). When blended with

---

[2] J. Schumpeter, *Capitalism, Socialism and Democracy* 84 (1950).

[3] A. Smith, *Wealth of Nations* 129 (1937 ed.).

the existing tetraethyl lead (TEL) product. TML created new product arrays of varying TML/TEL blends, with varying product performance characteristics.

In addition, all four respondents compete with varied and varying billing arrangements, which they strenuously try to keep secret from their competitors. (IDFs 138 and 183.) All deliver antiknocks at older, lower prices after a price increase has gone into effect. (IDF 81.) This practice is so complex that the ALJ found it would take "a major accounting project" to determine the equivalent amounts of price discounts. (ID 139.) One competitor keeps the arrangements secret from its own sales personnel, issuing the concessions in credit statements to its buyers. (IDF 138.)

The ALJ's findings on this record also show that respondents do learn of their competitors' practices, but not always instantaneously or accurately. For example, sometime in 1977 Ethyl learned (apparently for the first time) that DuPont had been (1) picking up invoices for customers' outside consultants, (2) giving away weigh tanks, and (3) shipping antiknock beyond effective dates at old prices. (IDF 141.) Ethyl also discovered that PPG was giving rebates for customers' outside consulting services. (IDF 141.) Sometime within the period 1975 to 1977, one refiner customer revealed to DuPont a special discount arrangement it had begun with Nalco as early as 1974. (IDFs 68 and 140.) Prior to this proceeding, none of the other three respondents even knew of Nalco's use of MFN clauses, and PPG could not confirm that its rivals used such clauses until the Commission's complaint in this matter did them the courtesy of removing that bit of "uncertainty." (IDF 136.) Also, Ethyl erroneously thought Nalco was selling some of its antiknock at F.O.B. prices. (IDF 137.) Both Ethyl and DuPont had difficulty monitoring the "multileg" transactions between PPG and Nalco in which they exchanged or sold TML and TEL. (ID 142.)

If such pricing and quasi-pricing arrangements were difficult for competitors to monitor, it was obviously even more difficult for them to discover the exact value of the numerous varieties of internal service arrangements (such as computer programs, employee training, refinery inspections, and so on). In short, these non-list price competitive arrangements not only benefit refiner-customers, but also make any restriction of output below competitive levels a highly dubious prospect in the antiknock industry. As one commentor observes:

"Under contemporary, multi-vectored, dynamic competition, the probability of tacit collusion among a few producers is negligible because the decision variables are so numerous that no producer is able to anticipate the precise actions of his competitiors. . . . Clearly, measurement of the effectiveness of competition in a market requires an assessment of *all* vectors, and a summation of their competitive effects. The strength of competition cannot be assessed by confining attention to *prices."*[4]

[4] N. Jacoby, *Corporate Power and Social Responsibility* 140 (1973).

Yet, the Commission's decision effectively dismisses the record evidence of non-price competition as undesirable, and ignores its potentially destabilizing influence on any supracompetitive industry equilibrium. The majority's principal citation for such an approach (Maj.Op. at 43 n.60.) is a work by Professor George Stigler, in which, according to the majority, he concludes that "price competition is much more effective in increasing output and reducing profits than non-price competition . . ." [5] In fact, the remainder of the very paragraph cited by the majority makes clear that Stigler was referring to what he characterized as an "empirical judgment." [6] Stigler did not say that a competitive result would not occur where non-price competition is possible. Empirical research subsequent to his cited publication has demonstrated that it can.[7] Moreover, Stigler's analysis assumes the existence of a closed market and a collusive agreement. No such conspiracy was alleged or proven in this case.

As Professor (now Judge) Posner observed:

"[I]f other forms of competition—inventory, product quality, *service,* or whatever—are very important, the only effect of eliminating price competition may be to channel competitive energies into other, and costly, forms of competition." [8] (Emphasis added)

Or, to quote Professor (now Judge) Bork:

There is no difficulty in explaining the prevalence of product rivalry. Those who see in it the peculiar machinations of oligopolists overlook the obvious fact that consumers are sensitive to much more than price. Most products present a bundle of satisfactions, both functional and aesthetic; product rivalry is essential, particularly in complex products, if the variety of consumer tastes is to be satisfied effectively. Intense product rivalry, therefore, signals not lack of competition but its presence.[9]

To adopt a legal standard that disregards these significant non-price aspects of competition—aspects that customers value and that are an integral part of an industry's competitive process—would seem to run directly *counter* to the intent of the authors of the FTC and Sherman Acts that the majority wishes to further. It is indeed ironic that the standard adopted by the majority would tell firms in oligopolistic industries that in the future they should focus their competitive activities on forms of competition more readily detectable by competitors (i.e., list-price competition), thereby making anticompetitive arrangements—whether collusive or interdependent—more readily achievable.

B. The Standard Ignores Discounting Off List-Price

Beyond neglecting the many important types of non-price competition just discussed, the majority's myopic fascination with list-price movements also ignores an equally important characteristic of the antiknock industry. Although the majority characterizes off list-price discounting in this industry as "limited" (Maj.Op. at 51, 111.), the record evidence clearly shows that substantial discounting occurred during the "relevant period." The majority concedes that during the 1974-79 period, PPG discounted in about one-third of its sales, and that *a full 58 percent of PPG's antiknock sales (including co-producer sales) were make at discounts off list-price in 1979. (Id.* at 44, 98.) Nalco's pricing behavior was even more remarkable. As the majority are again forced to admit, *over 80 percent of Nalco's sales were made at a discount off list-price. (Ibid.)* These undisputed figures demonstrate that sales at list price for these two competitors were the exception, not the rule. Indeed, as the majority notes in discussing whether Nalco need be made subject to the Commission's order, Nalco made the "great majority" of its sales at a discount from list (*Id.* at 102.), and "[I]f Nalco's pattern of discounting is continued, most of its sales will actually not be made at list price." (*Ibid.*)

With respect to DuPont and Ethyl, the principal form of competition chosen by these two largest antiknock producers was the provision of services and other non-price aspects. However, while the majority finds otherwise, the ALJ correctly found that DuPont and Ethyl did engage in several practices that amounted to a price discount, such as allowing "forward ordering," late billing, and credit arrangements. (IDFs 80 and 88.) In addition, the record discloses at least one instance in which one of those firms in fact granted a discount to a refiner customer over most of the "relevant period". (See Maj. Op. at 74 n. 75.)

The ALJ found that the respondents took "extreme measures to ensure off-list pricing information is kept strictly confidential" (IDF 183.), and to keep the "transactions prices" of such arrangements confidential. (IDF 138.) Further, notwithstanding the record evidence of aggressive price competition by the two smallest firms, the majority condemns the "participation by PPG and Nalco in the rigid pricing patterns followed by the entire industry" and states (remarkably): "As in the case of PPG, we conclude Nalco's discounting was sufficiently restrained so as not to upset the prevailing market equilibrium." (Maj.Op. at 101.) Whatever one may conclude as to DuPont and Ethyl, I simply do not believe that the record supports this conclusion as to PPG and Nalco. Once again, I find it ironic that the majority—so anxious to increase "uncertainty" in this industry—finds PPG and Nalco liable because their price-cutting was done secretly, rather than by lowering the published list-price. It is difficult to understand how the majority can square its finding of liability as to PPG and Nalco with its own statement: "It is familiar economic theory that the more complex and more hidden the form of competition, the more difficult is the achievement of coordinated, parallel behavior in an oligopoly." (*Id.* at 43-44.) One result of today's decision may well be that future discounting will occur more often on a list-price basis, where all

[9] R. Bork, *The Antitrust Paradox* 190-91 (1978).

competitors can more readily detect it and react, according each respondent greater certainty in setting its list-prices.

C. The Standard Is Too Broad Because It Ensnares PPG and Nalco, Who Were Procompetitive Factors in the Industry

Perhaps the most disturbing implications of today's decision are raised by the majority's finding that PPG and Nalco are equally liable as this industry's two most successful firms, Ethyl and DuPont. Any lingering doubts about the inappropriateness of the legal standard adopted by the Commission today vanish when one examines the record evidence upon which this liability is imposed. Not only did these smaller firms engage in the challenged practices to a lesser extent than DuPont and Ethyl, but the record demonstrates that their influence on the antiknock industry was markedly procompetitive.

The majority finds both PPG and Nalco liable only for using uniform delivered pricing. (Maj. Op. at 2–3, 100–01.) PPG was not even alleged to have used MFN clauses. (*See* Complaint ¶12(b).) The majority finds that Nalco used MFN clauses "in a minority of cases", and concludes (correctly) that "the record does not support a finding that the use of these clauses by Nalco had a significant effect on the overall pricing pattern." (Maj. Op. at 100.)

Moreover, the ALJ found that both PPG and Nalco have been "procompetitive forces" in the antiknock industry since they entered in the early 1960's (ID 161 n.24.), which includes the "relevant period." Even the majority is forced to admit that "It is true that Nalco and PPG have introduced some competitive element into the market." (Maj. Op. at 101.) Even placing all other considerations aside, a legal standard that imposes liability on the smallest members of an "oligopoly" who have been found to be aggressive procompetitive forces in both price and non-price dimensions discussed above—apparently because in the majority's view PPG and Nalco were not able to bring their industry all the way to the perfectly competitive model—simply sweeps too broadly. Whatever the arguments for finding the two largest respondents liable, I think it clear that the complaint against PPG and Nalco should be dismissed.

I suspect it will be cold comfort to PPG and Nalco to discover that, although liable under Section 5, they are not subject to the Commission's order in this case. While the majority's new cause of action is ostensibly confined to Commission enforcement under Section 5, there is no assurance that private litigants will not try their luck at extending it to the Sherman Act. (This might be attempted under either a tacit agreement theory under Sherman Section 1, or as a conspiracy to monopolize theory under Section 2. Such an attempt would find support in the majority's lengthy discussion of why existing Sherman Act precedent involving tacit collusion supports a finding of unlawful conscious parallelism among oligopolists. *(See* Maj. Op. at 16–20.))

More important, in a very real and very significant sence, today's findings of liability as to PPG and Nalco may well engender anticompetitive consequences by the message sent to even small actors in other oligopolistic industries (and to firms contemplating entry into them). That message is that even if those relatively small firms are procompetitive forces and unilaterally and for sound business reasons adopt practices that their (larger) customers desire, they had best keep one eye on the FTC (and perhaps uninhibited private litigants) for a potential lawsuit.

In particular, today's decision may have the unintended effect of deterring entry into oligopolistic industries. Potential entrants (such as those in the position of PPG in 1961 and Nalco in 1964) will no longer be certain they may safely adopt the prevailing trade practices within the target industry, even if the practices are desired by buyer and seller alike and are adopted unilaterally. Oligopolies—where they do not result from government regulation—are usually able to persist only by virtue of significant scale economies or other efficiencies. It would be most unfortunate—and the height of irony—if the majority's actions today deterred new entry into such industries.

D. The Majority's "Relevant Period" Is Inappropriate

A legal standard intended to promote the interests of consumers and the objectives of competition policy should focus upon a time period sufficiently long to constitute a meaningful, representative test of the competitive effects of the challenged practices, and to allow an assessment of their historical bases—whether anticompetitive or efficiency-related. The time period chosen and focused upon by both the ALJ and the majority as "the relevant period" (Maj. Op. at 1.) [10]—January 1974 to May 1979—does neither. Instead, the majority carves out a single (albeit important) five-and-one-half-year "slice" of the antiknock industry's nearly 60-year history in which special factors may account for the effects the majority finds objectionable, and from which it is not possible to determine either the purposes or actual effects of the challenged practices. Because the majority opinion is virtually silent on developments prior to the "relevant period," a brief historical digression is necessary.

1. *The Challenged Practices Were Adopted Before Interdependent Behavior Was Possible.* In 1924, Ethyl's predecessor corporation was formed to market TEL compounds produced under a patent monopoly controlled (indirectly) by the DuPont Corporation. In 1938, Ethyl began producing TEL itself. But until 1948 Ethyl remained the sole U.S. marketer of antiknocks. (IDFs 16–17.) The majority concedes that Ethyl adopted uniform delivered pricing in the 1930's while it was the sole antiknock producer. (Maj. Op. at 77.) Most-favored-nation clauses were also adopted unilaterally by Ethyl while it was the only producer (IDF 156.), as were advance price notices. (Maj. Op. at 55, 62.) In short, none of the three challenged practices were adopted as a result of any decisions by competing firms—conscious or unconscious—to restrict output or promote stability. Rather, as I discuss below in Part IV(C), they were adopted for reasons of efficiency and in response to customer demands.

2. *The "Relevant Period" Is Atypical And Unrepresentative.* In addition, the history of this industry shows that the time period chosen as "relevant"—1974 to 1979—is, in fact, too short to draw any inferences of anticompetitive effects. It is possible that the claimed high prices and profits and stable market penetration cited by the majority (Maj. Op. at 36–39, 40–41, 47.) may all be attributable to the influences of government regulations alone. No such effects prior to the 1974–79 period are demonstrated by the ALJ's or the majority's findings.

From August 1971 to January 1974, federal price controls froze the price of antiknocks (at least for TEL). (RDX 332G.) In the meantime, as the majority notes, in 1973 federal environmental controls were promulgated that would ultimately result in a 90 percent reduction in antiknock industry demand, but with both the exact amount and timing of the reduction unclear. (Maj. Op. at 105; ID, Appendix C.) Originally, respondents believed the controls were to be phased in over a four-year period from 1975 to 1979. But numerous delays resulted in postponing the start until 1978, after which demand fell sharply. (IDFs 43–44; and ID, Appendix C.) One respondent, PPG, is currently in the process of exiting the industry. (Maj. Op. at 102–03.)

Thus, any tendency for prices or profits to rise in the 1974–79 period may be attributable to the substantial risk introduced by government regulations. In addition, the threat of impending extermination or near-extermination substantially weakened any desire to expand and achieve any significant additional market penetration in that period. (IDF 40.)

Finally, in many industries the expiration of price controls was followed by rapid price hikes, as firms subject to controls sought to compensate for years in which output prices were frozen.[11]

In the period preceding the start of the majority's "relevant period" there was significant entry, substantial volatility of market penetrations, stable or falling product prices, and the development of innovative products and processes. From 1948 to 1974, Ethyl's share fell from 100 to 33 percent of the market. From 1961 to 1974, DuPont's share fell from 50 to 38 percent, while Nalco had grown from nothing to 12 percent and PPG from nothing to 16 percent by the start of the "relevant period." (ID, Appendix C.) Meanwhile, from 1960 to 1974 the price of TEL rose by only 17 percent, and the price of TML actually *declined* by 10 percent. (IDF 52.) In sharp contrast, during this same period the overall producer price index rose by 57

[10] The majority opinion asserts that the Commission complaint alleges the challenged practices were followed "over an extended period." (Maj. OP. at 1.) In fact, the complaint is completely silent with respect to the duration of the alleged practices.

[11] M. H. Kosters, *Controls and Inflation: The Economic Stabilization Program in Retrospect* 40–41 (Washington: American Enterprise Institute for Public Policy Research, 1975); M. and R. Friedman, *Free to Choose* 279–80 (1980).

percent.[12] During this same time frame, Nalco developed TML, and both Nalco and PPG developed new production processes for recycling oil refiners' waste products. (IDFs 32 and 83.) All four of the so-called "facilitating" practices challenged in the complaint were in fact in use by two or more respondents during this 1960–74 period. (*See, e.g.,* IDF 124.) The majority fails to explain why these practices did not "facilitate" supracompetitive price increases during this period. Presumably, the majority feels this 14-year period is simply not "relevant."

In sum, the majority has focused exclusively on a time period during which the "aftershock" of price controls rippling through the economy, coupled with the market disruption created by the impending environmental restrictions on leaded gasoline, combined to exert a profound effect on the antiknock market. The majority attributes all of the pricing and profit performance during 1974–79 to respondents' facilitating practices, and none to government intervention. It is readily apparent what serious mischief a legal standard can create when it permits prosecutors to establish a performance-based antitrust law violation upon evidence from a short, unrepresentative, and unusual time period that is viewed in isolation from the remainder of the industry's history. Such a legal standard hardly seems consonant with the goals of competition policy.[13]

E. The Standard Ignores Respondents' Customers

The majority dismisses the actions and potential actions of respondents' customers—petroleum refiners—as irrelevant and "misguided." The basis for this approach is the majority's notion that refiners do not realize that the practices they have demanded of respondents help the refiners individually, but harm them as a group as industry output is allegedly restricted below competitive levels. (Maj. Op. at 75–76.)

The majority concedes—as it must—that respondents' customers are large, sophisticated, and aggressive firms, "many of whom did press for discounts", and that this fact cuts against their anticompetitive inferences. (*Id.* at 35.) However, it then proceeds to ignore the ramifications of this fact for its theory, saying only that it is "inadequate to change [our] overall conclusion." (*Ibid.*) Six antiknock buyers—Exxon, Mobil, Texaco, Gulf, Amoco, and Chevron—are among the ten largest U.S. industrial corporations. (IDF 19.) Many of these refiners are fully capable of integrating backward into the production of antiknocks if services were deficient, or if prices exceeded marginal cost—i.e., if respondents profits were excessive. This is more than a theoretical possibility. The ALJ found that five of the largest antiknock buyers jointly own the export market's largest producer, OCTEL. (IDF 37.) (Tariffs apparently preclude OCTEL from exporting into the U.S. in competition with respondents. (IDF 104.)) One such refiner provided technical and marketing assistance as well as financial help to facilitate Nalco's entry in 1964, and participated in Nalco's successful development of a new product, TML. Other refiners provided financing to both Nalco and PPG (then called Houston) in their inaugural years. (IDFs 50 and 139.)

Thus, when the focus of the analysis is broadened to include the special nature of customers in the antiknock industry, a considerably different picture of the competitive process emerges. In spite of criticisms by some of complaint counsel's refiner witnesses concerning respondents' pricing policies, those refiners appear to be in large measure satisfied with and responsible for the practices they criticized. Many refiners demanded the challenged practices, and felt they saved them money. Much like advertising, refiners relied on the challenged practices to compare prices or to reconsider contracts. (IDFs 112 and 126.)

There were no barriers blocking refiners from entering themselves and taking away business from an unresponsive and uncompetitive antiknock industry. Even if such entry were less likely following the EPA's actions since 1973, the majority does not explain why entry was not feasible before the "relevant period." If prices were too high or services too low at any point in time, the refiners could not only play one seller off against another, but could threaten respondents' very existence in the antiknock market with backward vertical integration. That none of these potential entrants chose to do so at any point in time—especially today when a firm with 17 percent of 1980 sales is exiting the industry and is destroying rather than selling its production facilities—is simply inconsistent with the cartel result. Perhaps the statement of one of complaint counsel's refiner witnesses, a purchasing agent for Exxon Corporation, explains best why refiners did not enter the antiknock market as producers:

> We think it's [respondents' antiknock fluid] a bargain. Even though we fuss at our vendors a lot, it really is a bargain for us as far as achieving higher quality at a lower price. (Steen, Tr. 3457.)

In sum, the record evidence in this case shows that the majority's legal standard disregards the role of respondents' customers, ignores the history of the challenged practices, fails to consider the effects of non-price dimensions of competition, and, I believe, runs counter to the goals of this nation's laws on competition. If a standard of harmful interdependent oligopoly behavior is to be adopted, it should not be so narrow and static that it permits inferences of harm which a broader, dynamic perspective would show to be, in fact, procompetitive and beneficial to competition and consumers. For these reasons alone, I cannot join in the majority's decision.

III. The Standard Is Too Vague and Unpredictable To Serve as a Reasonable Guide to Business Behavior

As the majority intimates, even if a particular legal standard is sound in theory, it may not be sufficiently simple and clear to serve as a guide for business behavior. No matter how conceptually elegant a theory, it is of no practical value if businesses cannot figure out what they are supposed to do and not do until after the fact. Yet this is precisely the result of the standard adopted in this case.

Under the cause of action created today, firms acting independently and adopting one or more practices for legitimate business reasons at the behest of their customers would become liable at some unknowntime when some unknown combination of the practices used by an unknown number of the firms took place. Even firms not found to employ the practices in any objectionable way would be liable for, in effect, "hanging around the wrong crowd." The principal guidance provided by the majority would be a list of four objectionable structural and seven objectionable performance characteristics, with a proviso that "additional" features may be relevant as well. Most of those characteristics are as vaguely stated as the challenged practices, and many exist in both competitive and monopoly situations. (*See* Part IV(A), below.)

This is simply not an understandable rule of law. At best, it would add another dimension of regulatory risk and uncertainty to this and other industries' enviornments. At worst, it would actually deter beneficial, procompetitive behavior, for fear of triggering a Section 5 violation for unknown and unknowable reasons.

A. The Standard Does Not Specify When the Challenged Practices Became Illegal

The majority decision seems to imply that each of the challenged practices in and of itself may be legal—that it is a combination of the practices that is objectionable. (Maj.Op. at 90–94.) Specifically, it allows that grace periods provided with advance price notification might be lawful if it were not for the practice of uniform delivered pricing. (*Id.* at 94.) It further concedes that MFN clauses might be legal if it were not for the practice of advance price notification. (*Ibid.*) Finally, it admits that even then the practices might be legal if a different set of structural and performance variables characterized an industry. (*Id.* at 22, 24–27, 110.)

It is, of course, well and good to have a standard that is sufficiently flexible to allow reasonable behavior. Given that a standard is to be set, it should by no means make interdependent oligopoly behavior a *per se* violation. But there should be sufficient clarity to allow firms a reasonable certainty of liability under a knowable set of circumstances.

A standard should allow future firms in similar circumstances to predict when a set of practices adopted for legitimate business reasons in response to customer demand becomes an antitrust violation. Was Ethyl guilty of a Section 5 violation when it adopted each of the practices unilaterally? Or

---

[13] It might be another matter if there were evidence that the industry had lobbied for the regulations in question. Such is not the case here.

did they become a violation when DuPont entered in 1948, and subsequently sought to take away sales from Ethyl by adopting the same business methods Ethyl had found successful? Or did the practices become unlawful when PPG's predecessor (Houston Chemical Company) entered in 1961 and sought to take away sales from Ethyl and DuPont? (PPG gained 16 percent of sales within 13 years as DuPont, the sales leader, lost 12 points in that period.) Or did the illegality arise when Nalco entered in 1964 and gained almost 12 points over the next 10 years—all at the expense of the two leading firms, DuPont and Ethyl? (*See* ID, Appendix C.) To each of these questions, the majority provides no answer.

At no point does the majority explain when the violation was triggered. The most likely inference appears to be that liability followed the imposition of government regulations in the 1970's which threatened extermination of the industry and which, according to the majority's decision, practically eliminated the possibility of further entry. (Maj.Op. at 33.) This is because the decision elsewhere states that it "would not expect such [pricing coordination] practices to have a significant effect unless barriers to entry deterred potential entrants from 'competing away' excess profits earned by firms with supracompetitive prices." (*Id.* at 25.) Since there was significant entry in the 1960's with substantial shifts in sales penetration, *I* can only infer that the decision finds that the violation occurred sometime during the subsequent period of government controls.

If that is the case, it should be so stated so that in the future potential violators will have a better chance of knowing *when* otherwise lawful practices may become a law violation. If it is not the case that government regulation triggered the violations found here, then the "relevant period" should be extended backward in time to determine precisely when the violation occurred, and with what effect on competition and consumers.

B. The Standard Does Not Specify What Combination of the Practices Is Unlawful

There are considerable uncertainties in the majority decision regarding potential liability for alternative combinations of the challenged practices. The clearest implication is that uniform delivered pricing is most objectionable to the majority. All four respondents are found liable for its use. (Maj.Op. at 2, 90, 93, 101.) The majority implies the other challenged practices could be lawful if it were not for uniform delivered pricing. (*Id.* at 94.) Further, the majority intimates that the truly objectionable aspect of advance price notification is the additional "grace period" over and above the notice period contractually required. (*See, e.g.,* Maj.Op. at 101.) Today's decision holds liable two firms—PPG and Nalco—whose only "hard core" challenged practice was uniform delivered pricing. (Nalco did not employ a grace period in conjunction with its advance notification contracts, and PPG did not utilize the grace period to initiate any price increases.) For the reasons discussed in Part IV(D), below, there is no basis in this record to infer anticompetitive effects from use of such delivered pricing by PPG and Nalco, or either of the remaining two respondents.

DuPont and Ethyl are found to have engaged—unlawfully—in *three* of the challenged practices. Nalco is found to have used the same three practices, but to be liable for only *one* (uniform delivered pricing). PPG is found to have employed only *two* of the three practices, but to be liable for only *one* (again, uniform delivered pricing). I suspect it will be difficult indeed for firms operating in "oligopolistic" industries to sort all of this out into any meaningful antitrust compliance guidelines.

Moreover, a legal standard that implies that each of several challenged practices may be lawful by themselves, but then holds liable two firms on the basis of only one of the practices, is less than precise. At best, such a standard may make firms more cautious about entering oligopolistic industries in which one or more of the challenged practices are the prevailing terms of trade.

IV. The Facts in the Record Do Not Meet the Proposed Standard

Even if the majority decision's proposed standard were broad enough and clear enough to serve as a basis for imposing liability, no violation could be found on the facts in the record. The record shows that neither the structure, performance, nor conduct criteria of the standard are satisfied by the facts in this case.

A. The List of "Objectionable" Structural and Performance Variables Do Not Support the Majority Conclusion

The majority decision offers a list of objectionable structural and performance characteristics that are intended to resolve the vagueness problem, and to serve as the theory on the basis of which the inferences of anticompetitive effects may be drawn. The majority argues that the challenged practices can be inferred to be unacceptably anticompetitive (and hence unlawful) if they are associated with certain "structural" and "performance" characteristics. They identify five such structural characteristics: (1) high concentration, (2) high entry barriers, (3) a homogeneous product, (4) inelastic demand, and (5) "additional [structural] factors." They then designate eight performance characteristics: (1) "highly uniform" prices, (2) "lock-step" price changes, (3) "limited" discounting, (4) "stable" market shares, (5) "relatively high" profits, (6) price in excess of marginal cost, (7) rising prices accompanied by both "sluggish demand" and "excess capacity," and (8) "additional [performance] factors." (Maj. Op. at 110–12.)

Each of the cited characteristics is subject to alternative interpretations in the context of almost any real-world industry situation. In addition, the categories labeled "additional factors" contain characteristics that are clearly procompetitive in the antiknock industry. I consider here certain of these structural and performance variables that the majority misinterprets in its analysis.

1. *Structural Factors.* a. *High Concentration.* It is undisputed that the antiknock industry is highly concentrated. It is also true that such concentration lends itself to an awareness that each firm's actions will influence those of its competitors and, ultimately, affects the industry equilibrium levels of price, services, and output. But this is true of all oligopolistic industries, irrespective of whether the practices challenged in this case are utilized. As one commentator observes:

> [O]ligopoly competition may be as virile as competition in an industry with a large number of small- or medium-sized firms. * * * It is immaterial that each oligopolist firm acts with awareness of its competitors as long as it makes its independent decisions on price, quality of product and service, research and innovation, cost and profit factors. * * * Again I stress that the courts have not condemned a mere oligopoly market power as a Sherman Act violation. The Supreme Court has distinguished genuine collusive conduct of oligopolists from mere conscious uniformity of business behavior arising from mutual awareness of common economic or business justifications in harmony with independent self-interest."[14]

Or, more recently, as other observe:

> When there are at least two noncolluding firms in an industry, there is no clear-cut relationship between the number of firms and the degree of competition."[15]

b. *High Entry Barriers.* I heartily concur in the majority's conclusion that the practices challenged in this case cannot lead to supracompetitive results in the absence of effective entry barriers. (Maj. Op. at 25.) However, the majority's definition of an entry barrier is subject to question. As Posner points out, properly viewed, an entry barrier is not a high cost of entry. Rather, it is a high (long-run) cost that entrants must bear in excess of those costs incurred by existing firms.[16] In this case government price controls and environmental regulations weighed equally on all firms, present or potential. Thus, they are not entry barriers in the true economic sense. But even assuming EPA regulations make it unlikely any new firms will enter the antiknock industry, this "structural factor" was not present until the early 1970's. Thus, we must presume the challenged practices were lawful until that

time. It follows that, under the majority's theory, the imposition of environmental regulations gave rise to an antitrust violation on the part of all industry firms and—in addition to mandating the medium-term demise of the industry—presumably required all four respondents to restructure their traditional business practices.

c. *Homogeneous Product.* The record evidence amply supports the majority's conclusion that antiknock compounds of a given proportion of TML and TEL are identical. (Maj. Op. at 33–34.) However, the record also demonstrates that alternative mixtures of the two compounds (*e.g.*, 75/25 TML/TEL vs 25/75 TML/TEL) have different characteristics and different prices. (*See, e.g.*, IDF 7.) More important, the antiknock product was sold with essential safety services—services that varied substantially among the four respondents. Moreover, the record shows respondents used varying credit terms and delivery dates.[17] (*See* Part II (A), above.) In short, the product—properly defined to include the associated services and delivery arrangements—is, upon close inspection, far from homogeneous. The majority's failure to recognize this explains its decision to ignore the numerous dimensions of price and non-price competition in this industry.

d. *Inelastic Demand.* The majority decision states that inelastic demand is necessary for the existence of supracompetitive prices and profits—to assure that any output restriction results in "price above marginal cost." (Maj. Op. at 25.) If this statement regards *industry* elasticity, it is simply wrong. As Posner observes, inelastic industry demand at the market price—which does prevail in the antiknock industry (IDF 42.)—is inconsistent with a monopoly result, and "is rather good evidence that the sellers are not colluding—at least, not effectively." [18] (This is because where industry demand is inelastic, joint marginal revenue would be negative.) If the majority means that *firm* demand curves are inelastic at the market price, it implies that they were acting irrationally, since marginal revenue would be negative. In addition, any inference of inelastic firm demand is inconsistent with the high degree of price sensitivity shown by buyers in the record. (IDF 27.)

e. *Additional Structural Factors.* The most obvious "additional" structural factor is the undisputed presence of large, sophisticated, and aggressive buyers. As the majority admits, this cuts against any inference of anticompetitive conduct and effects. As previously indicated, this is a crucial factor in this industry, since buyers were the most obvious source of potential entry and could have integrated backwards into the antiknock industry if profits were really excessive.

The additional crucial structural factor needed to support the majority's legal theory (which the majority decision also cites but ignores) is that "price competition [must be] more important than other forms of competition." (Maj. Op. at 22.) As discussed extensively above, the existence of substantial non-price competition—such as the service element in the antiknock industry—substantially reduces the likelihood of anticompetitive effects. The record in this case bears that out.

f. *Summary.* Thus, the majority defines and applies three of its four structural prerequisites in a manner inconsistent with the proper economic meaning of these concepts. Moreover, it omits discussion of two others that point to an absence of anticompetitive effects. When properly analyzed, five of six important structural conditions are not met by the facts in this case. The product—*cum* services and off-list price dimensions of competition—is *not* homogeneous. *Industry* demand at the transactions price is inelastic, while *firm* demand is elastic. Price does *not* appear to be the most important dimension of competition in this industry. Customers *are* large, sophisticated, and aggressive. Although there are import tariffs, entry barriers are *not* high, as evidenced by the entry and successful expansion of two respondents in the period preceding the "relevant period." (This conclusion is bolstered by the fact that respondents' customers could (as they have in other countries) integrate backward into the industry.) The majority's single remaining "structural" factor—industry concentration—is itself the subject of intense debate in the economic literature as to cause and effect.

2. *Performance Factors.* a. *"Highly Uniform Price" and "Lock-Step" Price Changes.* It is clear that the majority views the uniformity of respondents' list-prices and their tendancy to rise in so-called "lock-step" fashion as the heart of this case. (Maj. OP. at 51, 64, 80.) It emphasizes that, of 24 list-price increases during the "relevant period," 20 were identical and occurred for all respondents on the same day. (*Id.* at 48.) The basic problem with this notion is that, as the majority itself recognizes, prices tend towards uniformity in competitive markets as well as non-competitive ones. The decision seeks to resolve this dilemma by saying that it is not so much the uniformity of prices but the rapid speed at which respondents' prices adjust that demonstrates the asserted fact that prices are above competitive levels and that "price leadership" is involved.

First, I note the circularity of the claim that price uniformity (however defined) is anticompetitive because prices are above competitive levels and that prices exceed competitive levels because of price uniformity. Second, the existence of substantial service competition among respondents shows that pricing cannot be discussed in a vacuum. In this industry, any tendency for pricing to rise above marginal cost would be checked by competition along service and other non-price dimensions.

Third, the notion that "price leadership" and simultaneous movements in price provide the key distinctions between competitive and supracompetitive markets is simply erroneous. To quote from a leading economics text:

> *All* prices in all markets are administered in the sense that each person decides at what price he shall sell (in the light of market demand). . . . The prices and sales of firms are interdependent. They watch each other closely and, like dogs chasing a rabbit, move together, even in those cases where there is no leader, simply because they seek the same quarry.
>
> * * * * *
>
> That the same firm is usually the first to make a price change which others almost always follow does not mean that the leader dictates prices to other firms, nor does it imply some tacit agreement not to compete with prices. It can attest to the lead firm's greater acuity and knowledge of market conditions.
>
> * * * * *
>
> Simultaneity of price action or "dominance" by one firm is not evidence *for or against* the existence of *effective* collusive agreements. The number of sellers and the coordinated price-search process, whether it be simultaneous of lagging behind some apparent "price leader," are also irrelevant.[19] (Emphasis in original)

Or, as Posner observes:

> To be sure, there are dangers in pressing the "meeting-of-the-minds" approach too far. Suppose that a group of competing firms simultaneously experience an increase in the cost of some raw material that each one uses. In deciding how to respond to the common cost increase, each firm will consider the probable response of its competitors to the increase, since its ability to pass on the cost increase in whole or part to its customers by raising prices will depend on the pricing decisions of its competitors. The process by which the firms arrive at the new equilibrium at a higher price may thus have elements of "tacit agreement." The process is not an anticompetitive one; yet if the firms explicitly coordinated their pricing in reaction to cost change, the law would treat their agreement as illegal collusion—and rightly so, since there would be justifiable suspicion that the agreement was both unnecessary to smooth adjustment to the cost increase and motivated, at least in part, by a desire to raise the market price by more than the cost increase actually requires.
>
> This example shows that the law should not always equate tacit and explicit pricing agreements. Some degree of tacit coordination of pricing in reaction to external shocks, such as the increase in raw-material costs examined above, is inevitable and unobjectionable.[20]

In short, pricing uniformity is the inevitable result of open market processes and is consistent with either competitive or anticompetitive behavior and results. It is the expected condition in so-called oligopoly such as the antiknock industry, with or without use of the challenged practices.

b. *"Relatively High" Profits and Price Above Marginal Cost.* It appears there is simply a failure of proof on the claim that

---

[17] For the proposition that differing delivery dates and credit terms can introduce "an element of heterogeneity", *see* J. Hirshleifer, *Price Theory and Applications* 337 (1976).

[18] *Antitrust Laws* at 57.

[20] *Antitrust Law* at 72. *See also* D. Turner, "The Definition of Agreement Under the Sherman Act: Conscious Parallelism and Refusals to Deal," 75 Harvard L. Rev. 669 (1962).

profits were excessive. First, the accounting method employed failed to use *current* costs (*see, e.g.*, IDF 166.), which are necessary for any inference that entry of equally efficient competitors is being deterred.[21] Second, as Posner notes, where costs vary among firms, the competitive optimum is where price equals cost for the *marginal* seller only.[22] And as Demsetz notes, differential profits among sellers are inconsistent with an anticompetitive situation.[23] PPG's 1978 reduction in capacity and its recent exit are scarcely consistent with price above marginal cost for the marginal firm. In addition the accounting data cited by the ALJ show Ethyl's estimated rates of return before taxes are generally twice as high as those for PPG and Nalco for the "relevant period," with DuPont in between. (IDF, Appendix J.)

Moreover, as Posner also observes, "equality of price and (long-run) marginal cost is efficient only when the market is in an equilibrium, or stable, condition."[24] Such a description scarcely characterizes the antiknock industry during the "relevant period." Even as the market distortions caused by price controls were fading, those caused by environmental regulations were growing. Risk existed in the certain knowledge of near-extermination, with only the timing and pattern of the precipitous decline unclear.

These facts—and the fact that at no time before, during or since the "relevant period" did any of the large oil company buyers attempt to integrate vertically into this industry—are inconsistent with the majority's finding of supracompetitive profits and performance in the antiknock industry.

c. *"Limited" Discounts and "Stable" Market Shares.* The majority's legal standard does not specify when, or in what order of magnitude, these measures are sufficient to rebut an anticompetitive inference. Moreover, the record indicates a non-trivial amount of each, especially when the time horizon is broadened at either end. (*See* Parts II(B) and (D)(2), and III(A), above.)

d. *Rising Prices Accompanied by "Sluggish" Demand and "Excess" Capacity.* As indicated, examining price rises without reference to the effect of government controls can lead to erroneous inferences as to their cause. In this case, the rising prices cited by the majority followed over two years of price controls, and occurred during a period of extreme uncertainty and risk and of frequent raw material shortages. (*See* Part II(D)(2), above.)

Government controls also had a major effect on respondents' decisions on output and capacity. (See Part II(D)(2), above.) These included not only product regulations that, starting in 1974, threatened imminent drastic sales declines, but also EPA plant emissions controls that even made it necessary to invest in maintaining some existing equipment and plant. (IDF 38.) Thus, it is not surprising that two respondents, Ethyl and PPG, reduced plant capacity during the relevant period.

Yet, by 1979, a year plagued by supply problems with lead and sodium inputs (IDF 40.), Ethyl was operating at 95 percent capacity, and in 1980—for which no capacity data are available—it replaced DuPont as the industry leader (IDF 38; ID, Appendix C.) DuPont, which operated at between 84 and 94 percent of capacity in the recession years of 1974 and 1975, achieved 100 percent capacity in 1976. (IDF 39.) While the record is somewhat unclear following that time, the ALJ states that DuPont operated at "excess capacity" through 1979. (IDF 39.)

Nalco operated at from 77 to 89 percent capacity during the 1974 to 1979 period and had supply problems in three of those years. (IDF 41.) The ALJ found that "PPG did not have any significant excess capacity" from 1974–1976, and operated at 86, 100, and 88 percent capacity during the next three years. (IDF 40.) In addition, Nalco was the high-cost producer in the industry, so that any excess capacity on its part is perfectly consistent with price equal to marginal cost for it, the marginal firm—the competitive optimum for an industry with varying firm costs. (See Part IV(A)(2)(b), above.)

Similarly, PPG's current exit and creation of excess facilities that no one wants to buy is itself inconsistent with any idea that profits in this industry *were* during the "relevant period" or are today excessive. This is an important point because economic profit—the kind that is relevant to any assessment of competition—is a forward-looking concept that must take expected future events (such as eventual near-extermination) and uncertainty (such as the timing of the process) into account. (*See* references cited at Part IV(A) (2)(b), above.)

e. *"Additional Factors".* The most important "additional factors" in this case are the various beneficial services and innovations in products and production processes. (See Part II(A), above.) Once again, as in the case of the structural factors these are ignored by the majority opinion.

f. *Summary.* The decision's (mis)application of performance criteria to the record evidence does not provide support for an oligopoly theory under which anticompetitive effects can be inferred from the challenged practices. The majority's facile treatment of these criteria only adds to the confusion caused by the conduct criteria, which fail to explain when the challenged practices become a violation, in what combination, or when adopted by what number of firms.

B. Evidence on Conduct

What seems to trouble the majority most in this case is its perception that there is some sort of intent on the part of each of the four respondents to "maintain" a "stable market" in this industry by unilaterally maintaining the challenged practices. In support of this perception, the majority cites an Ethyl document expressing concern about "maintaining a stable market for antiknocks" in a period of "market shrinkage" and "overcapacity." (Maj. OP. at 52.) It also cites testimony by DuPont's Director of Marketing that selling at F.O.B. to a large customer in this time period could lead to a decline in general prices (*Id.* at. 81.), and statements by him and an Ethyl document about the possible impact of eliminating MFN clauses on industry "marketing practices." (*Id.* at 72–73.) Finally, the majority cites evidence that both DuPont and Ethyl view the practice of advance price notification with grace periods as a way to "test" competitors' reactions before making pricing actions final. (*Id.* at 58–60.)

While the cited statements are subject to varying interpretations, they may reflect little more than expressions of great concern about the inevitable destabilization and monetary losses that would occur once the environmental controls were put into place and phased into completion. Recall that the phasing down was to have begun on January 1, 1974—the beginning of the "relevant period," but after a series of uncertain delays (*ex ante*), the start of the process began on January 1, 1978. (IDF 44.) It was followed by a precipitous drop in demand, over 50 percent in three years (IDF, Appendix C.), as the controls became binding.

Thus, the Ethyl statement about "maintaining" a "stable market," as well as the DuPont and Ethyl statements about the potential for destabilization from changing certain marketing practices, are consistent with fully justified fears about what might happen to them as a result of sudden changes in industry conditions—whether they be caused externally such as by government controls, or internally, such as those initiated unilaterally in the form of new or different marketing practices, products, or production methods.

Moreover, concern expressed (internally) by some business executives from two respondents about the prospect of market destabiliztion does not necessarily imply that price or the price-service equilibrium was at supracompetitive levels. Any resulting destablization could drive existing prices below cost or below the competitive level—the marginal cost of the marginal firm—even from a pre-existing competitive equilibrium, as PPG's recent exit makes clear. In that regard, the cited statements do not establish an intent to increase market stability. It is one thing to adopt actions that might raise prices above competitive levels. It is quite another simply to refrain from actions that might reduce prices below competitive levels.

Another aspect of the challeged practices on which the majority place great reliance in finding liability is the use by some respondents of a grace period that provides notice of price changes over and above that contractually required. Although the majority notes that only DuPont and Ethyl used it (Maj. Op. at 95–96, 98–99.), its opinion attacks the grace period by including all four firms:

By following a consistent practice over the relevant period adhered to by every industry member, the respondents have developed an

[24] *Antitrust Law* at 136.

effective way of signaling pricing intentions. The practice of conveying to a competitor what is, in effect, a price "offer," then waiting for a response—while avoiding different list prices at any time—actually goes beyond the competitive effect in exchanging current price information condemned in *Container Corp.* In that case, the practices which reduced competition consisted of agreements to exchange current price information by firms representing almost all the market. Here firms representing *all* the market have not only developed a system for exchanging current price information but for communicating future information with the opportunity to announce future prices on a contingent basis. (Maj. OP. at 51–52, emphasis in original.)

In fact, the price movements associated with the "grace period" are no more a "signaling tool" in this industry than the actual movement of prices among competitors in any small numbers situation. Where there are few competitors *any* price change is a "signal" to competitors about a firm's intentions, whether that change be in spot or future market contracts.

Moreover, as long as what amounts to a "futures" market in this case (the practice of advance price notification) is allowed to exist, no change in the so-called "testing" behavior can be expected to occur. The very same "testing"—raising, then adjusting prices before they are implemented—can be achieved simply by adjusting the effective dates of the announced price increases after the announcement. In addition, the practice of forward-ordering at the old price can be extended in time to accommodate any disenchanted buyer, without any loss of sales, even after a price rise occurs. Thus, the majority's notion that respondents will be less likely to initiate price rises if the "grace period" is abolished is without support in the record.

C. The Challenged Practices Were Adopted for Legitimate, Procompetitive Business Reasons, and Were Desired by Respondents' Customers

The majority asserts that in assessing the challenged practices under a rule of reason approach, it considers any procompetitive effects of the practices. (Maj. Op. at 22.) It then proceeds to reject all of respondents proffered justifications for the practices, feeling they are outweighed by the assertedly anticompetitive effect of the practices on (list) price. (Maj. Op. at 89–91.) I find respondents' arguments persuasive and more than ample to offset the tenuous inferences upon which the majority's finding of anticompetitive effects is grounded.

Ethyl adopted one of the challenged practices—uniform delivered pricing—just prior to 1938 as a means of encouraging its buyers to receive the highly explosive fluids in tankcars as opposed to drums. (IDF 124.) Today, although some large refiners with plants located close to respondents's plants object to the practice other buyers find that the practice saves state transportation and inventory taxes, which they would have to pay if title passed prior to delivery. They also testified that it simplifies purchasing decisions by allowing quicker evaluation and comparison of respondents's prices. (IDF 126.) The ALJ found that the prices "possibly does eliminate some costs customers would incur under an F.O.B. system" (IDF 126.), and that it is based on "some legitimate business reasons." (IDF 156.) The record indicates that freight savings to buyers located closest to respondents' plants from an F.O.B. system would only be roughly one percent of selling price. (See Part IV(D), below.)

Like uniform delivered pricing, the ALJ found that MFN clauses are also based on "some legitimate business reasons." (ID 156.) The record reflects that refiners desire the clauses (ID 154.), including the small refiners. (IDF 121.) Moreover, one respondent—Nalco—met customer objections when it generally dropped the practice. (IDF 120.) (PPG was not charged with utilizing the practice.)

The ALJ found that refiner witnesses (including those from small refiners) also generally favored respondent's practice of providing advance price notification. (IDF 112.) There is no evidence that it—or the accompanying grace period to which the majority particularly objects—was adopted as a result of any meeting of the minds of respondents. The grace period was not even utilized by Nalco. (Maj. Op. at 98.) PPG's officials testified that it would like to drop the practice. (IDF 110.) Refinery witnesses (including complaint counsel's) testified that they believed the practice saves them money by permitting "forward ordering" at the old price, and that it facilitates their firms' ability to reconsider respondents' contracts and to engage in financial and other planning. (IDF 112.)

D. The Majority's Key Practice—Uniform Delivered Pricing—Was Presumed But Not Proven To Be Anticompetitive

Finally, I discuss what appears to be the lynchpin of the majority's finding of liability—the impact of uniform delivered pricing, a practice respondents' customers utilized to compare prices. Given the majority's extensive treatment of the case law involving uniform delivered pricing, its statement that absent such delivered pricing the practice of advance price notification with grace periods might be lawful, and the fact that liability for two of the four respondents rests solely upon the asserted anticompetitive effects from this one practice, it seems appropriate to analyze the benefits and costs of this practice in some detail.

Curiously, after mentioning respondents' arguments that the practice did not have a substantial influence on antiknock selling prices, the majority's decision makes no attempt to look at the numbers in the record. Instead it chooses to emphasize—erroneously—that as in *Triangle Conduit,*[25]

[25] *Triangle Conduit & Cable v. FTC,* 168 F.2d 175 (7th Cir. 1948), *aff'd by equally divided court sub nom., Clayton Mark & Co. v. FTC,* 336 U.S. 956 (1949).

respondents' plants are "scattered over the United States," so that delivery costs are quite different among them to different refiners. (Maj. Op. at 85, 93.) The majority then invokes its uncertainty theory, and finds that replacing this practice with F.O.B. pricing "would have introduced the complexity of 'masking' discounts because it would have introduced price variations among customers." (*Id.* at 82.)

This claim is supported in the first instance by reference to Nalco's practice of selling its Texas-produced TML to a customer in Antioch, California for the same price as DuPont charges in that location. (*Id.* at 76.) But the record shows that Nalco shipped its TML to Antioch, where it purchased DuPont's TEL for mixing prior to customer purchase. (IDF 89.) Similarly, DuPont would at least sometimes purchase TML from Nalco's Texas plant for mixing prior to delivery (IDF 20.) or, alternatively, ship its TML and TEL products to its mixing plant in Texas. Although DuPont had manufacturing plants in California and New Jersey, it has a mixing plant in Texas. Contrary to the majority's erroneous and misleading assertion that respondents' plants are "scattered across the country" (Maj. Op. at 85, 93.), they are in fact remarkably concentrated. DuPont's mixing plant as well as *all* plants of each of the other three respondents are all located within a 300-mile radius in Texas and Louisiana. (IDFs 1–4: Rand McNally Atlas.)

Thus, for example, when Nalco sold a 50/50 TML/TEL mix to customers in Antioch, California (TML cannot be used without mixing), its price with delivery cost would be identical to its F.O.B. price in either California or Texas or at any point in between. Moreover, the same kind of tendancy toward inter-area price equalization—with or without this challenged practice—occurs when (as is generally true here) the *buyers'* plants are scattered across much of the U.S.

In addition, the ALJ found that average freight costs in the antiknock industry "are small in relation to the total market price." (IDF 190.) The exhibit cited by the ALJ on delivery costs (IDF 127; and RDX 333.) supports this finding. It shows that in 1979, average actual delivered costs among respondents' customers amounted to 1.53¢ per pound (less than 2 percent of list price in that year (IDF, Appendix D)] and that the lowest potential F.O.B. price for the refiner located closest to respondents' plants was 0.3¢ per pound. Thus, the maximum possible effect on such refiners versus the industry average was on the order of 1.2¢ per pound, or little more than 1 percent of selling price.

At the other end, there were two small refiners with shipping costs of 8.1¢ per pound who were, in effect, receiving a discount of that amount—less the 1.5¢ average actual freight costs per pound incurred in delivery. But 59.5 percent of the refiners, and 84.5 percent of shipments, had actual average freight costs of under 2¢ per pound. And 76 percent of the refiners and 94.5 percent of shipments had actual average freight costs of less than 3¢ per pound. Of the ten largest buyers, the spread ranged from 0.5¢ per pound to 2.8¢ per pound. (RDX 333.) Given

the list-price of antiknocks—which DuPont currently places at $1.07 per pound (Maj. Op. at 106.)—it can readily be seen that the ALJ was correct in finding that delivery charges are "small in relation to sales price." (IDF 127.) This fact, coupled with the relatively centralized locations of respondents' plants, demonstrates that use of uniform delivered pricing cannot have had the significant anticompetitive effect attributed to it by the majority.

Given the legitimate business reasons for this practice (including the desire by respondents and their customers that respondents maintain title and liability for the explosive compounds until delivery), given the savings on state taxes and on bookkeeping costs associated with determining where the products went, and given the small fraction of total sales price accounted for by transportation costs, I find insufficient support in the record for the allegation that uniform delivered pricing had any substantial impact on competition in this industry. Elimination of uniform delivered pricing would not introduce substantial F.O.B. price variations among respondents, and its overall cost to customers as a group would likely exceed any conceivable benefits to particular refiners.

V. Conclusion

In sum, taken together the challenged practices—uniform delivered prices, advance price notification with grace periods, and most-favored-nation clause—arguably reduce buyers' search costs and facilitate their ability to find the best price/value among refiners. In light of the intense competition in services and other non-list-price dimensions, moreover, the record fails to prove that these practices are anticompetitive. Their prohibition could well impose costs on consumers without any corresponding benefits. For these reasons, and for a similar lack of any evidence of anticompetitive structure and performance; for the failure to articulate an understandable and predictable standard of liability; and for the use of a criterion whose focus is so narrow as to present a possibly erroneous and harmful view of competition, I dissent.

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Subch. E

Change in Format for Publication of New Animal Drug Approvals

AGENCY: Food and Drug Administration.

ACTION: Rule-related notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that **Federal Register** documents amending the animal drug regulations to reflect approval of new animal drug applications and supplements will no longer contain an abstract of the basis of approval. This information will be contained in the freedom of information (FOI) summary.

FOR FURTHER INFORMATION CONTACT: J. Taylor Madill, Bureau of Veterinary Medicine (HFV-231), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3336.

SUPPLEMENTARY INFORMATION: Section 512(i) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360b(i)) requires that upon approval of an original or supplemental new animal drug application (NADA), a notice be published in the **Federal Register** setting forth the name and address of the applicant, conditions and indications of use of the new animal drug, and other necessary information. The notice is effective as a regulation and is codified in the Code of Federal Regulations.

The **Federal Register** document usually contained a brief summary of the basis for approval in the preamble. This summary has included statements of agency conclusions under specific statutory provisions, regulations, or policies. The basis for approval has also been described in more detail in the FOI summary as required by 21 CFR 514.11(e).

To expedite the publication of regulations reflecting approval of NADA's and supplemental NADA's, and to consolidate into one document the summary of the agency's basis for approval, FDA has decided that it will no longer routinely include the brief summary in the preamble. Instead, the preamble will refer readers to the FOI summary for a complete discussion of the basis for approval, including a summary of the data supporting the approval.

Dated: April 15, 1983.

William F. Randolph

Acting Associate Commissioner for Regulatory Affairs

21 CFR Part 177

[Docket No. 82F-0190]

Indirect Food Additives; Polymers; High-Temperature Laminates

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of an aliphatic polyurethane laminating adhesive for fabricating retortable pouches and related high-temperature laminates. This action is in response to a food additive petition filed by Fujimori Kogyo Co., Ltd.

DATES: Effective April 22, 1983; objections by May 23, 1983.

ADDRESS: Written objections to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Terry C. Troxell, Bureau of Foods (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of July 13, 1982 (47 FR 30291), FDA announced that a petition (FAP 2B3633) had been filed by Fujimori Kogyo Co., Ltd., 4-16, 1-Chome Nihonbashi, Bakuro-Cho, Chuo-Ku, Tokyo, Japan, proposing that the food additive regulations be amended to provide for the safe use of a 2-component aliphatic polyurethane laminating adhesive for fabricating retortable pouches and other high-temperature laminates identified in § 177.1390(c).

FDA has evaluated the data in the petition and other relevant material and concludes that the proposed food additive use is safe and that § 177.1390 should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Bureau of Foods (address above) by appointment with the information contact person listed above. As provided in § 171.1(h)(2), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding may be seen in the Dockets Management Branch (address above), between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 177

Food additivies, Polymeric food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348)) and under authority

delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Foods (21 CFR 5.61 as revised February 4, 1983; 48 FR 5251), Part 177 is amended in § 177.1390 by revising paragraph (c)(2)(iv)(*b*) to read as follows:

PART 177—INDIRECT FOOD ADDITIVES: POLYMERS

§ 177.1390 High-temperature laminates.

* * * * *

(c) * * *

(2) * * *

(iv) * * *

(*b*) Urethane cross-linking agent comprising not more than 25 percent by weight of the cured adhesive and formulated from 3-isocyanatomethyl-3,5,5-trimethylcyclohexyl isocyanate (CAS Reg. No. 4098–71–9) adduct of trimethylol propane (Cas Reg. No. 77–99–6) and/or 1,3-bis(isocyanatomethyl) benzene (CAS Reg. No. 25854–16–4) adduct of trimethylol propane.

* * * * *

Any person who will be adversely affected by the foregoing regulation may at any time on or before May 23, 1983 submit to the Dockets Management Branch (address above) written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this regulation. Received objections may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This regulation shall become effective April 22, 1983.

(Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348))

Dated: April 12, 1983.

Sanford A. Miller,

Director, Bureau of Foods.

[FR Doc. 83–10562 Filed 4–21–83; 8:45 am]

BILLING CODE 4160–01–M

21 CFR Part 558

New Animal Drugs for Use in Animal Feeds; Virginiamycin

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed by SmithKline Animal Health Products providing for a 4.4 percent virginiamycin premix (20 grams virginiamycin activity per pound) for use in making medicated swine feed and broiler rations.

EFFECTIVE DATE: April 22, 1983.

FOR FURTHER INFORMATION CONTACT: Lonnie W. Luther, Bureau of Veterinary Medicine (HFV–128), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4317.

SUPPLEMENTARY INFORMATION: SmithKline Animal Health Products, Division of SmithKline Corp., 1500 Spring Garden St., Philadelphia, PA 19101, has filed a supplement to NADA 91–513 for Stafac 44 (virginiamycin 4.4 percent, 20 grams virginiamycin activity per pound). The supplement provides for a new premix concentration. The NADA previously provided for virginiamycin premix levels of 2.2 percent and 11 percent (Stafac 22 and Stafac 110).

The supplement is approved and the regulations are amended accordingly.

Approval of this supplement does not change the approved conditions of use of the drug. It permits use of a different premix concentration in addition to those previously approved. The use levels for virginiamycin in the feed remain the same. Approval does not require new effectiveness or safety data. Under the Bureau of Veterinary Medicine's supplemental approval policy (42 FR 64367; December 23, 1977), this is a Category II supplemental approval which does not require reevaluation of the safety and effectiveness data in the original approval. In addition, a freedom of information summary for approval of the supplement is not required.

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24(d)(1)(iii) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), § 558.635 is amended by revising paragraph (b)(1) to read as follows:

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

§ 558.635 Virginiamycin.

* * * * *

(b) *Approvals.* (1) Premix levels of 2.2 percent (10 grams per pound), 4.4 percent (20 grams per pound), 11 percent (50 grams per pound), and 50 percent (227 grams per pound) granted to No. 000007 in § 510.600(c) of this chapter for use as in paragraph (f).

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Ch. I

[FHWA Docket No. 83–4, Notice No. 4]

Truck Size and Weight Policy Statement

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Cancellation of certain interim designations.

SUMMARY: The FHWA has made an interim designation of certain highways in each State on the Federal-aid Primary System that must be made available to certain size trucks for the period from April 6 through October 3, 1983. By this notice the FHWA is cancelling the interim designation of those primary system highways in the States of Georgia, Pennsylvania, Vermont, and Alabama that had not been designated by those States. The agency will address the interim designation for qualifying primary system highways in these four

States in a separate proceeding, which will be instituted in the near future.

DATE: This cancellation is effective April 20, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Harry B. Skinner, Office of Traffic Operations, (202) 426–1993, or Mr. David C. Oliver, Office of the Chief Counsel, (202) 426–0825, Federal Highway Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION: On April 5, 1983, (48 FR 14844) the FHWA published a notice of policy statement that designated, on an interim basis, qualifying Federal-Aid primary system (FAP) routes available to certain size vehicles pursuant to section 411 and 416 of the Surface Transportation Assistance Act of 1982 (STAA) (Pub. L. 97–424, 96 Stat. 2097), as amended by Pub. L. 98–17. The States of Georgia, Pennsylvania, Vermont, and Alabama have instituted actions in United States District Courts to enjoin that designation with respect to those primary system highways that had not been proposed for designation by the individual States in response to an earlier FHWA notice. One of the allegations in these suits was that the States had not had an opportunity to comment upon the safety of particular highway segments in the FHWA designations prior to their issuance.

To clarify the status of highways that will be open to the classes of vehicles covered by the STAA in light of the pending litigation and to accommodate some of the concerns of these States, the FHWA is cancelling the interim designation of all routes added by the FHWA in the April 5 notice beyond those designated by the four States. So that the public is aware of which highways will be open to these vehicles, we are setting out, in an Appendix to this notice, the FAP highways proposed for designation by Georgia, Pennsylvania, and Alabama. (Vermont did not propose for designation any primary highways.) We wish to emphasize that the entire Interstate System in these States remains open to the trucks authorized by the STAA.

The issue of interim qualifying primary system highways four these for States will be addressed in a proceeding that will be instituted in the near future. At that time the States and other interested parties will be able to submit comments on FHWA proposals for interim designations.

This cancellation affects only the States listed above. In other States that have concerns over the FHWA interim designations we are continuing discussions to resolve questions raised about the designations and to delete or add routes to accommodate States' concerns. Discussions have already been concluded with several States and a revised list of interim designations will be published shortly.

Issued on: April 20, 1983.

R. A. Barnhart,

Federal Highway Administrator, Federal Highway Administration.

BILLING CODE 4910-22-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

24 CFR Part 885

[Docket No. R-82-982]

Housing for the Elderly or Handicapped; Amendment to Implement Cost Savings Procedures; Correction

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule; correction.

SUMMARY: This document makes three technical amendments. It corrects a dollar amount stated as the per-unit cost limit for one bedroom units in non-elevator buildings in the final rule published on March 18, 1983 (48 FR 11432). It adds the category of moderate rehabilitation contracts to the description of contracts between borrowers and general contractors required by § 885.415(m) to be furnished before initial loan closing, consistent with a recent amendment to other provisions of Part 885 (47 FR 51565, November 16, 1982). It also adds one sentence to the paragraph concerning simplified cost certification to make it clear that verification by an independent Certified Public Accountant or an independent public accountant is necessary.

FOR FURTHER INFORMATION CONTACT: Grady J. Norris, Assistant General Counsel for Regulations, Department of Housing and Urban Development, Room 10276, 451 Seventh Street, SW., Washington, D.C. 20410. Telephone (202) 755-7055. (This is not a toll-free number.)

PART 885—[AMENDED]

Accordingly, the following corrections are made to FR Doc. 83-7090 appearing on 11432 in the issue of March 18, 1983:

§ 885.410 [Corrected]

1. On page 11435, column 2, in § 885.410(b)(2), "$24,862" is corrected to read "$24,662".

§ 885.415 [Corrected]

2. On page 11435, column 3, in § 885.415(m), "Construction or Substantial Rehabilitation Contract" is revised to read "Construction, Moderate Rehabilitation or Substantial Rehabilitation Contract."

3. On page 11436, column 2, paragraph (d) of § 885.425 is corrected to read as follows:

§ 885.425 Completion of acquisition with or without moderate rehabilitation, construction or substantial rehabilitation, execution of HAP contract, and cost certification and approvals by HUD.

* * * * *

(d) In lieu of the requirements set forth in paragraphs (c) (1) and (3) of this section, a simplified form of cost certification prescribed by the Secretary may be completed and submitted by the Borrower for projects with mortgages of $500,000 or less. The simplified cost certification shall be verified by an independent Certified Public Accountant or an independent public accountant in a manner acceptable to the Secretary. (Approved by the Office of Management and Budget under OMB control number 2502-0044.)

Excise Taxes; Extension of Payment Due Date for Certain Fuel Taxes

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document provides temporary regulations with respect to the extension of payment due date for certain fuel taxes. Changes to the applicable law were made by the Highway Revenue Act of 1982. These regulations affect certain qualified people and provide them with the guidance needed to comply with the law.

DATE: The regulations apply to certain fuel taxes due after March 31, 1983.

FOR FURTHER INFORMATION CONTACT: Ada S. Rousso of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202-566-4336), not a toll-free call.

SUPPLEMENTARY INFORMATION:

Background

This document contains temporary regulations relating to the depositary requirements for fuel taxes paid by certain qualified persons under section 4081 of the Internal Revenue Code of 1954 (Code). These depositary requirements were amended by section 518 of the Highway Revenue Act of 1982 (Pub. L. 97-424, 96 Stat. 2097). The temporary regulations provided by this document will remain in effect until superseded by final regulations on this subject.

The Highway Revenue Act of 1982 (Act) was enacted as Title V of the Surface Transportation Assistance Act of 1982. Section 518(a) of the Act authorizes the Secretary to prescribe regulations which permit any qualified person whose liability for tax under section 4081 of the Code is payable with respect to semimonthly periods to have a due date of 14 days after the close of each semimonthly period if payment is made by wire transfer to any government depositary authorized under section 6302(c) of the Code.

Section 518(b) of the Act defines "qualified person" as (1) one whose average daily production of crude oil for the preceding calendar quarter does not

exceed 1,000 barrels, and (2) any independent refiner (within the meaning of section 4995(b)(4) of the Code). In addition, section 518(b)(2) of the Act provides that in determining whether any person's production exceeds 1,000 barrels per day, aggregation rules similar to the rules of section 4992(e) of the Code shall apply.

Where the 14th day after the close of a semimonthly period falls on a Saturday, Sunday, or legal holiday in the District of Columbia, section 518(c) of the Act provides a special rule whereby the due date for payment of fuel taxes shall be the immediately preceding day which is not a Saturday, Sunday or legal holiday in the District of Columbia.

Need for Temporary Regulations

There is a need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue it with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

Special Analyses

No general notice of proposed rulemaking is required by 5 U.S.C. 553(b) for temporary regulations. Accordingly, the Regulatory Flexibility Act does not apply and no Regulatory Flexibility Analysis is required for this rule. The Commissioner of Internal Revenue has determined that these temporary regulations are not subject to Executive Order 12291.

Drafting Information

The principal author of this regulation is Ada S. Rousso of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

List of Subjects in 26 CFR Part 145

Extended due date for payment of certain fuel taxes, Floor stocks refunds, Floor stocks tax, Highway Revenue Act of 1982, Excise taxes.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR Part 145 is amended as follows:

PART 145—[AMENDED]

There is added in its appropriate place the following new section:

§ 145.3–1 Extension of payment due date for certain fuel taxes.

(a) *In general.* For qualified persons whose liability for tax under section 4081 arises after March 31, 1983, and is payable with respect to semimonthly periods, the due date for each payment is 14 days after the close of the semimonthly period if the payment is made by wire transfer to any government depositary authorized by the Secretary under section 6302(c) and § 48.6302(c)–1(c)(3) relating to the use of government depositaries (or, if the payment is made by transfer between accounts in the same government depositary).

(b) *Qualified person.* For purposes of paragraph (a) of this section, the term "qualified person" means any person whose average daily production of crude oil for the preceding calendar quarter does not exceed 1,000 barrels, or any independent refiner within the meaning of section 4995(b)(4) and § 51.4996–1(h) relating to independent refiners.

(c) *Aggregation rules.* To determine under paragraph (b) of this section whether any person's production exceeds 1,000 barrels per day, the rules of section 4992(e) relating to allocation within related groups shall apply. Thus, for persons who are members of the same related group (within the meaning of section 4992(e)(2)) at any time during the preceding calendar quarter, the 1,000 barrel amount will be reduced for each such person by allocating such amount among all such persons in accordance with the rules of section 4992(e).

(d) *Special rule where 14th day falls on Saturday, Sunday, or legal holiday.* If the payment due date under this section falls on a Saturday, Sunday or legal holiday in the District of Columbia, the due date shall be the immediately preceding day which is not a Saturday, Sunday or legal holiday in the District of Columbia.

(e) *Effective date.* This section will apply to payments due after March 31, 1983.

This Treasury decision is issued under the authority contained in Section 518 of the Highway Revenue Act of 1982 (96 Stat. 2097) and section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917, 26 U.S.C. 7805).

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

Approved: April 15, 1983.

John E. Chapoton,

Assistant Secretary of the Treasury

BILLING CODE 4830-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 198

[DoD Directive 2001.1]

Visits by Foreign Dignitaries

AGENCY: Office of the Secretary, DoD.

ACTION: Final rule.

SUMMARY: This final rule has been issued to establish uniform DoD policies, assign responsibilities, and provide guidance regarding the expenditure of DoD funds for expenses associated with hosting foreign dignitaries who are visiting the United States as officially invited guests of the Department of Defense.

EFFECTIVE DATE: This rule was approved and signed by the Deputy Secretary of Defense on September 15, 1982, and is effective as of that date.

FOR FURTHER INFORMATION CONTACT: Mr. Arthur H. Ehlers, Director for Organizational and Management Planning, Office of the Deputy Assistant Secretary of Defense (Administration), Washington, D.C. 20301, telephone 202–695–4278.

SUPPLEMENTARY INFORMATION: This rule is being submitted in compliance with 5 U.S.C., Section 552(a)(1)(D) and 1 CFR 305.76–2.B.

List of Subjects in 32 CFR Part 198

Foreign dignitaries, Invitations and visits to the United States, DoD funding for visits by foreign dignitaries.

Accordingly, 32 CFR, Chapter I, is amended by adding a new Part 198, reading as follows:

PART 198—VISITS BY FOREIGN DIGNITARIES

Sec.

198.1 Purpose.
198.2 Applicability.
198.3 Policy.
198.4 Responsibilities.
198.5 Funding Guidelines for Visits by Foreign Dignitaries.

Authority: Title 10, United States Code.

§ 198.1 Purpose.

This Part establishes policies and assigns responsibilities governing the use of DoD funds expended for foreign dignitaries visiting the United States as officially invited guests of the Department of Defense.

§ 198.2 Applicability.

The provisions of this Part apply to the Office of the Secretary of Defense, the Military Departments, the

Organization of the Joint Chiefs of Staff, the Unified and Specified Commands, and the Defense Agencies (referred to collectively as "DoD Components"). The term "Military Services," as used herein, refers to the Army, Navy, Air Force, and Marine Corps.

§ 198.3 Policy.

(a) Invitations to foreign dignitaries to visit the United States at the expense of the Department of Defense shall be extended only by the Secretary of Defense, Deputy Secretary of Defense, Secretaries of the Military Departments, Chairman of the Joint Chiefs of Staff, and Service Chiefs. At their discretion, these officials may delegate, in writing, to other senior DoD officials the authority to host such visits.

(b) To the extent possible, invitations shall be limited to foreign counterparts of the officials designated in § 198.3(a) above, his or her spouse, and no more than two accompanying staff officials. In addition:

(1) Transportation to and from the United States normally shall be the responsibility of the visiting dignitary.

(2) The invitation normally shall be for a period of not more than 10 days.

(3) The tour itinerary shall be based upon the purpose of the visit as determined by the inviting official in coordination with the foreign dignitary.

(4) Whenever possible, travel within the United States shall be by U.S. military aircraft.

(5) U.S. personnel travelling with the official party shall be limited to the minimum number necessary to provide escort, interpreting, security, or other essential services which may be necessary to accomplish the purpose of the visit.

(6) When desired by the foreign official, and in the interests of the Department of Defense, the local Defense or Service Attache may be included in the official party at the discretion of the inviting official.

(c) Unless other funds are specifically authorized for use, financial obligations incurred incident to visits by foreign dignitaries shall be funded from accounts established under the emergency and extraordinary expense limitation contained in the annual operations and maintenance appropriations of the DoD Components. Utilization of these funds shall be consistent with the provisions of DoD Directive 7250.13 and the following:

(1) Expenses normally shall be charged to the accounts of the inviting official's Component. However, when a visit is assigned to a Military Service or the Defense Intelligence Agency under § 198.4(c) below, the designated executive agent shall be responsible for the costs of carrying out the assignment, except for the following:

(i) Expenses incurred in connection with those parts of the visit that are to a DoD installation of another DoD Component, or an industrial facility performing activities related to another DoD Component. These expenses shall be charged to the accounts of the DoD Component visited.

(ii) Expenses incurred in connection with those parts of the visit that are to nonmilitary installations located in the National Capital Region, other points of national interest that are included in the itinerary as a courtesy to the foreign dignitary, and visits to DoD installations solely for the purpose of indoctrination. These expenses shall be charged to the accounts of the Secretary of Defense or Chairman of the Joint Chiefs of Staff, as appropriate.

(2) Guidelines for the type of expenditures for which DoD funds may and may not be used are at § 198.5.

§198.4 Responsibilities.

(a) The *Secretary or Deputy Secretary of Defense, Secretaries of the Military Departments,* and *Chairman of the Joint Chiefs of Staff* are responsible for the overall policy, administration, and approval of expenditures for foreign dignitaries visiting the United States as officially invited guests of the Department of Defense. This responsibility may be delegated to a senior official within their respective organizations.

(b) The *Assistant Secretary of Defense (International Security Affairs)* and the *Assistant Secretary of Defense (International Security Policy)* shall advise the Secretary of Defense and provide policy guidance regarding politico-military matters in their respective geographical and functional areas of responsibility as they pertain to visits by foreign dignitaries.

(c) The *Heads of the Military Services and the Defense Intelligence Agency,* or designees, upon request by the authorities designated in § 198.4(d) and (e), below, shall serve as executive agents for making support service arrangements for foreign dignitaries visiting the United States at the invitation of the Secretary of Defense, Deputy Secretary of Defense, and Chairman of the Joint Chiefs of Staff or their authorized designees.

(d) The *Executive Secretary of the Department of Defense* shall serve as the single point of contact within the Office of the Secretary of Defense to coordinate the tasking of executive agents for visits hosted by the Secretary of Defense and Deputy Secretary of Defense or their authorized designees.

(e) The *Director of the Joint Staff* shall serve as the single point of contact within the Organization of the Joint Chiefs of Staff to coordinate the tasking of executive agents for visits hosted by the Chairman of the Joint Chiefs of Staff or his authorized designees.

(f) The *Executive Secretary, DoD,* and the *Director of the Joint Staff* shall task an executive agent promptly, in writing, and shall include in the written tasking the purpose of the visit and available guidance regarding DoD activities, contractor facilities, and national points of interest to be visited.

(g) *Heads of DoD Components,* or their designees, authorized to expend DoD funds for visits by foreign dignitaries shall monitor their use to ensure that the highest order of propriety and integrity is maintained and that the provisions of this Part and DoD Directive 7250.13 are carefully followed.

§ 198.5 Funding guidelines for visits by foreign dignitaries.

(a) DoD funds used to defray expenses associated with visits by foreign dignitaries must be expended in a manner which ensures that the policy objectives of the United States and the interest of the U.S. taxpayer jointly are served.

(b) This requires the exercise of sound judgment and discretion on the part of all DoD personnel engaged in planning and conducting visits by foreign dignitaries. Accordingly, the following guidelines are provided to assist in making decisions regarding the use of DoD funds.

(1) Expenses for the official party, to include authorized U.S. escort officers, may be paid for the following:

(i) Lodging;

(ii) Meals and refreshments;

(iii) Gratuities for services rendered by nongovernment personnel;

(iv) Official communications;

(v) Taxi fares or rental vehicle fees when government transportation is not available;

(vi) Valet services, such as laundry and dry cleaning, which would normally not have been incurred except for travel associated with the official visit; and

(viii) Entertainment, such as theaters, sports activities and events, concerts, and sightseeing tours.

(2) Expenses may not be paid for the following:

(i) Items of a personal nature, such as clothing, toilet articles, cigarettes, hair and beauty care, shoeshines, souvenirs;

(ii) Personal long distance telephone calls; and

(iii) Gifts or flowers to be presented by the foreign dignitary.

(3) These guidelines are not all inclusive, but are indicative of the nature of items for which DoD funds may and may not be used. In dealing with cases not covered above, individual judgment must be used, employing the above guidelines as a basis for evaluating the particular circumstances and conditions involved.

Dated: April 28, 1983.

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 50

National Capital Parks Regulations; Demonstrations in the White House Area

AGENCY: National Park Service, Interior.

ACTION: Interim rule with request for comments.

SUMMARY: This interim rule with requests for comments amends § 50.19 of Title 36 of the Code of Federal Regulations concerning demonstrations and special events in the National Capital Parks to prohibit signs or placards on the White House sidewalk except those that are carried by an individual. The interim rule also amends § 50.19 of Title 36 of the Code of Federal Regulations and § 50.7(h) of the same title concerning storage of materials in park areas to prohibit the placement or storage of parcels, containers, packages, bundles or other property on the sidewalks surrounding the White House.

DATES: This interim rule is effective April 22, 1983, and will remain in effect until revoked, replaced or modified by a final rulemaking publication. Written comments, suggestions, or objections regarding this interim rule will be accepted until May 23, 1983.

ADDRESS: Written comments regarding this interim rule should be sent to Manus J. Fish, Jr., Regional Director, National Capital Region, National Park Service, 1100 Ohio Drive, S.W., Washington, D.C. 20242.

FOR FURTHER INFORMATION CONTACT: Sandra Alley, Associate Regional Director, Public Affairs, National Capital Region, National Park Service, 1100 Ohio Drive, S.W., Washington, D.C. 20242, telephone (202) 426-6700; Richard G. Robbins, Assistant Solicitor, National Capital Parks, Office of the Solicitor, Department of the Interior, Washington, D.C. 20240, telephone (202) 343-4338.

SUPPLEMENTARY INFORMATION: The following persons participated in the writing of this rule: Richard G. Robbins and Patricia S. Bangert, Office of the Solicitor, Department of the Interior.

Background

Recent events in the Memorial Core parks have increased security concerns for the White House and the President. On December 8, 1982, an individual backed a truck up to the Washington Monument and threatened to blow up the structure with 1,000 pounds of dynamite that he allegedly had stored in the truck. The incident, occurring a mere three blocks from the White House, highlighted the threat that could be potentially caused to the White House and the President by one determined individual.

Since the incident, the National Park Service, along with other law enforcement agencies, have reviewed present regulations applicable to the White House area to determine if regulatory changes could aid in minimizing potential threats to the structure and its occupants. Two areas of concern became evident in that review—signs or placards stationed on the White House sidewalk and parcels, containers, packages, bundles and other property placed or stored on the White House sidewalk and other sidewalks surrounding the structure. (The term White House sidewalk is defined in 36 CFR 50.19(a)(5) as "the south sidewalk of Pennsylvania Avenue, NW., between East and West Executive Avenues, NW.".)

Signs or placards leaning against the White House fence, and parcels and other property placed or stored on the sidewalks, especially those left unattended, represent potential threats to the security of the area. For example, both can potentially conceal explosives or other contraband and both can potentially be used to scale the White House fence. In fact, the Secret Service reports a recent incident in which a large sign was used to facilitate the scaling of the fence.

In addition to security concerns, experience with the recent proliferation of signs or placards and parcels and other property stationed and stored on the White House sidewalk has demonstrated that the policy of allowing such activity impedes the free flow of pedestrian and emergency traffic by and through the White House and significantly diminishes the White House experience for park visitors. For example, two individuals who have in the past and are presently maintaining a daily demonstration in front of the White House have had as many as twenty-five signs or placards leaning against the White House fence. In addition to the signs, paper bags, suitcases and other pracels containing personal belongings obstruct the view of the White House and impede the flow of pedestrian traffic.

It is the judgment of the National Park Service that certain restrictions can be placed upon the stationing of signs or placards and placement or storage of parcels and other property on the White House sidewalk which would enhance the park visitor's experience in viewing the White House and respond to security concerns without impairing the demonstrator's ability to convey a message.

Regulatory Changes

To accomplish the purpose of minimizing potential threats to the White House and the President, and for the other purposes outlined above, the National Park Service is amending present regulations to prohibit signs or placards on the White House sidewalk, except those that are being hand-carried by an individual. The regulation, then, is not applicable to other parks where demonstrations are permitted. (Demonstrations are not permitted on other sidewalks contiguous to the White House. 36 CFR 50.19(c)(1).)

The interim rule would not prohibit the carrying of a sign or placard during demonstrations on the White House sidewalk. Further, it would not place any restriction on the size of the sign or placard, as long as it is in fact being held or carried by an individual. The interim rule would prohibit signs or placards that are not held or carried by individuals, for example, signs that are leaned against the White House fence, signs that are left unattended on the White House sidewalk and signs that are supported by other structures. In fact, the interim rule does not dramatically change the present regulatory scheme—temporary structures are presently prohibited on the White House sidewalk under 36 CFR 50.19(e)(8).

The National Park Service believes that there is a substantial government interest in regulating the use of signs or placards on the White House sidewalk. Signs or placards not hand-carried and those left unattended cannot be easily moved in emergency situations. Signs or placards leaning against the White House fence may conceal dangerous

materials, obscure the view of law enforcement personnel and create other security problems. For example, a sign affixed to a large structure caught fire several weeks ago, seriously damaging the fence and granite post in front of the Old Executive Office Building, a few feet from the White House sidewalk and fence.

In addition, signs or placards leaning against the White House fence can obscure the view of the White House for the thousands of park visitors. Signs or placards stationed on the sidewalk also incommode the passageway and sometimes cause difficulty in maintaining smooth pedestrian flow, which may include park visitors and persons having business in the area.

The interim rule also prohibits the placement or storage of parcels, containers, packages, bundles or other property on the White House sidewalk, the west sidewalk of East Executive Avenue, N.W. between Pennsylvania Avenue, N.W. and E Street, NW., and the north sidewalk of E Street, NW. between East and West Executive Avenues, NW. The rule will not interfere with an individual who is carrying a parcel or other property along the sidewalk. In fact, it will not even subject an individual setting a parcel or other property down on the sidewalk or attending structures for up to one hour to law enforcement action unless that individual either refuses law enforcement personnel requests to search the property, or leaves the property unattended.

The National Park Service concludes, however, that when a parcel, container, package, bundle or other property is placed or stored on the sidewalks contiguous to the White House, potential security problems are created. In addition, the National Park Service concludes that parcels and other property, like signs or placards, may obscure the view of the White House by park visitors and law enforcement personnel, may be difficult to move when the sidewalk must be cleared in an emergency and may incommode the sidewalk and interfere with visitor and business pedestrian traffic.

The National Park Service believes that these minor restrictions on the stationing of signs or placards and the placement or storage of parcels, containers, packages, bundles or other property serve substantial government interests in maintenance of the security of the White House, preservation of the park experience for park visitors, and free passage of pedestrian traffic by and through the White House. The regulation is written in a neutral manner such that all persons are prohibited from stationing signs or placards or storing parcels or other property on the sidewalks surrounding the White House. In addition, it is unrelated to the suppression of free expression and the incidental impact on First Amendment freedoms is only as great as is essential to serve the substantial government interests in security, aesthetics and free passage of pedestrian traffic. Further, the interim rule applies only to sidewalks contiguous to the White House. A substantial number of alternative forums exist close to the White House sidewalks where these restrictions do not apply.

Public Participation

The policy of the Department of the Interior is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions, or objections regarding the interim rule to the address noted at the beginning of the rulemaking within the time period specified.

Impact Analysis

The National Park Service has determined that this document is not a major rule requiring preparation of a Regulatory Impact Analysis under Executive Order 12291. The National Park Service has also determined that the interim rule will not have a significant economic impact on a substantial amount of small entities and, therefore, does not require a small entity flexibility analysis under Pub. L. 96–354. The interim rule merely places restrictions on the stationing of signs or placards and parcels and other property on sidewalks contiguous to the White House. It will have no substantial impact on any aspect of the economy.

The National Park Service has further determined that this interim rule is not a major Federal action significantly affecting the quality of the human environment.

List of Subjects in 36 CFR Part 50

District of Columbia, National Parks, National Capital Parks.

G. Ray Arnett,

Assistant Secretary for Fish and Wildlife and Parks.

Date approved: April 6, 1983.

PART 50—NATIONAL CAPITAL PARKS REGULATIONS

In consideration of the foregoing, §§ 50.19 and 50.7 of Title 36 of the Code of Federal Regulations are accordingly amended.

1. The authority citation for Part 50 reads as follows:

Authority: Sec. 6, Act of July 1, 1898 (30 Stat. 571); secs. 1–3, Act of August 25, 1916 (39 Stat. 535, as amended); sec. 16, Act of March 3, 1925 (43 Stat. 1126, as amended); Act of March 17, 1948 (62 Stat. 81); Act of August 8, 1953 (67 Stat. 495); Act of July 1, 1980 (94 Stat. 872); 16 U.S.C. 1–3; D.C. Code 8–137 (1981); D.C. Code 40–721 (1981).

§ 50.19 [Amended]

2. Section 50.19 is amended by redesignating paragraphs (e)(9) through (11) as (e)(11) through (13) and adding new paragraphs (e)(9) and (e)(10) to read as follows:

* * * * *

(e) * * *

(9) No signs or placards shall be permitted on the White House sidewalk except those signs or placards that are held or worn by an individual.

(10) No parcel, container, package, bundle or other property shall be placed or stored on the White House sidewalk or on the west sidewalk of East Executive Avenue, NW., between Pennsylvania Avenue, NW., and E Street, NW., or on the north sidewalk of E Street, NW., between East and West Executive Avenues, NW.; Provided, however, that a parcel, container, package, bundle or other property, except structures, may be set down on these sidewalks for a maximum of one hour if it is attended at all times within that time period, and law enforcement personnel are permitted to search the property.

* * * * *

§ 50.7 [Amended]

3. Section 50.7(h) is amended by redesignating the existing paragraph as paragraph "(1)" and by adding a paragraph "(2)", as follows:

* * * * *

(h) *Storage.* (1) * * *

(2) No parcel, container, package, bundle or other property shall be placed or stored on the White House sidewalk, as that term is defined in § 50.19(a)(5) of this part, or on the west sidewalk of East Executive Avenue, NW., between Pennsylvania Avenue, NW., and E Street, NW., or on the north sidewalk of E Street, NW., between East and West Executive Avenues, NW.; Provided,

however, that a parcel, container, package, bundle or other property, except structures, may be set down on any of these sidewalks for a maximum of one hour if it is attended at all times within that time period, and law enforcement personnel are permitted to search the property.

POSTAL SERVICE

39 CFR Part 601

Procurement of Property and Services; Amendments to Postal Contracting Manual

AGENCY: Postal Service.

ACTION: Amendments to the Postal Contracting Manual.

SUMMARY: The Postal Service announces a number of changes to the Postal Contracting Manual, most of which are made to comply with Pub. L. 97-306, the Veterans' Compensation, Education, and Employment Amendments of 1982. The requirements of the statute applicable to the Postal Service include those related to the affirmative action obligations and mandatory listing of jobs by Federal contractors, and the filing of affirmative action plans by Federal entities for hiring, placement, and advancement of disabled veterans. Certain editorial changes were also made to the language of the sections changed.

EFFECTIVE DATE: April 19, 1983.

FOR FURTHER INFORMATION CONTACT: Eugene A. Keller, (202) 245-4818.

SUPPLEMENTARY INFORMATION: The Postal Contracting Manual, which is incorporated by reference in the **Federal Register** (see 39 CFR 601.100), has been amended by the issuance of PCM Circular 83-2, dated April 19, 1983.

In accordance with 39 CFR 601.105, notice of these changes is hereby published in the **Federal Register** and the text of the changes is filed with the Director, Office of the Federal Register. Subscribers to the basic manual will receive these amendments from the Postal Service. (For other availability of the Postal Contracting Manual, see 39 CFR 601.104.)

List of Subjects in 39 CFR Part 601

Government procurement.

Explanation of these amendments to the Postal Contracting Manual follows:

Explanation of Changes

1. PCM 7-104.48, Affirmative Action for Disabled Veterans and Veterans of the Vietnam Era, is changed to correct an omission and deletes paragraph (d) of the veteran's clause in accordance with a Department of Labor notice published in 47 FR 4258.

2. PCM 12-1100 is changed to meet the requirements of Pub. L. 97-306.

3. PCM 12-1102(a) is changed to reflect the text of the Department of Labor regulation (41 CFR 60-250.2) implementing Pub. L. 97-306.

4. PCM 12-1102 (d) and (e) are changed to reflect the exemption provisions of Pub. L. 97-306.

Editorial changes were made in 7-104.48 and 12-1102 (a), (d), and (e) under the Clear-Language Project of the Procurement and Supply Department's Procurement-Modernization Program.

Explanation of these amendments to the Postal Contracting Manual follows:

Explanation of Changes

1. In PCM Circular 82-1 (9/13/82), Explanation of Changes, policy change 2 misstated the dollar threshold (as $100,000) above which solicitations for construction contracts are subject to legal review. The threshold is $150,000.

2. On 1/13/83, the Informal Purchasing Limit was raised from $20,000 to $25,000 in a *Postal Bulletin* article. This circular revises the *Postal Contracting Manual* to reflect that change.

3. Reference is made to Form 7334, Order-Invoice-Voucher, August 1975 edition in PCM 18-301.3 (a) and (b).

(5 U.S.C. 552(a), 39 U.S.C. 401, 404, 410, 411)

Fred Eggleston,

Assistant General Counsel, Legislative Division.

National Ambient Air Quality Measurement Methodology

Correction

In FR Doc. 83-32848 beginning on page 54896 in the issue of Monday, December 6, 1982, make the following corrections:

Appendix A—[Corrected]

The following corrections should be made to Appendix A of 40 CFR Part 50:

1. On page 54899, middle column, paragraph 3.1, ninth line, "25 μg SO_2m^3" should have read "25 μg SO_2/m^3".

2. On page 54903, third column, paragraph 8.2.8, eleventh line, "1 N NCl" should have read "1 N HCl".

3. On page 54904, middle column, sixth line from the top, "5° C.[16]" should have read "5°C.(16)".

4. On page 54904, third column, the equation should have been labeled as Equation 5.

5. On page 54905, first column, thirteenth line, "below 25μγSO_2/m^3. (89)." should have read "below 25 μg SO_2/m^3. (8, 9)."

6. On the same page, second column, paragraph 9.3, ninth line, "15±110° C." should have read "15±10° C.".

7. On page 54907, first column, under Equation 6, in the list of symbols, correct "$P_{H_2}0$" and "P_{H_20}" to read "P_{H_2O}".

8. Same page, center column, nine lines from the bottom, "absorbance future" should have read "absorbance during future".

9. Same column, in the third and fourth lines from the bottom, "=A" should have read "A" in both places.

10. Same page, third column, the table should have read as follows:

Sulfite-TCM Solution	Volume of Sulfite-TCM Solution, mL	Volume of TCM, mL	Total μg SO_2 (Approx.)*
working	4.0	6.0	28.8
working	3.0	7.0	21.6
working	2.0	8.0	14.4
dilute working	10.0	0.0	7.2
dilute working	5.0	5.0	3.6
-	0.0	10.0	0.0

*Based on working sulfite-TCM solution concentration of 7.2 μg SO_2/mL; the actual total μg SO_2 must be calculated using equation 11 below.

11. In the twelfth line below the table, "±° C." should have read "±1° C.".

12. Same column, Equation 11 should have read as follows:

$$\mu g\ SO_2 = V_{TCM/SO_2} \times C_{TCM/SO_2} \times D \qquad (11)$$

where

V_{TCM/SO_2} = volume of sulfite-TCM solution used, mL;

C_{TCM/SO_2} = concentration of sulfur dioxide in the working sulfite-TCM, μg SO_2/mL (from equation 4); and

D = dilution factor (D = 1 for the working sulfite-TCM solution; D = 0.1 for the diluted working sulfite-TCM solution).

13. On page 54908, first column, the caption for paragraph 10.3 now reading *"Dynamic California Procedures"* should have read *"Dynamic Calibration Procedures"*.

14. Same page, second column, under Equation 12, the list of symbols, "O_d" and "O_p" should have read "Q_d" and "Q_p".

15. Page 54910, center column, fourth line from the top, "O_s" should have read "Q_s".

16. Same column, eleventh line from the top "at ° ±5° C." should have read "at 5° ±5° C."

17. Same page, third column, fourth line from the bottom, "micrograms to" should have read "micrograms of".

18. Page 54911, first column, under Equation 20, in the list of symbols, "Q_7" should have read "Q_i", and in the entry for Q_f, "sampling is" should have read "sampling in".

19. Same column, at the bottom of the Data Form, "Σxy=_____ Σx^2=_____" should have read "Σxy_____ Σy^2_____".

20. Same page, center column, in the caption for paragraph 12.5, remove "αT1".

21. Same column, under paragraph 13.2, in entry 5, "After hours" should have read "After 24 hours".

Appendix B—[Corrected]

The following corrections should be made to Appendix B of 40 CFR Part 50:

1. Same column, in paragraph 7.9.1, "±° C" should have read "±3° C".

2. Page 54914, first column, paragraph 8.6, ninth line, "loaded in" should have read "loaded and unloaded in".

3. Same column, paragraph 8.10, "start and stop and" should have read "start and stop".

4. Page 54915, second column, paragraph 9.3.7, "$\sqrt{\Delta H(P_2/P_{std})(298/T_2)}$" should have read "$\sqrt{\Delta H(P_2/P_{std})(298/T_2)}$".

5. In the same paragraph, "$Q_{std}=1/m\sqrt{\Delta H(P_2/P_{std})(298/T_2)}-b$" should have read "$Q_{std}=1/m\sqrt{\Delta H(P_2/P_{std})(298/T_2)-b}$".

6. Same column, in paragraph 9.3.9, twenty fifth line, "(750 mm" should have read "(760 mm".

7. On page 54917, first column, the equation in paragraph 10.2 should have read as follows:

$$V-Q_{std}\times t$$

Appendix C—[Corrected]

The following correction should be made to Appendix C of 40 CFR Part 50:

On page 54922, third column, the equation at the top of the page should have read as follows: $V=Q_{std}\times t$

$$[CO]_{OUT} = \frac{[CO]_{STD} \times F_{CO}}{F_D + F_{CO}}$$

BILLING CODE 1505-01-M

40 CFR Part 60

[A-2-FRL-2351-5]

Air Pollution Control; Standards of Performance for New Stationary Sources; Delegation of Authority to the Commonwealth of Puerto Rico

AGENCY: Environmental Protection Agency.

ACTION: Notice of delegation of authority.

SUMMARY: This notice announces the delegation of authority by the Environmental Protection Agency to the Commonwealth of Puerto Rico to implement and enforce additional source categories of the Standards of Performance for New Stationary Sources (NSPS). This delegation was requested by the Puerto Rico Environmental Quality Board (EQB).

NSPS is an air pollution control requirement set under the Clean Air Act. NSPS are applicable to certain categories of new air pollution sources.

EFFECTIVE DATE: This action is effective April 22, 1983.

FOR FURTHER INFORMATION CONTACT: Francis W. Giaccone, Chief Air Facilities Branch, Air & Waste Management Division, Region II Office, 26 Federal Plaza, New York, New York 10278, (212) 264–9627.

SUPPLEMENTARY INFORMATION: Section 111(c) of the Clean Air Act directs the Administrator of the Environmental Protection Agency (EPA) to delegate EPA's authority to implement and enforce Standards of Performance for New Stationary Sources (NSPS) to any state which has submitted adequate procedures. Nevertheless, the Administrator still retains concurrent authority to enforce the standards following delegation of authority to a state.

On June 8, 1982 the Chairman of the Puerto Rico Environmental Quality Board (EQB) requested that the EPA delegate to that Board the authority to implement and enforce certain additional source categories of NSPS. The following is a complete listing of NSPS delegated to the EQB. The source categories now being delegated by today's action are identified with an asterisk(*).

D Fossil-Fuel Fired Steam Generators for Which Construction Commenced After August 17, 1971 (Steam Generators and Lignite Fired Steam Generators)
*Da Electric Utility Steam Generating Units for Which Construction Commenced After September 18, 1978
E Incinerators
F Portland Cement Plants
G Nitric Acid Plants
H Sulfuric Acid Plants
I Asphalt Concrete Plants
J Petroleum Refineries—(Process Gas Combustion, Catalytic Regenerators)
*J Petroleum Refineries—(Sulfur Recovery)
K Storage Vessels for Petroleum Liquids Constructed After June 11, 1973 and Prior to May 19, 1978
*Ka Storage Vessels for Petroleum Liquids Constructed After May 18, 1978
L Secondary Lead Smelters
M Secondary Brass and Bronze Ingot Production Plants
N Iron and Steel Plants
O Sewage Treatment Plants
P Primary Copper Smelters
Q Primary Zinc Smelters
R Primary Lead Smelters
S Primary Aluminum Reduction Plants

W Phosphate Fertilizer Industry: Triple Superphosphate Plants
X Phosphate Fertilizer Industry: Granular Triple Superphosphate Storage Facilities
Y Coal Preparation Plants
Z Ferroalloy Production Facilities
AA Steel Plants: Electric Arc Furnaces
*BB Kraft Pulp Mills
*CC Glass Manufacturing Plants
*DD Grain Elevators
*GG Stationary Gas Turbines
*HH Line Plants

EPA's Findings

EPA's determination that the delegation request should be approved is based on the Agency's review of the Puerto Rico Public Policy Environmental Act, Law No. 9 of 1970, 12 L.P.R.A. Sec. 1121, et. seq. and on the Puerto Rico Regulation for the Control of Atmospheric Pollution. EPA determined that such delegation is, therefore, appropriate and so notified the chairman of the EQB, in a letter dated November 19, 1982. This letter identifies the conditions under which delegation would be approved. EQB, in a letter dated January 5, 1983, requested that the EPA approve minor revisions to some of the conditions for delegation. EPA agreed to these modifications in a January 28, 1983 letter to the Chairman of the EQB. Delegation was subsequently accepted by EQB in a letter dated March 7, 1983. Copies of all correspondence and EPA's delegation letter are available for public inspection in the Office of the Air Facilities Branch at the Environmental Protection Agency, Region II Office, 26 Federal Plaza, New York, New York 10278.

The Office of Management and Budget has exempted this action from the requirements of Section 3 of Executive Order 12991.

PART 60—[AMENDED]

Part 60 of Title 40 of the Code of Federal Regulations is amended by revising paragraph (b)(BBB) of § 60.4 to read as follows:

§ 60.4 Address.

* * * * *

(b) * * *

(BBB) Commonwealth of Puerto Rico: Commonwealth of Puerto Rico Environmental Quality Board, P.O. Box 11488, Santurce, Puerto Rico 00910, Attention: Air Quality Area Director.

[FPMR Temp. Reg. E-77, Supp. 1]

Rounding Requisition Quantities to Bulk Pack

AGENCY: Office of Federal Supply and Services, GSA.

ACTION: Temporary regulation.

SUMMARY: This supplement extends to December 31, 1983, the expiration date of FPMR Temporary Regulation E–77 concerning rounding requisition quantities to bulk pack. FPMR Temporary Regulation E–77 is extended to provide additional time for comments on the regulation. Based on the comments received a decision will be made to continue or discontinue rounding requisition.

DATES:

Effective date: January 1, 1983.
Expiration date: December 31, 1983.

FOR FURTHER INFORMATION CONTACT: James W. Jeremiah, Director, Requisition Management Division ((703) 557–8570)

SUPPLEMENTARY INFORMATION: The General Services Administration has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; or major increases in costs to consumers or others; or significant adverse effects. The General Services Administration has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

FPMR Temporary Regulation E–77 (41 CFR Chapter 101, Appendix to Subchapter E) is amended by Supplement 1 which is filed with the original document. The text of Supplement 1 will not appear in the CFR volume.

Ray Kline,

Acting Administrator of General Services.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 661

[Docket No. 30419–60]

Ocean Salmon Fisheries Off the Coasts of Washington, Oregon, and California

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Emergency interim rule and request for comment.

SUMMARY: The Secretary of Commerce issues this emergency interim rule to delay the 1983 opening date for the commercial troll salmon fishery for all salmon species except coho between Cape Blanco, Oregon, and Cape Vizcaino, California. This rule responds to an emergency by shortening the commercial troll season. The intended effect is to increase the number of fall chinook salmon that enter the Klamath River for the Indian subsistence fisheries and to continue progress toward achieving the spawning escapement goal for that river system. This action in nondiscretionary and is required by the Magnuson Fishery Conservation and Management Act.

DATES: Interim rule is effective on April 19, 1983 and remains effective until modified or superseded. Comments are invited until May 1, 1983.

ADDRESS: Comments on and inquiries concerning this notice should be directed to H. A. Larkins, Director, Northwest Region, National Marine Fisheries Service (NMFS), 7600 Sand Point Way NE, BIN C15700, Seattle, WA 98115, or Alan W. Ford, Director, Southwest Region, NMFS, 300 South Ferry Street, Terminal Island, CA 90731.

FOR FURTHER INFORMATION CONTACT: H. A. Larkins, 206–527–6150, or Alan W. Ford, 213–548–2575.

SUPPLEMENTARY INFORMATION: Final regulations implementing the 1982 amendment to the fishery management plan for the ocean salmon fisheries off Washington, Oregon, and California (Ocean Salmon FMP), which became effective on August 30, 1982 (47 FR 38545), set open seasons and areas for the commercial troll fishery between Cape Blanco, Oregon, and the U.S.-Mexico border. According to these regulations, the commercial troll season for all salmon species except coho opened on May 1 and ended on May 31 for the area between Cape Blanco, Oregon, and the California-Oregon border. The season opened on May 1 and ended on May 24 for the area between the California-Oregon border and Point Arena, California.

At its March 1983 meeting, the Pacific Fishery Management Council (Pacific Council) adopted a 1983 amendment to its Ocean Salmon FMP that proposes a 38-day (29 percent) reduction in the commercial troll fishing season in the ocean off southern Oregon and northern California. The amendment is expected to achieve an 11.8 percent increase in the number of adult fall chinook entering the Klamath River over the 62,700 in 1982. An essential element of this reduction of the ocean harvest is to delay until May 16 the opening date of the commercial fishing season for all salmon species other than coho in the area between Cape Blanco, Oregon, and Cape Vizcaino, California. An analysis of approximately 2.7 million coded wire tags (CWT) placed in 1976–79 hatchery-reared fall chinook salmon led the Council's Salmon Plan Development Team to conclude that southern Oregon and northern California fisheries have a significant impact on Klamath River fall chinook, particularly the ocean fisheries between Coos Bay, Oregon, and Eureka, California. The Council's amendment also will move northward about 46 miles a salmon management subarea boundary, now located at Point Arena, to Cape Vizcaino, California. Present information indicates that Cape Vizcaino more accurately delineates the southern boundary for most Klamath River chinook. This action anticipates and reflects both the Council's delayed opening date and proposed boundary change.

By unanimous vote at its March 23, 1983, meeting, the Council found that an emergency would exist in the salmon fishery if the commercial troll season between Cape Blanco, Oregon, and Cape Vizcaino, California, was not reduced. The Council estimated that failure to enact the delayed opening date in State and Federal waters between Cape Blanco and Cape Vizcaino could result in an increase in the ocean chinook harvest of about 35,000 to 45,000 chinook salmon for the two-week period between May 1 and May 15. Because about one in four chinook in this region is of Klamath origin and the ratio of the ocean catch to the in-river run of salmon is about 2 to 1 (as estimated by the Salmon Plan Development Team), the in-river run could be reduced by as many as 5,000 adult chinook salmon if this action is not effective before May 1.

The Council felt that this action should be implemented by a separate emergency rule because it doubted that the emergency regulations for the entire amendment could be effective by May 1. Under existing regulations, the commercial fishing season from Point Arena northward through Cape Vizcaino, California, to Cape Blanco, Oregon, opens on May 1. The Council was concerned about providing sufficient notice of a change in the existing regulations to allow the fishing industry a reasonable time for planning. Uncertainty about actual and proposed opening dates and boundaries could also result in potential confusion and frustrate effective enforcement by the states, NMFS, and the U.S. Coast Guard. Of additional concern was the lead time necessary for California to promulgate concurrent regulations for State waters. In California, a minimum of 10 days is required by statute to process emergency regulations after the Federal action is filed for public inspection with the Office of the Federal Register. The salmon seasons in California territorial waters currently are fixed at April 15 to September 30 by the State legislature and must be changed by emergency State regulations to conform to the Council's proposed seasons.

Section 305(e)(2)(A) of the Magnuson Fishery Conservation and Management Act (Magnuson Act), as amended by Pub. L. 97–453 on January 12, 1983, authorizes the Secretary of Commerce (Secretary) to promulgate emergency regulations if the Council finds that an emergency exists involving any fishery within its jurisdiction, whether or not a fishery plan exists for the fishery. If, the Council's finding is by unanimous vote, the Secretary must promulgate emergency regulations to address the fishing emergency. On March 23, 1983, the Council, by unanimous vote, requested the Secretary to promulgate emergency regulations.

Classification

The NOAA Assistant Administrator for Fisheries (Assistant Administrator) concurs with the Council's finding that these modified rules are necessary and appropriate for conservation of the salmon resources off southern Oregon and northern California, an area where a fishery emergency exists. He has determined that the Council's unanimous action is consistent with section 305(e)(2)(A) of the Magnuson Act and that these rules must be implemented as emergency rules. The Assistant Administrator also finds for good cause that the reasons justifying promulgation of these rules on an emergency basis make it impracticable and contrary to the public interest to provide notice and opportunity for comment upon, or to delay for 30 days the effective date of these emergency regulations, under the provisions of section 553 (b) and (d) of the Administrative Procedure Act.

The NOAA Administrator has determined that these rules are not "'major" under E.O. 12291, and that the emergency which justified the promulgation of emergency regulations under section 305(e) of the Magnuson Act also constitutes an emergency situation under § 8(a)(1) of E.O. 12291. This conclusion was reached because the difference between this action and existing regulations for the same area is insignificant and the existing regulations were found to be nonmajor (47 FR 24135). Because it is imperative to implement these rules immediately, it is impracticable to comply with section 3(c)(3) of E.O. 12291, which requires that NOAA transmit to the Director of the Office of Management and Budget (OMB) a copy of every nonmajor rule at least 10 days prior to publication. However, a copy of these emergency regulations has been transmitted to the Director of OMB.

The Council is in the final stages of preparing a 1983 amendment to its Ocean Salmon FMP that, upon approval and implementation, will (among other things) permanently establish these emergency rules. A notice of availability of the draft supplemental environmental impact statement for the 1983 amendment was published on February 4, 1983 (48 FR 5308). When completed, the Council's amendment will include a final supplemental environmental impact statement, a regulatory flexibility analysis as required by the Regulatory Flexibility Act, a determination of the applicability of the Paperwork Reduction Act and a determination of consistency of the amendment with the approved coastal zone management programs of Oregon, Washington, California, and the San Francisco Bay Area as required by section 307(c) of the Coastal Zone Management Act.

List of Subjects in 50 CFR Part 661

Fish, Fisheries, Fishing, Indians.

Dated: April 19, 1983.

Carmen J. Blondin,

Acting Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

PART 661—OCEAN SALMON FISHERIES OFF THE COASTS OF WASHINGTON, OREGON, AND CALIFORNIA

For reasons set out in the preamble, 50 CFR Part 661 is amended as follows:

1. The authority citation for Part 661 reads as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 661.20, paragraphs (a)(4)(i) and (5)(i) are revised to read as follows:

§ 661.20 Commercial fishing.

(a) * * *

(4) * * *

(i) The season for all salmon species except coho begins on May 16 and ends on May 31; during this season only the gear specified in § 661.20(b)(2) may be used.

* * * * *

(5) * * *

(i) The season for all salmon species except coho begins on May 16 and ends on May 31—except for the area between Cape Vizcaino and Point Arena, California, where the season for all salmon species except coho begins on May 1 and ends on May 31. During these seasons, only gear specified in § 661.20(b)(2) may be used.

* * * * *

[FR Doc. 83–10804 Filed 4–19–83; 5:01 pm]

BILLING CODE 3510–22–M

50 CFR Part 674

[Docket No. 30318–42]

High Seas Salmon Fishery Off Alaska

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NOAA issues a final rule modifying a rule implementing the Fishery Management Plan for the High Seas Salmon Fishery off the Coast of Alaska East of 175 Degrees East Longitude. The rule is necessary to clarify the authority of the Director, Alaska Region (Regional Director), National Marine Fisheries Service, NOAA, to limit the harvest of chinook salmon to the appropriate level within the optimum yield range. The Regional Director would be able to prohibit fishing for any or all species of salmon in all or part of the management area by publishing a notice of closure.

EFFECTIVE DATE: May 20, 1983.

ADDRESS: Copies of the RIR/RFA and addendum are available from Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska.

FOR FURTHER INFORMATION CONTACT: Robert W. McVey, 907–586–7221.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for the High Seas Salmon Fishery off the Coast of Alaska East of 175 Degrees East Longitude (FMP) governs this fishery in the fishery conservation zone (FCZ) under the Magnuson Fishery Conservation and Management Act (Magnuson Act). The FMP provides for inseason adjustments by field order to season and area openings and closures. Implementing rules at 50 CFR 674.23 specify the procedures and criteria for issuance of field orders by the Secretary of Commerce (Secretary) under this FMP.

Given the coastwide depressed condition of many naturally produced chinook salmon stocks, the potential for change in year-class strength, and the unpredictability of chinook salmon catches during the season, NOAA sought to clarify formally the closure authority of the Secretary with respect to achieving a specific annual catch level within the optimum yield (OY) range, and to limit this closure authority to the management of chinook salmon. NOAA also proposed to eliminate the current regulatory requirement that the Secretary prohibit salmon fishing if the harvest of any other species is apt to exceed the maximum value of its range

to bring the regulations in conformity with the FMP.

The current OY range of 243,000–272,000 was established in 1981 by Amendment 2 to the FMP. In 1981 NOAA managed to troll fishery to achieve the high end of the OY range (272,000). Due to new information confirming the depressed status of many naturally produced stocks, the North Pacific Fishery Management Council (Council) and NOAA attempted to manage the 1982 fishery for a catch of 255,500 chinook salmon. The Council's recommendation for a 1983 harvest guideline is expected in March following review and analysis of the impacts of the proposed U.S.-Canada Pacific Salmon Interception Treaty. However, in the past some members of the public have argued that the current regulations limit the Secretary's authority to preventing the harvest only from exceeding the maximum OY value, i.e., 272,000, and therefore, that the Council and NOAA could not manage the fishery for a lower harvest level within the OY range. This regulatory amendment clarifies the Council's intent.

On August 6, 1982, NOAA proposed such regulatory modification (47 FR 34167), and requested comments on the proposed modification until September 20, 1982. The discussion of the basis for such modification is contained in 47 FR 34167. No comments were received on the proposed modification during the comment period.

Accordingly, NOAA amends § 674.23(a)(2) to clarify the authority of the Secretary to manage the chinook salmon fishery for a harvest level anywhere within the OY range that he determines to be necessary for conservation and management of chinook salmon. This criterion supplements those included in § 674.23(a)(1), which also authorizes inseason management actions through field orders. In addition, NOAA amends § 674.23(a)(2) to clarify that OY ranges for the other species of salmon will not be treated as quotas. The final rule is identical to the rule proposed at 47 FR 34167.

Classification

The Assistant Administrator, NOAA, has determined that this final rule is necessary and appropriate for the conservation and management of salmon resources in the FCZ off Alaska, and that the action is consistent with the FMP, the national standards of the Magnuson Act, the other provisions of the Magnuson Act, and other applicable law.

An environmental impact statement is not required under the National Environmental Policy Act because the proposal is within the scope of the actions considered in the final and supplemental environmental impact statements for the FMP and both Amendments 1 and 2, which are on file with the Environmental Protection Agency.

The Administrator, NOAA has determined that this final rule is not a "major rule" under criteria specified in Executive Order 12291. The regulatory impact review/regulatory flexibility analysis (RIR/RFA) prepared on Amendment 2 to the FMP considered the current chinook OY range of 243,000–272,000 and alternative harvest levels. The RIR/RFA on Amendment 2 was updated by a 1982 addendum which covers this final regulation in terms of the Regulatory Flexibility Act as well as E.O. 12291. Therefore, the RIR/RFA supports the final regulations which allow the Secretary to fix the harvest level at any value from 243,000–272,000. A copy of the RIR/RFA and addendum may be obtained by writing the Regional Director at the above address.

This final rule neither contains a collection of information requirement nor involves any agency in collecting or sponsoring a collection of information within the meaning of the Paperwork Reduction Act of 1980.

List of Subjects in 50 CFR Part 674

Administrative practice and procedure, Fish, Fishing, Reporting requirements.

Dated: April 19, 1983.

Carmen J. Blondin,

Acting Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

For reasons set forth in the preamble, 50 CFR Part 674 is amended as follows:

PART 674—HIGH SEAS SALMON FISHERY OFF ALASKA

1. The authority citation for Part 674 reads as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 674.23, paragraph (a)(2) is revised to read as follows:

§ 674.23 Modifications of time and area limitations.

(a) * * *

(2) Following consultation with ADF&G, the Secretary shall prohibit fishing for any or all species of salmon in all or part of the management area if such a prohibition is necessary to prevent the total harvest of chinook salmon for the fishing season from exceeding either the maximum amount of the optimum yield or any other value within the optimum yield range for chinook salmon that the Secretary determines to be necessary for the conservation and management of chinook salmon. The Secretary will do this by issuing a field order in accordance with paragraph (b) of this section.

16 CFR Part 300

Amendment to Rules and Regulations Under the Wool Products Labeling Act of 1939

AGENCY: Federal Trade Commission.

ACTION: Notice of rulemaking on proposed amendment.

SUMMARY: The Federal Trade Commission is considering amending Part 300 of the Rules and Regulations under the Wool Products Labeling Act of 1939. The proposed amendment would delete the word "minimum" in § 300.29 and insert, in lieu thereof, the word "average." Section 300.29 sets forth the manner of labeling wool products which consist of, or are made from, miscellaneous cloth scraps comprising manufacturing byproducts and containing various fibers of undetermined percentages. The illustrations in § 300.29 show permissible labeling for wool products. Each of these illustrations requires the disclosure of the minimum percentage of recycled wool on labels.

The amendment being considered by the Commission would require that the average, rather than the minimum, percentage of recycled wool be disclosed on labels.

DATE: Written comments must be received on or before May 23, 1983.

ADDRESS: Comments may be mailed to Secretary, Federal Trade Commission, Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: Jerry R. McDonald, Attorney, Division of Enforcement, Bureau of Consumer Protection, Federal Trade Commission, 600 E Street NW., Washington, D.C. 20580. 202–376–2800.

SUPPLEMENTARY INFORMATION: In the past, the Commission has approved and the courts have issued five final consent judgments or decrees requiring that wool products be labeled with the lowest or minimum percentage of wool or recycled wool shown by fiber content tests.[1] The injunctions in these decrees prohibit the defendants therein from distributing imported wool products unless they test such products for fiber content. If these tests show the percentage of any fiber to be misstated on the labels by more than 3%, the defendants are required to relabel these products with labels showing the lowest percentages of wool or recycled wool and other fibers revealed by the fiber content tests.

The purpose of the Wool Products Labeling Act of 1939 is stated in the preamble to the Act:

> To protect producers, manufacturers, distributors, and consumers from the unrevealed presence of substitutes and mixtures in spun, woven, knitted, felted, or otherwise manufactured wool products, and for other purposes.

The Rule now requires that these products be labeled with the minimum percentage of recycled wool. Labeling with the minimum standard assures that the consumer will receive at least the percentage of recycled wool stated on the label. The Commission is considering changing the Rule to require that these products be labeled with the average percentage of recycled wool. Labeling with the average percentage of recycled wool may provide more accurate information to the consumer concerning the recycled wool content. Lowest percentage labeling may be as misleading as highest because it introduces a downward bias.

The Commission is interested in receiving comments on what standard should apply to labeling the recycled wool content of wool products which consist of, or are made from, miscellaneous cloth scraps comprising manufacturing byproducts and containing various fibers of undetermined percentages. If the rule is amended, the amendment would be propsective and would not require the relabeling of wool products labeled prior to the effective date of the amendment.

Authority: Section 6(a) of the Wool Products Labeling Act of 1939, 15 U.S.C. 68(d). Section 553 of the Administrative Procedure Act, 5 U.S.C. 553.

PART 300—[AMENDED]

§ 300.29 [Amended]

Based on the comments, the Commission will make a determination whether to amend § 300.29 of Title 16 by substituting the word "average" in place of "minimum".

Issued: March 14, 1983.

By direction of the Commission.

Benjamin I. Berman,

Acting Secretary.

BILLING CODE 6750–01–M

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Part 250

Oil and Gas and Sulphur Operations in the Outer Continental Shelf

Correction

In FR Doc. 83–8409 beginning on page 13440, in the issue of Thursday, March 31, 1983 make the following correction:

On page 13441, column two, "§ 250.81" should read "§ 250.80–1".

BILLING CODE 1505–01–M

GENERAL SERVICES ADMINISTRATION

41 CFR Part 101–41

Change In Forms Sequence; SF 1103 Set, U.S. Government Bill of Lading

AGENCY: General Services Administration.

ACTION: Proposed rule.

SUMMARY: The General Services Administration (GSA) proposes to amend the Federal Property Management Regulations to change the sequence of the Standard Form (SF) 1103 set, U.S. Government Bill of Lading, by positioning one copy of SF 1103–A, Memorandum Copy, as the third form in the set and the remaining SF 1103–A's to be positioned following the SF 1103–B. The purpose of this change is to provide a clearer copy for those agencies that

transfer this document to microfilm and to provide a more legible copy for fiscal or administrative use.

DATE: Written comments must be received by May 23, 1983.

ADDRESS: Comments should be sent to the General Services Administration (BWCPR), 18th and F Streets, NW., Washington, D.C. 20405.

FOR FURTHER INFORMATION CONTACT: John W. Sandfort, Chief, Regulations, Procedures, and Claims Branch, Office of Transportation Audits (202–786–3014).

SUPPLEMENTARY INFORMATION: The GSA has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. The GSA has based all administrative decisions underlying this proposed rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this proposed rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

1983 Corn, Sorghum, Barley, Oats, and Rye Program; Determination Regarding the Proclamation of 1983-Crop Program Provisions

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Notice of determination of 1983-crop program provisions for corn, sorghum, barley, oats, and rye.

SUMMARY: The purpose of this notice is to affirm the following determinations which have been made by the Secretary of Agriculture on September 23, 1982 with respect to the 1983 crops of corn, sorghum, barley, oats and rye: (1) The loan and purchase level per bushel shall be $2.65 for corn, $2.52 ($4.50 per cwt.) for sorghum, $2.16 for barley, $1.36 for oats, and $2.25 for rye; (2) the established target level per bushel is $2.86 for corn, $2.72 for sorghum ($4.86 per cwt.), $2.60 for barley, and $1.60 for oats; (3) an acreage reduction program will be in effect for feed grains with a uniform reduction of 10 percent for corn, sorghum, barley, and oats; (4) a cash land diversion program will be in effect which requires a 10 percent conservation use acreage diversion, in addition to the 10 percent acreage reduction program, with a payment per bushel of $1.50 for corn and sorghum, $1.00 for barley and $.75 for oats; (5) barley producers shall be eligible for payments; (6) malting barley shall not be exempt from the feed grain acreage reduction program; (7) grazing of conservation use acreage will not be permitted during the six principal growing months; (8) the feed grain base acreages for 1983 will remain the same as those established for 1982; and (9) neither cross compliance nor offsetting compliance shall be required. These determinations are required to be made in accordance with Sections 105B, 107C, and 110 of the Agricultural Act of 1949 as amended (hereinafter referred to as the "1949 Act").

EFFECTIVE DATE: September 23, 1982.

ADDRESS: Dr. Howard C. Williams, Director, Analysis Division, USDA–ASCS, Room 3741, South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT: Orville I. Overboe, Agricultural Economist, Analysis Division, ASCS–USDA, P.O. Box 2415, Washington, D.C. 20013 or call (202) 447–4417. The Final Regulatory Impact Analysis describing the options considered in developing this notice of determination is available on request from the above-named individual.

SUPPLEMENTARY INFORMATION: This notice has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has been designated as "major". It has been determined that these program provisions will result in an annual effect on the economy of $100 million or more.

The title and number of the federal assistance program that this notice applies to are: TITLE—Feed Grain Production Stabilization: Number 10.055 as found in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to this notice since there is no requirement that a notice of proposed rulemaking be published with respect to the subject matter of these determinations in accordance with 5 U.S.C. 553 or any other provision of law.

This notice sets forth determinations with respect to the following issues:

1. *Loan and Purchase Level.* Section 105B(a)(1) of the 1949 Act provides that the Secretary shall make available to producers loans and purchases for 1983 crop corn at such a level, not less than $2.65 per bushel, as the Secretary determines will encourage the exportation of feed grains and not result in excessive total stocks of feed grains after taking into consideration the cost of producing corn, supply and demand conditions, and world prices for corn. Section 105B(a)(2) provides that the Secretary shall make available to producers loans and purchases for the 1983 crops of grain sorghum, barley, oats, and rye at such levels as the Secretary determines is fair and reasonable in relation to the level that loans and purchases are made available for corn, taking into consideration the feeding value of such commodity in relation to corn and certain other factors specified in Section 401(b) of the 1949 Act.

2. *Established (Target) Price.* Section 105B(b)(1)(C) of the 1949 Act provides that the established price for 1983 corn shall not be less than $2.86 per bushel. The Secretary may adjust this established price to reflect any change in (i) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the determination is made from (ii) the average adjusted cost of production per acre for the two crop years immediately preceding the year previous to the one for which the determination is made. Section 105B(b)(1)(E) of the 1949 Act provides that the payment rate for grain sorghum, oats, and, if designated by the Secretary, barley, shall be such rate as the Secretary determines fair and reasonable in relation to the rate at which payments are made available for corn.

3. *Acreage Reduction Program (ARP).* Section 105B(e)(1) and (2) of the 1949 Act requires the Secretary to provide for a combination of an acreage reduction program and a land diversion program under which the acreage planted to feed grains for harvest on the farm would be limited to the acreage base for that farm reduced by a total of 15 percent, consisting of a reduction of 10 percent under the acreage reduction program and a reduction of 5 percent under the land diversion program. As a condition of eligibility for loans, purchases, and payments on the 1983 crop of feed grains, a producer must comply with the terms and conditions of the combined acreage reduction and land diversion program. The acreage base to be used for a farm under the 1983 program shall be the same as the acreage base applicable to the farm under the acreage reduction program for the 1982 crop, adjusted to reflect established crop rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base. If an acreage reduction program is in effect for any crop, the national program acreage, program allocation factor and

voluntary acreage reduction provisions are not applicable to such crop. The individual farm program acreage shall be the acreage planted on the farm to feed grains for harvest within the permitted feed grain acreage for the farm.

4. *Exemption of Malting Barley.* In accordance with Section 105B(e)(2) of the 1949 Act, the Secretary may provide that no producer of malting barley shall be required as a condition of eligibility for feed grain loans, purchases, and payments to comply with any acreage limitation if such producer has previously produced a malting variety of barley, plants barley only of an acceptable malting variety for harvest, and meets other conditions as the Secretary may prescribe.

5. *Set-Aside Program.* Sections 105B(e)(1) and (3) of the 1949 Act provide that the Secretary may provide for a set-aside program if he determines that the total supply of feed grains, in the absence of such a program, will be excessive, taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency.

6. *Land Diversion Program.* Section 105B(e)(5) of the 1949 Act, as amended, requires that the Secretary implement a land diversion program for the 1983 crop of feed grains under which the Secretary shall make crop retirement and conservation payments to any producer of the 1983 crop of feed grains whose acreage planted to feed grains for harvest on the farm is reduced so that it does not exceed the feed grain acreage base for the farm less an amount equivalent to 5 percent of the feed grain acreage base in addition to the 10 percent reduction required by the acreage reduction program. Such payments shall be made in an amount computed by multiplying (i) the diversion payment rate, by (ii) the farm program payment yield for the crop by (iii) the additional acreage diverted under the land diversion program. The diversion payment rate shall be established by the Secretary at not less than $1.50 per bushel for corn, except that the rate may be reduced up to 10 percent if the Secretary determines that the same program objective could be achieved with the lower rate. The payment rate for grain sorghums, oats, and if designated by the Secretary, barley, shall be such rate as the Secretary determines is fair and reasonable in relation to the rate at which payments are made available for corn. The Secretary shall make not less than 50 percent of any land diversion program payments to producers of the 1983 crop as soon as practicable after a producer enters into a land diversion contract with the Secretary and in advance of any determination of performance, but in no care prior to October 1, 1982. If a producer fails to comply with a land diversion contract after obtaining an advance payment under this paragraph, the producer shall repay the advance immediately and, in accordance with regulations issued by the Secretary, pay interest on the advance.

7. *The National Program Acreage (NPA).* Section 105B(c)(1) of the 1949 Act provides that the Secretary shall proclaim an NPA for the 1983 crop of feed grains not later than November 15, 1982. The NPA for feed grains shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the farm program payment yields for the 1983 crop) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the 1983/84 marketing year. The NPA provisions do not apply if an acreage reduction program is implemented for the 1983 crop of feed grains.

8. *Voluntary Reduction Percentage.* Section 105B(c)(3) of the 1949 Act provides that the 1983 individual farm program acreage of feed grains eligible for payments shall not be reduced by appplication of an allocation factor if the producer reduces the acreage of feed grains planted for harvest on the farm from the 1983-crop established feed grains acreage base by at least the percentage recommended by the Secretary in his proclamation of the NPA for the 1983 crop. If an acreage reduction program is implemented for thje 1983 crop of feed grains, the voluntary reduction percentage shall not be applicable to such crop.

9. *Grazing and Haying of Designated Acreage Reduction Program Acreage.* Section 105B(e)(4) of the 1949 Act provides the Secretary may permit all or any part of designated conservation use acreage to be devoted to sweet sorghum, hay and grazing or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or other commodity, if he determines such crop production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of price support programs, and will not affect farm income adversely.

10. *Producer Reserve Program.* Section 110 of the 1949 Act provides that the Secretary shall formulate and administer a program under which producers of feed grains will be able to store feed grains when in abundant supply and extend the time for their orderly marketing. Under such program, the Secretary shall make original or extended price support loans to producers at such level of support as the Secretary determines appropriate, except that the loan rate shall not be less than the current level of support provided for under the feed grain program established in accordance with Section 105B of the 1949 Act. The program may provide for (1) repayment of such loans in not less than 3 years nor more than 5 years; (2) payments to producers for storage in such amounts and under such conditions as are determined appropriate to encourage producers to participate in the program; (3) a rate of interest not less than the rate of interest charged the Commodity Credit Corporation by the United States Treasury, except that the Secretary may waive or adjust such interest as the Secretary deems appropriate; (4) recovery of amounts paid for storage, and for the payment of additional interest or other chares if such loans are repaid by producers before the market price for feed grains has reached the trigger release level; and (5) conditions designed to induce producers to redeem and market the feed grains securing such loans without regard to the maturity dates thereof whenever the Secretary determines that the market price for feed grains has attained a specific trigger release level, as determined by the Secretary. The Secretary shall announce the terms and conditions of the producer storage program as far in advanoe of making loans as practicable. In such announcements, the Secretary shall specify the quantity of feed grains to be stored under the program which the Secretary determines appropriate to promote the orderly marketing of feed grains. The Secretary may place an upper limit on the amount of feed grains placed in the reserve but such upper limit may not be less than 1 billion bushels.

11. *Offsetting Compliance.* Section 105B of the 1949 Act provides that the Secretary may implement offsetting compliance requirements as a condition of eligibility for program benefits. If offseting compliance is required, operators and owners of farms would have to ensure that all their farms were complying with program requirements under the feed grain program such as planting within the established feed grain acreage bases or the normal crop

acreage established for these farms in order to be eligible for program benefits.

12. *Advance Payments.* Section 107C of the 1949 Act requires that the Secretary shall make available to producers who participate in the acreage reduction program advance deficiency payments if the Secretary determines that deficiency payments will likely be made.

For the 1983 crop of feed grains if the Secretary establishes an acreage limitation or acreage set-aside program for a crop of feed grains under section 105B(e) and determines that deficiency payments will likely be made for such commodity for such crop, the Secretary shall make available advance deficiency payments to producers who agree to participate in such program.

In any case in which the deficiency payment payable to a producer for a crop, as finally determined by the Secretary under section 105B(b)(1), is less than the amount paid to the producer as an advance deficiency payment for the crop under this section, the producer shall refund an amount equal to the difference between the amount advanced and the amount finally determined by the Secretary, to be payable to the producers as a deficiency payment for the crop concerned.

If the Secretary determines in accordance with section 105B(b)(1) that deficiency payments will not be made available to producers on a crop with respect to which advance deficiency payments already have been made, the producers who received such advance payments shall refund such payments. Any refund required shall be due at the end of the marketing year for the crop with respect to which such payments were made. If a producer fails to comply with the requirements under the acreage reduction or set-aside program involved (and, in the case of the 1983 crops of feed grains, the requirements of the land diversion program involved) after obtaining an advance deficiency payment under this section, the producer shall repay immediately the amount of the advance, plus interest thereon, in such amount as the Secretary shall prescribe by regulations.

A notice that the Secretary was preparing to make determinations with respect to the 1983 crop of feed grains was published in the **Federal Register** on July 27, 1982 (47 FR 32461) and provided for a 30-day comment period. The comment period was limited to 30 days to allow the Secretary sufficient time to properly consider the comments received before the final program determinations were made. A total of 521 comments were received from 30 states. Included in this total were comments from four national organizations and two members of Congress. A summary of the responses is as follows:

1. *Loan and Purchase Level:* There were 249 comments. The majority of those comments (236) pertained to the loan and purchase level for corn with 81 percent favoring an increase in the loan and purchase level, 12 percent favoring the minimum statutory level, 3 percent favoring a reduced level, and 4 percent favoring elimination of any loan and purchase level. Those favoring an increase of the loan and purchase level suggested levels ranging from $2.75 per bushel to 100 percent of parity.

2. *Established (Target) Prices.* Eighty-seven comments were received pertaining to the establishment of the target price level. The majority, 83 percent, favored an increase in the target price of corn above the statutory minimum of $2.86 per bushel, with suggested target prices ranging from $3.00 to $4.00. Most comments favored a target price of $3.00 per bushel.

3. *Voluntary Program Reduction.* Ten comments were received relating to a possible voluntary acreage reduction program. Ninety percent of those comments opposed a voluntary acreage reduction program on the grounds that it would fail to result in a significant reduction of feed grain acreage.

4. *Acreage Reduction Program (ARP).* There were 175 comments relating to possible implementation of an ARP with 87 percent favoring some form of ARP. The majority of those favoring an ARP favored a 10 percent acreage reduction rate although the suggested percentage ranged from 5 to 100 percent.

5. *Acreage Bases for Nonparticipants.* Eighty-eight comments related to the establishment of acreage bases for nonparticipants of an ARP. The majority (67%) favored a formula for establishing acreage bases which would reward those who participate in the 1982 ARP.

6. *Set-Aside Program Provisions.* Ten comments related to the establishment and extent of a set-aside program. All favored a set-aside program and suggested set-aside rates which ranged from 10 to 25 percent, with 40 percent favoring a 10–15 percent set-aside.

7. *Inclusion of Barley in the Feed Grain Program.* Eight comments concerned this issue with the majority favoring inclusion of barley in the feed grain program.

8. *Exclusion of Malting Barley from the ARP.* Of a total thirty-four comments, 74 percent were opposed to excluding malting barley from any ARP.

9. *Grazing and Haying of Designated ARP Acreage.* Twenty-three comments were received regarding whether or not to allow haying and grazing of ARP designated acreage. Sixty-one percent favored provisions which would permit haying and grazing of designated ARP acreage. Another 13 percent favored provisions which would permit grazing only.

10. *Land Diversion Program (LDP).* Eighty-two percent of a total of 251 comments favored establishment of a LDP. Of those favoring a LDP, 47 percent favored a combined LDP and ARP while 35 percent favored a LDP only.

11. *Offsetting Compliance.* Twenty-two comments related to the issue of whether or not offsetting compliance requirements should be imposed. The majority (73%) opposed imposition of any such requirements.

A number of the determinations with respect to the feed grain program are required to be made by Section 105B(e)(1) of the 1949 Act not later than November 15 prior to the calendar year in which the crop is harvested. On September 23, 1982, the Secretary announced by press release the various program determinations for the 1983 crop of feed grains. Accordingly, the purpose of this notice is to affirm the program determinations which have previously been announced on September 23, 1982. Thus, it has been determined that no further public rulemaking is required with respect to the following determinations:

Determinations

1. *Loan and Purchase Level.* In accordance with Sections 105B(a) (1) and (2) of the 1949 Act, it has been determined that the loan and purchase level per bushel shall be $2.65 for corn, $2.52 ($4.50 per cwt.) for grain sorghum, $2.16 for barley, $1.36 for oats, and $2.25 for rye.

2. *Established (Target) Price.* In accordance with Section 105B(b)(1)(C) of the 1949 Act, it has been determined that the established (target) price per bushel shall be $2.86 for corn, $2.72 ($4.86 per cwt.) for grain sorghum, $2.60 for barley, and $1.60 for oats.

3. *Acreage Reduction Program (ARP).* In accordance with Section 105B(e)(2) of the 1949 Act, it has been determined that a 20 percent reduction shall be applicable to the acreage planted to feed grains in 1983. Producers will be required to reduce their acreage bases by 10 percent for the acreage reduction program and 10 percent for the land diversion program for a total of a 20 percent reduction. Producers will be required to reduce their acreage by the combined total of the acreage reduction and the land diversion program in order

to be eligible for loans, purchases, and payments for the 1983 crop of feed grains. The Secretary has determined that the total supply of feed grains, in the absence of such limitations, will be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. This option was selected because it provides the best balance between the multiple objectives of providing adequate feed grain supplies for domestic and foreign utilization, while maintaining adequate carryover stocks, supporting farm income, combating inflation, holding down Treasury costs and conserving natural resources.

Land designated for conservation use must be cropland that was devoted to row crops or small grains in two of the last 3 years, except that for land to be designated for conservation use that is in a summer fallow rotation, the requirement is 1 of the last 2 years.

Eligible land on which permanent conservation practices were established in 1982 or a subsequent year will be eligible for designation as conservation use acreage under any acreage reduction, set-aside, or diversion program authorized by the 1949 Act, so long as the conservation practice is maintained. These conservation practices will be eligible for costshare payments under the Agricultural Conservation Program.

4. *Barley.* In accordance with Section 105B(b)(1)(E) of the 1949 Act, it has been determined that barley is eligible for deficiency, disaster, and crash land diversion payments.

5. *Exemption of Malting Barley.* In accordance with Section 105B(e)(2) of the 1949 Act, it has been determined that malting barley shall not be exempt from the feed grain acreage reduction program.

6. *Set-Aside Program.* In accordance with Sections 105B(e) (1) and (3) of the 1949 Act, it has been determined that there will be no set-aside program for the 1983 crop of feed grains since an acreage reduction program has been made applicable to the 1983 crops.

7. *Land Diversion Program (LDP).* In accordance with Section 105B(e)(5) of the 1949 Act, it has been determined that cash land diversion payments are necessary to assist in adjusting the total national acreage of feed grains to desirable goals and, therefore, such payments will be made for the 1983 crop of corn and sorghum at $1.50 per bushel, barley at $1.00 per bushel, and oats at $.75 per bushel multiplied by the farm program yield times the acreage diverted.

8. *National Program Acreage.* In accordance with Sections 105B(c)(1) and 105(B)(e)(2) of the 1949 Act, it has been determined that the NPA will not be applicable for the 1983 crop of feed grains since an acreage reduction program has been announced.

9. *Voluntary Reduction Percentage.* In accordance with Sections 105B(c)(3) and 105B(e)(2) of the 1949 Act, it has been determined that the voluntary reduction percentage will not be applicable for the 1983 crop of feed grains since an acreage reduction program has been announced.

10. *Grazing and Haying of Designated ARP Acreage.* In accordance with Section 105B(e)(4) of the 1949 Act, it has been determined that feed grain producers shall not be permitted to hay or plant alternate crops on designated acreage reduction program acreage. Grazing of the conservation use acreage will be authorized during the six principal non-growing months as determined by the State ASC committees.

11. *Offsetting Compliance.* Offsetting compliance will not be required as a condition of eligibility for a feed grain producer to participate in the 1983 acreage reduction and land diversion programs.

12. *Advance Payments.* Producers, at the time they sign up for the program, may request an advance of 50 percent of the cash diversion payment and of any projected deficiency payment. A producer accepting an advance payment, but who later does not comply with program provisions, must refund the amount of the advance payment with interest. Interest charged will be the rate in effect for commodity loans on the date of the advance payment, plus five percentage points.

Authority: Secs. 105B, 107C, 110, 1001; 95 Stat. 1227, as amended, 96 Stat. 766, 95 Stat. 1257, 91 Stat. 950, as amended (7 U.S.C. 1444d, 1445b–2, 1445e, and 1309).

Signed in Washington, D.C., April 15, 1983.

C. Hoke Leggett,

Acting Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410–05–M

Soil Conservation Service

Bynum Park RC&D Measure; Richmond County, North Carolina; Environmental Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

FOR FURTHER INFORMATION CONTACT: Mr. Coy A. Garrett, State Conservationist, Soil Conservation Service, Room 544, Federal Building, 310 New Bern Avenue, Raleigh, North Carolina 27611, Telephone (919) 755–4210.

Notice: Pursuant to Section 102(2) of the National Environmental Policy Act of 1969, the Council on Environmental Quality Guidelines, (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Bynum Park RC&D Measure, Richmond County, North Carolina.

The environmental assessment of this Federally assisted action indicates that the project will not cause significant local, regional or national impacts on the environment. As a result of these findings, Mr. Coy A. Garrett, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for critical area treatment on a county recreational facility. The planned improvements include installing diversions, grassed waterways, riprap outlets, pedestrian walkways, traffic control barriers, pipes, and grading and seeding bare and eroding areas to permanent vegetation. All treatment is aimed at erosion control and disposing of surface water at a nonerosive velocity.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Coy A. Garrett. An environmental impact appraisal has been prepared and sent to various Federal, State and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program. Office of Management and Budget Circular A–95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects is applicable.

Dated: April 7, 1983.

Coy A. Garrett,

State Conservationist

[FR Doc. 83-10421 Filed 4-21-83; 8:45 am]

BILLING CODE 3410-16-M

Cape Hatteras School, RC&D Measure, North Carolina; Environmental Impact

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Cape Hatteras School, RC&D Measure, Dare County, North Carolina.

FOR FURTHER INFORMATION CONTACT: Mr. Coy A. Garrett, State Conservationist, Soil Conservation Service, Room 544, Federal Building, 310 New Bern Avenue, Raleigh, North Carolina 27611, Telephone (919) 755-4210.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Coy A. Garrett, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The planned works of improvement include the installation of approximately 850 linear feet of collection pipe to dispose of excess water through gravity flow. Twelve catch basins will be installed to collect and remove excess surface water. Downspouts will be connected to each individual gutter pipe to direct surface water into catch basins and collection pipe. One flap gate will be attached to outlet pipe to prevent high wind tides from backing into collection system. All disturbed areas will be revegetated using adapted plant materials.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Coy A. Garrett.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.

BILLING CODE 3410-16-M

Creswell High School, RC&D Measure, North Carolina; Environmental Impact

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Creswell High School RC&D Measure, Washington County, North Carolina.

FOR FURTHER INFORMATION CONTACT: Mr. Coy A. Garrett, State Conservationist, Soil Conservation Service, Room 544, Federal Building, 310 New Bern Avenue, Raleigh, North Carolina 27611, Telephone (919) 755-4210.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Coy A. Garrett, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for reducing flooding and for improving drainage on the school grounds. The planned works of improvement include installing catch basins, pipes and sub-surface drainage tubing. Grading and shaping will be done to improve surface drainage and to eliminate ponding. All disturbed areas will be seeded with adapted permanent vegetation.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Coy A. Garrett.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.

BILLING CODE 3410-16-M

Indian Brook Watershed, N.H.; Intent to Deauthorize Federal Funding

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of Intent to Deauthorize Federal Funding.

SUMMARY: Pursuant to the Watershed Protection and Flood Prevention Act, Pub. L. 83-566, and the Soil Conservation Service Guidelines (7 CFR Part 622), the Soil Conservation Service gives notice of the intent to deauthorize Federal funding for the Indian Brook Watershed project, Coos County, New Hampshire.

FOR FURTHER INFORMATION CONTACT: Richard L. Porter, State Conservationist, Soil Conservation Service, Federal Building, Box G, Durham, NH 03824, telephone (603) 868-7581.

SUPPLEMENTARY INFORMATION: A determination has been made by Richard L. Porter that the proposed works of improvement for the Indian Brook Watershed project will not be installed. The sponsoring local organizations have concurred in this determination and agree that Federal funding should be deauthorized for the project. Information regarding this determination may be obtained from Richard L. Porter, State Conservationist, at the above address and telephone number.

No administrative action on implementation of the proposed

deauthorization will be taken until 60 days after the date of this publication in the **Federal Register.**

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention. Office of Management and Budget Circular A–95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects is applicable)

Dated: April 12, 1983.

BILLING CODE 3410–16–M

Turkey-Clay Creek Watershed, South Dakota; Availability of Record of Decision

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of Availability of a Record of Decision.

SUMMARY: Robert D. Swenson, responsible Federal official for projects administered under the provisions of Pub. L. 83–566, 16 U.S.C. 1001–1008, in the State of South Dakota, is hereby providing notification that a record of decision to proceed with the installation of the Turkey-Clay Creek Watershed project is available. Single copies of this record of decision may be obtained from Robert D. Swenson at the address shown below.

FOR FURTHER INFORMATION CONTACT: Robert D. Swenson, State Conservationist, Soil Conservation Service, 200 Fourth Street SW., Huron, South Dakota 57350, telephone 605–352–8651.

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention. Office of Management and Budget Circular A–95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects is applicable.)

Dated: April 12, 1983.

Robert D. Swenson,

State Conservationist.

Record of Decision, Turkey-Clay Creek Watershed, Clay, Hutchinson, Turner and Yankton Counties, South Dakota

1. *Purpose:* As State Conservationist for the Soil Conservation Service, I am the Responsible Federal Official (RFO) for all Soil Conservation Service projects in South Dakota.

The recommended plan for the Turkey-Clay Creek Watershed involves works of improvement to be installed under authorities administered by the Soil Conservation Service. This project includes the installation of nine single-purpose flood prevention structures, nine sediment basins, 10.2 miles of main channel and 55.3 miles of laterals to be modified, and mitigation.

The Turkey-Clay Creek Watershed plan was prepared under the authority of the Watershed Protection and Flood Prevention Act (Pub. L. 566, 83rd Congress, 68 Stat. 666, as amended) by the Clay, Hutchinson, Turner and Yankton Soil and Water Conservation Districts and the Turkey-Clay Creek Watershed District. Local residents began holding informal meetings in 1965. A steering committee submitted an application for federal assistance to the South Dakota Conservation Commission in May 1966. The Commission conducted a public field examination in September 1966. The South Dakota Conservation Commission approved the application in October 1966, and the South Dakota Water Resources Commission approved the application in January 1967. The application for planning assistance was submitted to the Administrator of the Soil Conservation Service in February 1967.

2. *Measures Taken to Comply with National Environmental Policies:* The Turkey-Clay Creek Watershed project has been planned in accordance with existing Federal legislation concerned with the preservation of environmental values. The following actions were taken to insure that the Turkey-Clay Creek Watershed plan is consistent with national goals and policies.

Several educational programs were conducted to inform people about procedures in organizing and planning a watershed district. The Turkey-Clay Creek Watershed District was officially organized on March 26, 1970. The referendum passed by 72 percent of the 230 votes cast.

The Soil Conservation Service's Watershed Planning Staff began gathering data for the preliminary investigation in 1971 and 1972. A number of public meetings were held to achieve more public participation in determining the problems, concerns, and objectives of the local people and special interest groups. Annual meetings were held, usually in March, to inform the public of planning progress.

Additional meetings were held with various groups to discuss the potential environmental impacts of the project. Such a meeting was held on October 16 and 17, 1973, with several agencies providing comments. The administrator of the Soil Conservation Service issued formal approval to develop a watershed plan in June 1975.

Meetings were held with representatives of the Environmental Protection Agency and the U.S. Fish and Wildlife Service in November 1976 and with the U.S. Fish and Wildlife Service and the South Dakota Department of Game, Fish and Parks on June 20, 1977. The purpose of these meetings was to discuss evaluations of alternative plans and their potential impact on the environment.

As part of the environmental evaluation, two major inventories were initiated. An inventory of land quality and quantity was conducted by the Soil Conservation Service. The purpose of this inventory was to determine the status of land treatment already installed in the watershed and the additional land treatment needed.

The second inventory was an evaluation of water quality conditions in the watershed. This was done under contract. Several other evaluations were made of wetland conditions, wildlife habitat and other factors which might be influenced by structural measures.

The Soil Conservation Service along with input from sponsors was involved in formulating several alternatives. These served as the basis of the national economic development plan, environmental quality plan and other alternatives set forth for considertion by the local sponsors, nd the concerned public. A public meeting was held at Irene, South Dakota on March 23, 1976 with 31 people in attendance. The purpose of this meeting was to provide suggestions and react to the various alternatives being formulated for the Preliminary Investigation Report.

Alternative plans displayed in the Preliminary Investigation Report, dated August 1976, were discussed at a public meeting at Volin, South Dakota on September 13, 1976 with 50 people in attendance. The potential benefits and possible environmental impacts of the various plans were evaluated. This discussion served as a basis for a tentative selection of structural measures to be included in the final plan. (All public meetings were announced in local newspapers and through other media such as radio and television.)

Since submitting their application for assistance, the watershed district board of managers has carried out an educational program designed to inform the general public and watershed residents of planning progress. This included meetings advertised in advance in local newspapers. Public tours of other watersheds have been sponsored by the district board, and public meetings have been held to discuss the various proposed measures.

During project formulation, the Soil Conservation Service, and U.S. Fish and Wildlife Service in consultation with the South Dakota Department of Game, Fish and Parks made a detailed evaluation of environmental impacts for the recommended plan. Mitigation measures recommended by these three agencies were presented to the sponsors on January 9, 1979. The sponsors agreed to the mitigation measures and they were incorporated into the project plan.

Interagency consultation as required by Section 7 of the Endangered Species Act of 1973, amended 1978, was activated on March 28, 1979. The U.S. Fish and Wildlife Service, the responsible agency, advised SCS on April 10, 1979, that the American peregrine falcon (Falco peregrinus anatum) and the bald eagle (Haliaeetus leucocephalus) may be present in the Turkey-Clay Creek project area.

Their findings required a biological evaluation by SCS concerning these two species. This evaluation completed on May 18, 1979, recognizes that the peregrine falcon and bald eagle may make migratory over flights and feeding/resting stops within the watershed, but that the watershed contains no critical habitats for these species. It also recognizes that the project works of improvement will have no adverse impacts on these species or their habitats. The U.S. Fish and Wildlife Service has reviewed the

SCS biological evaluation, and other available data, and have expressed no concerns.

The South Dakota State Archaeologist and the State Historical Preservation Officer were consulted to determine present historical and archaeological resources in the watershed and the impact of the proposed project measures on these resources. The project will not affect any known historical sites. The Soil Conservation Service will contract qualified personnel to conduct archaeological surveys of proposed land disturbance locations, prior to construction. SCS procedures to implement compliance with regulations of executive orders for the protection of historic and cultural properties will be followed. The sponsors are also responsible for compliance with State water laws, Section 10 of the River and Harbor Act, Section 404 of Pub. L. 92–500, and Executive Order 1990.

On October 29, 1980 project sponsors and Soil Conservation Service representatives met and the sponsors approved the Draft Turkey-Clay Creek Watershed Plan and Environmental Impact Statement. About 200 agencies, conservation groups and organizations were asked to comment on the Draft Watershed Plan and Environmental Impact Statement.

The consequences of a full range of reasonable and viable alternatives to specific project features were considered, studied, and analyzed. In reviewing these alternatives, all courses of action that could reasonably accomplish the project purposes were considered. Attempts were made to identify the economic, social, and environmental values affected by each alternative. In accordance with existing policy and procedures, the possibilities of structural and nonstructural alternatives for the project were considered.

3. *Conclusions.* The following conclusions were reached after carefully reviewing the proposed project in light of all national goals and policies, particularly those expressed in the National Environmental Policy Act, and after evaluating the overall merit of possible alternatives to the project:

a. The project will employ a reasonable and practicable means that is consistent with the National Environmental Policy Act while permitting the application of other national policies and interests. These means include, but are not limited to, a project planned and designed to minimize adverse effects on the natural environment, while accomplishing an authorized project purpose.

b. The Turkey-Clay Creek Watershed project was planned using a systematic interdisciplinary approach involving integrated uses of the natural and social sciences and environmental design arts. The results of this review constitutes the basis for the conclusions and recommendations. All conclusions concerning the environmental impact of the project and overall merit of existing plans were based on a review of data and information that would be reasonably expected to reveal significant environmental consequences of the proposed project. These data included additional studies prepared specifically for the project and comments and views of all interested Federal, State and local agencies and individuals.

c. In studying and evaluating the environmental impact of the project, every effort was made to express all environmental values quantitatively. Any failure to quantify particular environmental amenities and values is the result of the absence of a methodology having general scientific acceptance. Nevertheless, every effort was made to identify and give appropriate weight and consideration of nonquantifiable environmental values.

d. Wherever legitimate conflicts of scientific theory and conclusions existed and conclusions led to different views, persons qualified in the appropriate environmental disciplines were consulted. Theories and conclusions appearing to be most reasonable, scientifically acceptable, or both were adopted.

e. Every possible effort has been made to identify those adverse environmental effects which cannot be avoided if the project is constructed.

f. The long-term and short-term resource uses, long-term productivity, and the irreversible and irretrievable commitment of resources are accurately described in the final environmental impact statement.

g. All reasonable and viable alternatives to project features and to the project itself were studied and analyzed with reference to national policies and goals, especially those expressed in the National Environmental Policy Act and the Federal waters resource development legislation under which the project was planned. Each possible course of action was evaluated as to its possible economic, technical, social, and overall environmental consequences to determine the tradeoffs necessary to accommmodate all national policies and interests. Some alternatives may tend to protect more of the present and tangible environmental amenities than the proposed project will preserve. However, no alternative or combination of alternatives will afford greater protection of the environmental values while accomplishing the other project goals and objectives.

h. I conclude, therefore, that the proposed project will be the most effective means of meeting national goals and serving the public interest.

4. *Recommendations.* Having concluded that the proposed Turkey-Clay Creek Watershed project uses all practicable means, consistent with other essential considerations of the national policy, to meet the goals established in the National Environmental Policy Act, that the project will thus serve the overall public interest, that the final environmental impact statement has been prepared, reviewed, and accepted in accordance with the provisions of the Naional Environmental Policy Act as implemented by the Departmental regulations for the preparation of environmental impact statements, and that the project meets the needs of the project sponsors, I propose to implement the Turkey-Clay Creek Watershed project.

Dated: April 12, 1983.

R. D. Swenson,

State Conservationist, Soil Conservation Service, U.S. Department of Agriculture.

BILLING CODE 3410-16-M

Muddy Creek (Northeast Unit) Watershed, Montana; Finding of No Significant Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Muddy Creek (Northeast Unit) Wasteshed, Teton County, Montana.

FOR FURTHER INFORMATION CONTACT: Glen H. Loomis, Acting State Conservationist, Soil Conservation Service, P.O. Box 970, Bozeman, MT 59715, telephone 406–587–5271, Ext. 4322.

SUPPLEMENTARY INFORMATION: The environmental evaluation of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Glen H. Loomis, Acting State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project concerns a plan for onfarm agricultural water management-irrigation using watershed protection land treatment measures. Planned works of improvement include 4,130 acres of irrigation water management assistance, 690 acres of irrigation land leveling, 12,000 feet of water conveyance systems, 660 acres of automated surface systems, and 2,510 acres of sprinkler irrigation systems.

The Notice of a Finding of No Significant Impact has been forwarded to the Environmental Protection Agency and sent to various federal, state, and local agencies and interested parties. A limited number of copies of the Finding of No Significant Impact and Environmental Assessment are available to fill single copy requests at the above address. Basic data developed during the environmental evaluation are

of file and may be reviewed by contacting Wallace A. Jolly.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the Federal Register.

CONSUMER PRODUCT SAFETY COMMISSION

[CPSC Docket No. 83-1]

Sun and Sand Imports, Ltd., a Corporation, and Guido Muller, Individually; Prehearing Conference

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of Prehearing Conference.

DATE: This notice announces a prehearing conference to be held in the matter of Sun and Sand Imports, Ltd. on May 9, 1983 at 10:00 a.m.

ADDRESS: The prehearing conference will be in Room 4A-35, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland. For additional information contact: Sheldon D. Butts, Deputy Secretary, Consumer Product Safety Commission, Washington, D.C. 20207, telephone (301) 492-6800.

Notice of Prehearing Conference

Please take notice that a prehearing conference in this proceeding will be held at 10:00 a.m., on May 9, 1983 in room 4A-35, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland for the purposes outlined in 16 CFR 1025.21(a) the issues to be considered in the proceeding are:

(1) Whether respondents are engaged in the importation and sale of Children's Sleepwear: Sizes 0 through 6X and have their office and principal place of business located at 1441 Broadway, Room 1415, New York, New York 10018;

(2) Whether respondents were engaged in the importation into the United States and in the introduction, into commerce, and in the sale or shipment in commerce of wearing apparel as the terms "commerce" and "wearing apparel" are defined in the Flammable Fabrics Act, Sections 2 (b) and (d) 15 U.S.C. 1191 (b) and (d).

(3) Whether respondents have been engaged in the importation into the United States, and caused to be transported in commerce, Children's Sleepwear: Sizes 0 through 6X that are subject to and fail to conform to the Standard for Flammability in violation of Section 3 of the Flammable Fabrics Act, 15 U.S.C. 1192.

(4) Whether the acts and practices complained of, if proven, constitute unfair methods of competition and unfair and deceptive practices in commerce under the Federal Trade Commission Act prohibited under Section 3 of the Flammable Fabrics Act, 15 U.S.C. 1192.

Dated: April 19, 1983.

BILLING CODE 3910-01-M

Department of the Air Force

Recision of Notice of Intent To Prepare an Environmental Impact Statement

The United States Air Force announced in the **Federal Register** on July 21, 1982, the intent to prepare an environmental impact statement for siting a Phased Array Warning System radar (PAVE PAWS) in the vicinity of Goodfellow AFB/San Angelo, Texas. Subsequent to the announcement, a scoping meeting was held to define the environmental issues to be analyzed for: Christoval area ranch property located about 17 miles south of San Angelo and within four miles east northeast of Christoval; Mount Susan, about 17 miles south of Goodfellow AFB and within two miles southeast of Christoval; Schleicher County ranch property, located about 35 miles south of Goodfellow AFB; and ranch property in Tom Green County and Schleicher County, about 33 miles south of Goodfellow AFB.

After refining the operational analysis in December, 1982, the Air Force narrowed the proposed sites to the Schleicher County ranch property and Mount Susan. The Air Force also determined that the Schleicher County site would be the proposed action, with Mount Susan designated as the alternative. After a review of the environmental analysis, it was determined that the proposed action, Schleicher County, would not significantly impact the quality of the human environment. Therefore, the environmental analysis has been issued as an environmental assessment with an accompanying finding of no significant impact (FONSI).

Both the environmental assessment and FONSI will be available to interested parties for review for 30 days from the date of this notice before the decision on the location of the radar is implemented.

Additional information may be obtained from HQ ESD/PA Hanscom AFB, MA 01731, (617) 861–4466.

BILLING CODE 3910–01–M

Office of the Secretary

Defense Science Board; Advisory Committee Meeting

The Defense Science Board will meet in closed session on 25–26 May 1983 in the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

At the meeting on 25–26 May 1983 the Board will discuss interim findings and tentative recommendations resulting from ongoing Task Force activities associated with Stategic, Tactical, Intelligence/Command, Control and Communications, and Technology Issues. The Board will also discuss plans for future consideration of scientific and technical aspects of specific strategies, tactics and policies as they may affect the U.S. national defense posture.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92–463, as amended (5 U.S.C. App. I, (1976)), it has been determined that this DSB Task Force meeting concerns matters listed in 5 U.S.C. 552b(c) (1) (1976), and that accordingly these meetings will be closed to the public.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Service, Department of Defense.

This notice also describes the functions of the Council. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATE: May 9, 1983.

ADDRESS: The National Center for Research in Vocational Education, Ohio State University, 1960 Kenny Road, Columbus, Ohio 43210.

FOR FURTHER INFORMATION CONTACT: Dr. Howard F. Hjelm, Director, Division of Innovation and Development, 400 Maryland Avenue, SWl, Rm. 5044, ROB 3, Washington, D.C. 20202, (202) 245–2278.

SUPPLEMENTARY INFORMATION: The National Center for Research in Vocational Education Advisory Council is established under Section 171 of the Vocational Education Act of 1963 as amended by the Education Amendments of 1976 (Pub. L. 94–482) (20 U.S.C. 2401). The primary purpose of the Council is to advise the National Center Director on the operation of the National Center and the Secretary on regional centers. In addition to advising the Director, the Council, at the request of the Secretary, may be consulted on current issues in vocational education as they affect the National Center. Meetings held at the request of the Secretary are conducted in accordance with the Federal Advisory Committee Act (FACA).

That portion of the meeting of the Council under FACA is open to the public on May 9, 1983 from 1:00 p.m. to 4:30 p.m. The proposed agenda includes: 1:00–1:45—Report on Federal Activities; 1:45–4:30—Council Discussion and Recommendations on Technassociates Inc. Evaluation Report.

This meeting will be held in conjunction with a regular meeting of the Council to advise the Center Director.

Records are kept of all Council proceedings and are available for public inspection at the office of Glenn Boerrigter, Program Improvement Systems Branch, 400 Maryland Avenue, SW., Rm 5018, ROB 3, Washington, D.C. 20202; telephone: (202) 245–2617.

Dated: April 19, 1983.

John K. Wu,

Acting Assistant Secretary for Vocational and Adult Education.

BILLING CODE 4000–01–M

National Advisory Council on Indian Education; Meeting

AGENCY: National Advisory Council on Indian Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the scheduled and proposed agenda of a forthcoming meeting of the full Council. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend the meeting.

DATES: Full Council Meeting: May 9, 1983, 9:00 a.m. to 5:00 p.m.; May 10, 1983, 9:00 a.m. to 5:00 p.m.; and, May 11, 1983, 9:00 a.m. to 5:00 p.m.

Executive Committee Meeting: May 9, 1983, 6:30 p.m. until completion of business.

Standing Committee Meetings: May 10, 1983, 6:30 p.m. until completion of business.

ADDRESS: National Advisory Council on Indian Education, 425 13th Street, NW., Suite 326, Pennsylvania Building, Washington, D.C. 20004 (202/376–8882).

FOR FURTHER INFORMATION CONTACT: Dr. Michael P. Doss, Executive Director, National Advisory Council on Indian Education, 425 13th Street, NW., Suite 326, Pennsylvania Building, Washington, D.C. 20004 (202/376–8882).

SUPPLEMENTARY INFORMATION: The National Advisory Council on Indian Education is established under Section 442 of the Indian Education Act, Title IV of Pub. L. 92–318 (20 U.S.C. 1221g). The Council is established to submit to the Secretary of Education a list of nominees for the position of Director of Indian Education Programs; advise the Secretary of Education with respect to the administration of any program in which Indian children or adults

participate from which they can benefit; review applications for assistance under Title III of the Act of September 30, 1950, and make recommendations to the Secretary with respect to their approval; evaluate programs and projects carried out under any program of the Department of Education in which Indian children or adults can participate or from which they can benefit and disseminate the results of such evaluations; provide technical assistance to local educational agencies and to Indian educational agencies, institutions and organizations; assist the Secretary of Education in developing criteria and regulations for the administration and evaluation of grants made under Section 303(b) of the Act of September 30, 1950; submit to Congress not later than June 30 of each year a report of its activities; and, be consulted by the Secretary of Education regarding the definition of the term Indian.

The meeting will be open to the public. This meeting will be held at the National Advisory Council on Indian Education, 425 13th Street, NW., Suite 326, Pennsylvania Building, Washington, D.C. 20004 (202/376–8882).

The proposed agenda includes:

(1) Official Swearing-in Ceremony.

(2) Formal Orientation by U.S. Department of Education.

(3) Election of Officers and Appointment of NACIE Members to Standing Committees.

(4) Executive Director's Report.

(5) Review of NACIE's FY 1983 Budget.

(6) A Review of the Joint NACIE/ED Search Process for a New Director of the Indian Education Programs, U.S. Department of Education.

(7) Regular Council Business.

(8) Committee Discussions and Reports.

(9) Public Testimony.

The Executive Committee Meeting and Standing Committee Meetings will be open to the public. These committee meetings will be held at the National Advisory Council on Indian Education, 425 13th Street, NW., Suite 326, Pennsylvania Building, Washington, D.C. 20004 (202/376–8882).

The proposed agenda for the Executive Committee includes:

(1) NACIE Budget.

(2) NACIE Planning Meeting.

The proposed agenda for the Standing Committees includes:

(1) Consideration of Agenda Items.

Records shall be kept of all Council proceedings and shall be available for public inspection at the office of the National Advisory Council on Indian Education located at 425 13th Street, NW., Suite 326, Pennsylvania Building, Washington, D.C. 20004.

Dated: April 19, 1983. Signed at Washington, D.C.

Dr. Michael P. Doss,

Executive Director, National Advisory Council on Indian Education.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Langham Petroleum & Development, Inc.; Proposed Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of proposed consent order and opportunity for comment.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces a proposed Consent Order with Langham Petroleum & Development, Inc. and provides an opportunity for public comment on the terms and conditions of the proposed Consent Order.

DATE: Comments by May 23, 1983.

ADDRESS: Send comments to: Sandra K. Webb, Director, Houston Office, Economic Regulatory Administration, One Allen Center, Suite 610, 500 Dallas Street, Houston, Texas 77002.

FOR FURTHER INFORMATION CONTACT: Sandra K. Webb, Director, Houston Office, Economic Regulatory Administration, One Allen Center, Suite 610, 500 Dallas Street, Houston, Texas 77002, phone (713) 229–3715. Copies of the Consent Order may be obtained free of charge by writing or calling this office.

SUPPLEMENTARY INFORMATION: On April 18, 1983, the ERA executed a proposed Consent Order with Langham Petroleum & Development, Inc. (Langham) of Houston Texas. Under 10 CFR 205.199J(b), a proposed Consent Order which involves the sum of $500,000 or more, excluding interest and penalties, becomes effective no sooner than thirty days after publication of a notice in the **Federal Register** requesting comments concerning the proposed Consent Order. Although the ERA has signed and tentatively accepted the proposed Consent Order, the ERA may, after consideration of the comments it receives, withdraw its acceptance and, if appropriate, attempt to negotiate a modification of the Consent Order or issue the Consent Order as signed.

I. The Consent Order

Langham, with its home office located in Houston, Texas, is a firm engaged in the marketing and reselling of covered products and was subject to the Mandatory Petroleum Price and Allocation Regulations. To resolve certain potential civil liability arising out of the Mandatory Petroleum Allocation and Price Regulations and related regulations, 10 CFR Parts 205, 210, 211, and 212, during the period December 1, 1977 through January 27, 1981 ("the period covered by this Consent Order"), the ERA and Langham entered into a Consent Order the significant terms of which are as follows:

ERA has alleged that in connection with its reselling activities Langham priced crude oil in violation of 10 CFR Part 212, Subparts F and L. ERA has made no allegation concerning Langham's production and first sales of domestic crude oil and those transactions are specifically excluded from the terms of the Consent Order.

With respect to Langham's reselling activities, the ERA and Langham disagree concerning Langham's compliance with the Federal petroleum price and allocation regulations. Notwithstanding the ERA's view as to the proper application of the regulations to Langham's activities, Langham maintains that it has correctly construed and applied the regulations. The Consent Order does not constitute an admission of Langham nor a finding by the ERA of any violation of the Federal petroleum price and allocation regulations. Although the ERA and Langham each believes that their respective positions are meritorious, both parties desire to resolve these matters without resort to complex, lenghty and expensive compliance actions. In addition to its review of Langham's reselling activities, the ERA has also reviewed Langham's expenditures prior to and after the decontrol of crude oil and petroleum products, as well as current financial data of the firm. Based upon that review, the ERA believes that it is in the best interest of the public and the government to reslove these matters now by means of this Consent Order.

II. Refunds

Under this Consent Order, Langham will pay the sum of $32,000,000 in installments as follows: $5,000,000 within 180 days of the effective date of the Consent Order and the balance in 15 annual installments of $1,800,000 each. Langham further agrees that to the

extent that its actual net revenues exceed the net revenues reported in its Form ERA–69 filings by more than 3 percent, Langham will pay $1,000,000 for each full percentage point above 3 percent. Upon full satisfaction of the terms and conditions of this Consent Order by Langham, the DOE will release Langham from any civil claims that the DOE may have arising out of the specified transactions during the period covered by this Consent Order.

III. Submission of Written Comments

Interested persons are invited to submit written comments concerning the terms and conditions of this Consent Order to the address given above. Comments should be identified on the outside of the envelope and on the documents submitted with the designation, "Comments on Langham Consent Order." The ERA will consider all comments it receives by 4:30 p.m., local time, May 23, 1983. Any information or data considered confidential by the person submitting it must be identified as such in accordance with the procedurs in 10 CFR 205.9(f).

Issued in Houston, Texas on the 19th day of April 1982.

Sandra K. Webb,

Director, Houston Office, Economic Regulatory Administration.

[FR Doc. 83–10098 Filed 4–21–83; 8:45 am]

BILLING CODE 6450–01–M

Robert Stephen Langham; Proposed Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of proposed consent order and opportunity for comment.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces a proposed Consent Order with Robert Stephen Langham and provides an opportunity for public comment on the terms and conditions of the proposed Consent Order.

DATE: Comments by May 23, 1983.

ADDRESS: Send comments to: Sandra K. Webb, Director, Houston Office, Economic Regulatory Administration, One Allen Center, Suite 610, 500 Dallas Street, Houston, Texas 77002.

FOR FURTHER INFORMATION CONTACT: Sandra K. Webb, Director, Houston Office, Economic Regulatory Administration, One Allen Center, Suite 610, 500 Dallas Street, Houston, Texas 77002, phone (713) 229–3715. Copies of the Consent Order may be obtained free of charge by writing or calling this office.

SUPPLEMENTARY INFORMATION: On April 18, 1983, the ERA executed a proposed Consent Order with Robert Stephen Langham (R. S. Langham) of Houston, Texas. Under 10 CFR 205.199J(b), a proposed Consent Order which involves the sum of $500,000 or more, excluding interest and penalties, becomes effective no sooner than thirty days after publication of a notice in the **Federal Register** requesting comments concerning the proposed Consent Order. Although the ERA has signed and tentatively accepted the proposed Consent Order, the ERA may, after consideration of the comments it receives, withdraw its acceptance and, if appropriate, attempt to negotiate a modification of the Consent Order or issue the Consent Order as signed.

I. The Consent Order

R. S. Langham resides in Houston, Texas and is engaged in the marketing and reselling of covered products. During the period December 1, 1977 through January 27, 1981 ("the period covered by this Consent Order"), R. S. Langham was an officer, director and employee of Langham Petroleum & Development, Inc. and was subject to the Mandatory Petroleum Price and Allocation Regulations. To resolve certain potential civil liability arising out of the Mandatory Petroleum Allocation and Price Regulations and related regulations, 10 CFR Parts 205, 210, 211 and 212, the ERA and R. S. Langham entered into a Consent Order the significant terms of which are as follows:

ERA has alleged that during the period covered by this Consent Order, in connection with his reselling activities, R. S. Langham priced crude oil in violation of 10 CFR Part 212, Subparts F and L. ERA has made no allegation concerning R. S. Langham's production and first sales of domestic crude oil and those transactions are specifically excluded from the terms of the Consent Order.

With respect to R. S. Langham's reselling activities, the ERA and R. S. Langham disagree concerning R. S. Langham's compliance with the Federal petroleum price and allocation regulations. Notwithstanding the ERA's view as to the proper application of the regulations to R. S. Langham's activities, R. S. Langham maintains that he has correctly construed and applied the regulations. The Consent Order does not constitute an admission of R. S. Langham nor a finding by the ERA of any violation of the Federal petroleum price and allocation regulations. Although the ERA and R. S. Langham each believes that their respective positions are meritorious, both parties desire to resolve these matters without resort to complex, lengthy and expensive compliance actions. In addition to its review of R. S. Langham's reselling activities, the ERA has also reviewed R. S. Langham's expenditures prior to and after the decontrol of crude oil and petroleum products, as well as his current financial data. Based upon that review, the ERA believes that it is in the best interest of the public and the government to conclude these matters now by means of this Consent Order.

II. Refund

Under this Consent Order, R. S. Langham will pay an amount up to $10,000,000 based upon the after-tax income of R. S. Langham and certain related entities. The amount to be paid will be one-third of the amount by which such income exceeds $13.5 M over the five year period following the effective date of the Consent Order. Upon full satisfaction of the terms and conditions of this Consent Order by R. S. Langham, the DOE will release R. S. Langham from any civil claims that the DOE may have arising out of the specified transactions during the period covered by this Consent Order.

III. Submission of Written Comments

Interested persons are invited to submit written comments concerning the terms and conditions of this Consent Order to the address given above. Comments should be identified on the outside of the envelope and on the documents submitted with the designation, "Comments on R. S. Langham Consent Order." The ERA will consider all comments it receives by 4:30 p.m., local time, May 23, 1983. Any information or data considered confidential by the person submitting it must be identified as such in accordance with the procedures in 10 CFR 205.9(f).

Issued in Houston, Texas, on the 19th day of April, 1982.

Sandra K. Webb,

Director, Houston Office, Economic Regulatory Administration.

[FR Doc. 83–10097 Filed 4–21–83; 8:45 am]

BILLING CODE 6450–01–M

DEPARTMENT OF AGENCY

Cabot Fuel Corporation and Tuco, Inc.; Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration hereby gives notice of a Proposed Remedial Order which was issued to Cabot Fuel Corporation and its

subsidiary TUCO, Inc. of Amarillo, Texas.

The Proposed Remedial Order charged TUCO, Inc. with pricing violations in the amount of $3,991,784.12, plus accrued interest, in sales of natural gas liquids and natural gas liquid products during the period of October 1, 1974 through October 31, 1978.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from David H. Jackson, Director, Kansas City Office, Economic Regulatory Administration, 324 East 11th Street, Kansas City, Missouri 64106–2466. Within 15 days of publication of this notice, any aggrieved person may file a Notice of Objections with the Office of Hearings and Appeals, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461, in accordance with 10 CFR 205.193.

Issued in Kansas City, Missouri on the 6th day of April, 1983.

David H. Jackson,

Director, Kansas City Office, Economic Regulatory Administration.

BILLING CODE 6450–01–M

Northeast Petroleum Industries, Inc.; Proposed Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Proposed Consent Order and Opportunity for Comment.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces a proposed Consent Order with Northeast Petroleum Industries, Inc. and provides an opportunity for public comment on the proposed Consent Order.

DATE: Comments by May 23, 1983.

ADDRESS: Send comments to: Robert J. McKee, Jr., Director, Philadelphia Field Office, ERA, 1421 Cherry Street, Philadelphia, Pennsylvania 19102.

FOR FURTHER INFORMATION CONTACT: Robert J. McKee, Jr., Director, Philadelphia Field Office, ERA, 1421 Cherry Street, Philadelphia, Pennsylvania 19102, (215) 597–4550.

Copies of the Consent Order may be obtained free of charge by writing or calling this office.

SUPPLEMENTARY INFORMATION: On April 5, 1983, the ERA executed a proposed Consent Order with Northeast Petroleum Industries, Inc. ("Northeast") of Chelsea, Massachusetts. Under 10 CFR 205.199J(b), a proposed Consent Order which involves the sum of $500,000 or more, excluding interest and penalties, becomes effective no sooner than thirty days after publication of a notice in the **Federal Register** requesting comments concerning the proposed Consent Order. Although the ERA has signed and tentatively accepted the proposed Consent Order, the ERA may, after consideration of the comments it receives, withdraw its acceptance and, if appropriate, attempt to negotiate a modification of the Consent Order or issue the Consent Order as signed.

Northeast, with its home office located in Chelsea, Massachusetts, is a firm engaged in the sale of covered petroleum products, and was subject to the Mandatory Petroleum Price and Allocation Regulations at 10 CFR Parts 210, 211 and 212 during the period January 1, 1973 through January 28, 1981 ("the period covered by this Consent Order"). An audit conducted by the ERA included a review of Northeast's records relating to compliance with the Federal petroleum price and allocation regulations during the period January 1, 1973 through January 28, 1981 (the audit period). In its audit the ERA reviewed Northeast's pricing and allocation policies and procedures and the manner in which Northeast applied the Federal petroleum price and allocation regulations. Northeast has cooperated with this audit. Northeast has made its books and records available to the auditors of the DOE and the auditors have examined and reviewed a substantial volume of such materials. DOE believes that Northeast has maintained procedures reasonably adapted to achieve compliance with the Federal petroleum price and allocation regulations.

The ERA and Northeast disagree in several respects concerning Northeast's compliance with the Federal petroleum price and allocation regulations during the audit period. Notwithstanding the ERA's view as to the proper application of the regulations to Northeast's activities, Northeast maintains that it has correctly construed and applied the regulations. The ERA and Northeast each believes that its respective positions on the legal issues underlying their disagreements are meritorious. However, both parties desire to resolve the issues raised by the audit without resort to complex, lengthy an expensive compliance actions and therefore have entered into this Consent Order. The ERA believes that the Consent Order is in public interest because it provides a satisfactory resolution of disputed issues and an appropriate conclusion of the Northeast audit.

The Consent Order addresses all aspects of Northeast's compliance with the Federal petroleum price and allocation regulations during the audit period and, except for those issues explicitly excluded, resolves all issues concerning Northeast's compliance with the Federal petroleum price and allocation regulations during the audit period. In settlement of all disputes with the ERA concerning sales of covered petroleum products during the audit period, Northeast has agreed to refund an aggregate amount of $2,000,000. Of this $2,000,000, $800,000 is to be paid to eligible end-user No. 6 residual fuel oil customers, and $1,200,000 is to be paid to the U.S. Treasury for deposit as miscellaneous receipts. The Consent Order also provides details concerning records retention and procedures concerning enforcement of the provisions of the Consent Order.

The Consent Order does not constitute an admission by Northeast nor a finding by the ERA of any violation of the Federal petroleum price and allocation regulations. This notice merely summarizes the Consent Order, and neither limits nor modifies it in any way whatsover. The provisions of 10 CFR 205.199J, including those regarding the publication of this Notice, are applicable to the Consent Order.

Upon full satisfaction of the terms and conditions of this Consent Order by Northeast, the DOE releases Northeast from any civil claims that the DOE may have arising out of the Federal petroleum price and allocation regulations.

Submission of written comments: Interested persons are invited to submit written comments concerning the terms and conditions of this Consent Order to the address given above. Comments should be identified on the outside of the envelope and on the documents submitted with the designation "Comments on Northeast Petroleum Industries, Inc. Consent Order." The ERA will consider all comments it receives by 4:30 pm, local time, on May 23, 1983. Any information or data considered confidential by the person submitting it must be identified as such in accordance with the procedures at 10 CFR 205.9(f).

Issued in Philadelphia on the 6th day of April, 1983.

Robert J. McKee, Jr.,

Director, Philadelphia Field Office, ERA.

[FR Doc. 83–10716 Filed 4–21–83; 8:45 am]

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket No. QF83-226-000]

Birch Creek Hydro, Inc.; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

April 18, 1983.

On March 24, 1983, Birch Creek Hydro, Inc., (Applicant) 2210 Wilshire Blvd., No. 789, Santa Monica, California 90403, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The hydroelectric small power production facility will be located near Big Pine, California. The facility will consist of a solar powered pumping system and two hydro powerhouses. The net electric power production capacity of the facility will be 4,928 kilowatts. Applicant owns no other hydroelectric small power production facilities located within one mile of the facility. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-238-000]

Columbia Gas Transmission Corp.; Request Under Blanket Authorization

April 18, 1983.

Take notice that on March 17, 1983, Columbia Gas Transmission Corporation (Columbia), 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314, filed in Docket No. CP83-238-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) to add new points of delivery to existing wholesale customers under the authorization issued in Docket No. CP83-76-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Columbia proposes to construct and operate tap facilities necessary to provide 3 additional points of delivery to Columbia Gas of Kentucky, 5 additional points of delivery to Columbia Gas of Ohio and 7 additional points of delivery to Columbia Gas of West Virginia. Columbia states that the volumes of natural gas to be provided through the new points of delivery are within its currently authorized level of sales. Such volumes would not affect Columbia's peak day and annual deliveries to which its existing wholesale customer is entitled, it is asserted. Columbia also indicates that its wholesale customers are all served under its Rate Schedule CDS.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10767 Filed 4-21-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-259-000]

Columbia Gulf Transmission Co.; Application

April 18, 1983.

Take notice that on March 30, 1983, Columbia Gulf Transmission Company (Applicant), P.O. Box 683, Houston, Texas 77001, filed in Docket No. CP83-259-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon certain facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that the well connected to 2.0 miles of 4-inch pipeline extending from a producer platform in South Marsh Island Block 268, offshore Louisiana, has been abandoned, and these facilities, constructed to transport gas from this well, are no longer needed as used. Applicant, therefore, proposes the abandonment in place of the 2.0 miles of 4-inch pipeline.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 9, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[Docket No. QF83-223-000]

El Dorado County Water Agency, et. al., Park Creek; Application For Commission Certification of Qualifying Status of a Small Power Production Facility

April 18, 1983.

On March 16, 1983, the El Dorado County Water Agency, et. al., (Applicant), P.O. Box 1608, 2890 Mosquito Road, Placerville, California 95667, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The hydroelectric facility will be located on Sly Park Creek in El Dorado County, California. The electric power production capacity of the facility will be 6.9 megawatts. The Applicant does not own any other hydroelectric small power production facilities located within one mile of the facility. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedures. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. QF83-219-000]

El Dorado County Water Agency, et al., Plum Creek; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

April 18, 1983.

On March 16, 1983, the El Dorado County Water Agency, et. al. (Applicant), P.O. Box 1608, 2890 Mosquito Road, Placerville, California 95667, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The hydroelectric facility will be located on Plum Creek, in El Dorado County, California. The electric power production capacity of the facility will be 42.7 megawatts. The Applicant does not own any other hydroelectric small power production facilities located within one mile of the facility. No electric utility, electric utility holding company or any combination thereof has an ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. QF83-224-000]

El Dorado County Water Agency, et al., El Dorado 2; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

April 18, 1983.

On March 16, 1983, the El Dorado County Water Agency, et al. (Applicant), P.O. Box 1608, 2890 Mosquito Road, Placerville, California 95667, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The hydroelectric facility will be located near the existing PG&E El Dorado Powerhouse, in El Dorado County, California. The electric power production capacity of the facility will be 60.8 megawatts. The Applicant does not own any other hydroelectric small power production facilities located within one mile of the facility. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10771 Filed 4-21-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP83-13-003]

El Paso Natural Gas Co.; Compliance Filing

April 18, 1983.

Take notice that on April 4, 1983, El Paso Natural Gas Co. (El Paso), pursuant to Part 154 of the Federal Energy Regulatory Commission's (Commission) regulations under the Natural Gas Act, submitted for filing the following revised tariff sheets to its FERC Gas Tariff, Original Volume No. 1, to be effective April 15, 1983:

Fourth Revised Sheet No. 89
Fourth Revised Sheet No. 90
Third Revised Sheet No. 91
Second Revised Sheet No. 91-A
First Revised Sheet No. 91-B
Second Revised Sheet No. 91-C
Second Revised Sheet No. 91-D
Second Revised Sheet No. 91-E
First Revised Sheet No. 91-F
Second Revised sheet No. 91-G
First Revised Sheet No. 91-H
First Revised Sheet No. 91-I

On October 27, 1982, El Paso tendered to the Commission, pursuant to Part 154 of the Commission's regulations, revised tariff sheets[1] to its FERC Gas Tariff,

[1] Substitute Twenty-fourth Revised Sheet No. 1, Fourth Revised Sheet Nos. 72 and 73, Third Revised

Original Volume No. 1, which, when accepted and made effective by the Commission, would have replaced the two forms of service agreement (Form A and Form B) presently included in El Paso's Original Volume No. 1 Tariff with a single, new form of service agreement, and updated the Table of Contents thereto to reflect replacement of Forms A and B with the new Form. By order issued November 26, 1982, at Docket No. RP83–13–000, the Commission accepted El Paso's filing, consolidated it with El Paso's pending rate proceedings at Docket Nos. RP82–33–000 and RP83–6–000 for purposes of hearing and decision, and suspended it until April 15, 1983, when the new Form will be permitted to become effective subject to alteration or deletion of terms not found to be just and reasonable. Thereafter, by order issued February 18, 1983, at Docket Nos. RP83–13–001 and RP83–13–002, the Commission rescinded that portion of its November 26, 1982 order which allowed El Paso to delete Forms A and B from its Original Volume No. 1 Tariff, and conditioned acceptance of the new Form upon El Paso's retention of Forms A and B until all executed service agreements patterned after those forms have expired.

To comply with the condition set forth in the Commission's February 18, 1983 order, El Paso submitted revised tariff sheets in substitution for those filed on October 27, 1982 in the captioned proceeding. The revised tariff sheets tendered reflect new pagination which will serve to include the new Form in EL Paso's Original Volume No. 1 Tariff while retaining Forms A and B now contained therein.

El Paso requests that the Commission grant any and all waivers which may be necessary to permit the tendered revised tariff sheets to be substituted for those filed on October 27, 1982, in the captioned proceeding and that such tendered tariff sheets be permitted to become effective April 15, 1983 subject to alteration or deletion as provided for in the Commission's order issued November 26, 1982, as amended.

EL Paso states that a copy of the filing was served upon all parties of record in Docket Nos. RP82–33–000, RP83–6–000 and RP83–13–000, and upon all interested pipeline system customers of El Paso and interested state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before April 27, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commissioin and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83–10772 Filed 4–21–83; 8:45 am]

BILLING CODE 6717–01–M

[Docket Nos. CP83–228–000 and CP83–228–001]

Esperanza Transmission Co.; Application

April 18, 1983.

Take notice that on March 7, 1983, Esperanza Transmission Company (Esperanza), P.O. Box 2447, Corpus Christi, Texas 78403, filed in Docket No. CP83–228–000 an application, as supplemented March 30, 1983, in Docket No. CP83–228–001, pursuant to Section 311(a)(2) of the Natural Gas Policy Act of 1978 for authorization to transport up to 50,000 Mcf of natural gas per day for United Gas Pipe Line Company (United) within the State of Texas, for an extended term of two years beginning June 5, 1983, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Esperanza states that natural gas would be transported from various points in the producing field area to points of interconnection with United in Cherokee, Dewitt, Goliad, Jim Wells and Matagorda Counties, Texas, with Houston Pipe Line Company for United's account in Nueces County, Texas, and with Transcontinental Gas Pipe Line Corporation for United's account in Wharton County, Texas. Esperanza further states that it would charge United a rate of 15.0 cents per Mcf for gas transported.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 9, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83–10773 Filed 4–21–83; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP83–239–000]

Florida Gas Transmission Co.; Request Under Blanket Authorization

April 18, 1983.

Take notice that on March 23, 1983, Florida Gas Transmission Company (FGT), P.O. Box 44, Winter Park, Florida 32790, filed in Docket No. CP83–239–000 a request pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) proposing to transport gas in interstate commerce for ultimate consumption in International Minerals and Chemical Corporation's (IMC) new Wales plant locatedin Polk County, Florida, under the authorization issued in Docket No. CP82–553–000 pursuant Section 7 of the Natural Gas Act, all as more fully set forth in its request which is on file with the Commission and open to public inspection.

FGT asserts that the new Wales plant is adjacent to IMC's Kingsford Plant. FGT states that in Docket No. CP66–159 on February 11, 1966 it received authorization to construct and operate approximately four miles of pipeline and to deliver natural gas to IMC, a direct sale customer of FGT. However, FGT states that said order specifically referred to the plant to be served, the Kingsford Plant and the end uses of the gas. Therefore, FGT now requests that it be permitted to deliver gas for use in IMC's New Wales plant.

FGT states that it would not construct any new facilities in order to serve the New Wales plant. Service to the Kingsford and New Wales plants would be made through the existing delivery point and deliveries would remain within IMC's existing FERC established volumetric entitlement, it is asserted.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR

Sheet No. 74, Second Revised Sheet No. 75, Fourth Revised Sheet No. 76, First Revised Sheet No. 77, Third Revised Sheet Nos. 78, 79, and 80, Second Revised Sheet Nos. 81, 82 and 83.

385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10774 Filed 4-21-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA83-2-34-001]

Florida Gas Transmission Co., Compliance Filing

April 18, 1983.

Take notice that on April 4, 1983, Florida Gas Transmission Company (FGT) submitted for filing the following substitute tariff sheets:

Original Volume No. 1

Substitute 30th Revised Sheet No. 3-A
Substitute 7th Revised Sheet No. 3-B

Original Volume No. 2

Substitute 20th Revised Sheet No. 128

On February 28, 1983, FGT filed its PGA filing, to be effective April 1, 1983, pursuant to § 154.38 of the Commission's Regulations under the Natural Gas Act and Section 15 of FGT's FERC Gas Tariff (Purchase Gas Adjustment and Incremental Pricing Provisions). FGT's filing was composed of Thirtieth Revised Sheet No. 3-A and Seventh Revised Sheet No. 3-B to Original Volume No. 1, and Twentieth Revised Sheet No. 128 to Original Volume No. 2. By letter order dated March 31, 1983, the Commission conditionally accepted the tariff sheets subject to FGT refiling within fifteen days of the issuance of the Commission's order reduced rates to be effective April 1, 1983, which reflect the proper supplier rates of Southern Natural Gas Company (SNG). FGT has refiled the substitute tariff sheets to reflect SNG's rates to be effective April 1, 1983.

The effect of the adjustments required by the Commission's letter order is to reduce the average cost of gas purchased for the adjustment period from 293.5081¢/Mcf to 293.1245¢/Mcf, or a decrease of .3836¢/Mcf.

FGT states that the copies of the filing were mailed to all customers served under the Rate Schedules affected by the filing and the interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rule 211 or 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before April 28, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10775 Filed 4-21-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP75-104-032]

High Island Offshore System; Petition to Amend

April 18, 1983.

Take notice that on March 22, 1983, High Island Offshore System (Petitioner), One Woodward Avenue, Detroit, Michigan 48226, filed in Docket No. CP75-104-032 a petition to amend the order issued March 29, 1982, in Docket No. CP75-104, *et al.*, pursuant to Section 7(c) of the Natural Gas Act so as to authorize Petitioner to establish a limitation on the volume of condensate to be transported with the gas tendered to Petitioner for transportation by its shippers at each point of receipt, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner explains that its system was originally designed to accommodate a maximum of 10 barrels of condensate per 1,000 Mcf of gas transported. Despite this, Petitioner states, no limitation on condensate transportation is contained in the transportation agreements with Petitioner's shippers or in Petitioner's FERC Gas Tariff and no such limitation was requested or included in its authorization issued in Docket No. CP75-104, *et al.* In response to operating concerns which arise due to transportation of large volumes of condensate, Petitioner states, it has adopted a new operating policy which would limit condensate transportation in Petitioner's system without Petitioner's prior consent to no more than 10 barrels of condensate per 1,000 Mcf of gas delivered at each point of receipt. To implement the policy change, Petitioner requests that the Commission amend ordering paragraph B of the Order Denying Rehearing and Approving Settlement Agreement issued March 29, 1982, to read as follows:

(B) The settlement agreement filed by HIOS on January 18, 1982, is approved and the service specified therein is authorized upon condition that gas tendered to HIOS, at any authorized Point of Receipt, shall not contain more than 10 barrels of condensate per 1,000 Mcf without the prior consent of HIOS or its Operator.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before May 9, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10776 Filed 4-21-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-255-000]

Houston Pipe Line Co.; Application

April 18, 1983.

Take notice that on March 28, 1983, Houston Pipe Line Company (Applicant), P.O. Box 1188, Houston, Texas 77001, filed in Docket No. CP83-255-000 an application pursuant to Section 311(a)(2) of the Natural Gas Policy Act of 1978 and § 284.127 of the Commission's Regulations for authority to transport certain quantities of natural gas for Texas Eastern Transmission Corporation (Tetco), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it is currently engaged in the transportation of natural gas on behalf of Tetco pursuant to a transportation agreement dated June 14, 1979. It is stated that service under this

agreement commenced June 29, 1979, for an initial term of two years under the self-implementing provisions of § 284.122(a) of the Commission's Regulations and was extended for a period of two years commencing June 29, 1981, pursuant to § 284.125 of the Commission's Regulations. In order that the transportation service might be continued on an uninterrupted basis, Applicant has requested the Commission issue an order authorizing a continuation of the transportation arrangement for a period of two years commencing June 29, 1983, and ending June 28, 1985.

Applicant proposes to transport up to 2,000 Mcf of gas per day for Tetco or such additional daily volumes which Applicant determines that its operating conditions shall reasonably permit. Applicant states that it would transport Tetco's volumes from a point or points located on Applicant's pipeline facilities in Harris, Matagorda, and Colorado Counties, Texas, to a point or points located on Tetco's pipeline facilities in Angelina, Colorado, and Chambers Counties, Texas, and other mutually agreeable point or points. It is stated that pursuant to the original transportation agreement dated June 14, 1979, no rate would be charged by Applicant for the service.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 9, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10777 Filed 4-21-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-234-000]

Lone Star Gathering Co.; Application

April 18, 1983.

Take notice that on March 16, 1983, Lone Star Gathering Company (Applicant), 301 South Harwood Street, Dallas, Texas 75201, filed in Docket No. CP83-234-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing an increase in the daily contract demand from 5,500 Mcf to 10,500 Mcf under an existing transportation agreement dated November 26, 1973 with Natural Gas Pipeline Company of America (Natural), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is asserted that Applicant is authorized to transport gas produced from the Carthage, JGS, and Penn-Griffith Fields in Panola and Rusk Counties, Texas, for Natural. Applicant proposes pursuant to an amendment dated Febraury 17, 1982, to increase the daily contract demand transported from these fields from 5,500 Mcf to 10,500 Mcf. It is asserted that such increase would enhance Natural's ability to exchange gas with Lone Star Gas Company.

Any person desiring to be heard or to make any protest with reference to said applicant should on or before May 9, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if not motion to intervene is filed within the time required herein, if the Commisison on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10778 Filed 4-21-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-257-000]

Michigan Consolidated Gas Co., Application and Petition

April 18, 1983.

Take notice that on March 29, 1983, Michigan Consolidated Gas Company (Mich Con), 500 Griswold Street, Detroit, Michigan 48226, filed in Docket No. CP83-257-000 a petition pursuant to § 385.207 of the Commission's Rules of Practice and Procedure (18 CFR 385.207) for an order declaring that Commission authorization is unnecessary to engage in certain transactions of natural gas or, in the alternative, an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Mich Con to engage in transactions incident to the direct sale of surplus natural gas supplies to Sohio Chemical Company (Sohio), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is indicated that pursuant to an agreement dated March 21, 1983, Mich Con has agreed to sell to Sohio up to 25,000,000 dt equivalent of natural gas per year at a maximum daily delivery rate not to exceed 90,000 dt equivalent, subject to interruption to the extent the gas supplies are required by Mich Con to provide adequate service to its distribution customers. It is stated that the term of the agreement is for an initial period of two years commencing from the date of first deliveries and is automatically extendable for successive two-year periods unless cancelled by either party by notification within 30 days of the end of the current two-year term. The proposed rate to be charged by Mich Con would be the sum of the gas-cost component of the commodity rate of Michigan Wisconsin Pipe Line Company's (Mich Wisc) Rate Schedule MC-1 under which Mich Con purchases gas from Mich Wisc plus five cents. Mich Con states that this rate represents its incremental cost of gas plus Mich Wisc's charge for transportation plus three cents and that this total rate is currently $3.45 per million Btu.

Misc Wisc proposes in Docket No. CP83-253-000 to transport the above sales volumes, by displacement, from its existing point of interconnection with Mich Con at Willow Run Station in

Ypsilanti Township, Washtennaw County, Michigan, to Panhandle Eastern Pipe Line Company (Panhandle) at an existing interconnection located in Defiance County, Ohio, which would in turn deliver thermally equivalent volumes to Columbia Gas Transmission Corporation (Columbia) at an existing delivery point in Paulding County, Ohio, which would then redeliver such volumes to Sohio at its Lima, Ohio, plant. Once a proposed interconnection between Mich Wisc and Columbia is constructed and placed into service, redeliveries would be made by Mich Wisc directly to Columbia, it is explained. Mich Con states it would pay Mich Wisc 2.0 cents per dt delivered to either Columbia or Panhandle.

Mich Con indicates that the gas sold to Sohio is a less expensive source of supply than Sohio's traditional supplier, Columbia Gas of Ohio, Inc. and that the proposed sale would result in annual fuel cost savings which would enable Sohio to regain its competitiveness in the ammonia and urea production market. Mich Con further states that upon authorization of the requested service, Sohio would be able to recall approximately 70 of its 271 employees currently laid off.

Mich Con requests the Commission to issue a declaratory order stating that no Commission authorization is necessary to engage in the proposed transactions since the contemplated sale of gas to Sohio is a direct sale to an end-user and not a sale for resale and is exempt from Commission jurisdiction under Section 1(b) of the Natural Gas Act and the transportation of natural gas in interstate commerce necessary for this sale would be accomplished solely by Mich Wisc, Panhandle, and Columbia, and Mich Con would, therefore, not transport the gas in interstate commerce. Mich Con requests that the declaratory order specifically state that Mich Con requires no Commission authorization to undertake the proposed transactions and that none of Mich Con's facilities are or would be subject to the Commission's jurisdiction by virtue of engaging in these transactions.

Mich Con avers that if the Commission should determine that it is necessary for Mich Con to obtain authorization under Section 7(c) of the Natural Gas Act, it is in the present and future public convenience and necessity for such authorization to be granted for a limited term to terminate with the termination of the underlying sales agreement by either party and be expressly conditioned so as not to effect any change in the non-jurisdictional status of any sales, operations, or facilities of Mich Con other than those which are the subject of such limited authorization. Mich Con submits that the Commission should state in any order granting such authorization that acceptance of the certificate would not impair the continued validity of the exclusion from the Commission's jurisdiction previously granted to Mich Con pursuant to Section 1(c) of the Natural Gas Act except to the extent necessary to enforce the terms and conditions of such certificate. Mich Con further requests that any such order expressly waive any and all accounting and reporting requirements except those expressly applicable to the authorized transaction.

Any person desiring to be heard or to make any protest with reference to said application and petition should on or before 5–9–83, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Mich Con to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-253-000]

Michigan Wisconsin Pipe Line Co.; Application

April 18, 1983.

Take notice that on March 28, 1983, Michigan Wisconsin Pipe Line Company (Applicant), One Woodward Avenue, Detroit, Michigan 48226, filed in Docket No. CP83-253-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing (1) an interruptible transportation service for Michigan Consolidated Gas Company (Mich Con), (2) an emergency exchange service between Applicant and Columbia Gas Transmission Corporation (Columbia), and (3) the construction and operation of an interconnection between the pipeline transmission facilities of Applicant and Columbia which is incident to the above transportation and emergency exchange services, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The applicant indicates that pursuant to an agreement dated March 21, 1983, Mich Con has agreed to sell to Sohio Chemical Company (Sohio) an annual quantity of 25,000,000 dt equivalent of natural gas at a maximum daily delivery rate not exceed 90,000 dt equivalent without the concurrence of Mich Con. The agreement states that this service is subject to interruption to the extent the gas supplies are required by Mich Con to provide adequate service to its own distribution customers. It is stated that the term of this agreement is for an initial period of two years commencing from the date of first deliveries and is automatically extendable for successive two year periods unless cancelled by either party by notification within 30 days of the end of the initial two year term or any two year extension. It is indicated that Sohio's Lima, Ohio, ammonia-products plant has lost its ability to compete with manufacturers of similar products due to the cost of natural gas from its present supplier. It is further stated that even small changes in the cost of natural gas have a direct impact on production costs and the economic well being of this plant since natural gas constitutes approximately 80 percent of the cost of ammonia

production. Sohio indicates that production of ammonia, urea, and carbon dioxide at its Lima plant were shut down on July 21, 1982, and that subsequently 70 of its 271 employees have been laid off and additional layoffs are likely if the facilities cannot be restored to full operations.

Applicant states that it has entered into an agreement with Mich Con dated March 23, 1983, which provides for the transportation of up to 90,000 dt equivalent of natural gas for subsequent redelivery of Sohio provided sufficient pipeline capacity is available to provide such service without detriment or disadvantage to Applicant's existing customers. Applicant states that it would receive the natural gas supplies from Mich Con, by displacement, at an existing point of delivery at Applicant's Willow Run Station in Ypsilanti Township, Washtenaw County, Michigan. Redeliveries of thermally equivalent volumes would be made by Applicant to Panhandle Eastern Pipe Line Company (Panhandle) at an existing delivery point located in Defiance County, Ohio, it is asserted. Panhandle would deliver equivalent volumes to Columbia at an existing delivery point and Columbia would deliver equivalent volumes to the Sohio plant in Lima, Ohio, at an existing delivery point, it is explained. Applicant informs that once the proposed interconnection with Columbia is placed into service redeliveries would be made by Applicant directly to Columbia.

Applicant states that Mich Con has agreed to pay it 2.0 cents per dt equivalent redelivered to either Panhandle or Columbia for Mich Con's account. In addition, Applicant states that Mich Con has agreed to pay a metering charge of 2.0 cents per dt equivalent redelivered by Applicant to Columbia at the new interconnection. This metering charge is proposed to be assessed on an aggregate of 28,364,000 dt equivalent of natural gas since Applicant has determined that this quantity is sufficient fully to reimburse Applicant for its cost of service associated with constructing and operating the new interconnection. Applicant states that the term of the agreement is for an intial period of two years commencing from the date of first deliveries and may be extended beyond such date providing notification is received from Mich Con at least 30 days prior to the end of the initial term.

Applicant proposes to construct and operate an interconnection in Paulding County, Ohio, which would connect Columbia's facilities with the mainline transmission system of Applicant. It is stated that this new interconnection would comprise gas measurement, flow control and pressure regulating facilities, and interconnecting pipeline which collectively are estimated to cost $448,920. The cost of constructing this interconnection would be financed by Applicant with funds presently on hand.

The proposed new interconnection would be utilized to effectuate direct deliveries to Columbia of the gas volumes transported by Applicant for the account of Mich Con and to effectuate the proposed gas exchange service between Columbia and Applicant. Applicant states that the new interconnection would be used by Applicant and Columbia to achieve additional operating flexibility and to assist each company in alleviating emergency situations via the exchange of gas. According to the terms of an agreement dated March 23, 1983, Applicant and Columbia have agreed, upon request, and to meet an emergency, to deliver up to 100,000 Mcf of natural gas per day to the other if the deliveries of such can be made without impairment of the service obligations of the delivering party. The agreement states further that as soon as possible, but within a period of 60 days thereafter, the party which received the emergency gas supplies would be obligated to redeliver thermally equivalent quantities at the new interconnection.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 9, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commisson

[Docket Nos. CP83-245-000 and CP83-245-001]

Montana-Dakota Utilities Co.; Application

April 18, 1983.

Take notice that on March 21, 1983, Montana-Dakota Utilities Co. (Applicant), 400 North Fourth Street, Bismarck, North Dakota 58501, filed in Docket No. CP83-245-000 an application as supplemented in Docket No. CP83-245-001 on March 30, 1983, pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of direct sale taps on certain jurisdictional gas pipelines and related facilities, all as more fully set forth in the application, as supplemented, which is on file with the Commission and open to public inspection.

Applicant proposes to construct and operate taps on the lines identified below for service to the following:

Name of customer	Location of tap	Class of customer
Terry Carson	Pembina County, ND	Residential.
Richard Brusseau	Pembina County, ND	Residential.
Dennis Bachard	Pembina County, ND	Residential.
Oscar Marcelin	Pembina County, ND	Residential.
Ron Falk	Pembina County, ND	Residential.
Leonard Rollstads	Pembina County, ND	Residential.
Bob Grube	Pembina County, ND	Residential.
Allan Svor	Pembina County, ND	Residential.
Orlo Mostad	Pembina County, ND	Residential.
Bob Hildenbrant	Pembina County, ND	Residential.
Tim Mattson	Burleigh County, ND	Residential.
Jens Traeholt	Burleigh County, ND	Residential.
Dane Fuchs	Morton County, ND	Residential.
Jim Thompson	Morton County, ND	Residential.
Roger Nesham	Ward County, ND	Residential.
Shaun Roll	Stark County, ND	Residential.
Gary Farstveat	Golden Valley, ND	Commercial.
John Rabenberg	Roosevelt County, MT	Residential.

Name of customer	Location of tap	Class of customer
America Colloid Co..	Phillips County, MT	Industrial.
Jim Anderson	Valley County, MT	Residential.
Westley Smith	Richland County, MT	Residential.
Agri-Systems	Big Horn County, MT	Commercial.
Ray Whitten	Carbon County, MT	Commercial.
Big Horn Calcium	Carbon County, MT	Industrial.
Reeves Concrete	Johnson County, WY	Commercial.
Jusher, Inc.	Johnson County, WY	Commercial.
Wayne Linstad	Lawrence County, SD	Residential.
P&S Seed	Phillips County, MT	Commercial.

It is stated that the gas supply for these customers would be from general system supply with impact on Applicant's supply being negligible.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 9, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP82-13-004]

National Fuel Gas Supply Corp.; Proposed Changes in FERC Gas Tariff

April 18, 1983.

Take notice that on April 11, 1983, National Fuel Gas Supply Corporation (National Fuel) tendered for filing proposed changes in its FERC Gas Tariff, Original Volume Nos. 1 and 2. The proposed changes would reduce National Fuel's rates to the level contained in an amended settlement currently pending before the Commission in Docket No. RP82-13-000, for gas deliveries commencing March 1, 1983.

National Fuel states that the proposed tariff sheets are tendered only on the specific condition precedent that the amended settlement will be approved by the Commission without modification. If the amended settlement is not so approved, National Fuel states that these tariff sheets shall be deemed withdrawn and of no force and effect, *ab initio.*

National Fuel states that copies of this filing were served upon the company's jurisdictional customers and the regulatory commissions of the States of New York, Ohio, Pennsylvania, Delaware and New Jersey.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rule 211 or 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before April 28, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10786 Filed 4-21-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-261-000]

Panhandle Eastern Pipe Line Co.; Request Under Blanket Authorization

April 18, 1983.

Take notice that on March 31, 1983, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP83-261-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) to add two new delivery points under the authorization issued in Docket No. CP83-261-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Panhandle states that it would construct and operate two new delivery points to serve Indiana Gas Company (Indiana), an existing customer of Panhandle, in Hamilton County, Indiana (the Geist Reservoir delivery point), and Madison County, Indiana (the Reformatory delivery point), pursuant to a gas sales contract dated February 10, 1983. It is indicated that this contract replaces a contract dated June 1, 1981, and authorized by the Commission in Docket No. CP81-451. Panhandle states that sales to Indiana are made under its Rate Schedule G-1 which does not prohibit the addition of new delivery points.

It is asserted that maximum daily deliveries would be 2,500 Mcf at the Geist Reservoir delivery point and 1,000 Mcf at the Reformatory delivery point. It is further asserted that maximum daily deliveries at the Anderson No. 2 delivery point, which were set at 57,500 Mcf in the June 1, 1981, contract, would be reduced to 54,000 Mcf to allow for the maximum daily delivery of 3,500 Mcf at the two new delivery points. Therefore, Panhandle states that this proposal would not increase Indiana's contract demand and would be without detriment to Panhandle's other customers.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10787 Filed 4-21-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-141-003]

Trunkline Gas Co.; Petition to Amend

April 18, 1983.

Take notice that on March 31, 1983, Trunkline Gas Company (Petitioner), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP82-141-003 a petition to amend the order issued August 6, 1982, in Docket No. CP82-141-000 pursuant to Section 7(c) of the Natural Gas Act so as to authorize the addition of Panhandle Eastern Pipe Line Company (Panhandle) as a party to the transportation and exchange agreement dated December 29, 1981, between Petitioner, Columbia Gas Transmission Corporation (Columbia Gas) and Columbia Gulf Transmission Company (Columbia Gulf), all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner states that by order issued August 6, 1982, Petitioner, Columbia Gas, and Columbia Gulf were authorized to exchange up to 20,000 Mcf of natural gas per day between points in offshore Louisiana. Petitioner further states that pursuant to the transportation and exchange agreement between the parties Columbia Gas delivers volumes of natural gas to Petitioner at Eugene Island Block 392, offshore Louisiana, and Trunkline delivers natural gas to Columbia Gas at Columbia Gulf's facilities in West Cameron Block 624, offshore Louisiana. Petitioner further states that Petitioner and Columbia Gas would receive exchange gas from offshore Louisiana and transport such volumes of natural gas to an existing interconnection between the facilities of Petitioner and Columbia Gulf located near Centerville, St. Mary Parish, Louisiana.

Petitioner proposes herein pursuant to an amendment No. 1, dated May 4, 1982, to the transportation and exchange agreement to make Panhandle a party to the exchange so as to allow Panhandle to deliver volumes of natural gas to Columbia Gulf in West Cameron Block 624 for the account of Petitioner as part of Petitioner's exchange volumes of 20,000 Mcf per day. Petitioner states that except for the addition of Panhandle as a party to the exchange, all other terms and conditions of the transportation and exchange agreement would remain in full force and effect.

It is asserted that the proposed implementation of amendment No. 1 to the transportation and exchange agreement would benefit Petitioner, Columbia Gas, Columbia Gulf, and Panhandle. It is explained that the proposal would enable all parties to utilize their pipeline systems in the most efficient manner possible.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before May 9, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 of 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10768 Filed 4-21-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP81-166-001]

U-T Offshore System; Amendment

April 18, 1983.

Take notice that on March 30, 1983, U-T Offshore System (Applicant), 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP81-166-001 an amendment to its pending application in Docket No. CP81-166-000 pursuant to Section 7(c) of the Natural Gas Act so as to reflect a total transportation service for its shippers of up to 1,606,097 Mcf of gas per day in lieu of 1,654,490 Mcf per day, all as more fully set forth in the amendment which is on file and open to public inspection.

Applicant states that its pending application in Docket No. CP81-166-000 requests authorization to construct, install, and operate 13,800 horsepower of compression at the Johnson's Bayou plant in Louisiana as well as to render firm transportation service of up to 1,654,490 Mcf of gas per day. Applicant further states that it is now proposing a reduction in proposed firm transportation service designed to conform to the reduced transportation requests contained in an amendment to High Island Offshore System's (HIOS) pending application in Docket No. CP80-408-001. It is explained that the proposed new level of firm transportation service also reflects the addition of 14,197 Mcf per day which is to be delivered to Applicant at West Cameron Block 116 for the account of three shippers.

Despite the reduction in proposed firm transportation authority, Applicant asserts it would be necessary to install the same facilities proposed in its pending application in Docket No. CP81-166-000. Applicant notes that the estimated cost of the facilities proposed in the application has risen from $21,500,000 to $22,914,000.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before May 9 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10769 Filed 4-21-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-342-000 and Docket No. ER83-343-000]

Vermont Electric Power Co., Inc. and Vermont Yankee Nuclear Power Co.; Order Accepting for Filing and Suspending Proposed Contract Amendments, Noting Interventions, Granting Waiver, Denying Summary Judgment, Consolidating Dockets, and Establishing Procedures

Issued: April 15, 1983.

On February 23, 1983, Vermont Yankee Nuclear Power Corporation (Vermont Yankee) submitted for filing a proposal to amend Section 7 of its Power Contract [1] with the ten owner-sponsors of the 540 MW Vermont Yankee nuclear generating facility.[2] Vermont Yankee seeks to begin collecting the estimated cost of ultimately decommissioning this facility. The revenue increase resulting from this

[1] *See* Attachment A for rate schedule designations.

[2] The Power Contract contains a formula rate through which the sponsors are assessed monthly charges associated with operation of the Vermont Yankee plant in proportion to their respective entitlements in the plant capability.

proposed amendment would be about $8.3 million (7.8%) on an annualized basis for 1983. Vermont Yankee requests an effective date of April 24, 1983, sixty days after filing. The company, however, has stated that it will defer collection of these revenues until September 1, 1983, in order to allow the utilities purchasing the output from the facility to provide for the pass-through of these charges to their customers. Vermont Yankee also seeks waiver of section 35.13 of the Commission's filing regulations, asserting that the instant filing does not amend the design of the existing cost of service formula rate and that submission of all the required data would prove costly while adding no relevant information.

Vermont Yankee has sponsored a study estimating that it will cost $72,770,000 (in 1981 dollars) to dismantle the facility. Based on an assumed 7 percent inflation rate, the company calculates that it will require $422,613,000 to decommission the facility as planned in the year 2007. In addition, based on the assumption that these revenues may be subject to State and Federal taxes, Vermont Yankee also seeks to recover the amounts asociated with such potential tax liability.

Vermont Yankee, however, indicates that it is seeking a ruling from the Internal Revenue Service (IRS) that amounts collected to finance the decommissioning are not subject to taxation.[3] Vermont Yankee, therefore, proposes to place the amounts that it will collect in an interim escrow account prior to obtaining a ruling from the IRS. In the event that a favorable ruling is obtained, Vermont Yankee states that it will refund, with interest, all amounts previously collected and attributable to the taxes. In any event, after a ruling has been obtained, the appropriate funds will be transferred to a trust.[4]

Also on February 23, 1983, Vermont Electric Power Company (VELCO) submitted for filing an amendment to its Three-Party Power Agreement with Central Vermont Public Service Company (Central Vermont) and Green Mountain Power Corporation (Green Mountain). Under that agreement, Central Vermont and Green Mountain, two of the owner-sponsors, assign to VELCO their entitlements to Vermont Yankee capacity and energy, and VELCO, in turn, makes such capacity and energy available to other Vermont utilities. The proposed amendment would permit VELCO to pass on the these utilities the decommissioning costs to be charged by Vermont Yankee.[5] VELCO requests that its submittal become effective coincident with that of Vermont Yankee.

Notices of the Vermont Yankee and VELCO filings were published in the **Federal Register** with comments due on or before March 23, 1983. On March 23, 1983, the Vermont Yankee Department of Public Service (Department) filed notices of intervention in both dockets. The Department states its opposition to the Vermont Yankee and VELCO filings on the basis that the filing utilities have yet to demonstrate that the proposed decommissioning plan (1) will result in the lowest possible cost to ratepayers, and (2) will adequately assign responsibility in the event that the decommissioning fund proves insufficient. The Department notes, in particular, that the tax issues relating to the decommissioning revenues remain unresolved. In addition, the Department has suggested alternative approaches such as the establishment of separate trusts by the individual sponsors, or State collection of decommissioning costs through an excise tax mechanism.

A joint notice of intervention in the Vermont Yankee docket was timely filed by the Connecticut Public Utilities Control Authority, the Massachusetts Department of Public Utilities, the New Hampshire Public Utilities Commission, the Maine Public Utilities Commission, the Rhode Island Division of Public Utilities and Carriers, and the Vermont Department of Public Service. This pleading raised no specific issues. Separate notices of intervention were also timely filed in Docket No. ER83–343–000 by the Maine Public Utilities Commission, and the Attorney General of the State of Rhode Island. The Attorney General states that Vermont Yankee's proposed revenues have not been shown to be reasonable and he requests that the submittal be suspended for five months.

A joint motion to intervene was also timely filed in Docket NO. ER83–343–000 by Central Vermont and Green Mountain. The Vermont Electric Generation and Transmission Cooperative likewise filed a motion to intervene. The cooperative is a stockholder of Vermont Yankee and has a life-of-the-unit entitlement in the facility.

Another motion to intervene in the Vermont Yankee docket was timely filed by 22 Massachusetts Cities [6] who have purchased from certain of the ten owner-sponsors power entitlements totaling 4.6 percent of the capacity and energy of Vermont Yankee. The Cities also filed a supplement to their motion to intervene on March 25, 1983.

The Cities request that the Commission issue a deficiency letter seeking clarification of the mechanics of Vermont Yankee's decommissioning proposal. The Cities also ask that the Commission summarily reduce the proposed revenues by one-half on the grounds that such revenues are excessive and unsupported, and also represent uncertain Federal income tax liability associated with the revenues to finance the decommissioning. Alternatively, the Cities propose that they, instead of Vermont Yankee, be allowed to hold in trust the dollars associated with this potential tax liability. Further, the Cities propose that they be allowed to hold all decommissioning payments in their own trust to minimize total payments in light of their status as tax-exempt entities. According to the Cities, the amounts purportedly required for decommissioning are substantially overstated in a number of specific respects. In addition, the Cities object that the proposed amendment does not specifically state that any refunds will be passed on from the ten sponsors to the nonsponsor utilities.

On April 7, 1983, Vermont Yankee filed an answer to the Cities' protest of March 23, 1983. Vermont Yankee does not object to the Cities' motion to intervene but does oppose their requests for summary reduction of the proposed revenues, for permission to hold funds in their own separate trusts, and for the issuance of a deficiency letter.

Discussion

We shall grant Vermont Yankee's request for waiver of § 35.13 of the Commission's regulations pertaining to the submission of full cost of service data. Vermont Yankee's proposal concerns a single cost item under a formula rate—decommissioning expense—and it has provided a study sufficient in detail to permit a

[3] According to Vermont Yankee, under current Federal tax policy, it will not be able to deduct the costs of decommissioning from taxable income during the life of the facility. Rather, the costs of decommissioning may be expensed and deducted for tax purposes only as they are incurred. However, no benefits will arise from the tax deduction because, at that time, Vermont Yankee will have no revenues or taxable income to be offset by the decommissioning costs.

[4] Vermont Yankee's submittal also includes a proposed interim escrow agreement and trust indenture.

[5] Vermont Yankee and VELCO both request that their filings be consolidated for purposes of hearing and decision.

[6] Holyoke, Taunton, Chicopee, Shrewsbury, Braintree, Peabody Westfield, Danvers, Wakefield, Hingham, Marblehead, Middle-bourough, North Attleboro, Hudson, Ipswich, West Boylston, Hull, Middleton, Georgetown, Paxton, Sterling, and Boylston.

preliminary examination of the proposal. Given this determination, we shall deny the Cities' request that a deficiency letter be issued. The Cities will have the opportunity to address the need for further clarification of Vermont Yankee's proposal during the course of an evidentiary hearing.

We shall also deny the Cities' request to summarily reduce the revenues which Vermont Yankee proposes to collect. The issues of income tax liability, Vermont Yankee's support for its position, the stated amounts required for decommissioning, and alternative strategies for developing an appropriate funding mechanism all present questions of law and fact most appropriately resolved based on a hearing record.

Our preliminary review of the submittals by Vermont Yankee and VELCO indicates that the proposed amendments have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential or otherwise unlawful. Accordingly, we shall accept the submittals for filing and suspend them as ordered below.

In *West Texas Utilities Co.*, Docket No. ER82-23-000, 18 FERC ¶61,189 (1982), we explained that where our preliminary examination indicates that proposed rates may be unjust and unreasonable and may produce substantially excessive revenues, as defined in *West Texas*, we would generally impose a maximum suspension. Review of Vermont Yankee's decommissioning proposal suggests that the proposed charges may produce substantially excessive revenues. Accordingly, we shall suspend the proposed rates for five months from sixty days after filing to become effective on September 24, 1983, subject to refund. Similarly, VELCO's proposal, which provides for the pass-through of the Vermont Yankee decommissioning changes and a coincident effective date, will also be suspended to become effective on September 24, 1983, subject to refund. We shall consolidate the filings made by Vermont Yankee and VELCO as requested, unasuch as common questions of law and fact are clearly presented.

Finally, we note that under Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the timely notices of intervention and motions to intervene serve to make the previously listed persons parties to this consolidated proceeding.

The Commission Orders.

(A) Vermont Yankee's request for waiver of section 35.13 of the Commission's regulations is hereby granted.

(B) The Cities' motions for issuance of a deficiency letter or for summary reduction of the revenues proposed by Vermont Yankee are hereby denied.

(C) The amendments proposed by Vermont Yankee and VELCO are hereby accepted for filing and suspended for five months, to become effective on September 24, 1983, subject to refund.

(D) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particulary sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and reasonableness of Vermont Yankee's and VELCO's decommissioning proposals.

(E) Docket Nos. ER83-342-000 and ER83-343-000 are hereby consolidated for purposes of hearing and decision.

(F) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after the date of this order, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(G) The Secretary shall promptly publish this order in the **Federal Register**.

By the Commission.

Kenneth F. Plumb,

Secretary.

Attachment A—Vermont Electric Power Company, Inc., Vermont Yankee Nuclear Power Corporation, Docket Nos. ER83-342-000 and ER83-343-000

Rate Schedule Designations

Designation and Description

Docket No. ER83-342-000: Vermont Electric Power Company, Inc.
Supplement No. 13 to Rate Schedule FPC No. 154—An undated Agreement to Amend the Three-Party Power Agreement
Docket No. ER83-343-000: Vermont Yankee Nuclear Power Corporation
Supplement No. 1 to Rate Schedule FPC No. 1—Amendment No. 2 to Vermont Yankee Power Contract
Supplement No. 2 to Rate Schedule FPC No. 1—Vermont Yankee Decommissioning Fund—Dollar Cost Impact of Customers and life of Unit Secondary Purchases

[OPTS-59121; TSH-FRL 2337-2]

Certain Chemicals; Premanufacture Exemption Applications

Correction

In FR Doc. 83-8477 beginning on page 14036, in the issue of Friday, April 1, 1983 make the following correction:

On page 14037, column one, line eighteen, "TME 83–6" should read "TME 83–36."

BILLING CODE 1505–10–M

[OPTS–51463; BH–FRE 2351–6]

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of interim policy published in the **Federal Register** of May 15, 1979 (44 FR 28558) and November 7, 1980 (45 FR 74378). This notice announces receipt of fifteen PMNs and provides a summary of each.

DATES: Close of Review Period:

PMN 83–627—July 6, 1983.

PMN 83–628, 83–629, 83–630 and 83–631—July 9, 1983.

PMN 83–632, 83–633 and 83–634—July 10, 1983.

PMN 83–635 and 83–636—July 11, 1983.

PMN 83–637, 83–638, 83–639, 83–640 and 83–641—July 12, 1983.

Written comments by:

PMN 83–627—June 6, 1983.

PMN 83–628, 83–629, 83–630 and 83–631—June 9, 1983.

PMN 83–632, 83–633 and 83–634—June 10, 1983.

PMN 83–635 and 83–636—June 11, 1983.

PMN 83–637, 83–638, 83–639, 83–640 and 83–641—June 12, 1983.

ADDRESS: Written comments, identified by the document control number "[OPTS–51463]" and the specific PMN number should be sent to: Document Control Officer (TS–793), Office of Toxic Substances, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E–409, 401 M St., SW., Washington, DC 20460, (202–382–3532).

FOR FURTHER INFORMATION CONTACT: Theodore Jones, Acting Chief, Notice Review Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E–216, 401 M St., SW., Washington DC 20460, (202–382–3729).

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the PMNs received by EPA. The complete non-confidential document is available in the Public Reading Room E–107.

PMN 83–627

Importer. Allied Corporation.

Chemical. (G) Substituted diyne urethane.

Use/Import. (G) Specialty ink for labeling. Import range: Confidential.

Toxicity Data. Acute oral: > 5 g/kg; Irritation: Skin—Non-irritant, Eye—Non-irritant; Ames Test: Non-mutagenic; Skin sensitization: None.

Exposure. Confidential.

Environmental Release/Disposal. Confidential. Disposal by landfill.

PMN 83–628

Manufacturer. Confidential.

Chemical. (S) Reaction product of diglycidyl ether of bisphenol A, dimer acid, soya fatty acid and dimethylol propionic acid.

Use/Production. (S) Site-limited and industrail resin for manufacturing automotive paint. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Processing, use and disposal: dermal and inhalation, a total of 32 workers, up to 7 hrs/da, up to 250 da/yr.

Environmental Release/Disposal. More than 10,000 kg/yr released to land. Disposal by landfill.

PMN 83–629

Manufacturer. Confidential.

Chemical. (S) Reaction product of 2-butanone oxime and polymethylene polyphenylene isocyanate.

Use/Production. (S) Site-limited and industrial resin for manufacturing automotive paint. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Processing, use and disposal: dermal and inhalation, a total of 32 workers, up to 7 hrs/da, up to 250 da/yr.

Environmental Release/Disposal. More than 10,000 kg/yr released to land. Disposal by landfill.

PMN 83–630

Manufacturer. Confidential.

Chemical. (G) Reaction product of an aromatic diglycidyl ether, an amine and a cyclic ester.

Use/Production. (S) Site-limited and industrial resin for manufacturing automotive paint. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Processing, use and disposal: dermal and inhalation, a total of 32 workers, up to 7 hrs/da, up to 250 da/yr.

Environmental Release/Disposal. More than 10,000 kg/yr released to land. Disposal by landfill.

PMN 83–631

Manufacturer. Confidential.

Chemical. (G) Polymer of formaldehyde and substituted phenols.

Use/Production. Confidential. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Confidential.

Environmental Release/Disposal. Confidential.

PMN 83–632

Manufacturer. Confidential.

Chemical. (S) 7-[4-chloro-6-[3-[2-(hydroxy sulfonyloxy) ethylsulfonyl]-N-ethylanilino]-1,3,5-triazine-2-ylamino]-4-hydroxy-3-(4-methoxy-2-sulfophenylazo)-2-naphthalenesulfonic acid, trisodium salt.

Use/Import. (S) Industrial dyestuff. Import range: 500–10,000 kg/yr.

Toxicity Data. Acute oral: >5,000 mg/kg; Irritation: Skin—Very slight, Eye—Mild to negative.

Exposure. No data submitted.

Environmental Release/Disposal. No data submitted.

PMN 83–633

Manufacturer. Confidential.

Chemical. (S) 4-amino-5-hydroxy-3-[3-[2-(hydroxysulfonyloxy)ethylsulfonyl] phenylazo]-6-(1,5-disulfo-2-naphthylazo)-2,7-napthalenedisulfonic acid, pentasodium salt.

Use/Import. (S) Industrial dyestuff. Import range: Confidential.

Toxicity Data. Acute oral. >5,000 mg/kg; Irritation: Skin—Negative, Eye—Moderate to negative.

Exposure. No data submitted.

Environmental Release/Disposal. No data submitted.

PMN 83–634

Importer. Confidential.

Chemical. (G) Substituted mono azo aromatic.

Use/Import. (S) Colorant for industrial coatings on metal. Import range: Confidential.

Toxicity Data. Acute oral: >5,000 mg/kg; Irritation: Skin—Non—irritant, Eye—Non-irritant; Ames Test: Non-mutagenic.

Exposure. Processing: dermal and inhalation, a total of 1 worker, up to 2 hrs/max.

Environmental Release/Disposal. Less than 10 kg/yr released to air.

PMN 83-635

Manufacturer. Confidential.

Chemical. (G) Isocyanate functional polyester urethane prepolymer.

Use/Production. (S) Curative for two part urethane adhesive system. Prod. range: 10,000–40,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture: dermal and inhalation, a total of 2 workers/batch, up to 7 hrs/batch, up to 12 batches/yr.

Environmental Release/Disposal. No release. Disposal by Resource Conservation Recovery Act (RCRA)—licensed waste hauler.

PMN 83-636

Manufacturer. Confidential.

Chemical. (G) Modified polyester polyurethane.

Use/Production. (G) Open use. Prod. range: 0–12,900 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture, processing and use: dermal, inhalation and ocular, a total of 39 workers, up to 8 hrs/da, up to 260 da/yr.

Environmental Release/Disposal. Less than 10 kg/yr released to air and water with 10–100 kg/yr to land. Disposal by incineration and landfill.

PMN 83-637

Manufacturer. Confidential.

Chemical. (G) Polyether alkenyl alkanyl esters.

Use/Production.(G) contained use. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture, processing, use and disposal: dermal, a total of 18 workers, up to 2 hrs/da, up to 250 da/yr.

Environmental Release/Disposal. More than 10,000 kg/yr released to water with 100–1,000 kg/yr to land. Disposal by biological treatment system and landfill.

PMN 83-638

Manufacturer. Confidential.

Chemical. (G) Polyether alkenyl alkanyl esters.

Use/Production. (G) Contained use. Prod. range: Confidential.

Toxicity data. No data submitted.

Exposure. Manufacture, processing, use and disposal: dermal, a total of 18 workers, up to 2 hrs/da, up to 250 da/yr.

Environmental Release/Disposal. 1,000–10,000 kg/yr released to water with 1,000–10,000 kg/yr to land. Disposal by biological treatment system and landfill.

PMN 83-639

Manufacturer. Confidential.

Chemical. (G) Trisubstituted benzoxazolium salt.

Use/Production. (G) Low volume site-limited intermediate. Prod. range: 2–35 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture and use: dermal and inhalation, minimal.

Environmental Release/Disposal. No release. Disposal by biological treatment system and incineration.

PMN 83-640

Manufacturer. Confidential.

Chemical. (G) Disubstituted benzenamine.

Use/Production. (G) Low volume site-limited intermediate. Prod. range: 1–15 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture and use: dermal and inhalation minimal.

Environmental Release/Disposal. No release. Disposal by biological treatment system and incineration.

PMN 83-641

Manufacturer. Confidential.

Chemical. (G) Trisubstituted benzothiazolium salt.

Use/Production. (G) Incorporated as a minor constituent in an article for commercial and consumer use. Prod. range: 1–30 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture and use: dermal and inhalation minimal.

Environmental Release/Disposal. No release. Disposal by biological treatment system and incineration.

Dated: April 15, 1983.

Linda A. Travers,

Acting Director, Management Support Division.

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

April 18, 1983.

Background

When executive departments and independent agencies propose public use forms, reporting, or recordkeeping requirements, the Office of Management and Budget (OMB) reviews and acts on those requirements under the Paperwork Reduction Act [44 U.S.C Chapter 35]. Departments and agencies use a number of techniques to consult with the public on significant reporting requirements before seeking OMB approval. OMB in carrying out its responsibilities under the act also considers comments on the forms and recordkeeping requirements that will affect the public. Reporting or recordkeeping requirements that appear to raise no significant issues are approved promptly. OMB's usual practice is not to take any action on proposed reporting requirements until at least ten working days after notice in the **Federal Register**, but occasionally the public interest requires more rapid action.

List of Forms Under Review

Immediately following the submission of a request by the Federal Reserve for OMB approval of a reporting or recordkeeping requirement, a description of the report is published in the **Federal Register**. This information contains the name and telephone number of the Federal Reserve Board clearance officer (from whom a copy of the form and supporting documents is available). The entries are grouped by type of submission—i.e., new forms, revisions, extensions (burden change), extensions (no change), and reinstatements.

Copies of the proposed forms and supporting documents may be obtained from the Federal Reserve Board clearance officer whose name, address, and telephone number appear below. The agency clearance officer will send you a copy of the proposed form, the request for clearance (SF 83), supporting statement, instructions, transmittal letters, and other documents that are submitted to OMB for review.

For further information contact:

Federal Reserve Board Clearance Officer—Cynthia Glassman—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202–452–3829)

OMB Reviewer—Richard Sheppard—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, D.C. 20503 (202–395–6880)

Request for Approval of New Reports

1. Report title: Annual Report of Total Deposits and Total Reservable Liabilities; Quarterly Report of Selected Deposits, Vault Cash, and Reservable Liabilities

Agency form number: FR 2910a, FR 2910q

Frequency: Annual, quarterly

Reporters: Depository institutions

SIC Code: 602, 603, 605, 612, 614

Small businesses are affected.

General description of report: respondent's obligation to reply is mandatory [12 U.S.C. 248(a) and 461]; a pledge of confidentiality is promised [5 U.S.C. 552 (b)(4) and (b)(8)].

These reports collect information from those depository institutions (other than Edge Act and Agreement Corporations, U.S. Branches and Agencies of foreign banks, and certain member and former member commercial banks) that are exempt from reserve requirements under the Garn-St Germain Depository Institutions Act of 1982. The reports will provide the minimum amount of information needed for ensuring compliance with reserve requirements and for adequately constructing, analyzing, and controlling the monetary aggregates.

Request for Approval for Revision to Existing Report

1. Report title: Report of Transaction Accounts, Other Deposits and Vault Cash

Agency form number: FR 2900

Frequency: Daily, weekly, quarterly

Reporters: Depository institutions

SIC Code: 602, 603, 605, 612, 614

Small businesses are affected.

General description of report: respondent's obligation to reply is mandatory [12 U.S.C. 248, 461, 3105]; a pledge of confidentiality is promised [5 U.S.C. 552 (b)(4) and (b)(8)].

Package of reports collects information on deposit data for depository institutions that have transaction accounts, or nonpersonal time deposits (FR 2900), Eurocurrency depoists from depository institutions that obtain funds from foreign (non-U.S.) sources or that maintain foreign branches (FR 2950, 2951); and selected items on the FR 2900 in advance from large commercial banks and a sample of small commercial banks (FR 2000, 2001) to ensure compliance and for construction of the monetary aggregates.

Board of Governors of the Federal Reserve System, April 18, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-10718 Filed 4-21-83; 8:45 am]

BILLING CODE 6210-01-M

Independence Bancorp, Inc.; Merger of Bank Holding Companies

Independence Bancorp, Inc., Perkasie, Pennsylvania, has applied for the Board's approval under section 3(a)(5) of the Bank Holding Company Act (12 U.S.C. 1842(a)(5)) to merge with Cheltenham Corporation, Cheltenham, Pennsylvania, a one-bank holding company with respect to Cheltenham Bank, Cheltenham, Pennsylvania. The factors that are considered in acting on

the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of Philadelphia. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than May 14, 1983. Any comment on anapplication that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, April 18, 1983.

James McAfee,

Associate Secretary of the Board.

Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of Cleveland** (Lee S. Adams, Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *Trans Kentucky Bancorp,* Pikeville, Kentucky; to become a bank holding company by acquiring 100 percent of the voting shares of The Citizens Bank of Pikeville, Pikeville, Kentucky. Comments on this application must be received not later than May 12, 1983.

B. **Federal Reserve Bank of Altanta** (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *Colony Bancorp, Inc.*, Fitzgerald, Georgia; to become a bank holding company by acquiring 100 percent of the voting shares of The Bank of Fitzgerald, Fitzgerald, Georgia. Comments on this application must be received not later than May 13, 1983.

C. **Federal Reserve Bank of St. Louis** (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *First Bank Capital Corporation,* Tupelo, Mississippi; to become a bank holding company by acquiring 100 percent of the voting shares of the succesor by merger to First Citizens National Bank, Tupelo, Mississippi. Comments on this application must be received not later than May 13, 1983.

D. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Jena Holding Company,* New Orleans, Louisiana; to become a bank holding company by acquiring 88.6 percent of the voting shares of LaSalle

Bancshares, Inc., Jena, Louisiana, and thereby indirectly acquire LaSalle Bank, Jena, Louisiana. Comments on this application must be received not later than May 13, 1983.

2. *Uvalde Bancshares, Inc.*, Uvalde, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of The Uvalde Bank, Uvalde, Texas. Comments on this application must be received not later than May 13, 1983.

Board of Governors of the Federal Reserve System, April 18, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Line of Business Program; Extension of Comment Period

AGENCY: Federal Trade Commission.

ACTION: Notification of extension of time to May 9, 1983 for receiving comments on the staff analysis of the benefits and costs of the Federal Trade Commission.

SUMMARY: The Commission will consider in the near future whether to resume Line of Business date collection for years subsequent to 1977. The Commission requested comments on the stff analysis by a **Federal Register** announcement of March 10, 1983 (48 FR 10130). A 45-day comment period was established. By this current announcement, the Commission extends the April 25, 1983 deadline for the expiration of the comment period to May 9, 1983. Comments should be submitted in writing to the Secretary of the Commission; twenty copies should be supplied.

ADDRESS: Office of the Secretary, Federal Trade Commission, 6th Street and Pennsylvania Avenue, N.W., Washington, D.,C. 20580.

SUPPLEMENTARY INFORMATION: The staff analysis released for public comment consists of a set of six documents totalling over 1,000 pages containing analysis and recommendations concerning the resumption of line of business data collection. Certain parties requested the Commission for a brief extension of the comment period, stating the length of the documents and difficulties incurred in receiving copies quickly made it difficult to review the material and adequately prepare their comments within the 45-day period allotted by the Commission. Accordingly, the Commission extends the comment period an additional 14 days. By this notice, the Comment period will now expire May 9, 1983.

Copies of the documents may be obtained by writing the Distribution Branch, Office of Public Records, Federal Trade Commission, 6th and Pennsylvania Avenue, N.W., Washington, D.C. 20580, or by calling (202) 523-3598.

FOR FURTHER INFORMATION: Contact FTC/ESL, David F. Lean Washington, D.C. 20580; (202) 634-7332.

Dated:

By direction of the Commission

Michael A. Baggage,

Acting Secretary.

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 83F-0096]

American Cyanamid Co.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that American Cyanamid Co. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of acetone-formaldehyde condensate as a component of adhesives intended for use in contact with food.

FOR FURTHER INFORMATION CONTACT: Marvin D. Mack, Bureau of Foods (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, D.C. 20204, 202-472-5740.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 3B3698) has been filed by American Cyanamid Co., One Cyanamid Plaza, Wayne, NJ 07470, proposing that § 175.105 *Adhesives* (21 CFR 175.105) be amended to provide for the safe use of acetone-formaldehyde condensate as a component of adhesives for use in contact with food.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c) (proposed December 11, 1979; 44 FR 71742).

Dated: April 19, 1983.

E.M. Industries, Inc.; Filing of Color Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that E.M. Industries, Inc., has filed a color additive petition proposing that the color additive regulations be amended to provide for the safe use of a chlorophyll-copper complex for imparting visible color in polymethylmethacrylate bone cement used in conjunction with orthopedic surgical procedures.

FOR FURTHER INFORMATION CONTACT: Carl Larson, National Center for Devices and Radiological Health (HFK-410), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-472-7940.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 706(b)(1), 74 Stat. 399-402 as amended (21 U.S.C. 376(b)(1))), notice is given that a petition, CAP 3C0175, has been filed by E.M. Industries, Inc., New York, NY 10532, proposing that the color additive regulations be amended to provide for the safe use of a chlorophyll-copper complex for imparting visible color in polymethylmethacrylate bone cement used in conjunction with orthopedic surgical procedures.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c) (proposed December 11, 1979; 44 FR 71742).

Dated: April 19, 1983.

Sanford A. Miller,

Director, Bureau of Foods.

BILLING CODE 4160-01-M

[Docket No. 83F-0087]

Ironsides Co.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Ironsides Co. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of the following four additives as minor components of surface lubricants used in the manufacture of metallic articles that contact food: benzotriazole; polyoxyethylated (5 moles) tallow amine; sodium petroleum sulfonate, MW 440–450 (CAS Reg. No. 68608–24–4) derived from naphthenic oil having a Saybolt viscosity range of 500–600 SUS at 100° F; and *alpha*-alkyl-*omega*-hydroxypoly(oxyethylene) produced by the condensation of 1 mole of C_{12}-C_{15} straight chain primary alcohols with an average of 3 moles of ethylene oxide.

FOR FURTHER INFORMATION CONTACT: Garnett R. Higginbotham, Bureau of Foods (HFF–334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 2B3600 has been filed by Ironsides Co., Columbus, OH 43216, proposing that § 178.3910 (21 CFR 178.3910) of the food additive regulations be amended to provide for the safe use of the following four additives as minor components of surface lubricants used in the manufacture of metallic articles that contact food: benzotriazole; polyoxyethylated (5 moles) tallow amine; sodium petroleum sulfonate, MW 440–450 (CAS Reg. No. 68608–24–4) derived from naphthenic oil having a Saybolt viscosity range of 500–600 SUS at 100° F; and *alpha*-alkyl-*omega*-hydroxypoly(oxyethylene) produced by the condensation of 1 mole of C_{12}-C_{15} straight chain primary alcohols with an average of 3 moles of ethylene oxide.

The agency has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday.

Dated: April 15, 1983.

Sanford A. Miller,

Director, Bureau of Foods.

Consumer Participation; Open Meetings

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the following consumer exchange meetings.

Buffalo District Office, chaired by Lois M. Meyer, Consumer Affairs Officer. The topics to be discussed are: Change in Nutrition Label Format, Updates on Sodium Labeling and Education Programs, Quackery and Economic Deceptions, COPE, Tamper-Resistant Packaging, and Aspartame—Low Calorie Sweetener.

DATE: Thursday, April 28, 1983, 10:00 a.m.

ADDRESS: First Floor Conference Room, Clinton County Government Center, 137 Margaret St., Plattsburh, NY 12901.

FOR FURTHER INFORMATION CONTACT: Lois M. Meyer, Consumer Affairs Officer, Food and Drug Administration, 599 Delaware Ave., Buffalo, NY 14202, 716–846–4483.

Buffalo District Office, chaired by Robert L. Hart, Supervisory CSO, Albany Resident Post, and Lois M. Meyer, CAO, Buffalo District. The topics to be discussed are: Change in Nutrition Label Format, Updates on Sodium Labeling and Education Programs, Quackery and Economic Deceptions, COPE, Tamper-Resistant Packaging, Use of Sulfites, Regulation of Health Foods, Cambridge Diet, MSG, and Guidelines of In-Store Nutrition Programs.

DATE: Friday, April 29, 1983, 10:00 a.m.

ADDRESS: Room 38 (lower level), Leo W. O'Brien Federal Building, Clinton and N. Pearl St., Albany, NY 12207.

FOR FURTHER INFORMATION CONTACT: Lois M. Meyer, Consumer Affairs Officer, Food and Drug Administration, 599 Delaware Ave., Buffalo, NY 14202, 716–846–4483.

New York District Office, chaired by George J. Gerstenberg, District Director. The topics to be discussed are: Proposal to Change Nutrition Label Format, Tamper-Resistant Packaging, and Update on Patient Medication Instruction Program (PMI).

DATE: Friday, April 29, 1983, 1:30 p.m. to 3:30 p.m.

ADDRESS: The Bedford Health Center, 485 Throop Ave., Brooklyn, NY 11221.

FOR FURTHER INFORMATION CONTACT: Marta Buhay, Consumer Affairs Officer, Food and Drug Administration, 850 Third Ave., Brooklyn, NY 11232, 212–965–5043.

SUPPLEMENTARY INFORMATION: The purpose of these meetings is to encourage dialogue between consumers and FDA officials, to identify and set priorities for current and future health concerns, to enhance relationships between local consumer and FDA's District Offices, and to contribute to the agency's policymaking decisions on vital issues.

Dated: April 15, 1983.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FDA-225-83-0001]

Memorandum of Understanding With the University of Arkansas at Pine Bluff

AGENCY: Food and Drug Administration

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has executed a memorandum of understanding with the University of Arkansas at Pine Bluff (UAPB). The purpose of the understanding is to provide the mechanism for a collaborative program between UAPB and FDA's National Center for Toxicological Research (NCTR) to promote advanced study in the biomedical sciences and to further NCTR's research and training goals.

EFFECTIVE DATE: The agreement became effective March 23, 1983.

FOR FURTHER INFORMATION CONTACT: Walter J. Kustka, Intergovernmental and Industry Affairs Staff (HFC-50), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857; 301-443-1583.

SUPPLEMENTARY INFORMATION: In accordance with § 20.108(c) (21 CFR 20.108(c)) stating that all agreements and memoranda of understanding between FDA and others shall be published in the **Federal Register**, the agency is publishing the following memorandum of understanding:

Memorandum of Understanding Between the University of Arkansas at Pine Bluff and the Food and Drug Administration National Center for Toxicological Research

I. Purpose

This agreement will provide the mechanism for a collaborative program between the University of Arkansas at Pine Bluff (UAPB) and the Food and Drug Administration's National Center for Toxicological Research (NCTR).

II. Background

The University of Arkansas at Pine Bluff is a component of the University of Arkansas system with approximately 3,000 students. One of the major objectives of the University is to produce a pool of students who are well prepared and highly motivated to pursue advanced study in the biomedical sciences.

The National Center for Toxicological Research is a Federal Laboratory specializing in biomedical research. A part of NCTR's goal is to assist in training highly qualified toxicologists. The collaborative program with UAPB provides an opportunity to accomplish this while furthering NCTR's research goals.

III. Substance of Agreement

Through this agreement, NCTR will provide facilities, equipment, materials, and limited supervision for outstanding science students who will serve as guest workers at the Center performing collaborative research with NCTR scientists. In addition, NCTR will provide guest worker positions or appointments to do collaborative research for qualified faculty members of UAPB, if spaces are available during summers or periods of sabbatical leave.

NCTR and UAPB will establish a joint guest lecture and seminar program for the benefit of all members of both institutions to promote exchange of information on the latest developments at both institutions. To further accomplish this objective, members of the staffs of NCTR and UAPB will be granted access to the library facilities of both institutions.

IV. Name and Address of Participating Parties

A. University of Arkansas at Pine Bluff, 1100 University Drive, Pine Bluff, AR 71601.

B. Food and Drug Administration, National Center for Toxicological Research, Jefferson, AR 72079.

V. Liaison Officers

A. For University of Arkansas at Pine Bluff: Chancellor, University of Arkansas at Pine Bluff, (currently Dr. Lloyd V. Hackley); 501-541-4517.

B. For National Center for Toxicological Research: Director, National Center for Toxicological Research, (currently Dr. Ronald W. Hart); 501-541-4517.

IV. Period of Agreement

This agreement becomes effective upon acceptance by both parties and will continue indefinitely. It may be modified by mutual consent or terminated by either party upon a 60-day advance written notice to the other.

Dated; March 23, 1983.

Approved and accepted for the University of Arkansas at Pine Bluff,

Lloyd V. Hackley,

Chancellor.

Dated: March 11, 1983.

Approved and accepted for the Food and Drug Administration.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

Effective date. This memorandum of understanding became effective March 23, 1983.

Dated: April 14, 1983.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 83-10412 Filed 4-21-83; 8:45 am]

BILLING CODE 4160-01-M

Health Resources and Services Administration

Availability of Funds for Community Health Center (CHCs) and Migrant Health Centers (MHCs)

AGENCY: Public Health Service, HHS.

ACTION: Notice.

SUMMARY: The Health Resources and Services Administration (HRSA) announces that applications for supplemental awards are now being accepted from CHCs and MHCs which received fiscal year (FY) 1982 and 1983 operational grant awards under sections 330 and 329 of the Public Health Service (PHS) Act (42 U.S.C. 254c, 254b), respectively. This notice contains information of interest to prospective applicants for such funding.

DATE: To receive consideration as being on time, mailed applications must be postmarked on or before June 1, 1983. Hand delivered applications must be received by COB June 1, 1983.

FOR FURTHER INFORMATION CONTACT: Information may be obtained from, and applications should be mailed to, the appropriate Regional Health Administrator (see Appendix).

SUPPLEMENTARY INFORMATION: On March 24, 1983, the Congress enacted the "Emergency Expenditures to Meet National Needs Act of 1983" (Pub. L. 98–8) which appropriates an additional $65 million for CHCs and MHCs to expand the availability of essential health care services for the disadvantaged and unemployed. In appropriating these funds, the Congress directed that priority is to be given to applications for supplemental grants from centers based on the extent of unemployment in the area in which a center is located and on whether its service area includes a significant number of unserved or underserved people. Because it is anticipated that large numbers of currently funded CHCs and MHCs in high priority areas are in need of and will apply for supplemental grants to expand their services under this notice, the Department is not inviting applications from new centers for these funds at this time. However, the Department notes that a separate notice of availability of funds published on March 16, 1983 (48 FR 11169), does invite new and existing CHCs to apply for approximately $14 million in funds available under the present Continuing Resolution (Pub. L. 97–377).

Of the $65 million, $5 million is available specifically for the provision of home health services through CHCs and MHCs. The balance of $60 million is to be used by CHCs and MHCs to expand the availability of essential health services for the disadvantaged and unemployed. This may be accomplished through the expansion of existing capacities, establishment of satellite clinics, or the provision of services through contracts with other health care providers. Services should be limited to those identified as "primary health services" in sections 329(a)(6) and 330(b)(1) of the PHS Act. Each center may apply up to 20% of any supplemental funds it receives for essential health services, for the purchase (at rates not exceeding those prevailing under the applicable State plan approved under title XIX of the Social Security Act) of inpatient hospital services for delivery and post partum care to pregnant women and infants who have no other source of payment for their care.

Centers currently funded under section 329 or 330 may apply by letter to the appropriate regional office for a supplemental award. The letter should describe the supplemental services proposed to be provided and a justification for such services. Such justification should include data on the unemployment rate in the center's proposed catchment area; a description, including a budget, of how the center plans to serve additional patients; an estimate of the number of new people to be served; a statement describing how funds for inpatient care will be utilized; and, if asking for funds for home health services, the number of home health aides to be hired. In describing how any funds for inpatient care for infants and pregnant women will be utilized, centers should be aware that Pub. L. 98–8 provides $105 million to States for maternal and child health services. Centers are encouraged to document in their applications any coordination arrangements or attempts to coordinate their services for children and pregnant women with State and local maternal and child health programs. Coordination efforts should include contact with State and local maternal and child health program directors.

If a center proposes to provide home health services, the center may request funds to train and employ individuals, including paraprofessionals such as homemaker/home health aides, to provide home health services in the center's service area. If the center is a Medicare certified home health agency, the center may directly train and employ individuals. If the center is not a Medicare certified hoem health agency, the center may enter into a contractual agreement with a Medicare certified home health agency to train and employ individuals.

The Department will approve those requests for funding which best promote the purposes of the legislation. The Congress directed that priority be given to applications for supplemental grants in areas of high unemployment and in areas where there are significant numbers of unserved or underserved individuals. In addition, the Congress directed that the demonstrated administrative, financial and general management capability of applicants be evaluated in awarding these funds. The Department will be taking into consideration a center's performance on the program indicators for MHCs and CHCs as published on March 13, 1979 (44 FR 14640).

While emphasis will be given to the factors described above, all applications will be evaluated in accordance with criteria set forth in the regulations (42 CFR 51c.305 for CHCs and 42 CFR 56.305 for MHCs).

Section 51c.104(b)(5) of the CHC regulations and § 56.104(b)(6) of the MHC regulations require applicants to include letters and other forms of evidence showing efforts to secure financial and professional assistance and support for the project and to secure continuing community involvement. Proposed applicants are advised to seek such evidence of support, from, among others, local officials and medical societies. Evidence that such support was sought will be considered in determining which applicants will be awarded grants under this announcement.

(CHC and MHC programs are listed as No. 13.224 and 13.246 in the OMB *Catalog of Federal Domestic Assistance*, respectively)

Dated: April 17, 1983.

Robert Graham,

Administrator, Assistant Surgeon General.

SUPPLEMENTARY INFORMATION: Section 2003 of the Social Security Act, as amended, authorizes $2.45 billion for allocation to the States for Social Services Block Grants—Fiscal Year 1983. The allocation of this amount was promulgated in Vol. 47, No. 190, page 43189 of the **Federal Register** on September 30, 1982.

Public Law 98–8 appropriates funds for a variety of programs and projects "to provide for neglected needs of the Nation which results in productive jobs and humanitarian assistance to the indigent and homeless * * *." Under this statute an additional $225 million has been appropriated for the Social Services Block Grant (SSBG) program for the fifty States, the District of Columbia and Puerto Rico.

The statute provides that for the SSBG program, the funds are to be used "to expand the availability of day care and other social services available to unemployed and disadvantaged Americans, which also shall include expanded Food and Nutrition Education (Nutrition Aids) * * *." The conference report suggests that States and local communities should give a high priority to day care services.

The statute also provides that no grant from this additional amount will be awarded to a State unless the State offers assurances satisfactory to the Secretary that it will use these funds in addition to rather than in lieu of existing Federal or State funds currently available for these purposes. The assurance need only be a factual statement to this effect.

States should send assurances required by Pub. L. 98–8 directly to the addressee below with a copy of the appropriate Regional Office: Department of Health and Human Services, Office of Human Development Services, 330 Independence Avenue, SW, Room 1296, Washington, DC 20201, Attention: Ms. Bettye J. Mobley.

No grants shall be issued until such assurances are received.

There are no requirements for States to report separately on these supplemental funds. Each State must decide whether it needs to amend its pre-expenditure report to cover expenditure of these supplemental funds. Specifically, if a State determines that its intended use of the supplemental funds is consistent with the use and distribution of funds in its current report, no amendment should be prepared. In general, a State need not amend its FY 1983 pre-expenditure report unless substantial changes are made in its activities.

There are no specific time limits in Pub. L. 98–8 which govern the obligations of funds. The statute and the supporting report, however, make it clear that these funds are to be obligated as rapidly as possible so as to quickly assist the unemployed and the needy as well as minimize future year budgetary outlays.

There are no audit requirements for these supplemental funds in Pub. L. 98–8. Therefore, the funds are subject to the normal audit provisions of the block grant statute.

In general, the transfer provisions of the block grant statute apply to the supplemental funds. Nothing in Pub. L. 98–8 prohibits transfer of these funds. However, language of the bill and the committee reports indicate congressional intent that these funds be used for certain purposes as indicated above. States may transfer funds as under current law provided that the transferred funds meet the special

requirements of Pub. L. 98–8, e.g., to maximize immediate creation of jobs.

Public Law 98–8 provides that the additional $225 million appropriated be allocated as follows:

1. One-third, $75.0 million, on the basis of the relative number of unemployed individuals who reside in each State as compared to the total number of unemployed individuals in all of the States;

2. One-sixth, $37.5 million, among "long-term unemployment States" on the basis of the number of unemployed individuals who reside in each such State as compared to the total number of unemployed individuals in all such States;

3. One-half, $112.5 million, as provided in Section 2003 of the Social Security Act, as amended.

For the purpose of allocating this additional appropriation, Pub. L. 98–8 provides that the number of unemployed individuals who reside in each State shall be determined by the Bureau of Labor Statistics of the department of Labor for the month of January 1983 and makes the following definitions:

1. "State" means each of the several States, the District of Columbia, and the Commonwealth of Puerto Rico;

2. "Long-term unemployment State" means any State in which the average unadjusted unemployment rate from June 1982 through November 1982 was 9.4 percent or higher.

Subsection 2003(a) of the Social Security Act, as amended, provides that each territory will receive as its anual allotment the same proportion of the total funds available for the year as it was allotted for Fiscal Year 1981. Public Law 98–8 includes only Puerto Rico among the territories. Therefore, additional funds have not been allotted to Virgin Islands, Guam and Northern Mariana Islands.

Subsection 2003(b) provides that the balance of the total funds available be allotted among the several States and the District of Columbia on the basis of their relative populations according to the most recent data available from the Department of Commerce. The Title XX allotments for Fiscal Year 1983, promulgated September 30, 1982, were based upon the Bureau of census 1980 Decennial Census.

The allotments promulgated by this issuance are based upon the Bureau of Census 1980 Decennial Census and Unemployment Statistics determined by the Bureau of Labor Statistics of the Department of Labor for the month of January 1983.

Effective date: October 1, 1982.

FISCAL YEAR 1983 ADDITIONAL FEDERAL ALLOTMENTS TO STATES FOR TITLE XX—SOCIAL SERVICES BLOCK GRANTS—PUBLIC LAW 98–8

	⅓ Based upon unemployed individuals in all States	¼ Based upon unemployed individuals in long-term unemployment States	⅓ Based upon provisions of Section 2003 of the Social Security Act	Total

Office of the Secretary

Agency Forms Submitted to the Office Of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on April 15.

Public Health Service

National Institutes of Health

Subject: Evaluation of the Impact of the Coronary Primary Prevention Trial and Multiple Risk Factor Intervention Trail (0925–0180)—Extension/no change
Respondents: Physicians
OMB Desk Officer: Fay S. Iudicello

Office of the Assistant Secretary for Health

Subject: National Health Interview Survey (1983 Questionnaire) (0937–0021)—Revision
Respondents: Individuals and households
Subject: Evaluation of the Data Provided for the National Vital Statistics Program—Preliminary plan
Respondents: State vital registration and statistics executives, State health officers, users of vital statistics data
Subject: Pretest of the 1984 Nursing Home Survey—New
Respondents: Nursing homes, their residents, registered nursing staff, and family members of the residents
OMB Desk Officer: Fay S. Iudicello

Centers for Disease Control

Subject: Request for Health Hazard Evaluations (0920–0102)—Extension/no change
Respondents: Employees, employers or employee representatives in general industry and mining
OMB Desk Officer: Fay S. Iudicello

Health Resources and Services Administration

Subject: Analysis of the Current Level of Resources Used in Geriatric Dental Education—New
Respondents: Dental schools
OMB Desk Officer: Fay S. Iudicello

Office of the Secretary

Subject: 1983 Survey of Consumer Finances/Pension Provider Follow-up—New
Respondents: Pension providers of household respondents in the 1988 Survey of Consumer Finances
OMB Desk Officer: Milo Sunderhauf

Copies of the above information collection clearance packages can be obtained by calling the HHS Reports Clearance Officer on 202–245–6511.

Written comments and recommendations for the proposed information collections should be sent directly to both the HHS Reports Clearance Officer and the appropriate OMB Desk Officer designated above at the following addresses:
Joseph F. Costa, Acting HHS Reports Clearance Officer, Hubert H. Humphrey Building, Room 524–F, Washington, D.C. 20201
OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, D.C. 20503, Attn: (name of OMB Desk Officer)

Dated: April 15, 1983.

Dale W. Sopper,

Assistant Secretary for Management and Budget.

BILLING CODE 4150–04–M

Assistant Secretary for Health; Delegation of Authority

Notice is hereby given that on March 31, 1983 the Secretary of Health and Human Services delegated to the Assistant Secretary for Health, with authority to redelegate, the authority vested in the Secretary under Section 1876 of the Social Security Act (42 U.S.C. 1395mm), as amended, to determine whether an entity is an "eligible organization" within the meaning of section 1876(b).

The May 1, 1978, delegation of authority to the Assistant Secretary for Health under the former section 1876(b)(2)(A) of the Social Security Act was superseded.

Dated: April 14, 1983.

Dale W. Sopper,

Assistant Secretary for Management and Budget/OS.

BILLING CODE 4150–04–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. N–83–1228]

Section 202 Loans for Housing for Elderly or Handicapped; Announcement of Fund Availability Fiscal Year 1983

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice of fund availability.

SUMMARY: HUD is announcing the availability of Fiscal Year 1983 loan authority under the Section 202 Housing for the Elderly or Handicapped Direct Loan Program. The loan authority will be used to provide direct Federal loans for a maximum term of 40 years under Section 202 of the Housing Act of 1959, as amended, to assist private, nonprofit corporations and consumer cooperatives in the development of housing and related facilities to serve the elderly or handicapped.

EFFECTIVE DATE: April 22, 1983.

FOR FURTHER INFORMATION CONTACT: The HUD Field Office for your jurisdiction.

SUPPLEMENTARY INFORMATION: Notice is hereby given pursuant to Title 24, Code of Federal Regulations, Part 885, as amended, that the Department of Housing and Urban Development will be accepting Applications for Fund Reservations from eligible Borrowers (see § 885.5 for the definition of "Borrower" and other terms used herein) for the provision of direct loans for the construction or substantial rehabilitation of Housing and Related Facilities (as defined) for dwelling use by Elderly or Handicapped Families (as defined) under the provisions of Section 202 of the Housing Act of 1959, as amended. Applications may also be accepted for loans for the acquisition with or without moderate rehabilitation of housing and related facilities for use as group homes for the nonelderly handicapped.

The Assistant Secretary for Housing is assigning Section 202 loan fund authority for Fiscal Year 1983 to the HUD Field Offices based on a determination that the fair share distribution pursuant to the formula specified in Section 213(d) of the Housing and Community Development Act of 1974, as amended, is the most equitable means of distributing these funds, even though Section 213(d) is not

applicable to funds available for obligation during Fiscal Year 1983.

While the precise number of units to be funded depends upon actual approvable applications received, the following distribution plan shows the approximate numbers of units and loan authority available for new applications in each Field Office jurisdiction identified below for Fiscal Year 1983.

FISCAL YEAR 1983 SECTION 202 DISTRIBUTION PLAN BY HUD FIELD OFFICE JURISDICTION

	Estimated number of units	Estimated loan authority *
Boston Regional Office:		
Boston AO	294	$15,807,000
Manchester SO (Maine, New Hampshire, Vermont)	127	5,037,000
Providence SO	58	2,402,000
Hartford AO	144	6,561,000
Total	624	29,607,000
New York Regional Office:		
Buffalo AO (Albany)	253	$9,901,000
Caribbean AO	156	6,506,000
Newark AO (Camden)	347	17,342,000
New York AO	619	35,770,000
Total	1387	69,518,000

Total	1969	77,112,000
Dallas Regional Office:		
Dallas AO (Albuquerque, Fort Worth, Lubbock)	343	$11,902,000
Little Rock AO	183	5,224,000
New Orleans AO (Shreveport)	173	7,381,000
Oklahoma City AO (Tulsa)	146	5,308,000
Houston SO	176	5,266,000
San Antonio AO	165	5,330,000
Total	1186	40,411,000
Kansas City Regional Office:		
Kansas City AO (Topeka)	229	$7,457,000
Omaha AO	76	2,513,000
Des Moines SO	148	4,734,000
St. Louis AO	139	5,715,000
Total	592	20,419,000
Denver Regional Office:		
Denver (Helena, MT, Fargo, ND, Sioux Falls, SD, Salt Lake City, UT, Casper, WY)	255	$9,277,000
Total	255	9,277,000
San Francisco Regional Office:		
Honolulu AO (Guam)	30	$1,369,000
Los Angeles AO (San Diego, Santa Ana)	485	26,880,000
Phoenix SO	121	4,769,000
San Francisco AO (Fresno, Reno, Las Vegas)	264	13,667,000
Sacramento SO	92	3,354,000
Total	992	49,829,000
Seattle Regional Office:		
Anchorage AO	11	$500,000
Portland AO	124	4,368,300
Seattle AO (Spokane)	136	5,455,700
Total	271	10,324,000

* The estimated loan authority is subject to further breakdown into "metropolitan" and "nonmetropolitan" areas.

The distribution plan set forth above is provided as a guide for prospective Borrowers. It indicates the estimated loan authority that can be expected to be made available for applications for units in each HUD Field Office jurisdiction. However, these unit and loan estimates are subject to change upon Regional and/or Field Office determinations. Such changes may be necessary in order to assure that there is enough loan authority in each Field Office to support housing projects of feasible size. Each HUD Field Office receiving Fiscal Year 1983 loan authority will prepare and publish a single Invitation for Applications for Section 202 Fund Reservation (Invitation) for its jurisdiction which indicates the amount of such authority and the maximum number of units this amount is expected to assist. Further, and in order to provide an equitable geographic distribution of the limited Section 202 units throughout a Field Office jurisdiction, Field Offices may establish a maximum number of units that may be requested under any one application. This unit limitation will vary for each Field Office depending on the number of units available for either the metropolitan or nonmetropolitan category of funds. The maximum unit limitation will be sufficient to support a housing project of a feasible size.

Priority Categories for Selection

Prospective Borroweres interested in applying should be aware of the policies and procedures governing priority categories for selection. The purpose of the priority system for the Section 202 program is to assure that applications from localities which are relatitively underfunded receive priority consideration and are treated in an equitable manner. In view of the limited funds for projects in Fiscal Year 1983 and in order to assure open competition, Field Offices will no longer suballocate funds within the Field Office jurisdiction. However, the Assistant Secretary for Housing has determined that the Section 213(d) requirement for 20–25 percent of funds to be used in "nonmetropolitan" areas is the most practial way to meet rural housing needs, even though Section 213(d) is not applicable to funds available for obligation during fiscal 1983. Field Office Invitations will identify the total number of units available for metropolitan and/or nonmetropolitan areas of its jurisdiction. Therefore, all applications received in metropolitan areas would compete against each other and all applications received in nonmetropolitan areas also would compete against each other. The Department intends, however, to exercise greater flexibility during fiscal 1983 in transferring unused funds from one field office to another at the time of end-of-year selection determinations—without regard to the state redistribution requirements under Section 213. In those instances where a Field Office jurisdiction covers more than one state, separate metropolitan and/or nonmetropolitan allocation areas may be established to the extent practicable for each state's part of the jurisdiction. In view of this revised procedure, there will be no nondesignated allocation areas in Fiscal Year 1983.

Accordingly, approvable applications wil be ranked in order of the following priority categories:

Category A: Applications for projects for the elderly and nonelderly handicapped from localitites whose funding needs *have* previously been underfunded relative to the funding needs of other localities.

Category B: Applications for projects for the elderly and nonelderly handicapped from localities whose funding needs *have not* previously been underfunded relative to the funding needs of other localities.

As mentioned above, interested Section 202 Borrowers will be notified of the total number of units available to metropolitan and nonmetropolitan areas by an Invitation prepared and advertised by the HUD Field Offices.

Schedule for Section 202 Invitations, Workshops and Application Deadline

All applications for Section 202 Fund Reservations submitted by eligible Borrowers must be filed with the appropriate HUD Field Office and must contain all exhibits and additional information as required by § 885.210 of the Regulations. In accordance with the

Paperwork Reduction Act of 1980 (Pub. L. 96–511), the information collection requirements that are included in the Section 202 application requirements referred to in this Notice have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 2502–0267.

HUD Field Offices will publish one Invitation in newspapers of general circulation and in minority newspapers where available serving the Field Office jurisdiction. Field Offices will accept applications anytime after publication of the Invitation, but no application will be accepted after the regular closing time of the appropriate Field Office on Thursday, June 23, 1983, unless said final date for submission of applications is extended by the Assistant Secretary for Housing by publication of an extension notice in the **Federal Register**. Applications which are mailed may be accepted provided they bear a postmark date and time which is no later than the regular closing time of the Field Office on June 23, 1983.

Borrowers interested in applying for a Fund Reservation under section 202 are encouraged to provide the appropriate Field Office with the name, address and telephone number of the Sponsor and/or Borrower organization(s), to advise the Field Office whether they wish to attend the workshop described in the following paragraph, and to secure the program handbook and Application Package. Minority organizations are encouraged to participate in this program as Sponsors and/or Borrowers.

Workshops will be conduced by Field Offices during the months of April and May 1983 to explain the Regulations and instructions governing the Section 202 and Section 106(b) Seed Money loan programs, to distribute Application Packages, and to discuss the application procedures, including the Department's modest design and cost containment requirements and required exhibits. It is highly recommended that prospective Borrowers interested in submitting applications attend the local Field Office workshop. Appropriate Field Office personnel will be in attendance to explain the required exhibits their respective disciplines will be reviewing. In addition, the local Field Office will be better able to address local concerns such as local market conditions, building codes, zoning and housing costs for their particular jurisdiction. More detailed information covering the time and place of the particular workshops will be indicated in the Field Office Invitation. Arrangements will be made by the Field Office, if necessary, to assure that any interested handicapped persons are able to attend and participate in the workshop. Such persons should contact the Field Office, so that appropriate arrangements can be made.

Additional Information

Pursuant to § 885.205(a)(4) of the Regulations, this is to serve further notice that:

(1) In keeping with the Department's efforts to contain costs, the Section 202 Application for a Section 202 Fund Reservation has been expanded to include additional submission, design and cost containment requirements to be used in evaluating Fiscal Year 1983 Section 202 Applications, These requirements are set forth in HUD Notice H 83–9, Revised Submission Requirements, Standard Ranking Criteria and Selection Procedures for the Fiscal Year 1983 Section 202 Program-Application for Fund Reservation, dated March 18, 1983 and will be included in the Section 202 Application Package available at the local HUD Field Office the Section 202 workshops to be conducted by HUD Field Offices will include discussions of these and other additional application requirements. Since modest design and cost containment objectives are a significant factor in the ranking process, applicants are encouraged to attend the HUD workshops.

(2) Notice is hereby given that applications submitted this fiscal year will be developed in accordance with the Section 202 Regulatory amendment to Implement Cost Savings Procedures, published in the **Federal Register** on March 18, 1983. The Department anticipates that the Section 202 Regulatory Amendment will become effective on May 2, 1983, well before any funding reservations are distributed among successful borrowers. Accordingly, Borrowers selected for Section 202 Fund Reservation in Fiscal Year 1983 will be required to develop the project in accordance with the revised Section 202 cost limits and the Borrower will be required to competitively bid the construction contract except in certain specified instances.

(3) Religious bodies may serve as Sponsors of Section 202 projects, but the Borrower corporation must be a separate legal entity in order to comply with Constitutional requirements for separation of Church and State. No religious purpose may be included in the Articles of Incorporation or By-laws, etc., of the Borrower corporation. (The mere recital in a Borrower's Articles of Incorporation that it is organized exclusively for religious, charitable, scientific, literary or educational purposes within the meaning of section 501(c)(3) of the Internal Revenue Code will not by itself make a Borrower ineligible.)

(4) Beginning this fiscal year, Section 202 Borrowers will not be permitted to engage, except for natural persons, in any other business or activity, including the operation of any other rental project, or incur any liability or obligation not in connection with the proposed project. The intent of this new requirement is that no obligee exists other than HUD that has claim to the assets of the Borrower corporation under the Regulatory Agreement. Accordingly, prospective applicants are now required to establish a single purpose Borrower corporation which is capitalized by a Sponsor in a sufficient amount to permit the Borrower's acceptability from a financial standpoint.

Sponsors who have previously established separate Borrower corporations for the sole purpose of applying for a Section 202 Fund Reservation and who were not previously selected would not have to establish a new corporation. Our outstanding requirement with regard to evidence of IRS tax exemption under Section 501(c) (3) or (4) is not altered by this new requirement. Borrower corporations must still evidence incorporation and tax exemption or filing for tax exemption under outstanding guidelines prior to the deadline for application receipt.

(5) The Sponsor must have a current exemption ruling from the Internal Revenue Service, and where the Sponsor and Borrower are not the same, the Borrower corporation must have applied for an exemption ruling from the Internal Revenue Service and show evidence of same by the time it submits its application to HUD (i.e., by the deadline date of June 23, 1983).

(6) Applications may be submitted only by eligible Borrowers. The Borrower must be an eligible corporation as defined in Section 885.5 of the Section 202 Regulations and must have been legally incorporated consistent with the requirement of Item (4) above at the time its Application is filed with the appropriate HUD Field Office.

(7) Projects designed exclusively for the chronically mentally ill are eligible under the same conditions and criteria as other projects designed solely for the nonelderly handicapped, except that only group homes for up to 15 persons and independent living complexes to

serve up to 20 persons may be proposed for the chronically mentally ill.

Applicants applying for housing for the chronically mentally ill will be required to complete a Service Program Description, describing how their proposed projects will be linked to supportive services needed to maintain chronically mentally ill persons in the community. As funds for such services cannot be recognized in HUD's loan processing, evidence of funding sources for such services must be provided with assurances that such funds will be secured by the time the project is ready for occupancy.

To assist HUD in its evaluation of the applicant's capabilities with regard to supportive services for the residents of group homes or independent living complexes, a representative from the State Mental Health Authority (SMHA) will be invited by HUD to evaluate and make recommendations concerning the responses to the Service Program Description. To this end, prospective applicants will be required to submit a copy of the Application to the SMHA. The HUD Field Office will advise prospective applicants of further details in this regard. As the review and evaluation is at the option of the State Mental Health Authority, for those States that do not wish to participate in the evaluation, HUD will conduct its own independent review and a copy of the Application would not have to be transmitted to the SMHA.

(8) Outstanding program instructions pertaining to unit limits for housing for the nonelderly handicapped (other than the chronically mentally ill) permit group homes to serve up to 15 persons on one site, and independent living complexes to include up to 40 units on one site. Although up to 40 units are permitted, applicants should be aware that independent living complexes comprised of two or more bedroom units are limited to families and may not be developed to serve large numbers of single, unrelated persons. Also, in an independent living complex, no more than 40 individuals *or* families may occupy units on any one site, regardless of the unit configuration.

(9) Pursuant to § 885.215 of the Regulations, no single Borrower may submit an Application or Applications in any HUD Region in excess of that necessary to finance the construction or substantial rehabilitation of three hundred (300) units of Housing and Related Facilities. Further, there is an administrative requirement which indicates that reservations for projects intended primarily for the elderly generally will not be approved for more than 200 units. The 200-unit limitation includes the number of units of housing for the elderly already on or adjacent to the site, as well as the number of units being requested. This policy is intended to expand the number of areas in the community where the elderly can live in housing specifically designed to meet their needs. This rule is not intended to rule out housing for the elderly in submarket ares of major cities where housing for the elderly, either privately or publicly financed, is already in existence, but to discourge additional housing for the elderly *adjacent* to existing privately or publicly financed facilities where the new units would result in a concentration of over 200 units. This requirement may be waived by the Field Office Manager where, in a given area or locality, there are no other suitable sites available for housing for the elderly.

(10) To be considered responsive to the Invitation, among other requirements, an Application must not request a larger number of units than advertised for the respective metropolitan and/or nonmetropolitan areas designated in the Invitation and must not exceed the maximum number of units per Application as may be established by the local Field Office.

(11) HUD will make contract authority under Section 8 of the United States Housing Act of 1937, as amended, available for successful Borrowers.

(12) Section 202 Fund Reservations will be distributed among successful Borrowers in accordance with the requirements of § 885.220 (Review of Application for Fund Reservation) and on the basis of all of the information furnished by the Borrowers as set forth in the Application Package as modified by HUD Notice H 83-9, Revised Submission Requirements, Standard Ranking Criteria and Selection Procedures for the Fiscal Year 1983 Section 202 Program-Application for Fund Reservation, dated March 18, 1983 and pursuant to § 885.225 (Approval of Applications) of the Regulations.

(13) Applicants who submitted Applications that were not funded due to insufficient Fiscal Year 1982 Section 202 loan authority will have to reapply under this year's Field Office Invitations.

(14) Section 885.410(j) of the Regulatons contains a minimum capital investment requirement for Section 202 Borrowers. This requirement applies to all Section 202 Borrowers receiving HUD Field Office approval of an Application for a Section 202 Fund Reservation (under the provisions of § 885.400 et seq.). Said minimum capital investment which is presently established at one-half of 1 percent (0.5%) of the total HUD-approved mortgage amount, not to exceed $10,000 shall apply to all Section 202 projects receiving Fund Reservations in Fiscal Year 1983. Section 106(b) funds, pursuant to Part 271, may not be used to satisfy the minimum investment requirement.

Borrowers are invited to submit applications for Section 202 Fund Reservations in accordance with this Announcement and Part 885. Additional information regarding the Section 202 program may be found in Part 885.

(The Catalog of Federal Domestic Assistance Program title and number is Housing for the Elderly or Handicapped, 14.157)

Authority: (Section 202, Housing Act of 1950 (12 U.S.C. 1701q), as amended; Section 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)))

Dated: April 19, 1983.

Philip Abrams,

Assistant Secretary for Housing—Federal Housing Commissioner.

BILLING CODE 4210-27-M

Office of the Secretary

[Docket No. N-83-1229]

Submission of Proposed Information Collections to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposals.

ADDRESS: Interested persons are invited to submit comments regarding these proposals. Comments should refer to the proposal by name and should be sent to: Robert Neal, OMB Desk Officer, Office of Management and Budget, New Excutive Office Building, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Acting Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410, telephone (202) 755-5310. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposals described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the

information collection proposal; (2) the office of the agency to collect the information; (3) the agency form number, if applicable; (4) how frequently information submissions will be required; (5) what members of the public will be affected by the proposal; (6) an estimate of the total number of hours needed to prepare the information submission; (7) Whether the proposal is new or an extension or reinstatement of an information collection requirement; and (8) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David S. Cristy, Acting Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposals should be sent to the OMB Desk Officer at the address listed above.

The proposed information collection requirements are described as follows:

Notice of Submission of Proposed Information Collection to OMB

Proposal: Application for Approval as Direct Endorsement Mortgagee/ Underwriter Certification
Office: Housing
Form number: HUD–54112 and HUD–54113
Frequency of submission: On Occasion
Affected public: Businesses or Other Institutions (except farms)
Estimated burden hours: 131,250
Status: New
Contact: Robert J. Englestad, HUD, (202) 426–0070; Robert Neal, OMB, (202) 395–7316.

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: April 8, 1983.

Proposal: Application for Transfer of Physical Assets
Office: Housing
Form number: HUD–92266
Frequency of submission: On Occasion
Affected public: Businesses or Other Institutions (except farms)
Estimated burden hours: 27,000
Status: New
Contact: June Foote, HUD, (202) 755–5547; Robert Neal, OMB, (202) 395–7316.

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: April 8, 1983.

Judith L. Tardy,
Assistant Secretary for Administration.

BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[M 57980 and M 57980–A]

Montana; Classification of Public Lands for State Indemnity Selection

April 15, 1983.

1. The Montana Commissioner, Department of State Lands, has filed a petition for classification and application to acquire the public lands described in paragraph 5 below, under the provisions of Sections 2275 and 2276 of the Revised Statutes, as amended (43 U.S.C. 851, 852 (1976)), in lieu of certain school lands granted to the State under the Act of February 22, 1889, 25 Stat. 676, that were encumbered by other rights or reservations before the State's title could attach. The application has been assigned serial numbers M 57980 and M57980–A.

2. The Bureau of Land Management will examine these lands for evidence of prior valid rights or other statutory constraints that would bar transfer. Those lands found suitable for transfer will be held to be clasified on June 27, 1983. Classification is pursuant to Title 43 Code of Federal Regulations, Subpart 2400 and Section 7 of the Act of June 28, 1934.

3. Information concerning these lands and the proposed transfer to the State of Montana may be obtained from the

District Manager, Miles City District Office, Bureau of Land Management, P.O. Box 940, Miles City, Montana 59301, (406) 232–4331, or the District Manager, Lewistown District Office, Bureau of Land Management, Airport Road, Lewistown, Montana 59457, (406) 538–7461.

4. For a period of 60 days from the date of publication of this notice in the **Federal Register**, all persons who wish to submit comments or objections on the above classification may present their views in writing to the State Director, Bureau of Land Management, P.O. Box 30157, Billings, Montana 59107. Any adverse comments will be evaluated by the State Director who will issue a notice of determination to proceed with, modify, or cancel the action. In the absence of any action by the State Director, this classification action will become the final determination of the Department of the Interior. As provided by Title 43 Code of Federal Regulations, Subpart 2462.1, a public hearing will be scheduled by the State Director if he determines that sufficient public interest exists to warrant the time and expense of a hearing.

5. The lands included in this classification are located in Blaine, Valley, Phillips, Prairie, Custer, and Fallon counties, Montana, and are described as follows: (footnotes correspond to numbered authorized users or applicants listed in Paragraph 6).

8. Rights-of-way granted by the Bureau of Land Management on the above lands will transfer with the land or may be reserved to the United States. Where mineral rights will transfer to the State, existing oil and gas leases will remain in effect under the terms and conditions of the leases. This classification constitutes official notice to grazing lessees that their Bureau of Land Management leases will be terminated in whole or in part upon transfer of the land to the State of Montana. The State Commissioner has agreed to give BLM's grazing permittees a preference right for grazing privileges on lands transferred to the State. The State leases will contain the same terms and conditions included in the present

leases to the fullest extent allowed by State laws. However, the State and the lessees may agree to enter into other tenure arrangements.

For a period of 45 days from the date of first publication indicated below, persons asserting a claim to or interest in the described lands, other than holders of leases, permits or rights-of-way listed above, may file such claim with the State Director, Bureau of Land Management, P.O. Box 30157, Billings, Montana 59107, together with evidence that a copy thereof has been served on the Board of Land Commissioners, State of Montana, Capitol Building, Helena, Montana 59620.

Kannon Richards,

Acting State Director.

[Group 629]

Arizona; Filing of Plat of Survey

April 15, 1983.

1. Plat of survey of the land described below will be officially filed in the Arizona State Office, Phoenix, Arizona effective at 7:45 a.m. on June 3, 1983.

Gila and Salt River Meridian, Arizona

UNS. T. 1 S., R. 16 E.

Tract 38

The area described contains 94.74 acres of land.

2. The land described above is located about 5 miles ESE of Globe, Arizona. The average elevation is about 3,500 feet above sea level. The terrain is rolling and drains in an easterly direction. Vegetation consists of oak brush, mesquite, yucca, cacti, crucifixion thorn, cat claw, creosote and scattered juniper.

3. Access to Tract 38 is by way of State Highway No. 70. The southerly right-of-way is identical with the North bdy. of Tract 38.

4. The above described land in Unsurveyed T. 1 S., R. 16 E., was included within the Tonto National Forest by Proclamation 795, of January 13, 1908.

5. The land described in paragraph 1 is included in a Designation Order, Tonto Forest Townsite, pursuant to the Act of July 31, 1958 (72 Stat. 438, 7 U.S.C. 10122, 16 U.S.C. 478a), as amended, and is segregated from appropriation, location or entry under the General Land and Mineral Laws.

6. Inquiries concerning the lands should be addressed to the Arizona State Office, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073.

Mario L. Lopez,

Chief, Branch of Lands and Minerals Operations.

Tenneco Inc., OCS–G 5157, West Delta Area, Blocks 58 and 59, (0.96 mile of 6" natural gas pipeline); February 11, 1983.

Texas Eastern Transmission Corporation, OCS–G 5227, Chandeleur Area, Block 25,—Main Pass Area, Block 93, (11.42 miles of 12" natural gas pipeline); March 10, 1983.

Texas Eastern Transmission Corporation, OCS–G 5228, Chandeleur Area, Blocks 17 and 25, (1.86 miles of 8" natural gas pipeline); March 14, 1983.

Exxon Pipeline Company, OCS–G 5229, Mississippi Canyon Area, Block 280,—South Pass Area, South Addition, Block 93, (15.21 miles of 12" crude oil and/or gas pipeline); February 7, 1983.

McMoRan Offshore Exploration Co., OCS–G 5230, South March Island Area, South Addition, Block 174,—Eugene Island Area, South Addition, Block 313, (14.02 miles of 6" oil pipeline); February 25, 1983.

Tenneco Inc., OCS–G 5232, West Cameron Area, South Addition, Blocks 493 and 498, (2.48 miles of 6" natural gas pipeline); March 14, 1983.

Person interested in reviewing environmental documents for the proposals listed above or obtaining information about EAs and FONSIs prepared for activities on the Gulf of Mexico OCS are encouraged to contact the MMS office in the Gulf of Mexico OCS Region.

FOR FURTHER INFORMATION CONTACT: Regional Supervisor, Offshore Operations Support, Gulf of Mexico OCS Region, Minerals Management Service, Post Office Box 7944, Metairie, Louisiana 70010, Phone 504/837–4720.

SUPPLEMENTARY INFORMATION: The MMS prepares EAs and FONSIs for proposals which relate to exploration for and the development/production of oil and gas resources on the Gulf of Mexico OCS. The EAs examine the potential environmental effects of activities described in the proposals and present MMS conclusions regarding the significance of those effects. EAs are used as a basis for determining whether or not approval of the proposals constitutes major Federal actions that significantly affect the quality of the human environment in the sense of NEPA & 102(2)(C). A FONSI is prepared in those instances where the MMS finds that approval will not result in significant effects on the quality of the human environment. The FONSI briefly presents the basis for that finding and includes a summary or copy of the EA.

This notice constitutes the public notice of availability of environmental documents required under the NEPA Regulations.

Dated: April 13, 1983.

BILLING CODE 4310-MR-M

Oil and Gas and Sulphur Operations in the Outer Continental Shelf; Amoco Production Co.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the Receipt of a Proposed Development and Production Plan.

SUMMARY: Notice is hereby given that Amoco Production Company has submitted a Development and Production Plan describing the activities it proposes to conduct on Leases OCS–G 0971 and 1880, Blocks 261 and 214, East Cameron Area, offshore Louisiana.

The purpose of this Notice is to inform the public, pursuant to Section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the Plan and that it is available for public review at the Office of the Regional Manager, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana 70002.

FOR FURTHER INFORMATION CONTACT: Minerals Management Service, Public Records, Room 147, open weekdays 9 a.m. to 3:30 p.m., 3301 North Causeway Blvd., Metairie, Louisiana 70002, Phone (504) 837–4720, Ext. 226.

SUPPLEMENTARY INFORMATION: Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in Development and Production Plans available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685). Those practices and procedures are set out in a revised § 250.34 of Title 30 of the Code of Federal Regulations.

Dated: April 15, 1983

National Park Service

Redwood National Park, California; Availability of Statement of Findings Regarding Floodplain Management and Wetland Protection

SUMMARY: Pursant to the requirements specified in Executive Order 11988 (May 24, 1977), for Floodplain Management, Executive Order 11990 (May 24, 1977) for Protection of Wetlands and their implementing guidelines, and the

National Park Service Floodplain Management and Wetland Protection Guidelines (**Federal Register**, Volume 45, Number 104—Wednesday, May 28, 1980), the National Park Service, Department of the Interior, gives notice that a statement of findings has been prepared for the Redwood Information Center, Redwood National Park, California.

The action calls for the construction of a visitor information center building and parking lot in a previously developed area located within the 100 year flood and the 500 year ???? event. However, the actual building is to be constructed above levels.

FOR FURTHER INFORMATION OR FOR A COPY OF THE STATEMENT OF FINDINGS, CONTACT: Howard H. Chapman, Regional Director, Western Region, National Park Service, P.O. Box 36063, San Francisco, California 94102, Telephone: (415) 556–4196; or Douglas Warnock, Superintendent, Redwood National Park, 1111 Second Street, Crescent City, California 95531, Telephone: (707) 464–6101.

Dated: April 15, 1983.

Office of the Secretary

Coastal Barrier Resources Act

AGENCY: Office of the Secretary, Interior

ACTION: Notice.

SUMMARY: Consistent with the provisions of Section 4(c) of the Coastal Barrier Resources Act (CBRA) (Pub. L. 97–348), and with the guidelines published in the **Federal Register** on November 19, 1982 (47 FR 52388–52393), the Department has completed making minor and technical modifications to the boundaries of the system units within 180 days after the date of enactment as required by CBRA. The Department provided written descriptions and notice of the proposed minor and technical modifications on March 14, 1983 to the Committee on Merchant Marine and Fisheries in the House of Representatives and to the Committee on the Environment and Public Works in the Senate. This information was also provided to the chief executive officer of each State, county, or equivalent jurisdiction in which a system is located; each State coastal zone management agency in those States which have a coastal zone management plan approved pursuant to section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1455) and in which a system is located; and each appropriate Federal agency, as required by CBRA. This information was also made available to the public as published in the **Federal Register** (47 FR 11177–11178) March 16, 1983. Comments on the proposed modifications were accepted through April 13, 1983.

As required, the Department has provided notice and written jusitification of the final minor and technical modifications to the individuals and entities indicated above.

Copies of all comments received and maps showing final modifications are available for public review. Interested individuals may contact the Coastal Barriers Task Force, Room 3149, U.S. Department of the Interior, Washington, DC 20240, prior to May 2, 1983 or the U.S. Fish and Wildlife Service after that date.

ADDRESS: Mr. Ric Davidge, Chairman, Coastal Barriers Task Force, U.S. Department of the Interior, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Mr. Frank McGilvrey, Coastal Barriers Officer, U.S. Fish and Wildlife Service, U.S. Department of the Interior, Washington DC 20240. (202) 343–5000.

Ric Davidge,

Acting Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310–70–M

Guidelines for Transactions Between Nonprofit Conservation Organizations and Federal Agencies

AGENCY: Office of the Secretary, Interior.

ACTION: Notice of final guidelines—Request for additional comments.

SUMMARY: The Assistant Secretary for Fish and Wildlife and Parks is publishing final guidelines for transactions between nonprofit conservation organizations and Federal agencies that utilize the Land and Water Conservation Fund (LWCF). These guidelines will provide broad instructions to the four Federal agencies in their use of nonprofit conservation organizations to assist in securing the natural, cultural, wildlife and recreation values in greatest need of protection.

The guidelines will apply to the National Park Service, Fish and Wildlife Service, and the Bureau of Land Management in the Department of the Interior and the Forest Service in the Department of Agriculture.

DATE: Additional comments must be received before May 23, 1983. Unless modified pursuant to notice in the **Federal Register**, these guidelines shall be effective June 21, 1983.

FOR FURTHER INFORMATION CONTACT: Ric Davidge, Chairman, LWCF Policy Group, Room 3156, Department of the Interior, Washington, D.C. 20240.

SUPPLEMENTARY INFORMATION: The public was invited to comment on the proposed guidelines, that appeared in the **Federal Register**, January 28, 1983 (Vol. 48, No. 20, pages 4055–6).

There were several comments received via phone expressing support for the guidelines and an interest in their rapid implementation. Thirty-two written comments were received. Thirty-one fully supported the guidelines and their immediate implementation by all of the Federal agencies using the Land and Water Conservation Fund. One letter supported all of the basic principles except the reqirement that a letter of intent be sent to the nonprofit organization outlining necessary land or interest in land needed, the estimated value, the projected time when the agency intends to acquire the property from the nonprofit organization and an explanation of the limitation of liability to the Government should the Federal agency be unable or decline to purchase the land.

The letter of intent is essential to establishing a common understanding of what is expected from the nonprofit and the Government. The purpose of these guidelines is to clarify the relationships between individual nonprofit organizations and LWCF Act agencies. This policy is primarily applicable when the nonprofit is dependent on Federal funding to conclude a transaction. Obviously, these guidelines are not intended to preclude purely private actions. Any private party can buy land within the boundaries of Federal areas without Federal permission or acquiescence. In those cases, however, where a nonprofit or any individual needs or requests limited Federal assurances prior to proceeding—those limited assurances will be subject to the policy guidelines provided herein. When a nonprofit requires limited assurances before it proceeds, our policy will require that certain ground rules be followed.

The majority of these ground rules were laid out in the proposed guidelines. Furthermore, there is an additional concern—not previously reflected in the guidelines—that full disclosure of financial arrangements be made in each case where the nonprofit has secured the land via an option to purchase and does not and will not own title to the

property prior to receipt of a firm Federal commitment to purchase the tract in question.

In these cases the Government will also want to know the financial background of the transaction. A disclosure of the financial background should indicate the price of the property to the nonprofit, the basis for that price (appraisals, etc.), the costs to the nonprofit, and the price and basis thereof for the subsequent sale to the United States. This additional requirement has now been added. In our view this type of disclosure to the concerned Federal agency is reasonable given the level of Federal commitment that is being requested, prior to nonprofit action. Because this is a new provision—although one applicable only to a very limited situation—additional time is being provided for public review and comment.

Office of Management and Budget and the General Accounting office have urged that guidelines be developed. The General Accounting Office's concerns have been expressed in recent reports including *Overview of Federal Land Acquisition and Management Practices* (CED 81-135), which noted that 4.5 percent of the land acquired by the National Park Service, the Fish and Wildlife Service, and the Forest Service during the period 1965–1979 was acquired through the use of nonprofit conservation organizations, and recommended that the Department develop a written policy for dealing with these groups. Such a policy, the report stated, should provide guidance on "when to use nonprofits, what the working relationship should be, and what unique land acquisition procedures might be appropriate."

Congress, as recently as the Explanatory Statement of the Recommendations of the Senate Committee on Appropriations on the Department of the Interior and Related Agencies Appropriation Bill, 1983 (H.R. 7356), indicated its support and interest in improving the "* * * cooperation between the land acquiring agencies and the nonprofit organizations that are capable of performing a valuable service in helping acquire properties * * *". It is the intent of the guidelines to create an understanding of the benefits and operating procedures of the nonprofit organizations and the Federal agencies and to foster greater cooperation.

The Department of the Interior has determined that this document is not a major rule under E.O. 12291 and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

This rule does not contain information collection requirements that require approval by the Office of Management and Budget under 44 U.S.C. 3501 et seq.

These guidelines do not in themselves constitute a major Federal action significantly affecting the quality of the human environment under the National Environmental Policy Act of 1969 (NEPA). NEPA concerns will be addressed at the individual unit levels on a case-by-case basis.

Nonprofit conservation organizations, like other private landowners, make their own decisions regarding the purchase and sale of real property. However, when dealing with resources to be purchased by the Federal agencies using the Land and Water Conservation Fund, some basic principles should be followed.

The Assistant Secretary for Fish and Wildlife and Parks makes notice of the following guidelines.

Guidelines for Transactions Between Nonprofit Conservation Organizations and Federal Agencies

Introduction

Because of the lengthy time requirements in the budgeting and appropriation process, Federal agencies are frequently unable to acquire land in response to imminent threats to critical resources or to buy needed resources under favorable terms. With the ability to act quickly in the private market and maintain flexible working relationships with landowners, nonprofit conservation organizations can assist and support the Federal land acquisition program. However, the role of nonprofit organizations in acquiring land or interests in land should be clearly and carefully defined in each transaction considering the basic principles listed below.

Basic Principles

Nonprofit conservation organizations are not in any manner agents of the Federal Government. They are private independent groups who freely negotiate real estate actions anywhere and anytime they desire and at their own risk. However, in dealing with the Government agencies, because of statutory, budgetary and policy considerations, the objectives of the Federal agencies must be paramount to those of the nonprofit conservation organizations.

Lands or interests in lands proposed for acquisition through a nonprofit organization should be in accord with priorities outlined by the agency.

Lands or interests in land acquired from nonprofit organizations must be within the boundaries of authorized areas, consistent with existing acquisition authorities, and limited to tracts that the agency has determined need to be acquired.

In each case the proposal of the agency should be outlined in a letter of intent to the nonprofit organization. The letter should provide the nonprofit organization with a minimum of: (1) Land or interest in land needed; (2) the estimated value; (3) the projected time frame as to when the agency intends to acquire the property from the nonprofit organization; and (4) a statement indicating that should the agency be unable or decline for policy reasons to purchase the land within the projected time frame, disposition of the land or interests in land by the nonprofit organization is without liability to the Government.

In cases where a nonprofit conservation agency or individual has secured an option to buy and does not or will not own title prior to a binding Federal commitment to purchase, all financial arrangements including the option price, the sale price to the Federal agency and appraisal data must be disclosed before a decision to purchase is made by the Federal agency.

G. Ray Arnett,

Assistant Secretary for Fish and Wildlife and Parks.

April 15, 1983.

[FR Doc. 83-10883 Filed 4-21-83; 8:45 am]

BILLING CODE 4310-70-M

INTERSTATE COMMERCE COMMISSION

[Investigation and Suspension Docket No. M-29788]

Motor Carriers; Charge for Shipments Moving on Order; Notify Bill of Lading N.M.F.T.A.

AGENCY: Interstate Commerce Commission.

ACTION: Extension of time to file comments.

SUMMARY: The previously established due date for comments (April 21, 1983) on our requirement that rules and charges unrelated to classification and not prescribed by the Commission be removed from the classification where the scope of the pertinent agreement is limited to classification making (See 47 FR 11572 (March 17, 1983)), has been extended 20 days.

DATE: Comments must be received by May 11, 1983.

ADDRESS: Send comments (original and 15 copies to: I. & S. M–29788, Interstate Commerce Commission, Office of Proceedings, Room 2139, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Jane Morris (202) 275–6434, or Howell I. Sporn (202) 275–7691.

SUPPLEMENTARY INFORMATION: By petition filed April 11, 1983, the National Classification Committee (NCC) requests a 20-day extension of time (until May 11, 1983) fo filing comments in this proceeding. The NCC states that due to the broad scope of the rules covered by our March 22, 1983 decision and the far-reaching impact of that decision on the National Motor Freight Classification, and extension is warranted.

The 20-day extension of time filing of comments in this proceeding is warranted. Given the importance and complexity of this proceeding, an extension will benefit both the parties and the Commission by insuring that the most responsive comments are filed, without unduly delaying the proceeding.

It Is Ordered

The petition is granted. The time for filing comments is extended to May 11, 1983.

Decided: April 15, 1983.

By the Commission, Reese H. Taylor, Jr., Chairman.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Nos. 39148 and 39149]

Motor Carriers; Interstate Contract Carrier Corp. and Stoops Express, Inc.; Petition for Exemption From Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of provisional exemption.

SUMMARY: Two motor contract carriers have each requested exemption from the requirements of 49 U.S.C. 10702, 10761, and 10762. The sought relief is provisionally granted for future as well as existing contracts.

DATES: Comments are due on May 9, 1983. The sought relief will become final on May 24, unless, in response to timely filed adverse comments, the Commission issues a further decision withdrawing the relief.

ADDRESS: Send comments (original and 15 copies) to: Room 2139, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:

Barbara Gardner, (202) 275-0961
Howell I. Sporn (202) 275-7691.

SUPPLEMENTARY INFORMATION:

Additional information is contained in the Commission's decision. To purchase a copy of the full decision contact:

T. S. InfoSystems, Inc., Room 2227, c/o Interstate Commerce Commission, 12th & Constitution Avenue NW., Washington, DC 20423

or telephone: (202) 289-4357 (D.C. Metropolitan area) (800) 424-5403 (toll free—outside the D.C. area).

Decided: April 14, 1983.

By the Commission, Division 2, Commissioners Gradison, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

Agatha L. Mergenovich,

Secretary.

[No. 39132 et al.] [1]

Motor Carriers; Milbank Freightways, Inc.; Petition for Exemption From Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of provisional exemption.

SUMMARY: Eight motor contract carriers have each requested exemption from the tariff filing requirements of 49 U.S.C. 10702, 10761, and 10762. The sought relief is provisionally granted for future as well as existing contracts.

DATES: Comments are due on May 9, 1983. The sought relief will become final May 24, 1983, unless, in response to timely filed adverse comments, the Commission issues a further decision withdrawing this relief.

ADDRESS: Send an original and 15 copies of comments to: Room 2139, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:

Barbara Gardner, (202) 275-0961

or

Howell I. Sporn, (202) 275-7691.

SUPPLEMENTARY INFORMATION:

Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T. S. Infosystems, Inc., Room 2227, Washington, DC 20423, or call 289-4357 in the DC metropolitan area or toll free (800) 424-5403.

Decided: April 14, 1983.

By the Commission, Division 2, Commissioners Gradison, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[1] This proceeding embraces Nos. 39133 Barry Transfer & Storage Co., Inc., 39134 Ceco Transport, Inc., 39135 Allen Freight Lines, Inc., 39137 J.R.S. Leasing Charter, Inc., 39138 All-Freight Express, Inc., 39139 Amtrans, Inc., and 39140 Almac of Arizona, Inc.

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional

questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.— All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Please direct status inquiries to Team 2, (202) 275-7030.

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 CFR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposd on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

BILLING CODE 7035-01-M

Motor Carriers; Finance Applications; Decision Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 2, (202) 275–7251.

Volume No. OP2–FC–178

By Commission, Review Board No. 2, Members Carleton, Ewing, and Williams.

MC–FC–81327. By decision of April 15, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 C.F.R. 1161, Review Board Number 2, approved the transfer to KENNETH W. KNIGHT d/b/a KNIGHT TRUCKING, Detroit, AL, of authority issued to LEMAN KNIGHT d/b/a PETE KNIGHT TRUCKING COMPANY, Detroit, AL, in Certificate MC–14073, issued August 31, 1976, authorizing the transportation of stone, in dump vehicles, from points in Bibb, Colbert, Franklin, Jefferson, and Shelby Counties, AL, to points in MS, with no transportation for compensation on return except as otherwise authorized; Permit MC–127726, issued December 9, 1969, authorizing the transportation of fertilizer and fertilizer materials, dry, in bulk, or in packages, from the plant site of International Minerals & Chemical Corporation, Florence, AL, to points in MS, and rerturned shipments of the above-described commodities, from points in MS, to the plant site of International Minerals & Chemical Corporation, Florence, AL, fertilizer and fertilizer material, dry, in bulk, in dump vehicles, and in packages, from the plant site of International Minerals & Chemical Corporation, Tupelo, MS, to the plant site of International Minerals & Chemical Corporation, Florence, AL, and returned shipments of the immediately above-specified commodities, from the plant site of International Minerals & Chemical Corporation, Florence, AL, to the plant site of International Minerals & Chemical Corporation, Tupelo, MS. Restriction: The operations authorized above are limited to a transportation service to be performed under a continuing contract, or contracts, wtih International Minerals & Chemical Corporation, of Skokie, IL; Sub-2, issued February 3, 1971, authorizing the transportation of lumber, from McShan, AL, to points in MS, AR, LA, TX, OK, KS, MO, IA, MN, WI, IL, IN, KY, TN, MI, OH, WV, NC, SC, and GA, with no transportation for compensation on return except as otherwise authorized. Restriction: The operations authorized herein are limited to a transportation service to be performed under a continuing contract, or contracts with McShan Lumber Company, Inc., of McShan, AL; Sub-3, issued September 16, 1976, authorizing the transportation of lumber and lumber products (except in bulk), from the facilities of the Leo Owsley Company, at or near Millport, AL, to points in AR, GA, IL, IN, IA, KY, LA, MI, MS, MO, NC. BILLING CODE 7035–01–M

[No. MC–C–10650]

Motor Carriers; Parker Motor Freight, Inc., and Hare Cartage, Inc., Single State Traffic, Petition for Declaratory Order

AGENCY: Interstate Commerce Commission.

ACTION: Notice of filing of petition for a declaratory order.

SUMMARY: By petition filed March 21, 1983, Parker Motor Freight, Inc., and Hare Cartage, Inc., seek a declaratory order determining whether traffic handled by Parker from a Michigan origin to a consolidator at Detroit, MI (Hare) for movement beyond Michigan in either for-hire carriage or private carriage is interstate in nature or in intrastate commerce. At the time the traffic originates in Michigan it is not known whether it will move beyond that State in private or for-hire carriage.

DATE: Written comments are due within 30 days of the date of publication of this notice in the **Federal Register.**

ADDRESSES: Send an original and eight copies of comments to: MC–C–10650, Room 2139, Office of Proceedings, Interstate Commerce Commission, Washington, DC 20423.

Send one copy of comments to petitioners' representatives:

Ronald J. Mastej, 900 Guardian Bldg., Detroit, MI 48226,
and
Alex J. Miller, 555 S. Woodward, Suite 512, Birmingham, MI 48011

FOR FURTHER INFORMATION CONTACT:

William K. Blakemore, (202) 275–6160
or
Howell Sporn, (202) 275–7691

SUPPLEMENTARY INFORMATION: The issue presented is whether certain traffic handled by petitioners is interstate in nature or intrastate traffic. The traffic originates at suppliers of Norris Industries, Inc., within Michigan and is destined to Norris' plants located outside of Michigan. These plants receive inbound materials and supplies from several vendors within Michigan. Norris requires its vendors to ship its materials and supplies to a consolidator at Detroit, MI. Hare Cartage, Inc., serves as that consolidator.

Parker Motor Freight, Inc., has participated in Norris' traffic originating at Holland, MI, and moving to the consolidator at Detroit. After the freight from Holland and other vendors in Michigan reaches Detroit, a decision is made by Norris as to whether the traffic will move to its out-of-state plants in private carriage or in for-hire carriage. At the time any shipment leaves a

vendor in Michigan it is known that the shipment's ultimate destination is to a Norris plant outside of Michigan, but it is not known whether the traffic will move beyond Detroit in private or for-hire carriage.

The petition seeks a declaratory order as to whether all or a portion of the described traffic is interstate in nature from a vendor's Michigan facility to the consolidation point at Detroit. Petitioners believe that such traffic is interstate in nature.

No oral hearing is contemplated. Any person, including petitioners, desiring to participate in this proceeding shall file with the Commission an original and eight copies of written representations, views, or arguments. A copy of each representation, also must be served on petitioners' representatives.

Written material submitted will be available for public inspection at the Office of the Interstate Commerce Commission, 12th Street and Constitution Avenue, Washington, D.C. during regular business hours.

Notice to the general public of this matter will be given by depositing a copy of this notice in the Office of the Secretary of the Commission for public inspection and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich

Secretary.

BILLING CODE 7035-01-M

[Ex Parte No. 387; Sub-900]

Norfolk and Western Railway Company; Exemption for Contract Tariff; ICC-NW-C-6013, Supplement 1 (Coal) Via Port of Lamberts Point, Virginia

AGENCY: Interstate Commerce Commission.

ACTION: Notice of provisional exemption.

SUMMARY: A provisional exemption is granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the above-noted contract tariff may become effective on one day's notice.* This exemption may be revoked if protests are filed.

DATES: Protests are due within 15 days of publication in the **Federal Register.**

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway (202) 275-7278.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in this instance to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption request meets the requirements of 49 U.S.C. 10505(a) and is granted subject to the following conditions: This grant neither shall be construed to mean that the Commission has approved the contract for purposes of 49 U.S.C. 10713(e) nor that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review this contract and to determine its lawfulness.

This action will not significantly affect the quality of the human environment or conservation of energy resources.

(49 U.S.C. 10505)

*Note.—tariff supplements advancing contract's effective date shall refer to this decision for authority.

By the Commission, Review Board Number 3, Members Krock, Joyce, and Dowell.

Decided: April 15, 1983.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 83-10500 Filed 4-21-83; 8:45 am]

BILLING CODE 7035-01-M

[Docket No. AB-52; Sub-21B]

Atchison, Topeka & Santa Fe Railway Co.; Abandonment; Between Ancona and Streator Junction, IL; Findings

The Commission has found that the public convenience and necessity permit the Atchison, Topeka and Santa Fe Railway Company to abandon its 30.7 mile rail line between Ancona (milepost 0.27) and Streator Junction (milepost 30.66) in Livingston, LaSalle and Woodford Counties, IL. A certificate will be issued authorizing this abandonment unless within 15 days after this publication the Commission also finds that: (1) A financially responsible person has offered assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served concurrently on the applicant, with copies to Louis E. Gitomer, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this Notice. Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-13,413, 13,413A]

Hanna Mining Co. and Hanna Nickel Smelting Co., Riddle, Oregon; Affirmative Determination Regarding Application for Reconsideration

The United Steelworkers of America, after being granted a filing extension, requested administrative reconsideration of the Department of Labor's Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance on behalf of the workers and former workers of the Hanna Mining Company and the Hanna Nickel Smelting Company in Riddle, Oregon. The determination was published in the **Federal Register** on January 14, 1983 (48 FR 1845).

The application for reconsideration claims, among other things, that since Hanna operates the only nickel mine located in the U.S. any amount of imported nickel directly affects the workers at Hanna. Also, occurring together with the closing of Hanna's mining operation in Oregon was the opening of a new mine and smelter in Columbia, South America by Hanna.

Conclusion

After review of the application, I conclude that the claims are of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, D.C., this April 13, 1983.

Robert O. Deslongchamps,

Acting Deputy Administrator, Unemployment Insurance Service.

[FR Doc. 83-10794 Filed 4-21-83; 8:45 am]

BILLING CODE 4510-30-M

[TA-W-13,544]

National Steel Corp., Weirton Steel Division, Weirton, West Virginia; Affirmative Determination Regarding Application for Reconsideration

By an application dated March 29, 1983, the Independent Steelworkers Union requested administrative

reconsideration of the Department of Labor's Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance on behalf of the workers and former workers of National Steel Corporation's Weirton Steel Division, Weirton, West Virginia. The determination was published in the **Federal Register** on March 4, 1983 (48 FR 9389).

The application for reconsideration claims, among other things, that the Department's denial was specifically based upon import and sales data that was improperly combined in such a manner as to nullify what were in fact, absolute and relative increases in imports of similar products during the relevant time period.

Conclusion

After review of the application, I conclude that the claims are of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application, is, therefore, granted. Signed at Washington, D.C. this April 14, 1983.

Robert A. Schaerfl,

Director, Office of Program Management, Unemployment Insurance Service.

[TA-W-14, 480]

U.S. Steel Corp., Fairfield Works, Fairfield, Alabama; Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on March 14, 1983 in response to a worker petition received on March 8, 1983 which was filed by the United Steelworkers of America on behalf of workers at the Fairfield Works of the U.S. Steel Corporation in Fairfield, Alabama.

A determination applicable to the petitioning group of workers was issued on January 25, 1983 (TA-W-13, 278). The Fairfield Works halted all production activities on June 26, 1982. No new information is evident which would alter the Department's previous determination. Consequently further investigation in this case would serve no purpose; and the investigation has been terminated.

Signed at Washington, D.C. this April 13, 1983.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Office of the Secretary

Agency Forms Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibility under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the proposed forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

On each Tuesday and/or Friday, as necessary, the Department of Labor will publish a list of the Agency forms under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new forms, revisions, extensions (burden change), extensions (no change), or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of any particular revision they are interested in.

Each entry will contain the following information:

The Agency of the Department issuing this form.

The title of the form.

The Agency form number, if applicable.

How often the form must be filled out.

Who will be required to or asked to report.

Whether small business or organizations are affected.

The standard industrial classification (SIC) codes, referring to specific respondent groups that are affected.

An estimate of the number of responses.

An estimate of the total number of hours needed to fill out the form.

The number of forms in the request for approval.

An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, Telephone 202-523-6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW., Room S-5526, Washington, D.C. 20210. Comments should also be sent to the OMB reviewer, Arnold Strasser, Telephone 202-395-6880, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, NEOB, Washington, D.C. 20503.

Any member of the public who wants to comment on a form which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

New

Occupational Safety and Health Administration
Ethylene Oxide 29 CFR 1910.1047
On occasion
Businesses or other institutions
Small business or organization
SIC: Multiple
182,780 responses; 73,200 hours

This regulation requires employers to establish and maintain accurate records of exposure monitoring and medical surveillance for employees exposed to ethylene oxide. These records are used by the employer, employee, physician and the Government in determining whether an employee's exposure to ethylene oxide may have had an effect on his/her health.

Extension

Bureau of Labor Statistics
Employment, Wages, and Contributions Report
BLS-3031
Quarterly
State Employment Security Agencies
SIC: 944
212 responses; 530,000 hours

ES-202, a summary of employment and wages of workers covered by Unemployment Insurance programs, is crucial to the administration of UI programs, and serves as the sampling frame and employment benchmark for most BLS programs, as an imput in GNP and personal income estimates, and is used for economic analysis, fund allocations, and program administration.

Signed at Washington, D.C. this 19th day of April, 1983.

Paul E. Larson,

Departmental Clearance Officer.

BILLING CODE 4510-26,-4510-24-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 83-32]

NASA Advisory Council, Aeronautics Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub.

L. 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Aeronautics Advisory Committee, Informal Advisory Subcommittee on High Performance Aircraft Systems.

DATE AND TIME: May 17, 1983, 8:30 a.m. to 4:30 p.m.; May 18, 1983, 8:30 a.m. to 4:30 p.m.; May 19, 1983, 8:30 a.m. to 12:00 noon.

ADDRESS: NASA Headquarters, 600 Independence Avenue, SW., Room 647, Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Mr. Jack Levine, National Aeronautics and Space Administration, Code RJH–2, Washington, D.C. 20546 (202/755–2366).

SUPPLEMENTARY INFORMATION: The Informal Advisory Subcommittee on High Performance Aircraft Systems was established to assist NASA in assessing the current adequacy of high performance aircraft technology and recommend actions to reduce deficiencies through modification of the planned NASA research and technology program in flight dynamics, aerodynamics, structures and materials, propulsion, airframe/propulsion integration, integrated propulsion/airframe controls, and flight research. The subcommittee, chaired by Mr. John D. Louthan, is comprised of twelve members. The meeting will be open to the public up to the seating capacity of the room (approximately 30 persons including the Subcommittee members and participants).

Type of meeting: Open.

Agenda

May 17, 1983

8:30 a.m.—Welcome and Introduction.
8:45 a.m.—Budget Overview/Status of NASA Aeronautics Program.
9:30 a.m.—Executive Secretary's Report.
—Review of Recommendations and Comments From Last Meeting of the Subcommittee
—Status of the Programs
—Overview of the 1984 Program
11:00 a.m.—Special Topic—NASA Advanced Tactical Fighter Technology Programs.
—Langley Research Center
—Lewis Research Center
—Ames Research Center/Dryden Flight Research Facility
—Member Presentations
4:30 p.m.—Adjourn.

May 18, 1983

8:30 a.m.—Special Topic Continued.
—Member Presentations Continued
—Discussion
1:00 p.m.—Other Business of the Subcommittee.
3:00 p.m.—Preparation of the Subcommittee Report.
4:30 p.m.—Adjourn.

May 19, 1983

8:30 a.m.—Preparation of the Subcommittee Report Continued.
12:00 noon—Adjourn.

Dated: April 14, 1983.

Richard L. Daniels,

Director, Management Support Office, Office of Management.

[FR Doc. 83–10706 Filed 4–21–83; 8:45 am]
BILLING CODE 7510–01–M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

President's Committee on the Arts and Humanities; Meeting

Notice is hereby given on Plenary Meeting III of the President's Committee on the Arts and the Humanities. The purpose of this meeting is to review committee activities and report progress. The Committee is charged with considering ways to increase private sector support for the arts and humanities, to consider appropriate ways to increase private sector support for the arts and humanities, to consider appropriate Federal involvement in the arts and humanities, and to make recommendations to the President and to the National Endowment for the Arts and the National Endowment for the Humanities.

Plenary Meeting III will convene at 9:00 a.m., on Tuesday, May 17, 1983 in the Council Room (Room M–04), 1100 Pennsylvania Avenue NW (Entrance on 12th Street), Washington, D.C. The meeting is expected to conclude before noon.

This meeting, open to the public, is by reservation on a space available basis (room capacity, 100 persons). Individuals wishing to attend must request reservations not later than May 11. Reservations may be made by sending a postcard with your full name and telephone number (so that you may be notified in the event of a change) to the President's Committee on the Arts and Humanities, New Executive Office Building, Rm. 2200, 726 Jackson Place, NW, Washington, D.C. 20503. Or you may call 202–456–6200 or 212–883–6764.

April 15, 1983.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

[FR Doc. 83–10763 Filed 4–21–83; 8:45 am]
BILLING CODE 7537–01–M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Subcommittee on Electrical Systems; Date Change

The ACRS Subcommittee on Electrical Systems scheduled for April 27, 1983 has been rescheduled for May 10, 1983, Room 1167, at 1717 H Street, NW., Washington, D.C.

All other items regarding this meeting remain the same as announced in the **Federal Register** published Tuesday, April 5, 1983 (48 FR 14770).

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Dr. Richard Savio (telephone 202/634–3267) between 8:15 a.m. and 5:00 p.m., EST.

Dated: April 19, 1983.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 83–10823 Filed 4–21–83; 8:45 am]
BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards, Subcommittee on Emergency Core Cooling Systems; Meeting

The ACRS Subcommittee on Emergency Core Cooling Systems will hold a meeting on May 10, 1983, Room 1046, at 1717 H Street, NW., Washington, D.C. The Subcommittee will discuss:

(1) NRR review of GE SAFER/GESTER ECCS Codes, and the status of other NRC/NRR licensing actions; and

(2) NRC/RES activities, including: Appendix K revision status, status of B&W/NRC Test Advisory Group effort, and the results of the recent LOFT feed-and-bleed test.

In accordance with the proceduers outlined in the **Federal Register** on October 1, 1982 (47 FR 43474), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance except for those sessions which will be closed to protect proprietary information (Sunshine Act Exemption (4)). One or more closed sessions may be necessary to discuss such information. To the extent practicable, these closed sessions will be held so as to minimize inconvenience to members of the public in attendance.

The agenda for subject meeting shall be as follows:

Tuesday, May 10, 1983—8:30 a.m. until the conclusion of business.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, their consultants, and other interested persons regarding the topics to be discussed.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Mr. Paul Boehnert (telephone 202/634–3267), between 8:15 a.m. and 5:00 p.m., EST.

I have determined, in accordance with Subsection 10(d) of the Federal Advisory Committee Act, that it may be necessary to close sessions of this meeting to public attendance to protect proprietary information. The authority for such closure is Exemption (4) to the Sunshine Act, 5 U.S.C. 552b(c)(4).

Dated: April 18, 1983.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 83-10824 Filed 4-21-83; 8:45 am]

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards, Subcommittee on Safety Research Program; Meeting

The ACRS Subcommittee on the Safety Research Program will hold a meeting on May 11, 1983, Room 1046, at 1717 H Street, N.W., Washington, D.C. The Subcommittee will review the NRC Safety Research Program and Budget for fiscal years 1985 and 1986, along with the Office of Research responses to ACRS recommendations included in the recent ACRS report to Congress on the NRC Safety Research Program for fiscal years 1984 and 1985 (NUREG–0963).

Notice of this meeting was published March 23, 1983.

In accordance with the procedures outlined in the Federal Register on October 1, 1982 (47 FR 43474), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance.

The agenda for subject meeting shall be as follows:

Wednesday, May 11, 1983—8:30 a.m. until the conclusion of business.

During the meeting, the Subcommittee will hear presentations from and hold discussions with the representatives of the Office of Nuclear Regulatory Research and research user offices of the NRC with regard to the proposed NRC Safety Research Program and Budget for fiscal years 1985 and 1986. It will discuss also the adequacy of the Office of Research responses to ACRS recommendations included in the recent ACRS report to Congress (NUREG–0963).

Further information regarding topics to be discussed, whether the meeting has been concelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefore can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Mr. Sam Duraiswamy (telephone 202/634–3267) between 8:15 a.m. and 5:00 p.m., EST.

Dated: April 18, 1983.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590-01-M

[Docket No. 50–70; Operating License No. TR–1]

Applications; General Electric Co. (Vallecitos Nuclear Center—General Electric Test Reactor); Rescission of Order and Order Modifying License

I

The General Electric Company (GE or licensee), Pleasanton, California, is the holder of the Operating License No. TR–1, issued on January 7, 1959, which authorizes the operation of the General Electric Test Reactor (GETR), at GE's Vallecitos Nuclear Center (VNC) located near Pleasanton, California. GETR is a 50 MW thermal test reactor primarily used in the production of radioisotopes for medical diagnosis and therapy and for industrial purposes. Additionally, boiling water reactor fuel element development testing is conducted in this facility. GE has applied for renewal of Operating License No. TR–1 and a notice of consideration of the application for renewal was published in the Federal Register on September 15, 1977 (42 FR 46427). A hearing in this matter was requested and an Atomic Safety and Licensing Board was established to rule on petitions for leave to intervene.

II

In the course of reviewing the information in support of the application for renewal of Operating License No. TR–1, the NRC determined that seismic and geologic characteristics near the reactor site were of significant concern. Therefore, on October 24, 1977 the Acting Director for Nuclear Reactor Regulation ordered that:

1. Pending further order by the Director, Office of Nuclear Reactor Regulation, the GETR shall, upon completion of the present cycle on Thursday, October 27, 1977, be placed and maintained safely in a cold shutdown condition.

2. GE show cause, in the manner hereinafter provided, why the suspension of activities under Operating License No. TR–1 should not be continued.

By letter dated November 11, 1977, GE responded to the Show Cause Order. Based on geologic, seismic, structural and analysis information accompanying their response, GE requested authorization to resume operation following completion of proposed modifications.

In a Memorandum and Order dated February 13, 1978, the Commission, pursuant to Section 191 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2241), delegated the authority to rule on the requests for a hearing to an Atomic Safety and Licensing Board (Licensing Board or Board). The Commission also stated that, in the event that a hearing is held, the issues to be considered by the Board are as follows:

(1) What the proper seismic and geologic design bases for the GETR facility should be;

(2) Whether the design of GETR structures, systems and components important to safety requires

modifications considering the seismic design bases determined in issue (1) above, and if so, whether the modification(s) can be made so that GETR structures, systems and components important to safety can remain functional in light of the design bases determined in issue (1) above;

(3) Whether activities under Operating License No. TR–1 should continue to be suspended pending resolution of the foregoing.

Thereafter, GE submitted additional information to the NRC Staff relating to the geological characteristics of the site. It recommended geologic and seismic design bases, and submitted an analysis to demonstrate that the facility, after modification, would meet those design bases. Upon review by the NRC Staff, GE was advised in the summer of 1978 to perform additional geologic investigations. In response, GE undertook an extensive program of geologic investigations between August and December 1978. In February of 1979, GE submitted a detailed report on these investigations, along with additional information concerning the ability of the GETR to meet the recommended seismic design bases.

By letter dated May 23, 1980, the staff completed a safety evaluation which presented its conclusions on the proper seismic and geologic design basis for the GETR. On October 27, 1980, the staff completed its safety evaluation report (SER) with regard to landslide hazard and seismic design of structures, systems and components important to safety. On January 15, 1981, the staff issued a supplement to its SER which completed the evaluation of issues (1) and (2) of the Show Cause Order.

A hearing was conducted from May 27 through June 10, 1981 on the issues set forth in the Commission's February 13, 1978 Memorandum and Order.

The hearing on the show cause order has resulted in the Licensing Board's issuance of an Initial Decision, LBP–82–64, 16 NRC ——, August 16, 1982. *aff'd,* ALAB–720 17 NRC ——, (March 23, 1983).

The conclusions of the Board were:

1. The proper geologic and seismic design bases for the GETR should be as follows:

(a) A surface offset design value of one meter of reverse-oblique net slip beneath the GETR should be utilized, along a fault plane of 2200 foot-wide Verona fault zone, which could vary in dip from about 10 to 45 degrees, occurring during a single event.

(b) The Regulatory Guide 1.60 Response Spectra, anchored to .75 g effective acceleration for an event on the Calaveras fault, and .6 g effective acceleration on the Verona fault.

(c) Combined loads caused by fault offset at the surface and vibratory ground motion from the Verona fault must be considered to act simultaneously, and that the entire one meter of surface offset is considered to occur coseismically.

(d) A seismic event could trigger a landslide, causing a 1.0 meter slope displacement occurring near the toe of the slope, at some distance from the GETR; accordingly, the one meter offset caused by the landslide must be considered in the design of safety-related equipment located in the area of the toe, such as the fuel flooding system piping, but need not be considered in the design of the GETR reactor structure.

2. The General Design Criteria of Appendix A to 10 CFR Part 50 apply only to power reactors and do not apply to the GETR.

3. Appendix A to 10 CFR Part 100 applies to power reactors and not to facilities such as the GETR, which does not produce electric or heat energy.

4. The design of GETR structures, systems and components important to safety do require modifications, and these modifications can be made so that the GETR structures, systems and components important to safety can remain functional in light of the seismic design bases determined in point (1) above.

III

In view of the foregoing and pursuant to sections 104, 161(b) and 161(i) of the Atomic Energy Act of 1954, as amended, the regulations in 10 CFR Parts 2, 50, and the Board's Initial Decision dated August 16, 1982, it is hereby ordered that:

(1) Operating License No. TR–1 is modified in accordance with the terms specified in Amendment No. 12, which is appended to this Order;

(2) The suspension of operation imposed by the Order to Show Cause of October 24, 1977 is hereby rescinded subject to the conditions specified in Amendment No. 12.

This Order is effective as of the date of its issuance.

Dated this 13th day of April 1983.

For The Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing.

[FR Doc. 83–10817 Filed 4–21–83; 8:45 am]

BILLING CODE 7590–01–M

International Atomic Energy Agency Draft Safety Guide; Availability of Draft for Public Comment

The International Atomic Energy Agency (IAEA) is completing development of a number of internationally acceptable codes of practice and safety guides for nuclear power plants. These codes and guides are in the following five areas: Government Organization, Design, Siting, Operation, and Quality Assurance. All of the codes and most of the proposed safety guides have been completed. The purpose of these codes and guides is to provide guidance to countries beginning nuclear power programs.

The IAEA codes of practice and safety guides are developed in the following way. The IAEA receives and collates relevant existing information used by member countries in a specified safety area. Using this collation as a starting point, an IAEA working group of a few experts develops a preliminary draft of a code or safety guide which is then reviewed and modified by an IAEA Technical Review Committee corresponding to the specified area. The draft code of practice or safety guide is then sent to the IAEA Senior Advisory Group which reviews and modifies as necessary the drafts of all codes and guides prior to their being forwarded to the IAEA Secretariat and thence to the IAEA Member States for comments. Taking into account the comments received from the Member States, the Senior Advisory Group then modifies the draft as necessary to reach agreement before forwarding it to the IAEA Director General with a recommendation that it be accepted.

As part of this program, Safety Guide SG–D8, "Safety-Related Instrumentation and Control Systems," has been developed. The working group, consisting of Mr. C. Karpeta from Czechoslovakia; Mr. F. Reisch from Sweden; Mr. J. L. Petrie from the United Kingdom; and Mr. J. Gallagher (Westinghouse Electric Corporation) from the U.S.A., developed the initial draft of this guide from an IAEA collation. This draft was subsequently modified by the IAEA Technical Reveiw Committee for Design and the Senior Advisory Group, and we are now soliciting public comment on a modified draft (Rev. 8, dated April 27, 1982). Comments received by the Director, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, by June 1, 1983, will be particulary useful to the U.S. representatives to the Technical Review

Committee and the Senior Advisory Group in developing their positions on its adequacy prior to their next IAEA meetings.

Single copies of this draft Safety Guide may be obtained by a written request to the Director, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

(5 U.S.C. 522(a))

Dated at Washington, D.C. this 18th day of April 1983.

For the Nuclear Regulatory Commission.

Robert B. Minogue,

Director, Office of Nuclear Regulatory Research.

[FR Doc. 83-10821 Filed 4-21-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-285]

Omaha Public Power District; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 72 to Facility Operating License No. DPR-40 issued to Omaha Public Power District (the licensee), which revised the Technical Specifications for operation of the Fort Calhoun Station, Unit No. 1, located in Washington County, Nebraska. The amendment was effective as of its date of issuance.

The amendment updated snubber information regarding assessibility and type. The amendment also denied part of the application which dealt with opening of certain fire doors because the licensee did not furnish an adequate basis.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated November 29, 1982, (2) Amendment No. 72 to License No. DPR-40, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, and at the W. Dale Clark Library, 215 South 15th Street, Omaha, Nebraska 68102. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 7th day of April, 1983.

For the Nuclear Regulatory Commission.

Robert A. Clark,

Chief, Operating Reactors Branch No. 3, Division of Licensing.

[FR Doc. 83-10818 Filed 4-21-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-285]

Omaha Public Power District; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 73 to Facility Operating License No. DPR-40 issued to Omaha Public Power District (the licensee), which revised the Technical Specifications for operation of the Fort Calhoun Station, Unit No. 1, located in Washington County, Nebraska. The amendment was effective as of its date of issuance.

The amendment deletes the interim special technical specification regarding operation with less than 75 percent of incore detector strings operable.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of the amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of the amendment.

For further details with respect to this action, see (1) the application for amendment dated November 18, 1982, as supplemented by letter dated March 11, 1983, (2) Amendment No. 73 to License No. DPR-40, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W. Washington, D.C. 20555, and at the W. Dale Clark Library 215 South 15th, Street, Omaha, Nebraska 68102. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 12th day of April, 1983.

For the Nuclear Regulatory Commission.

Robert A. Clark,

Chief, Operating Reactors Branch No. 3, Division of Licensing.

[FR Doc. 83-10819 Filed 4-21-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 30-19311; 50-387 and -388]

Pennsylvania Power and Light Co. and Allegheny Electric Cooperative, Inc.; Issuance of Materials License, Safety Evaluation Report, Environmental Impact Appraisal, and Negative Declaration for the Onsite Contingency Storage of Low-Level Radioactive Waste at the Susquehanna Steam Electric Station

The U.S. Nuclear Regulatory Commission (the Commission) has issued Materials License No. 37-06554-4 to the Pennsylvania Power and Light Company (PP&L or licensee) authorizing the receipt, possession, storage and transfer of low-level radioactive waste (LLRW) at its onsite LLRW Holding Facility at the Susquehanna Steam Electric Station (SSES) located in Luzerne County, near Berwick, Pennsylvania. The license authorizes the storage of up to four years of LLRW generated from the operation of the SSES. The license is effective as of the date of issuance and the term of the license is five years.

A notice of receipt of the application for a byproduct material license was published in the **Federal Register** on October 9, 1981 (46 FR 49975).

The application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's

regulations. The Commission has made appropriate findings as required by the Act and the Commission's Regulations in 10 CFR Chapter 1, which are set forth in the license.

The Commission's Office of Nuclear Material Safety and Safeguards, Division of Fuel Cycle and Material Safety, has completed its safety and environmental reviews in support of the issuance of Materials License No. 37–06554–4. Two staff documents, the Safety Evaluation Report and the Environmental Impact Appraisal of Contingency Storage of Low-Level Radioactive Waste Storage at Pennsylvania Power and Light Company's Susquehanna Steam Electric Station have been issued.

The Environmental appraisal, "Environmental Impact Appraisal of Contingency Storage of Low-Level Radioactive Waste at Pennsylvania Power and Light Company, Susquehanna Steam Electric Station," was issued in accordance with 10 CFR Part 51. The Environmental Impact Appraisal concluded that the issuance of the proposed license will not significantly affect the quality of the human environment and that there will be no significant environmental impact from the issuance of the proposed license. Based on this appraisal, the Commission therefore concludes that this Negative Declaration is appropriate and an environmental impact statement for this particular license is not warranted.

The Commission's Safety Evaluation Report, dated March 1983, and Environmental Impact Appraisal, dated March 1983, are available for public inspection at the Commission's Public Document Room 1717 H Street, NW., Washington, D.C. and at the Local Public Document Room for PP&L's Susquehanna Steam Electric Station at the Osterhout Free Library in Wilkes-Barre, Pennsylvania. A copy of these reports may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Fuel Cycle and Material Safety.

Dated at Silver Spring, Maryland this 15th day of April, 1983.

For the Nuclear Regulatory Commission.

Leland C. Rouse,

Chief, Advanced Fuel and Spent Fuel Licensing Branch, Division of Fuel Cycle and Material Safety, NMSS.

BILLING CODE 7590–01–M

OFFICE OF PERSONNEL MANAGEMENT

Proposed Data Collection for OMB Review

AGENCY: U.S. Office of Personnel Management.

ACTION: Notice of proposed data collection submitted to OMB for clearance.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980, this notice announces a proposal for collecting data from selected Federal agencies for general purpose statistics. Every two years, five respondents would submit reports on eight agencies for which data are not otherwise available to the Office of Personnel Management. The data would be used by the Office of Personnel Management to manage personnel programs and evaluate policy alternatives, and by the National Science Foundation and the Bureau of Labor Statistics. For copies of this proposal, call John P. Weld, Agency Clearance Officer, on (202) 632–7720.

DATE: Comments on this proposal should be received within ten working days from the date of this publication.

ADDRESSES: Send or deliver comments to:

John P. Weld, Agency Clearance Officer, U.S. Office of Personnel Management, 1900 E. Street, N.W., Room 6669, Washington, D.C. 20415, and

Frank Reeder, Information Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503

FOR FURTHER INFORMATION CONTACT: John. P. Weld, (202) 632–7720, Office of Personnel Management.

Donald J. Devine,

Director.

BILLING CODE 6325–01–M

Proposed Extension of Form for OMB Review

AGENCY: U.S. Office of Personnel Management.

ACTION: Notice of proposed extension of form submitted to OMB for clearance.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980, this notice announces a proposed extension of a form which collects information from the public. OPM Form 1164, Qualifications Inquiry for Testing Personnel, is completed by former employers of candidates being considered for positions as OPM test examiners. OPM uses the information to evaluate the trustworthiness and integrity of candidates being considered for these positions, thus supplementing a National Agency Check and Inquiry (NACI) and satisfying the special needs of this program. For copies of this proposal, call John P. Weld, Agency Clearance Officer, on (202) 632–7720.

DATE: Comments on this proposal should be received within 10 working days from the date of this publication.

ADDRESSES: Send or deliver comments to:

John P. Weld, Agency Clearance Office, U.S. Office of Personnel Management, 1900 E Street, NW., Room 6669, Washington, D.C. 20415

and

Frank Reeder, Information Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503

FOR FURTHER INFORMATION CONTACT: John P. Weld, (202) 632–7720.

Office of Personnel Management.

Donald J. Devine,

Director.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 19686; SR–Amex–82–20]

American Stock Exchange, Inc.; Filing of an Amendment to and Order Approving Proposed Rule Change

April 18, 1983.

The American Stock Exchange, Inc. ("Amex"[1]), 86 Trinity Place, New York, New York 10006, submitted on November 5, 1982, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b–4 thereunder, to provide for minimum customer margin requirements applicable to customers holding "uncovered" short positions in stock index options. In addition, in an amendment submitted on February 28, 1983, the exchange proposed to provide for reduced margin on stock index options that are "out-of-the-money."[2] Commission action on this proposed rule change is sought in connection with an Amex proposal to trade options on the Amex Major Market Index ("MMI").[3]

[1] The Amex Board of Governors ratified the proposed amendment to provide for reduced margin on "out-of-the-money" stock index options by the filing of a second amendment submitted on March 14, 1983. (*See* File No. SR–CBOE–82–20, Amendment No. 2.)

[2] The Amex submitted a proposal to trade an option on the Amex diversified 20-stock MMI on

Notice of the proposed rule change and the first amendment together with the terms of substance of the proposed rule change and the first amendment were given by the issuance of Commission Releases (Securities Exchange Act Release Nos. 19397 (January 4, 1983) and 19578 (March 9, 1983)) and by publication in the **Federal Register** (48 FR 1253, January 11, 1983 and 48 FR 11207, March 16, 1983). No comments were received with respect to the proposed rule change.

The Commission has recently considered the rules and regulations with respect to the amount of credit that may be initially extended and subsequently maintained on options on a stock index in connection with a proposal by the Chicago Board Options Exchange ("CBOE") to trade options on a broad-based 100-stock index.[3] Although the Amex MMI is comprised of only 20 stocks, the MMI, like the CBOE-100, is a broad-based index, reflecting a number of distinct sectors of the equity market. In view of the similarity of the current proposed rule change to the CBOE margin rule changes that the Commission recently approved, the Commission believes that the findings and conclusions concerning appropriate margin for options on a broad-based index set forth in the CBOE Margin Approval Order are appropriate here.[4]

Accordingly, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6, and the rules and the regulations thereunder. Further, the Commission finds good cause to approve the proposed rule change simultaneously with notice of the publication of Amendment No. 2 being that the amendment simply provides notice of Board approval of Amendment No. 1 with respect to which public notification and a comment period was provided.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-10602 Filed 4-21-83; 8:45 am]

BILLING CODE 8010-01-M

March 15, 1983. *See* Securities Exchange Act Release No. 19610 (March 17, 1983), 48 FR 12486 (March 24, 1983). *See* File No. SR-Amex-82-22 and, specifically, Amendment No. 1.

[3] *See* Securities Exchange Act Release No. 19587 (March 10, 1983), 48 FR 11193 (March 16, 1983) approving the proposed rule change of the CBOE to provide for minimum customer margin applicable to customers holding "uncovered" short positions in options on stock indices (*See* File No. SR-CBOE-82-20) ("CBOE Margin Approval Order"). The staff of the Board of Governors of the Federal Reserve System (the "FRB") has indicated to the Commission staff that it has considered the margin requirements for stock index options and is in the process of revising Regulation T to incorporate language to reflect their development. The FRB staff also indicated that a Commission no-action position with respect to approval of self-regulatory organization rules that established an effective margin for uncovered short positions of the premium plus 10 percent of the value of the index was appropriate. *See* letter to Richard Ketchum, Associate Director, Division of Market Regulation, SEC, from Laura Homer, Securities Credit Officer, FRB, dated March 9, 1983 (the "FRB letter").

[4] As noted in the CBOE Margin Approval Order, the Commission has not determined the appropriate level of margin applicable to options on indices which do not reflect a variety of industries and, thus, are not broad-based.

[Release No. 19685; File No. S7-971]

Receipt of an Amendment to the Plan for Reporting of Consolidated Options Last Sale Reports and Quotation Information

April 18, 1983.

On March 10, 1983, the self-regulatory organizations acting jointly as the Options Price Reporting Authority ("OPRA") submitted to the Commission, pursuant to Rule 11Aa3-2 under the Securities Exchange Act of 1934 ("Act"), an amendment to OPRA's Plan for Reporting of Consolidated Options Last Sale Reports and Quotation Information (the "Plan").

I. *Description of the Amendment.* The amendment consists of a revised fee schedule for the current subscriber agreement under the Plan. Under the revised fee schedule a subscriber's fee will be based upon both the number of its offices (or locations at which OPRA information is received) and the number of electronic display or interrogation devices in each location. The fee is currently based upon either the number of registered representatives employed by the firm or the number of business locations of the firm, whichever results in a lower fee. OPRA estimates the increase in total subscriber fees will be about 30 percent. OPRA proposes to implement the revised fee schedule on May 1, 1983.

II. *Request for Comment.* Pursuant to Rule 11Aa3-2(c)(3) under the Act, the amendment (including its proposed implementation date) became effective upon filing with the Commission. The Commission, however, may summarily abrogate the amendment within 60 days of its filing and require refiling and approval of the amendment by Commission order, if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanisms of, a national market system, or otherwise in furtherance of the purposes of the Act. Accordingly, in order to assist the Commission in determining whether to abrogate the amendment and to require refiling and further review, interested persons are invited to submit their views to George A. Fitzsimmons, Secretary Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, within 21 days from the date of publication of this notice in the **Federal Register.** All communications should refer to file No. S7-971.

Copies of the amendment, all subsequent amendments, all written statements with respect to the amendment which are filed with the Commission, and all written communications relating to the amendment between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for public inspection in the Commission's Public Reference Room.

For the Commission, by the Division of Market Regulation Pursuant to delegated authority.[1]

George A. Fitzsimmons,

Secretary.

SMALL BUSINESS ADMINISTRATION

Grant Agreement and Related Information

AGENCY: Small Business Administration.

ACTION: Notice of publication of grant agreement and related information.

SUMMARY: Title I of Pub. L. 98-8, approved March 24, 1983, required, among other things, that SBA utilize $50,000,000 of appropriated funds for grants for the rehabilitation and development of public parks and recreational areas. These funds are to be allocated to each State, the District of Columbia and the Commonwealth of Puerto Rico on the basis of unemployment, upon SBA's receipt from those jurisdictions of a certification which the Administrator of SBA deems appropriate. The law also authorized

expedited review and approval of procedures necessary for its implementation to be completed by April 15, 1983. This notice sets forth those procedures necessary to accomplish the law's intent.

DATE: The procedures set forth below are effective April 22, 1983.

ADDRESS: Comments should be addressed to William A. Scharf, Director, Office of Private Sector Initiatives, 1441 L Street, NW., Room 720–A, Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT: William A. Scharf, Director, Office of Private Sector Initiatives, 1441 L Street, NW., Room 720–A, Washington, D.C. 20416.

SUPPLEMENTARY INFORMATION: On March 24, 1983, President Reagan signed Pub. L. 98–8 ("The Jobs Bill"). This law appropriates, among other things, $50 million to SBA for grants under Section 21(a)(1) of the Small Business Act, 15 U.S.C. 648(a), for developing parks and recreation areas. The authorization was funded for the purposes of involving small business in providing jobs during a time of high unemployment and in order to accomplish benefits of lasting value. The appropriations statute recognized that there are many landscapers and others who are now idle and who could contract for this work. In addition, nurseries have a surplus of shrubs and trees which they have been unable to sell during the current recession. The planting of trees and shrubs on public lands can be accomplished in large measure by hiring unskilled individuals who are readily available in every city and county. It is the law's intent that grants for the $50 million be made quickly and that an intensive employment program be underway without delay.

The authorizing legislation permits the making of grants for rehabilitation and improvements to the public parks and recreation areas, and to the extent funds are available, that kind of work can be performed in the summer months. However, new plantings or transplantings of bareroot trees, shrubs and flowers must be accomplished in the next several months. Therefore, it is absolutely essential that these grants be made and this program executed immediately.

The authorizing legislation provides for grants to State governments. The appropriations legislation requires that these grants be made on the basis of the average number of unemployed individuals who reside in such jurisdiction as compared to the total number of unemployed individuals in all the States, the District of Columbia and Puerto Rico during the fourth quarter of calendar year 1982. To facilitate the immediate execution of this program, the Administrator of the Small Business Administration will make a grant without delay to any State if the Governor, or other appropriate designated official, certifies that such area will administer the grant in accordance with the provisions of the grant agreement set forth below. Therefore, for the purpose of distributing the $50 million, a grant in the amount indicated on the chart below shall be made to any State immediately upon the signing of the grant agreement by an authorized representative of the State, and the certification by the Governor that the State will comply with the following requirements.

(1) All of the projects will be carried out before October 1, 1983;

(2) All contracts for services will be awarded only to contractors who would qualify as small businesses under Section 3 of the Small Business Act, and as set forth in the grant agreement;

(3) Supplies purchased will be procured only from businesses which would qualify under Section 3 of the Small Business Act as a small business, and as set forth in the grant agreement;

(4) But for the grant, the work to be performed would not be performed prior to October 1, 1983;

(5) Individuals employed either directly by the state or an agency thereof or through a contractor on an hourly basis with the proceeds of the grant shall only be individuals who do not have full-time employment, and who are not simultaneously drawing unemployment compensation for the same period of employment;

(6) Every reasonable attempt will be made to assure that the funds result in employment of the maximum number of otherwise unemployed individuals and will result in benefits of lasting value to the public;

(7) All plantings or development or rehabilitation work will be performed in public parks or other publicly controlled or owned lands;

(8) Reasonable efforts will be made either from grant funds or other funds to assure that any plantings are appropriately watered or cared for until they are established;

(9) The state will comply with other procedures required by the Small Business Administration as set forth in the grant agreement.

With such a certification by a Governor of a State or by an appropriate official of an eligible jurisdiction, the Administrator is fully authorized to make the grant to such State or jurisdiction in the amount provided in the chart set forth below. In states or other eligible jurisdictions where such application and certification is not forthcoming, the Administrator can make grants to individual agencies of the jurisdiction or an educational institution or other qualified agencies or nonprofit institutions for individual shares of that jurisdiction grant as authorized in Section 21(a)(1) of the Small Business Act in accordance with expedited rules.

It is anticipated that to the extent that any funds allocated to any State are not applied for by July 1, 1983, they will be reallocated and distributed to other eligible jurisdictions for work which will be completed by October 1, 1983.

The appropriations statute requires that this program be implemented almost immediately and that all projects be carried out before October 1, 1983. Currently, however, SBA has no size standard for industries which could participate in the program, such as Ornamental Shrub and Tree Planting and Nursery Stock Wholesalers. (Wholesalers rather than retailers would be affected because even firms which normally engage in retail trade are considered wholesalers when they sell to the government.) Normally, in such cases where no size standard has been determined, a residual size standard of 500 employees would apply. (See 13 CFR 121.3–8.) However, in light of the size of the vast majority of firms potentially affected by this program, SBA believes that the residual size standard would be inappropriately large for this program.

Therefore, SBA is establishing an interim emergency size standard of 70 employees for purposes of this program alone as provided for by section 8, Executive Order 12291, and 5 U.S.C. 608. This standard will remain in effect only until October 1, 1983.

Due to the brief implementation time allowed for this program, SBA believes that the vast majority of the affected firms will be those in the Nursery Stock Wholesale trade. These firms are included in the Nondurable Goods Wholesale industry. Few firms in the industry actually sell nursery stock, however, and SBA lacks the statistical information to specify the wholesale nursery portion of this industry. Nevertheless, based on the industry as a whole, a size standard of 70 employees would include approximately 97 percent of the firms and about 50 percent of total sales. Therefore, SBA believes that 70 employees is an appropriate size standard for purposes of participation in this program.

Dated: April 15, 1983.

James C. Sanders,

Administrator.

Small Business Administration—Office of Private Sector Initiatives, Park and Recreational Area Development Grant Agreement

State of	Grant No.
Grant Period—All Projects Completed by 10-1-83.	Amount of Grant: $

The United States of America, represented by the Administrator of the United States Small Business Administration, and the State, District, or Commonwealth named above (hereinafter referred to as the State), mutually agree to perform this agreement in accordance with its terms and conditions including the conditions of the Governor's Certification (certification set forth immediately below).

The United States hereby promises, in consideration of the promises made by the State herein, to obligate and tender to the State the amount of money indicated below in the certification for the purpose stated in the certification. The State hereby promises, in consideration of the promises made by the United States, to administer the grant described below in accordance with the terms and conditions of this agreement.

Part I—Governor's Certification

In consideration of the United States Small Business Administration's approval of a grant of $——— to the State of ——— for the purpose of the rehabilitation and development of public parks and recreational areas, I, ———, Governor of said State hereby certify that the State will comply with the following requirements:

(1) All of the projects authorized to be funded by this grant will be carried out before October 1, 1983.

(2) All contracts for services will be awarded only to contractors who would qualify as small businesses under Section 3 of the Small Business Act, as defined below.

(3) Supplies purchased will be procured only from businesses which would qualify under Section 3 of the Small Business Act as a small business, as defined below.

(4) But for the grant, the work to be performed would not be performed prior to October 1, 1983.

(5) Individuals employed either directly by the State or an agency thereof or through a contractor on an hourly basis, with the proceeds of the grant, shall only be individuals who do not have full time employment, and are not simultaneously drawing unemployment compensation for the same period of employment.

(6) Every reasonable attempt will be made to assure that the funds result in employment of the maximum number of otherwise unemployed individuals and will result in benefits of lasting value to the public.

(7) All plantings or development or rehabilitation work will be performed in public parks or other publicly controlled or owned lands.

(8) Reasonable efforts will be made either from grant funds or other funds to assure that any plantings are appropriately watered or cared for until they are established.

(9) The State will comply with procedures and rules required by the Small Business Administration.

Date ———

Governor ———

State of ———

Part II—Definitions

A. The terms "SBA" or "Grantor" as used herein means the United States Small Business Administration.

B. The term "Administrator" as used herein means the Administrator of the United States Small Business Administration, or any representative lawfully delegated the authority to act for such Administrator.

C. The term "Director" as used herein means the Director of the Office of Private Sector Initiatives of the Small Business Administration, or any representative lawfully delegated the authority to act for such Director.

D. The term "Grants Management Officer" as used herein means the agency official responsible for the financial management of this grant for the Federal Government.

E. The term "Project" as used herein means a single project, to be undertaken to accomplish the rehabilitation and development of public parks and recreational areas.

F. The term "State" as used herein means the State, the District of Columbia, or the Commonwealth of Puerto Rico which is a party to this grant agreement. Wherever a term, condition, obligation or requirement refers to the State, such term, condition, obligation, or requirement shall also apply to the recipient political subdivision or public agency, except where it is clear from the nature of the term, condition, obligation or requirement that it is to apply solely to the State.

G. The term "Small Business" as used herein means a business concern that has, including its affiliates, a number of employees not exceeding 70, and meets the other regulatory requirements found in 13 CFR Part 121. The term "affiliates" is defined in 13 CFR 121.3–2(a). The term "number of employees" is defined in 13 CFR 121.3–2(t).

Part III.—Continuing Assurances

A. Terms of the Grant Agreement

1. The State agrees, as recipient of this assistance, that it will meet the following specific requirements and that it will further impose these requirements upon any political subdivision or public agency to which funds made available under this grant agreement are transferred. The State also agrees that it shall be responsible for compliance with the terms of this grant agreement by such a political subdivision or public agency and that failure by such political subdivision or public agency to so comply shall be deemed a failure by the State to comply with the terms of this agreement. However, such transfers of funds may be made by the State without further approval by the Grantor.

2. This hereby certifies that applicant possesses adequate grant management capabilities as required by OBM Circulars and SBA Federal Assistance Administration Regulation and Guidelines in all of the following areas: fiscal administration, facilities management, management information, personnel, planning and budget, procurement and property management.

3. This hereby certifies that applicant meets the standards for fund control and accountability as prescribed in OMB Circular A–102 or A–110 as appropriate in accordance with the legal status of the applicant's organizational status and have established or can demonstrate the willingness and ability to establish procedures that will minimize the time elapsing between the transfer of funds from the Treasury and their disbursement by the Grantee if advance payment procedures are used.

B. Nondiscrimination

1. The State will comply with Title VI of the Civil Rights Act of 1964 (Pub. L. 88–352) and in accordance with Title VI of that Act, no person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity for which the applicant receives Federal financial assistance and will immediately take any measures necessary to effectuate this provision.

2. The State will comply with Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d) prohibiting employment discrimination where (1) the primary purpose of a grant is to provide employment, or

(2) discriminatory employment practices will result in unequal treatment of persons who are or should be benefiting from the grant-aided activity.

C. Applicable Federal Circulars

The State shall comply with applicable regulations, policies, guidelines, and requirements including OMB Circulars A-87 and A-102, as they relate to the application, acceptance and use of Federal funds made available under this agreement.

D. Grant Application

1. The application for Federal assistance and associated documents submitted for the funds made available under this agreement is by this reference made a part of the agreement.

2. The State possesses legal authority to apply for the grant; that a resolution, motion or similar action, if necessary, has been duly adopted or passed as an official act of the applicant's governing body, authorizing the filing of the application, including all understandings and assurances contained therein, and directing and authorizing the person identified as the official representative of the applicant to act in connection with the application and to provide such additional information as may be required.

E. Grant Execution

1. The period of availability of funds under this agreement shall begin with the date of execution of this agreement and shall terminate on September 30, 1983, with all

unallocated funds as of October 1, 1983 being returned to the Grantor.

2. The State shall assure compliance with all applicable Federal, State, local laws and regulations.

3. The State will comply with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973, Pub. L. 93–234, 87 Stat. 975, approved December 31, 1976. Section 102(a) requires, on and after March 2, 1975, the purchase of flood insurance in communities where such insurance is available as a condition for the receipt of any Federal financial assistance for construction or acquisition purposes for use in any area that has been identified by the Secretary of the Department of Housing and Urban Development as an area having special flood hazards. The phrase "Federal financial assistance" includes any form of loan, grant, guaranty, insurance payment, rebate, subsidy, disaster assistance loan or grant, or any other form of direct or indirect Federal assistance.

4. The State will insure that the facilities under its ownership, lease or supervision which shall be utilized in the accomplishment of the purposes of this grant are not listed on the Environmental Protection Agency's (EPA) list of Violating Facilities and that it will notify the Federal grantor agency of the receipt of any communication from the Director of the EPA Office of Federal Activites indicating that a facility to be used in the project is under consideration for listing by the EPA.

5. The State will assist the Grantor in its compliance with Section 106 of the National Historic Preservation Act of 1966 as amended (16 U.S.C. 470), Executive Order 11593, and the Archeological and Historic Preservation Act of 1966 (16 U.S.C. 469a–1 *et seq.)* by consulting with the State Historic Preservation Officer on the conduct of investigations, as necessary, to identify properties listed in or eligible for inclusion in the National Register of Historic Places that are subject to adverse effects (see 36 CFR 800.0) by the activity, and notifying the Grantor to avoid or mitigate adverse effects upon such properties.

6. The State will comply with the minimum wage and maximum hours provisions of the Federal Fair Labor Standards Act, 29 U.S.C. 201 *et seq.*

F. Conflict of Interests

1. The State will establish safeguards to prohibit its employees from using their positions for a purpose that is or gives the appearance of being motivated by a desire for private gain for themselves or others, particularly those with whom they have family, business, or other ties.

G. Hatch Act

1. The State will comply with the provisions of the Hatch Act which provides that no officer or employee of the State whose principal employment is in connection with any activity which is financed in whole or in part pursuant to this agreement shall take part in any of the political activity prescribed in the Hatch Political Activity Act, 5 U.S.C. 118k (1964), with the exceptions therein enumerated.

H. Grant Administration Costs

1. Grant administration costs eligible for assistance shall not exceed 5 percent of the total grant.

I. Project Administration

1. The State shall promptly submit such reports and documentation as the Director may request.

2. Any monies advanced to the State under this agreement are "public monies" (owned by the Federal Government) and shall be deposited in a bank with FDIC insurance coverage and the balances exceeding the FDIC coverage shall be collaterally secured as provided for in 12 U.S.C. 265.

3. The State shall use any funds received by way of advance payment from the United States under the terms of this agreement solely for the purposes described in this agreement.

4. Properties rehabilitated or developed with funds made available under this agreement shall be available for inspection by the Grantor at such intervals as the Director shall require.

5. Recipients and secondary recipients shall not have Federal cash balances on which to draw interest. Any and all interest earned on Federal dollars must be returned to SBA withing 30 days of the end of the budget period of this grant.

6. Problems or questions relating to payment under this agreement should be directed to: Grants Management Officer, Room 219, U.S. Small Business Administration, 1441 L Street N.W., Washington, DC 20416, (202) 653–7744.

7. Financial reports in original and one copy, will be submitted to the Grants Management Officer, at the above address.

Reports of Federal Cash Transaction will be submitted on Standard Form 272 and Financial Status Reports shall be submitted on Standard Form 269.

Financial reports shall be furnished no later than 30 days after the end of the project period.

8. Performance reports shall be furnished to the Director no later than 30 days after the end of the project period.

Performance reports shall contain the following data:

(1) The total amount of grant funds expended for supplies purchased from qualified small businesses.

(2) The number of contracts awarded to qualified small businesses and the total dollar value of these contracts.

(3) The number of unemployed individuals that were employed directly by the State or subdivision or by a contractor with proceeds of the grant. The total dollars expended for this employment.

(4) A brief statement highlighting the improvements accomplished with the grant.

J. Retention and Custodial Requirements for Records

1. Financial records, supporting documents, statistical records, and all other records pertinent to this grant shall be retained for a period of three years; except the records shall be retained beyond the three-year period if audit findings have not been resolved.

2. The retention period starts from the date of the final expenditure report for the project.

3. State and local governments are authorized to substitute microfilm copies in lieu of original records.

4. The State will give the Grantor or the Comptroller General through any authorized representative access to and opportunity to examine all records, books, papers, or documents related to the grant.

Part IV—Special Provisions

A. Disputes

1. Except as otherwise provided by law or regulations, any dispute arising under this grant shall be decided by the Grants Management Officer (GMO), who shall reduce his decision to writing and mail or otherwise furnish a copy thereof to the State. Such a decision of the GMO shall be final and conclusive unless, within thirty (30) days from the date of receipt of such copy, the State otherwise delivers to the GMO a written appeal.

2. The GMO shall supply such appeal to the Administrator or his delegatee for adjudication. The decision of the Administrator concerning such appeal shall be final and conclusive unless determined by a court of competent jurisdiction to have been fraudulent or capricious, arbitrary, or so grossly erroneous as to imply bad faith, or not supported by substantial evidence.

3. In connection with an appeal proceeding under this article, the State shall be afforded an opportunity to be heard, to be present, to offer evidence and testimony in support of any appeal, to cross-examine Government witnesses and to examine documentation or exhibits offered in evidence by the Government or admitted to the appeal record (subject to the Government's right to offer its own evidence and testimony, to cross-examine the appellant's witnesses, and to examine documentation or exhibits offered in evidence by the appellant or admitted to the appeal record). The appeal shall be determined solely upon the appeal record.

4. This "Disputes" article shall not preclude consideration of any question of law in connection with decisions provided for by this article; provided, that nothing in this award document or related materials shall be considered as making final the decision of any administrative official, representative, or Board, on a question of law.

B. Project or Grant Termination

1. The Grants Management Officer may require the State to temporarily suspend assistance made available under this agreement to a project being funded therewith pending corrective action by the State of a violation of the terms of this agreement or pending a decision to terminate the project by the State.

2. The Grants Management Officer may terminate the grant in whole, or in part, at any time before the date of completion, whenever it is determined that the Grantee has failed to comply with the conditions of this grant agreement. The Grants Management Officer will promptly notify the State in writing of the determination and the reasons for the termination, together with the effective date. Payments made to States or recoveries by the Grantor under projects

terminated for cause shall be in accord with the legal rights and liabilities of the parties.

In witness whereof, the parties hereto have executed this agreement as of the date entered below.

VETERANS ADMINISTRATION

Advisory Committee on the Readjustment Problems of Vietnam Veterans; Establishment

In accordance with the provisions of the Federal Advisory Committee Act (Pub. L. 92-463) and Office of Management and Budget Circular A-63, as revised, and after consultation with the Administrator, General Services Administration, the Administrator, Veterans Administration has determined that establishment of the Advisory Committee on the Readjustment Problems of Vietnam Veterans is necessary and in the public interest in connection with the performance of duties imposed on the Veterans Administration by law.

The committee has been established to assemble and analyze ongoing research and clinical experience in order to assist in the formation of appropriate policy and organizational structures. In addition, the Veterans Administration is now faced with the challenge of reexamining preexisting service structures and determining how similar psychosocial readjustment difficulties of veterans during a post-war period might be met in the future. The Committee will be composed of authorities drawn from three major categories: (1) Recognized experts, both research and clinical, in the field, (2) national veterans service organization specialists and (3) individuals representing a cadre of training facilities. This diverse group will permit the VA to obtain a balanced representation of relevant viewpoints.

Comments of interested persons concerning the establishment of this Committee may be submitted to Arthur S. Blank, Jr., M.D., Director, Readjustment Counseling Service, (11RC), Veterans Administration Central Office, 810 Vermont Avenue, NW., Washington, D.C., 20420; Phone (202) 389-5419.

Dated: April 13, 1983.

By direction of the Administrator.

Rosa Maria Fontanez,
Committee Management Officer.

2

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

DATE AND TIME: 9:30 a.m. (eastern time), Tuesday, April 26, 1983.

PLACE: Commission Conference Room No. 200, second floor, Columbia Plaza Office Building, 2401 E Street NW., Washington, DC. 20506.

STATUS: Part will be open to the public and part will be closed to the public.

MATTERS TO BE CONSIDERED:

1. Ratification of Notation Vote/s.
2. A Report on Commission Operations (Optional).
3. Freedom of Information Act Appeal No. 83–1–FOIA–1–SF, concerning a request for the contents of an open Commissioner's charge file.
4. Freedom of Information Act Appeal Nos. 82–02–FOIA–014–MK, 015–MK, concerning a request for the contents of Title VII charge files.
5. Freedom of Information Act Appeal No. 82–8–FOIA–143–NY, concerning a request for confidential witness statements from a closed age discrimination charge file.

Closed:

1. Litigation Authorization; General Counsel Recommendations.
2. Proposed withdrawal of certain charges.
3. Discussion of DOL's Proposed Airline Employee Protection Regulations.

Note.—Any matter not discussed or concluded may be carried over to a later meeting. (In addition to publishing notices on EEOC Commission meetings in the **Federal Register**, the Commission also provided recorded announcements a full week in advance on future Commission sessions. Please telephone (202) 634–6748 at all times for information on these meetings.)

CONTACT PERSON FOR MORE INFORMATION: Treva McCall, Executive Secretary to the Commission at (202) 634–6748.

3

FEDERAL DEPOSIT INSURANCE CORPORATION

Changes in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its open meeting held at 2:00 p.m. on Monday, April 18, 1983, the Corporation's Board of Directors determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C. T. Conover (Comptroller of the Currency), that Corporation business required the withdrawal from the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matter:

Recommendation regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:
Case No. 45,658–NR: United States National Bank, San Diego, California

The Board further determined, by the same majority vote, that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matter:

Recommendation regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:
Case No. 45,670–L: Newport Harbour National Bank, Newport Beach, California

By the same majority vote, the Board further determined that no earlier notice of the changes in the subject matter of the meeting was practicable.

Dated: April 18, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,
Executive Secretary.

BILLING CODE 6714–01–M

4

FEDERAL DEPOSIT INSURANCE CORPORATION

Changes in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its closed meeting held at 2:30 p.m. on Monday, April 18, 1983, the Corporation's Board of Directors determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C. T. Conover (Comptroller of the Currency), that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matters:

Application of First American Bank for Savings, Boston, Massachusetts, an insured mutual savings bank, for consent to acquire the assets of and assume the liability to pay deposits made in Workingmen's Co-Operative Bank, Boston, Massachusetts, a non-federally-insured institution, and to establish the eight existing offices of Workingmen's Co-Operative Bank as

branches of First American Bank for Savings.

Recommendation regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 45,068–L: American City Bank & Trust Company, National Association, Milwaukee, Wisconsin

The Board further determined, by the same majority vote, that no earlier notice of the changes in the subject matter of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: April 18, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

5

FEDERAL ENERGY REGULATORY COMMISSION

Notice of Meeting

April 18, 1983.

TIME AND DATE: 10 a.m., April 25, 1983.

PLACE: Room 9310, 825 North Capitol Street, NE., Washington, D.C. 20426.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

(1) *Utah Power & Light Co., et al.* v. *FERC* S.Ct. No. 82–1312.

(2) McDowell County Consumers Council Inc. v. American Electric Power Co., *et al.*, Docket No. E–9206.

CONTACT PERSON FOR MORE INFORMATION: Kenneth F. Plumb, Secretary, Telephone (202) 357–8400.

Federal Energy Regulatory Commission

Certification

I hereby certify that, in my opinion, Commission deliberations concerning *Utah Power and Light Co., et al.* v. *FERC*, S.Ct. No 82–1312, scheduled on April 25, 1983, (and any subsequent meetings on the same matter that qualify under 18 CFR 375.206(a)) may properly be closed to public observation.

Discussions are likely to involve the agency's participation in a civil action.

The relevant exemptions on which this certification is based are set forth in the following provisions of law:

Section 552b(c) of Title 5 of the United States Code	Section 375.205(a) of Title 18 of the Code of Federal Regulations
(10)	(10)

Dated: April 13, 1983.

Charles A. Moore,

General Counsel.

Federal Energy Regulatory Commission

Certification

I hereby certify that, in may opinion, Commission deliberations concerning *McDowell County Consumers Council Inc.* v. *American Electric Power Co., et al.*, Docket No. E–9206, scheduled on April 25, 1983, [and any subsequent meetings on the same matter that qualify under 18 C.F.R. § 385.206(a)] may properly be closed to public observation.

Discussions are likely to disclose information the premature disclosure of which would be likely to significantly furstrate implementation of a proposed agency action. Discussions are also likely specifically to concern the conduct by the agency of a particular case involving a determination on the record after opportunity for hearing.

The relevant exemptions on which this certification is based are set forth in the following provisions of law:

Section 552b(c) of Title 5 of the United States Code	Section 375.205(a) of Title 18 of the Code of Federal Regulations
(9)(B), (10)	(9) (ii), (10)(ii)

Dated: April 14, 1983.

Carles A. Moore,

General Counsel.

SECURITIES AND EXCHANGE COMMISSION

Notice is herby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meetings during the week of April 25, 1983, at 450 5th Street, N.W., Washington, D.C.

Closed meetings will be held on Tuesday, April 26, 1983, at 10 a.m., following the 2:30 p.m. open meeting and on Thursday, April 28, 1983, at 10 a.m. An open meeting will be held on Tuesday, April 26, 1983, at 2:30 p.m.

The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meetings. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meetings may be considered pursuant to one or more of the exemptions set forth in 5

U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10).

Chairman Shad and Commissioners Evans, Longstreth and Treadway voted to consider the items listed for the closed meetings in closed session.

The subject matter of the closed meeting scheduled for Tuesday, April 26, at 10 a.m., will be:

Access to investigative files by Federal, State, or Self-regulatory authorities.
Settlement of administrative proceeding for and enforcement nature.
Formal order of investigation.
Institution of injunctive actions.
Litigation matter.

The subject matter of the closed meeting scheduled for Tuesday, April 26, 1983, following the 2:30 p.m., will be:

Post oral argument discussion.

The subject matter of the closed meeting scheduled for Thursday, April 28, 1983, at 10 a.m., will be:

Institution of injunctive actions.

The subject matter of the open meeting scheduled for Tuesday, April 26, 1983, at 2:30 p.m., will be:

Oral argument on an appeal by Henry Leroy Heybrock and Richard O. White from the initial decision of an administrative law judge. For further information, please contact R. Moshe Simon at (202) 272–7400.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Steve Boehm at (202) 272–2467.

Part II

Department of Labor

Employment and Training Administration

Civil Jurisdictions Classified as High Unemployment Areas Under Public Law 98-8

DEPARTMENT OF LABOR

Employment and Training Administration

Civil Jurisdictions Classified as High Unemployment Areas Under Public Law 98–8

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

DATE: This list is effective April 23, 1983.

SUMMARY: The Employment and Training Administration is announcing the list of civil jurisdictions classified by the Assistant Secretary as having high unemployment, pursuant to Public Law 98–8.

FOR FURTHER INFORMATION CONTACT: Mr. Richard C. Gilliland, Director, United States Employment Service, Employment and Training Administration, Room 8000, 601 D Street, NW., Washington, D.C. 20213. Telephone 202–376–6289.

SUPPLEMENTARY INFORMATION: Section 101(a)(3) of Pub. L. 98–8. 97 Stat. 13 (March 24, 1983), (the "Act") requires the Assistant Secretary for Employment and Training, United States Department of Labor, to

classify a civil jurisdiction as having high unemployment whenever, as determined by the Bureau of Labor Statistics using the latest comparable data available from Departmental, State, or local sources, the civil jurisdiction has had an average unadjusted employment rate over the previous twelve months of not less than ninety percent of the unadjusted average unemployment rate for all States during the same period. The Assistant Secretary, upon petition submitted by the appropriate State agency, may classify a civil jurisdiction as having high unemployment whenever the civil jurisdiction has experienced or is about to experience a sudden economic dislocation resulting in job loss that is significant both in terms of the number of jobs eliminated and the effect upon the employment rate of the area.

97 Stat. at 29–30. Section 101(a)(3) of the Act further requires the Assistant Secretary to publish a list of civil jurisdictions with high unemployment, together with descriptions thereof, as soon as practicable, but no later than 30 days after the date of enactment of the Act. 97 Stat. at 30. That list is published below. The list will be updated on a monthly basis hereafter, by adding civil jurisdictions that the Assistant Secretary deems to meet the above criteria. *id.*

Signed at Washington, D.C., this 19th day of April, 1983.

Albert Angrisani,

Assistant Secretary of Labor.

BILLING CODE 4510-30-M

Department of Labor

Employment Standards Administration
Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and Supersedeas Decisions to General Wage Determination Decisions

Modifications and supersedeas decisions to general wage determination decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the modifications and supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing general wage determination decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and supersedeas decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Office of Government Contract Wage Standards, Division of Government Contract Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Determination Decision.

Modifications to General Wage Determination Decisions

The numbers of the decisions being modified and their dates of publication in the **Federal Register** are listed with each State.

SUPERSEDEAS DECISION

STATE: Indiana
DECISION NUMBER: IN83-2031
COUNTIES: *See below
DATE: Date of Publication
Supersedes Decision No.: IN80-2015, dated April 11, 1980 in 45 FR 24985
DESCRIPTION OF WORK: Heavy and Highway Construction Projects

POWER EQUIPMENT OPERATORS: Classification Definitions.

Group I - Crane or derrick oper., clam shell oper., dragline oper., piledriver oper. including auger & boring machine oper. for drilling in piling, backhoe oper., hydra crane oper., gradall oper., shovel oper., patrol oper., cable ways oper., tugboat captain (150 hp or more), bulti-bowl oper. (similar to R.G. LaTourneau Model L-60-2 or 3 twenty cubic yard scrapers), side boom cat oper., multi-drum hoist oper. for rigging work, mechanic (heavy equipment), tower crane oper. (stationary, climbing, & travelling), gantry crane oper., locomotive crane oper., bridge crane oper (over 20 ton capacity), concrete pump w/boom (mobile) oper., high lift or forklift oper.(10 ft or higher).

Group II - Bulldozer, bridge crane (25 tons & under), highlift or forklift (less than 10 ft), straddle buggy,hoist (other than rigging work) including winch truck oper. where winch truck is not mobile & used as a hoist, trenching machine, (ladder & wheel type) over 6 ft cut & over 24 inches in width, concrete paver, scraper, front end loader, fireman-floating equipment, mobile winch truck, self-propelled sub-grader, asphalt paving machine, lubricating engineer (mobile plant, pavement breaker.

Group III - Tractor operated sweeper, trenching machine (ladder & wheel type) maximum cut 6 ft & maximum width 24 inches fireman, self-propelled roller, wellpoint pump & supervise installation(one operator for 3 pumps, not including standby units, w/in 300 ft radius),asphalt distributor, water truck driver, motor boat, oiler, pumpman (other than wellpoint) up to & including pumps w/in 300 ft radius, conveyor (motor operated), welding machine (3 or more combustion type), pulver mixer, compressor (from 1 up to & including 3 compressors) w/in 300 ft. radius, self-propelled sweeper, combination pump, compressor& combustion type welding machine, (any group of 3 units) with 300 ft radius, concrete mixer, concrete pump, tractor, street sweeping machine.

FOOTNOTE:
a. Six Paid Holidays: New Year's Day,Memorial Day, Independence Day, Labor Day, Thanksgiving Day, & Christmas Day.

Employer contributes 6% of regular hourly rate to vacation pay credit for employee who has worked in business less than 5 years; 8% for employee who has worked in business more than 5 years.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5 (a)(1)(ii)).

SUPERSEDEAS DECISION

STATE: Indiana COUNTIES: *See below
DECISION NUMBER: IN83-2031 DATE: Date of Publication
Supersedes Decision No.: IN80-2015, dated April 11, 1980 in 45 FR 24985
DESCRIPTION OF WORK: Heavy and Highway Construction Projects

*Statewide, except Lake, LaPorte, Porter and St. Joseph Counties

AREA DESCRIPTIONS

CARPENTERS

Area 1 - Jasper, Newton, & Starke Counties
Area 2 - Adams, Benton, Carroll, Cass, Clinton, Elkhart Fulton, Grant, Howard, Huntington, Kosciusko, Marshall, Miami, Pulaski, Tippecanoe, Tipton, Wabash, Wells & White Counties
Area 3 - Boone, Fountain, Hamilton, Hancock, Hendricks, Johnson, Marion, Montgomery, Morgan, Parke, Putnam, Vermillion (North of Clinton) & Warren Counties
Area 4 - Clay, Daviess, Gibson, Greene, Knox, Lawrence, Martin, Monroe, Orange, Owen, Sullivan, Vermillion (Remainder of Co.), & Vigo Counties
Area 5 - Remainder of Counties

CEMENT MASONS

Area 1 - Adams, Allen, DeKlab, Noble, Steuben & Whitley Counties
Area 2 - Elkhart, Lagrange & Kosciusko Counties
Area 3 - Blackford, Delaware, Grant, Huntington, Jay, Randolph Wabash & Wells Counties
Area 4 - Decatur, Fayette, Franklin , Rush, Union and Wayne Cos.
Area 5 - Barthalomew, Brown, Dearborn, Jackson, Jefferson, Jennings, Lawrence, Ohio, Orange, Ripley, Scott, Shelby, Switzerland and Washington Counties
Area 6 - Clark, Floyd and Harrison Counties
Area 7 - Crawford, Dubois, Perry, Posey, Spencer, Vanderburgh & Warrick Counties
Area 8 - Daviess, Gibson, Knox, Martin & Pike Counties
Area 9 - Green & Sullivan Counties
Area 10 - Clay, Owen (S. W. Pan handle only), Park, Putnam, Vermillion & Vigo Counties
Area 11 - Monroe, Morgan (S½) and Remainder of Owen Counties
Area 12 - Boone, Hamilton (S½ N. to Rte Ind 32 incl. Noblesville) Hancock (S. W. Corner N to but not including Wilkinson and E. to but not including Fortville), Hendricks, Johnson, Marion and Morgan (N½) Cos.
Area 13 - Hamilton, Hancock (Remainder of Co.). Henry, Madison & Tipton Counties
Area 14 - Benton (E. 2/3) , Carroll, Cass, Clinton, Fountain (E½), Howard, Miami, Montgomery, Tippecanoe, Warren (NE 1/3) & White Counties
Area 15 - Remainder of Benton, Fountain & Warren Counties
Area 16 - Fulton, Marshall and Pulaski (S½) Counties
Area 17 - Jasper (N.E. portion W. to but not including Westfield), Pulaski (N ½) & Starke Counties
Area 18 - Jasper (S½) and Newton Counties

LINE CONSTRUCTION

Area 1 - Clark, Floyd, Harrison, Jackson, Jefferson, Scott & Washington Counties
Area 2 - Crawford, Dubois, Gibson, Perry, Pike, Posey, Spencer, Vanderburgh & Warrick Counties
Ares 3 - Newton County
Area 4 - Remainder of Counties

DECISION NO. IN83-2031

CLASSIFICATION DEFINITIONS

LABORERS

Group 1 - Construction Laborer, Carpenter Tender, Fence Erector, Grade Checker, Guard Rail Erector, Continuous Steel Rod or Mat Installer, Wire Mesh Layer, Joint Man (Mortar, Mastic, and all other types), Lighting Installer (Permanent or Temporary), Lineman for Automatic Grade Maker on Paving Machines, Mortar Man, Multi- Plate Erector, Rip-Rap Installer (All products and matertials),Road Marking and Delineation Laborer, Setting and Placing of all Precast Concrete Products, Sign Installation including supporting structure, Spraying of all Epoxy, Curing Compound, or like material

Group 2 - Air Tool, Power Tool, and Power Equipment Operator, Asphalt Lute Man, Asphalt Raker Man, Batch Truck Dumper, Bridge Hand Rail Erector, Handler (Bulk or Bag Cement), Chain Saw Man, Concrete Puddler, Concrete Rubber, Concrete Saw Operator, Core Drill Operator, Eye Level, Hand Blade Operator, Hydro Seeder Man, Motor Driven Georgia Buggy Operator, Power Driven Compactor or Tamper Operator, Power Saw Operator, Pumcrete Assembly Man, screed Man or screw Man on Asphalt Paver, Rebar Installer, Sand blaster Man, Sealer applicator for asphalt, (toxic), Setting and Placing Prestressed on Precast Concrete Structural Members, Side Rail Setter (for Sidewalks, Side Ditches, Radii, and Pavements), Spreader Box Tender (Manual or Power Driven), Straw Blower Man, Subsurface Drain and Culvert Pipe Layer, transverse and Longitudinal Hand Bull Float Man

Group 3 - Horizontal Boring and Jacking Man, Jackman and Sheetman, Pipe Grade Man, winch and Windlass Operator

Group 4 - Conduit Installer, Cutting Torch Burner, Laser Beam, Aligner, Manhole Erector, Sewer Pipe Layer, Water Line Installer - Temporary or Permanent, Welders (Electric or Oxy-Acetylene)

Group 5 - Air Track and Wagon Drillman, Concrete Finisher, Dynamite and Powder Man, General Laborer Leadman

POWER EQUIPMENT OPERATORS

AREA 1

Group 1 - Air Compresor in Manifold with throttle valve, Asphalt Plant Engineer, Auto Grade or similar type machine, Auto Patrol, Backhoe - All, Ballast Regulator (R.R.), Bituminous Mixer, Bituminous Paver, Bituminous Plant Engineer, Bulldozer, Caisson Drilling Machine, Cherry Picker - all, Chip Spreader - Self-propelled, Cold Grinder or similar type equipment, Concrete Mixer - 21. cu. ft. or over, Concrete Pump - Truck mounted, Core Drilling Machine, crane or Derrick with any attachment (including Clamshell Dragline, Shovel, Backhoe, etc.), Dredge Operator, Drilling Machine on which the drill is an integral part, Earth Mover - rubber tires - (paddle wheel 619 631, TS-24, or similar type), Earth Mover - rubber tired (tandem 50: per hour additional), Elevating Grader, Endloader - hilift Shovel, P.C.C. Formless Paver, Gradall, Gravel Processing Plant-portable,

DECISION NO. IN83-2031

CLASSIFICATIONS DEFINITIONS (CONT'D)

POWER EQUIPMENT OPERATORS AREA 1 (CONT'D)

Guardrail Post Driver Operator, Head Greaser, Hilift Shovel-Endloader, Hoist (2 drums and over), Helicopter - Crew, Hydraulic Boom Truck, Keystone (Skimmer Scoop), Loader Self-propelled (belt-chain wheel), Locomotive Operator, Mechanic, Mucking Machine, Multi-bank Drill Operator, Panel Board Concrete Plant - central, mix type, Paver - Hetherington, Pile Driver-skid or crawler, Road Paving Mixer, Rock Breaking Plant, Rock Crushing Plant-portable, Roller (Aspalt, Waterbound, Macadam, Bituminous Macadam, Brick Surface), Roller - with dozer blade, Root Rake - Tractor mounted, Stump Remover-tractor mounted, Surface Heater and Planer, Tandem Push Tractor - 50¢ per hour additional, Tractor - boom winch or Hoe head, Tractor - Push, Tractor with scoop, Tractor Mounted Spreader, Tree Mover, Trench Machine (over 24"), Tug Boat Operator, Welder, Well Drilling Machine

Group 2 - Air compressor with throttle valve or Clever Brmoks type comb., Backfiller, Base Paver - Jersey or simillar type machine, Bull Float, Concrete Finishing Machine, Concrete Mesh Depressor-independently operated, Concrete Spreader - Power Driven, Dredge Engineer, Excavator Loader-portable, Fireman - on Boiler, Fork-lift - regardless of ton, Hoists - 1- drum, Mesh or Steel Placer, Minor Equipent Operator - 5 pieces, Multiple Tamping Machine (R.R.) P.C.C. Concrete Placer, Paving Breaker, Power Broom-Self-propelled, Pull Grader-Power Controlled, Refrigerating Machine- freezing Operation, Roller - earth and sub-base material, Ross Carrier (straddle buggy), Sheepfoot Roller-self-propelled without blade, Tamper - Multiple Vibrating (Asphalt Waterbound Macadam, Bituminous Macadam, Brick Surface) Tamper-Multiple Vibrating (Earth and Sub-Base Material), Trench Machine-24" and under, Tube Float, Well Point-System, Widener - Apsco or similar type, Winch Truck with A Frame

Group 3 - Air Compressor, Assistant to Engineer - Oiler, Assistant Plant Engineer, Automatic Dry Batch Plant, Bituminous Distributor, Bituminous Patching Tamper, Belt Spreader, Broom and Belt Machine, Brush Burner, Chair Cart - Self-propelled, Coleman Type Screen, Cold Grunder Oiler, Concrete Mixer - less than 21 cu. ft., Conveyor-portable, Curb Machine, Deckhand, Digger (Post Hole, power driven), Farm Tractor - inc. farm tractor with all atachments (except backhoe, Hilift Endloaders), Form Grader, Form Tamper-Motor Driven, Generator, Gunite Machine, Hetherington Driver, Hetherington Helper, Hydra Seeder, Mechanic's Helper, Mechanical Heater, Minor Equipment Operator-1 thru 4 pieces, Outboard or Inboard Motor Boat, Power Curing Spraying Machine, Power Saw - Concrete (Power Driven), Pug Mill Pull Broom-Power type, Seaman Tiller, Slurry Seal Machine, Spike Machine, Straw Blower or Brush Mulcher, Striping Machine (Paint, Motor Driven), Sub Grader, Trottle Valve, Tractaire with Drill, Truck Crane and Multi-Drill Oiler-Driver, Spreader, Water Pump

CLASSIFICATION DEFINITIONS (CONT'D)

UMI 1983 APR 22 ISS 79 VOL 48 4

DECISION NO. IN83-2031

CLASSIFICATIONS DEFINITIONS (CONT'D)

POWER EQUIPMENT OPERATORS - AREAS 2 and 3

Group 1 - Air Compressors in Manifold with throttle valve, Asphalt Plant Engineer, Auto Grade or similar type machine, Auto Patrol, Backhoe on Farm Type Tractor 45 H. P. & over, Ballast Regulator (R.R.), Bituminous Mixer, Bituminous Paver, Bituminous Plant Engineer, Bull Dozer, Caisson Drilling Machine, Cherry Picker - 15 ton or over, Chip Spreader, Concrete Mixer 21. cu. ft. or over, Core Drilling Machine, Crane or Derrick with any Attachment (incl. Clamshell, Dragline, Shovel, Backhoe, etc.), Dredge Engineer, Dredge Operator, Drilling Machine on which the drill is an integral part, Earth Mover-rubber tired (paddle wheel, 619, 631, TS-24 or similar type), Earth Mover-rubber tired-tandem (50 cents per hr. add'l. for each bowl), Elevating Grader, Fork Lift (10 ton or over), P.C.C. Formless Paver, Gradall, Gravel Processing Plant (portable), Operator of Guard Rail Post Driver, Highlfit Shovel - 1¼ cu. yd. or over, Hoist (2 drums and over), Helicopter-Crew, Hydraulic boom Truck, Keystone (Skimmer Scoop), Loader-Self-propelled (Belt-Chain-Wheel), Locomotive Operator, Mechanic, Mucking Machine, Panel board Concrete Plant (central mix type), Paver - Hetherington, Pile Driver-Skid or Crawler, Road Paving Mixer, Rock Breaking Plant, Rock Crushing Plant (Portable), Roller (Asphalt, Waterbound Macadam, Bituminous Macadam, Brick Surface), Roller Dith dozer Blade, Root Rake-Tractor Mounted, Self-propelled Widener, Stump Remover-Tractor Mounted, Surface Heater & Planer, Tandem Push Tractor (50 cents per hr. additional), Tractor Boom, winch or Hoe Head) Tractor - Push, Tractor with Scoop, Tractor Mounted Spreader, Tree Mover, Trench Machine (over 24"), Tug Boat Operator, Well Drilling Machine, Winch Truck with A Frame

Group 2 - Air compressor with Throttle Valve or Clever Brooks type Comb.; Backfiller, Backhoe on Farm Type Tractor under 45 H.P., Bull Float, Cherry Picker under 15 ton, Chip Spreader (self-propelled), Concrete Pump, Concrete Mesh Depressor-Independently operated, Concrete Spreader - Power Driven, End Loader under 1½ cu. yd., Excavating Loader - Portable, Finishing Machine and Bull Float, Gunite Machine, Head Greaser, Mesh or Steel Placer, Multiple Tamping Machine (R.R.), P.C.C. Concrete Belt Placer Bull Grader - Power Control, Refrigerating Machine - Freezing operation, Ross Carrier, Sheepfoot Roller (self-propelled), Tamper (Multiple Vibrating - Asphalt, Waterbound Macadam, Bituminous Macadam, Brick Surface), Trench Machine 24" and under, Tube Float, Welder

Group 3 - Assistant Plant Engineer, Base Paver (Jersey or similar type machine), Concrete Finishing Machine, Concrete Mixer - less than 21 cu. ft., Curb Machine, Farm Tractor (incl. Farm TRactor with all

DECISION NO. IN83-2031

CLASSIFICATION DEFINITIONS (CONT'D)

POWER EQUIPMENT OPERATORS AREAS 2 and 3 (CONT'D)

attachments except backhoe and incl. high lift end loaders of 1 cu. yd. capacity or less), Fireman (on boiler), Hoist (one drum), Operator-5 pieces of minor equip., Paving Breaker, Power Broom-Self-propelled, Roller (Earth & Sub-base material), Slurry Seal Machine, Spike Machine (R.R.), Tamper (Multiple Vibrating - Earth and Sub-base material), Throttle Valve, Throttle Valve and Fireman combination on horizontal or upright boiler, Tractaire with Drill, Tractor - 50 H.P. or over, Well Point System, Widener (Apsco or similar type)

Group 4 - Air Compressor, Assistant to Engineer - Oiler, Automatic Dry Batch Plant, Bituminous Patching Tamper, Belt Spreader, Broom & Belt Machine, Chair Cart (Self-propelled), Coleman Type Screen, Conveyor (portable), Deck Hand, Digger Post Hole (Power-Driven), Fork Lift - under 10 ton, Form Grader, Form Tamper (Motor-driven), Generator, Greaser Helper, Hetherington Driver, Hetherington Helper, Hydra Seeder, Mechanics Helper, Mechanical Heater, Operator-1 thru 4 pcs. of minor equip., Outboard or Inboard Motor Boat, Power Curing Spraying Machine, Power Saw - Concrete (power driven), Pug Mill, Pull Broom (Power Type), Seaman Tiller, Straw Blower or Brush Mulcher, Striping Machine-Paint (Motor-driven) Sub Grader, tractaire, Tractor (below 50 H.P.), Truck Crane Oiler - Driver, Spreader, Water Pump, Welding Machine - 2 of 300 amps or over

AREA 4

Group 1 - Air Compressors (2), Compressors hooked in Manifold, Asphalt Plant Engineer, auto grade and/or C.M.I. or similar type Machine, Auto Patrol, Motor Patrol, Power Blade, Apsco Paver, Asphalt Planer, Asphalt Rollers, Asphalt Paver Operator, Milling Machine, Self-Propelled Widener, Backhoe and/or Pavement Breaker Attachment, Self-Propelled Pavement Breaker, Ballast Regulator (R.R.), Bituminous Mixer, Bituminous Paver, Bituminous Plant Engineer, Bulldozer, One Drum Hoist with Tower or Boom, Cableways, Tower Machines, Backfiller, Boom Tractor, Boon or Winch Truck, Winch or Hydraulic Boom Truck, Boring Machine, Boiler Operator, Bruch Mulcher, Bull Float, Finishing Machine, Power Cranes, Overhead Cranes, Truck Cranes, Piledriver, Skid or Crawler, Guard Rail Post Driver, Tower Cranes, Hydro Crane, Cherry Picker, Draglines, Derricks, Shovels, Clam, Gradalls, Two Drum Machine, Concrete Mixers with Skip, Tournamixer, Concrete Pump (Truck or skid Mounted), Concrete Plant Engineer, Soil Cement Machine, Formless Paver, Concrete Spreader, resco Concrete Saw, Chip Spreader, Mesh Placer, Dredgeing Equipment or Dredge Engineer or Dredge Operator, Tug Boat Operator, Marine Scoops, Ditching Machine with dual Attachment, Standard or Dinkey Locomotives, Drilling Machine including Well Testing, Ciassons, Shaft or any similar type Drilling Machines (Well Point Systems), Mud Cat, Mucking Machine, Sull-Air, Mechanics, Welder, Head Equipment Greaser, Tournapull, Tractor Operating Scoops, Push Tractors, Large Rollers

DECISION NO. IN8302931

POWER EQUIPMENT OPERATORS AREA 4 (CONT'D)

on Earth, Loaders (track or Rubber Mounted), or similar type Machine, Lull, Tournadozer, Scoopmobiles, Elevating Machines, Power Sub Grader, Hydra Ax, Farm Tractor with Attachments, Seaman Tiller, Tree Mover, Stump Remover, Root Rake, Hydra Seeder, Straw Blower, Refrigerating Machine, freezing Operator, Chair Cart - Self Propelled, Helicopter Crew (3), Ross Carrier or Straddle Buggy or similar Machine, Rock Crusher Plant, Gravel Processing Machine, Pipe Cleaning Machine, Pipe Wrapping Machine, Pipe Bending Machine, Pug Mill, Concrete Bump Grinder Machine, Power Curing Spray Machine,

Group 2 - Air Compressor 600 cu. ft. and under, Air Tugger, Air Valves or Steam Valves, Assistant Concrete Plant Engineer, Asphalt Plant Fireman, Bulk Cement Plant Equipment Greaser, Concrete Mixers without Skips, Curbing Machine, Concrete Saw (Self Propelled), Concrete and Blacktop Curb Machine, Conveyors, Cement Blimps, Ditching Machine under 6", Distributor Operator on Trucks, Deck Hands, Elevators when used for hoisting material, Engine Tenders, Fork Lift, Farm Tractor, Fireman, Fireman on Paint or Dope Pots, Form Tamper, Form Grader, Flex Plane, Generators (two to four), or Welding Machines or Water Pumps, within 400 feet, Gunite Machine, Greaser Helper, Machine Mounted Post Hole Digger, Mud Jack, One Drum Machines without Tower or Boom One Water Pump, Oilers, One Welding Machine, Outboard or Inboard Motor boat, Power Broom (Self Propelled), Pull Broom (Power Type), Syphons and Pulsometer, Switchman, Striping and or Painting Machine (motor driven), Slurry Seal Machine, Track Jack, Temporary Heat, Throttle Valve, Tube Float, Tractaire, Wagon Drill, Multiple Tamping Machine (R.R.), Spike Machine (R.R.), Mechanical Heaters, Brush Burner

DECISION NO. IN83-2031

POWER EQUIPMENT OPERATORS (CONT'D)

AREA 5

Group 1 - Auto Patrol - Maintainer, Automatic Dry Batch Plant, Automated Concrete Placer, Automated Sub-Grader, Automated Slip Form Paver, Automated Finish Machine, Combination Backhoe-Front Endloader Machine (½ cu. yd. Backhoe Bucket or over or with attachments), Combination Backhoe (1 cu. yd. backhoe bucket or over or with attachments), Ballast Regulator (R.R.), Belt Loader - Stationary, Boring Machine (road), Bulldozer, Concrete Mixer - 27 cu. ft. or over, Concrete Pump, Concrete Pump Truck Mounted, Concrete Breaker Truck Mounted, Concrete Breaker Self-Propelled, Core Drilling Machine, Cranes and Backhoes-all Attachments, Cranes-Hammerhead, Crater Crane, Derricks, Derricks Traveling, Dredge Engineer, Dredge Operator, Formless Curb and Gutter Machine 36 inches and over, Formless Curb and Gutter Machine under 36 inches, gradall and Machines of a like nature, Guard Rail Post Driver Truck mounted, Lead Greaser, Helicopters, Highlift Shovel 3 yds. and over, Hoist 1 Drum, Hoist 2 & 3 Drum, Hydraulic Power Units, Grouting - Pile Driving and extracting, Locomotive Operator, Mechanic - Welder, Mucking Machine, Panelboard Concrete Plant (Central Mix Type), Paver - Hetherington, Pile Driver Skid or Crawler, Road Paving Mixer, Rock Drill Crawler or Skid Rig, Rock Drill Truck Mounted, Ross Carrier, Roto Mill Grinder 36" and over, Roto Mill Grinder less than 36, Throttle Valve & Compressor or Clever Brooks Type Combination, Throttle Valve and Fireman Combination on Horizontal or Upright Boiler, Tournaull or similar type equipment, Tractor - boom, Tractor Drawn Belt Loader, Tractor Drawn Belt Loader with attached pusher Trench Machine, Tug Boat Operator, Wheel Excavator, Winch Truck with "A" Frame, Scoops, Tournapulls or similar types machines in tandem (Add $1.00 to Class 1 hourly rate for each machine attached thereto)

Group 2 - Combination Backhoe Front Endloader Machine with less than ½ cu. yd. backhoe bucket or with att., Bituminous Mixer, Bituminous Paver, Bituminous Plant Engineer, Bridge Deck Finisher , Concrete Mixer, less than 27 cu. ft., Greaser, Highlift Shovel under 3 cu. yds., Jersey Spreader or Base Paver, Pavement Bump Grinder (Self-Propelled), Roller Asphalt (Waterbound, Macadam, Bituminous Macadam, Brick Surface), Sheepfoot Roller (Self-Propelled) with blade, Surface Heater and Planer, Tamper (Multiple Vibrating, Asphalt Waterbound Macadam, Bituminous Macadam, Brick Surface), Tractor - Push, Tractor with Scoop, Widener - Aspco or similar type

Group 3 - Assistant Plant Engineer, Back Filler, Bituminous Distributor, Broom and Belt Machine, Bull Float, Concrete Finishing Machine Concrete Spreader-Power Driver, Digger-Post-Hole- Power Driven, Finishing Machine and Bull Float, Forklift, Form Grader, Form Tamper-Motor Driven, Multiple Tamping Machine, Paving Breaker, Roller-Earth & Subbase Material, Roller Sheepfoot (Self-Propelled), Sub-grader, Tamper-Multiple Vibrating-Earth and Subbase Material, Tractaire,

DEPARTMENT OF LABOR

Mine Safety and Health Administration

30 CFR Parts 55, 56, and 57

Safety Standards for Loading, Hauling, Dumping

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice of availability of preproposal draft.

SUMMARY: The Mine Safety and Health Administration (MSHA) has developed a preproposal draft of revisions to current loading, hauling, and dumping standards for the metal and nonmetal mining industry. MSHA seeks comment from all interested parties on the preproposal draft. Copies of the draft may be obtained by contacting the Agency.

DATE: Comments must be received on or before June 21, 1983.

ADDRESS: Send comments to the Office of Standards, Regulations, and Variances, MSHA, Room 631, Ballston Towers #3, 4015 Wilson Boulevard, Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey, Acting Director, Office of Standards, Regulations, and Variances, MSHA, (703) 235–1910.

SUPPLEMENTARY INFORMATION: On March 25, 1980, MSHA published an Advance Notice of Proposed Rulemaking (ANPRM) in the **Federal Register** (45 FR 19267) announcing its comprehensive review of existing metal and nonmetal mine safety and health standards in 30 CFR Parts 55, 56, and 57. The Agency is reviewing the standards to eliminate duplicative and unnecessary standards, provide alternative methods of compliance, reduce recordkeeping requirements, and upgrade provisions consistent with advances in mining technology.

MSHA believes this review will result in more effective regulations for assuring the safety and health of miners. The review is consistent with the specific goals of Executive Order 12291, the Regulatory Flexibility Act, and the Paperwork Reduction Act.

On November 20, 1981, MSHA published a subsequent ANPRM in the **Federal Register** (46 FR 57253) listing eight sections the Agency had selected for priority review. Standards related to loading, hauling, and dumping were included in the priority group.

On March 9, 1982, (47 FR 10190), MSHA published a notice in the **Federal Register** announcing public conferences to discuss issues related to the standards under priority review. The Section .9 conferences were concluded in April 1982. During the conferences many commenters requested that the Agency make available a preproposal draft of the standards under review before issuing a proposed rule.

MSHA has now completed development of the preproposal draft for Section .9. In addition to revising the substance of the existing standards, the Agency has reorganized Parts 55, 56, and 57 into a single Part 58. This reorganization would eliminate the current repetition of identical standards in the Code of Federal Regulations. The proposed revisions designate each standard as either "General" (G), applying to both surface and underground operations; or "Surface" (S), where the standard applies only to surface operations; or "Underground" (U), where standards are applicable only to underground situations. These designations ensure that the standards will apply only to the appropriate types of operations, thus eliminating unnecessary duplication. In addition, the standards in Section .9 have been reordered to provide more logical groupings and an index has been developed to enable ready reference between existing standard numbers and their new numerical designations.

The Agency requests comment on the substance of the preproposal standards, as well as on the reorganization of the standards. In addition, the Agency is interested in any economic data or other regulatory impact information commenters may wish to submit. A copy of the preproposal draft notice has been mailed to persons and organizations known to MSHA. A copy of the preproposal draft may be obtained by submitting a request to the address provided above. The draft document contains the Agency's recommended revisions, a comparison with existing provisions, and a summary explanation of the proposed changes.

Dated: April 19, 1983.

Thomas J. Shepich,

Deputy Assistant Secretary for Mine Safety and Health.

DEPARTMENT OF LABOR

Mine Safety and Health Administration

30 CFR Part 48

Training and Retraining of Miners; Extension of Comment Period

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice to extend period for public comment.

SUMMARY: The Mine Safety and Health Administration (MSHA) is extending the period for public comment regarding the Agency's review of the the training regulations in 30 CFR Part 48. The comment period is extended to June 17, 1983.

DATE: Written comments must be received on or before June 17, 1983.

ADDRESS: All comments should be sent to: Mine Safety and Health Administration, Office of Standards, Regulations and Variances, Room 631, 4015 Wilson Boulevard, Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey, Acting Director, Office of Standards, Regulations and Variances, MSHA, (703) 235–1910.

SUPPLEMENTARY INFORMATION: On March 18, 1983 (48 FR 11669), MSHA published an advance notice of proposed rulemaking inviting public participation in the early stages of the Agency's review of the training regulations in 30 CFR Part 48. The advance notice that appeared on March 18, 1983, inadvertently scheduled March 17, 1983 as the deadline for receipt of comments. On March 22, 1983 (48 FR 11957), the date was corrected to be May 17, 1983. Due to requests from the public, MSHA is extending the comment period to June 17, 1983. All interested members of the mining community are encouraged to submit comments prior to that date.

Dated: April 19, 1983.

Thomas J. Shepich,

Deputy Assistant Secretary for Mine Safety and Health.

Part VI

Department of Agriculture

Agricultural Stabilization and Conservation Service

Burley and Flue-Cured Tobaccos; Interim and Proposed Regulations

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

7 CFR Part 726

Burley Tobacco Marketing Quota Regulations

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Interim rule.

SUMMARY: The Agricultural Stabilization and Conservation Service is amending the regulations at 7 CFR Part 726 to implement the provisions of the No Net Cost Tobacco Program Act of 1982 (Pub. L. 97-218, 96 Stat. 197, approved July 20, 1982) with respect to the burley tobacco marketing quota program. The interim rule provides for restrictions with respect to the marketing of burley tobacco by producers, warehousemen and dealers.

DATES: Effective April 22, 1983. Comments must be received on or before June 21, 1983 in order to be assured of consideration.

ADDRESS: Send comments to the Director, Tobacco and Peanuts Division, ASCS, Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013. All written submissions made pursuant to this notice will be made available for public inspection in Room 5750 South Building, USDA, between the hours of 8:15 a.m. and 4:45 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Jack S. Forlines, Agricultural Program Specialist, Tobacco and Peanuts Division, USDA-ASCS, P.O. Box 2415, Washington, D.C. 20013. (202) 382-0200. The Final Regulatory Impact Analysis covering this interim rule will be available on request from Jack S. Forlines.

SUPPLEMENTARY INFORMATION: This interim rule has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Secretary's Memorandum 1512-1 and has been classified as "not major." It has been determined that this rule will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State or local governments, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The title and number of the Federal Assistance Program to which this rule applies are: Commodity Loan and Purchases; 10.051, as found in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to this interim rule since the Agricultural Stabilization and Conservation Service (ASCS) is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this rule.

This interim rule is necessary to implement the provisions of the No Net Cost Tobacco Program Act of 1982 (hereinafter referred to as the "Act"). The Act amends the Agricultural Act of 1949 and the Agricultural Adjustment Act of 1938 to provide for the operation of the tobacco price support and production adjustment program in such a manner as to result in "no net cost" to taxpayers, except for administrative expenses common to the operation of all price support programs. The Act makes other changes to strengthen the operation of the program. The major provisions of this interim rule are as follows:

(1) *Limitation on the sale of tobacco floor sweepings.* Effective for the 1982 and subsequent crops of burley tobacco, section 314A of the 1938 Act limits the allowable floor sweepings of burley tobacco which may be marketed by warehousemen without penalty to 0.24 percent times the total first sales of tobacco at auction for the season for the warehouse involved. Previously, this same limitation was set forth by regulation. However, section 314A also provides that the marketing of floor sweepings in excess of the allowable amount will result in a penalty of 150 percent of the average market price for burley tobacco for the immediately preceding marketing year.

(2) *Lien for payment of penalty.* The 1938 Act, as amended, provides for a statutory lien with respect to certain tobacco thus establishing a more efficient mechanism for collecting marketing penalties. If a marketing quota penalty is assessed, there shall be a lien in favor of the United States on the tobacco with respect to which the penalty is to be assessed and on any other tobacco subject to marketing quotas in which the person has an interest until the penalty is paid. Currently, penalties which are reduced to a claim in favor of the United States are deductible only from the proceeds of tobacco which is pledged as collateral for a price support loan.

(3) *Penalties for marketing certain tobacco that is ineligible for price support.* Effective for any of the 1983 and subsequent crops of burley tobacco for which marketing quotas are in effect, producers shall be subject to a penalty with respect to any marketings of burley tobacco produced on a farm which is ineligible for price support because the farm operator or other producer on the farm has not agreed to contribute to the No Net Cost Tobacco Account. The penalty per pound will be equal to 75 percent of the preceding marketing year's average market price per pound for burley tobacco.

(4) *Warehouseman's records and reports.* This interim rule provides for minor changes in the burley tobacco regulations with respect to the records and reports of warehousemen. The most significant change is the requirement that a notation of "No Price Support" must be entered by the warehouseman on the basket ticket for each lot of tobacco which is identified with a marketing card bearing the same notation.

(5) *Dealer's records and reports.* This interim rule also provides for minor changes in the burley regulations with respect to the records and reports of dealers. The dealer shall make deductions for producer contributions to the No Net Cost Tobacco Account in accordance with the provisions of 7 CFR Part 1464. For the 1982-83 marketing year, the dealer shall deduct one cent per pound from the price paid to the producer in nonauction purchases, unless the purchase is identified with a marketing card bearing the notation "No Price Support." The amount of such deductions in subsequent marketing years will be announced by the Secretary.

(6) *Processing and storing 1982 crop carryover tobacco.* Because of generally favorable growing conditions, many burley tobacco producers have produced tobacco in excess of 110 percent of their effective quota. In the absence of a carryover program (i.e., a program whereby producers deliver their excess burley tobacco to a designated delivery point for processing and storage until the beginning of the next marketing year), many producers would be required to store the excess tobacco on their farms until the next marketing season. This interim rule authorizes the Burley Tobacco Growers Cooperative Association and the Burley Stabilization Corporation to process and store 1982 crop producer carryover tobacco and to act as the producer's marketing agent in marketing the tobacco in the 1983-84 marketing year. The handling of 1982 crop carryover tobacco is limited to the producer-owned and operated Burley

Tobacco Growers Cooperative Association and the Burley Stabilization Corporation to assure that the tobacco will be insulated from commercial trade channels and will not be marketed until the subsequent year.

(7) *Approval of transfers of quota by lease or sale.* This interim rule provides that if a claim for marketing quota penalty has been filed by ASCS against a lessor or seller, a lease or sale of quota by such lessor or seller will not be approved by the county committee until such time as the claim is satisfied or the proceeds from the lease or sale are applied against such claim.

Since producers, warehousemen, tobacco dealers and buying companies are currently involved in the purchase and sale of 1982 crop year burley tobacco, implementation of this rule must be made as soon as possible. Thus, it has been determined that this interim rule shall become effective upon publication in the **Federal Register** without prior opportunity for public comment. However, the public is invited to comment on this interim rule for a period of 60 days after the date of publication in the **Federal Register**. A final document discussing comments received and any amendments to this interim rule which may be deemed necessary will be published in the **Federal Register** as soon as possible.

List of Subjects in 7 CFR Part 726

Marketing quotas, Penalties, Reporting requirements, Tobacco.

Interim Rule

PART 726—[AMENDED]

Accordingly, 7 CFR Part 726 is amended as follows:

1. The table of contents is amended as follows:

Sec.

* * * * *

726.55 Determination of farm yields.

* * * * *

726.68 Transfer of tobacco marketing quotas by lease, by sale, or by owner.

* * * * *

726.80 Identification of tobacco subject to quota.

* * * * *

726.91 Lien for penalty.

* * * * *

726.100 Duties of Kansas City ASCS Field Office.

* * * * *

2. The authority citation is revised to read as follows:

Authority: Sec. 301, 313, 314, 314A, 316B, 317, 372–375, 377, 378, 52 Stat. 38, as amended, 47, as amended, 48, as amended, 96 Stat. 210, 215, 75 Stat. 469, as amended, 79 Stat. 66, 52 Stat. 63, as amended, 65–66, as amended, 70 Stat. 206, 7 U.S.C. 1301, 1313, 1314, 1314–1, 1314b–2, 1314c, 1363, 1372–1375, 1377, 1378, Sec. 401, 63 Stat. 1054, as amended, 7 U.S.C. 1421.

3. In § 726.51, the introductory paragraph is revised; paragraphs (a–1), (a–2), and (ii–1) are added; and paragraphs (g), (k)(1), (m)(1), (o), (r), and (ff)(2) are revised to read as follows:

§ 726.51 Definitions.

In determining the meaning of the provisions of this subpart, unless the context indicates otherwise, words importing the singular include and apply to several persons or things, words importing the plural include the singular, words importing the masculine gender include the feminine as well, and words used in the present tense include the future as well as the present. As used in this subpart and in all instructions, forms, and documents in connection therewith, the words and phrases defined in this section shall have the meanings herein assigned to them unless the context or subject matter otherwise requires. References contained herein to other parts of this title or chapter shall include current and later amendments to the referenced parts. Unless defined in this section the words or phrases defined in § 719.2 of this chapter shall have the same meaning when used in this part.

* * * * *

(a–1) *Active burley tobacco producer.* Any person who intends to be a burley tobacco producer in the current year by sharing in the risk of producing the crop and who provides a certification of such intention on a form approved by the Deputy Administrator.

(a–2) *Allowable floor sweepings.* The quantity of floor sweeping determined by multiplying 0.0024 times the total producer first sales of burley tobacco at auction for the season for the warehouse involved.

* * * * *

(g) *Director.* The Director, or Acting Director, Tobacco and Peanuts Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture.

* * * * *

(k) *False identification.* False identification occurs if:

(l) Tobacco was marketed or was permitted to be marketed in any marketing year as having been produced on a farm when, in fact, it was produced on a different farm; or

* * * * *

(m) *Farm marketing quota.*—(1) *Old farm.* The pounds determined by multiplying the preliminary farm marketing quota by the national factor and adjusting the result for any permanent quota adjustment.

* * * * *

(o) *Floor Sweepings.* The scraps or leaves of tobacco which accumulate on the warehouse floor in the regular course of business.

* * * * *

(r) *Leaf account tobacco.* The quantity of tobacco purchased or otherwise acquired by or for the account of a warehouse (except floor sweepings which accumulate on the warehouse floor), as adjusted by the debits and credits to the buyers corrections account, and including floor sweepings purchased from another warehouse or dealer.

* * * * *

(ff) * * *

(2) *Permanent.* (i) Old farm adjustment from reserve, (ii) pounds of quota transferred to the farm from the eminent domain pool, (iii) pounds of quota transferred to or from the farm by sale, (iv) pounds of quota transferred to the farm from the forfeiture pool, or (v) pounds of forfeited quota.

* * * * *

(ii–1) *Shared in risk of production.* Involvement in the production of burley tobacco by a person who:

(1) Invests in the production of a crop of burley tobacco in an amount which is not less than 20 percent of the proceeds of the sale of the crop;

(2) Depends solely on a share of the proceeds from the marketing of the tobacco for the return on the investment;

(3) Waits until such crop of burley tobacco is marketed to receive any return on the investment; and

(4) Maintains records, for a period of three years after the end of the marketing year in which the tobacco is sold, which may be used to verify that the provisions of this paragraph have been met.

* * * * *

4. Section 726.55 is revised to read as follows:

§ 726.55 Determination of farm yields.

(a) *Farm having a previously established farm yield.* The farm yield for a farm on which a farm yield has been established shall be the same in the current year as the farm yield previously established for the farm.

(b) *Farm not having a previously established farm yield.* As required, the county committee shall appraise a farm yield for any farm not having a previously established farm yield. The appraised yield shall be based on similar farms having a farm yield;

however, the appraised farm yield may not exceed 3,500 pounds.

5. In § 726.57, paragraph (a) is revised to read as follows:

§ 726.57 Determining farm marketing quotas and effective farm marketing quotas.

(a) *Farm marketing quotas.* The farm marketing quota shall be determined by multiplying the national factor as determined by the Secretary for the current year by the preliminary farm marketing quota for the current year and adjusting the result for permanent quota adjustments.

* * * * *

6. Section 726.68 is revised to read as follows:

§ 726.68 Transfer of tobacco marketing quotas by lease, by sale, or by the owner.

(a) *General.* Effective with respect to the 1983 crop year and in accordance with the provisions of this section, a burley tobacco marketing quota (including any quota which has been pooled in accordance with the provisions of Part 719 of this chapter) may be transferred between farms within a county by sale or lease, or by the owner to another farm owned or operated by such owner. A sale of quota may be made only when required to prevent forfeiture of the quota in accordance with § 726.69. If the farm is subject to a lien, the consent of a lienholder is not required for either a transfer of the quota by sale or a one year transfer of the quota by lease or by the owner to be effective.

(b) *Sale.* If the transfer of a quota is by sale, the transfer shall be based on part or all of the farm poundage quota. The maximum quota that may be transferred is the farm poundage quota.

(c) *Lease or owner.* If the transfer of a quota is by lease or by the owner, transfer shall be based on a part or all of the effective farm poundage quota. The maximum quota that may the transferred is the effective farm poundage quota.

(d) *Transfer provisions.*—(1) *Accumulation of quota.* A transfer shall not be approved if the county committee determines that the primary purpose of the transfer is to accumulate the quota on the farm (i.e., alternately transferring to and from the farm for two or more years to maintain the quota without satisfactory evidence of plans for producing the quota on the receiving farm).

(2) *Subleasing.* In order to determine whether there is any subleasing of a quota, the current year is divided into two periods, the period before October 1 and the period on or after October 1. The county committee shall not approve a transfer during either period if the effect would be both a transfer to and from the farm during the same period: *Provided,* That a transfer may be approved within any such period if quota is transferred from a farm for one or more years and the farm subsequently is combined with another farm that otherwise is eligible to receive quota by lease or by the owner.

(3) *Transferring farm.* A transfer of quota from a farm by lease or by the owner shall not be approved:

(i) *Purchased and/or reallocated quota.* If the pounds of quota being transferred exceed the difference obtained by subtracting from the effective farm marketing quota the total pounds of quota purchased and/or reallocated from forfeited quota in the current and two preceding years, as adjusted to reflect changes in national quota factors which have occurred since each respective purchase and/or reallocation of quota.

(ii) *New farm.* If the farm is a new farm.

(iii) *Reduction pending.* If consideration of a marketing quota violation is pending which may result in a quota reduction for the farm for the current year. However, if the county committee determines that a decision will not be made on the pending case of or before the date specified in § 726.63, a one-year transfer will be approved if otherwise eligible.

(iv) *Filed on or after October 1.* If the transfer agreement is filed on or after October 1 unless:

(A) Any tobacco which may be produced on the farm is eligible for price support in accordance with the provisions of Part 1464 of this title, and

(B) The county committee determines that, in those cases in which quota was temporarily transferred to the farm by an agreement filed before October 1, the producer made reasonable and customary efforts to produce the entire effective farm marketing quota.

(v) *Consent of lienholder.* For a multiple year transfer, if the farm is subject to a lien, unless the lienholder agrees in writing to the transfer.

(vi) [Reserved]

(vii) *Claim for tobacco marketing quota penalty.* If a claim has been filed against the lessor for a tobacco marketing quota penalty and the claim remains unpaid: *Provided,* That this provision shall not apply if the claim is paid or the entire proceeds of the lease of the quota are applied against the claim and the county committee determines that the amount paid for the lease represents a reasonable price for the pounds of quota being leased.

(viii) *Forfeiture pending.* To the extent that forfeiture of such quota is expected to become final before July 1.

(4) *Receiving farm.* A transfer of quota to a farm by lease or by the owner shall not be approved:

(i) *Limitation.* If the pounds of quota being transferred plus the pounds of quota previously transferred to the farm by lease or by the owner exceed the smaller of 30,000 pounds or the difference between the farm marketing quota and one-half the result obtained by multiplying the acres of cropland on the farm by the farm yield.

(ii) *Filed on or after October 1.* If the transfer agreement is filed on or after October 1 and if the producers on the farm do not qualify for price support in accordance with the provisions of Part 1464 of this title.

(5) *Selling farm.* A transfer of quota from a farm by sale shall not be approved:

(i) *Forfeiture otherwise required.* Unless forfeiture of the quota otherwise would be required in accordance with § 726.69.

(ii) *Previous purchases and/or reallocated quota.* If the pounds of quota being transferred exceed the pounds of quota for which forfeiture otherwise is required in accordance with the provisions of § 726.69(c).

(iii) *Reduction pending.* If consideration of an indicated marketing quota violation is pending which may result in quota reduction for the farm for the current year. However, if the county committee determines that a decision will not be made on the pending case on or before the date specified in § 726.63, a transfer will be approved if otherwise eligible.

(iv) *Forfeiture pending.* If the agreement for transfer by sale is filed subsequent to the final date which is permitted for the sale of the quota in order to prevent forfeiture.

(v) *Claim for tobacco marketing quota penalty.* If a claim has been filed against the seller for a tobacco marketing quota penalty and the claim remains unpaid: *Provided,* That this provision shall not be applicable if the claim for such penalty is paid or the entire proceeds of the sale of the quota are applied against the claim and the county committee determines that the amount paid represents a reasonable selling price for the pounds of quota being sold.

(6) *Buying farm.* A transfer of quota to a farm by purchase shall not be approved:

(i) *Active producer.* Unless the buyer is an active burley tobacco producer.

(ii) *Cropland limitation.* If the sum of the pounds of quota being transferred,

plus the pounds of quota previously transferred to the farm in the current year by lease or by the owner, exceeds the difference between the farm marketing quota and one-half the result obtained by multiplying the acres of cropland on the farm by the farm yield.

(iii) *Quota previously sold.* If the farm owner sold quota from the farm during the current or either of the two preceding years to prevent a forfeiture of the quota.

(e) *Transfer agreement.* In order for a transfer of quota by sale, by lease, or by the owner to be approved for, or beginning in, the current crop year, the transfer must be:

(1) *Form.* Recorded on Form ASCS–375.

(2) *Signatures.* Agreed upon and signed by:

(i) *Lease.* The owner and operator of the transferring farm and the owner or operator of the receiving farm.

(ii) *Sale.* The owner of the selling farm and an active burley tobacco producer who is the buyer. If the buyer is neither owner or operator of the farm to which the quota will be assigned, the owner or operator of the farm must give written consent for the quota to be assigned to the farm.

(iii) *Owner transfer.* The owner of the transferring farm who also must be the owner or operator of the receiving farm.

(iv) *Witness.* An authorized witness who shall be a member of a State or county committee or an ASCS employee. Each person whose signature is required by either paragraph (e)(2)(i), (ii), or (iii) must sign in the presence of an authorized witness, except that when:

(A) The owner and operator of a lessor farm are different persons, the owner or operator, but not both, must sign in the presence of an authorized witness.

(B) Any person whose signature is required is ill, infirm, resides in a distant area, or are in similar hardship situations the requirement of a witness may be waived provided the county executive director mails Form ASCS–375 to such person for the required signature.

(3) *Where to file.* Filed in the county ASCS office which serves the county in which the transferring farm is located for administrative purposes.

(4) *When to file.* Filed on or before:

(i) *Lease or owner transfer.* February 15 of the next succeeding year.

(ii) *Sale.* June 30 of the current year.

(f) *Period of transfer.* A transfer by lease or by owner may be for a period of one to five years.

(g) *Approval or disapproval of a transfer agreement.* The county committee shall approve each transfer agreement which meets the eligibility conditions as set forth in this section: *Provided,* That the county committee may delegate authority to the county executive director or other county office employee to act on behalf of the county committee and approve a transfer agreement which meets the eligibility requirements as set forth in this section. Such delegation of authority may authorize the county executive director or county office employee to approve any transfer agreement or the delegation of authority may be limited to approval of either transfers by sale or by lease or by the owner. Only the county committee shall disapprove a transfer agreement.

(1) *Time for determination.* Any approval or disapproval by the county committee of a transfer agreement should be made within 30 days after the transfer agreement is filed with the county committee unless additional time is required as the result of conditions beyond the control of the county committee. However, if an agreement is filed after June 30 which provides for the sale of a quota, a transfer agreement shall not be approved until the next year's quota is computed for the selling farm. In addition, if a marketing quota referendum will be conducted to determine whether or not quotas will be in effect for the crop, a transfer agreement shall not be approved until the Secretary announces that quotas have been approved by referendum.

(2) *Effective date.* An approved transfer agreement shall become effective upon approval by the county committee or its designee.

(h) *Quota after transfer by lease or by the owner.* The effective farm marketing quota shall be determined for both the transferring farm and the receiving farm in accordance with the provisions of § 726.57.

(i) *Apportionment of data and determination of quota after transfer of quota by sale.*—(1) *Apportionment of data for the selling farm.* The pounds of farm marketing quota retained on the selling farm after the sale of quota shall be divided by the farm marketing quota established for the selling farm before the sale to determine a factor for apportioning farm data. The data to be retained on the selling farm shall be determined by multiplying the factor by the following data:

(i) The amount of any overmarketings which have not been subtracted when a determination is made of the effective farm marketing quota of the selling farm;

(ii) The pounds of quota which have been transferred from the selling farm by lease or by the owner in the current year;

(iii) The pounds of quota which have been reduced in the current year as the result of a marketing quota violation in a prior year;

(iv) The pounds of quota transferred to the farm by lease or by owner in the previous year;

(v) The previous year's farm marketing quota;

(vi) The previous year's effective farm marketing quota; and

(vii) The previous year's marketings.

(2) *Apportionment of data for the buying farm.* The buying farm's share of each respective item of farm data shall be determined by subtracting the pounds which are retained on the selling farm for the respective item from the pounds which were established for the selling farm for the respective item before the current sale of quota: *Provided,* That the pounds of quota transferred from the selling farm by lease or by the owner and/or the pounds of quota reduction resulting from a marketing quota violation on the selling farm may be apportioned between the farms in accordance with a written agreement between the buyer and the seller if the farm marketing quota retained on the selling farm is sufficient to satisfy the pounds of quota which were transferred by lease or by the owner, the pounds of quota which have been reduced as the result of a marketing quota violation, and the overmarketings for the farm, if any. The data determined in accordance with this paragraph shall be added to any previous data for the buying farm.

(3) *Quotas after transfer.* After adjusting the data in accordance with the provisions of this section, the effective farm marketing quota shall be determined in accordance with § 726.57 for both the buying farm and the selling farm.

(j) *Carryover tobacco.* If tobacco is marketed after the entire farm marketing quota of the producing farm has been transferred by sale, the tobacco shall be considered as having been marketed on each farm to which farm marketing quota was transferred by sale in accordance with a transfer agreement filed after June 30 of the last year in which a farm marketing quota was established for the producing farm. Such marketing shall be prorated to each farm in proportion to the pounds of farm marketing quota purchased by each farm. If there was more than one farm to which a farm marketing quota was transferred by sale, the marketing may be assigned to the farms in the manner agreed to in writing by each of the buyers of such farm marketing quota.

(k) *Farm division after transfer by lease.* If a farm is divided after there has been a transfer of a marketing quota to the farm by lease, the transferred quota shall be divided in the manner which is designated in writing by the lessee. In the absence of a written designation, the leased quota shall be apportioned in the same manner as the farm marketing quota of the parent farm.

(l) *Multiple year transfer by lease or by owner.* The effective farm marketing quota on a receiving farm having a multiple-year transfer agreement in effect shall be adjusted for each year for which such transfer agreement is in effect to reflect any decrease in the national quota factor which causes the farm marketing quota established for the transferring farm to be less than the pounds of quota which have been transferred to the receiving farm.

(m) *Cancellation of transfer.* (1) A transfer of quota under this section which was approved in error or on the basis of incorrect information furnished by the parties to the agreement shall be canceled by the county committee. For the purpose of determining any overmarketings and undermarketings from the farms, and for the purpose of determining marketing quota penalties, the cancellation shall be effective as of the date of approval. However, such cancellation shall not be effective for the current marketing year for marketing quota penalties purposes if: (i) The transfer approval was made in error or on the basis of incorrect information which had been unknowingly furnished by the parties to the agreement; and (ii) the parties to the transfer agreement were not notified of the cancellation before the marketing for the receiving farm exceeded the correct effective farm marketing quota. The provisions of this paragraph shall not preclude any application of the provisions with respect to erroneous notice which are set forth in § 726.66.

(2) If a transfer of quota is canceled because of fraud on the part of the owner of the transferring farm but no fraud is attributable to either the owner or operator of the receiving farm, such cancellation shall be effective as of the date of approval of the transfer except for purposes of determining marketing quota penalties for the receiving farm. If a transfer of quota is canceled, the overmarketings shall be charged against the farm from which the transfer of quota was made if the farm, after any reconstitution which may be necessary as a result of the fraud, is assigned a quota against which the overmarketings could be charged. Otherwise, the overmarketings shall be charged against any other farm involved in the fraud having a quota after any reconstitution required by such fraud. Notwithstanding the foregoing, any overmarketings on the receiving farm which are in excess of the amount of quota involved in the canceled transfer shall be charged against the receiving farm.

(n) *Dissolution or revision of a transfer agreement.* A transfer agreement may be dissolved or minor revisions made with respect to such agreement if a written request by all parties to the agreement is made to the county committee by February 15 of the current marketing year. After any such dissolution or revision of a transfer agreement, an official notice of the marketing quota shall be issued by the county committee to each of the operators involved in the transfer agreement. If a request to dissolve or revise a multiple-year lease is made after February 15 of the current marketing year, but before the last crop year for which the transfer agreement is effective, the next quotas established for the farms shall reflect the dissolution or revision.

(o) *Considered planted credit.* Considered planted credit shall be given to the transferring farm when tobacco quota is transferred from the farm by lease or by owner.

7. In § 726.81, paragraph (d) is revised to read as follows:

§ 726.81 Issuance of marketing cards.

* * * * *

(d) *"No Price Support".* The notation "No Price Support" shall be entered on each marketing card issued for the use of:

(1) *Farm.* Any producer on the farm if the producers on the farm are ineligible for price support in accordance with the provisions of Part 1464 of this title.

(2) *Producer.* A producer on a farm if the producer is ineligible for price support in accordance with the provisions of Part 1464 of this title.

* * * * *

8. In § 726.82, paragraph (a) is revised to read as follows:

§ 726.82 Claim stamping and replacing marketing cards.

(a) *Claim stamping.* If a person is indebted to the United States and such indebtedness has been recorded on the county debt record, any marketing card issued for the farm on which the person has a producer interest shall bear the notation "U.S. Claim" followed by the amount of the indebtedness. The name of the debtor-producer, if different from the farm operator, shall be recorded directly under the claim notation. The notation "TMQ" indicating tobacco marketing quota as the type of indebtedness shall constitute notice to any buyer that until the amount of penalty is paid, the United States has a lien with respect to any crop of tobacco in which the debtor-producer has an interest. A claim notation other than "TMQ" shall constitute notice to any buyer that subject to prior liens, the net proceeds from any tobacco pledged as collateral for a price support loan shall be paid to the "Agricultural Stabilization and Conservation Service, USDA" to the extent of the indebtedness shown. The acceptance and use of a marketing card bearing a notation and information concerning an indebtness to the United States shall not constitute a waiver by the debtor-producer of any right to contest the validity of such indebtedness by appropriate appeal. As claim collections are made, the amount of the claim shown on the marketing card shall be revised to show the claim balance. If requested by the producer, the county executive director who issued the marketing card shall issue a claim-free marketing card when the claim has been paid.

* * * * *

9. In § 726.88, paragraph (c) is amended by removing the second sentence and a new paragraph (h) is added to read as follows:

§ 726.88 Penalties considered to be due from warehousemen, dealers, buyers, and others excluding the producer.

* * * * *

(h) *Floor sweepings.* Effective for the 1982 and subsequent crops of tobacco, any person who markets floor sweepings in excess of allowable floor sweepings shall be subject to a civil penalty of 150 percent of the average market price, as specified in § 726.86, for the immediately preceding marketing year. The calculated penalty rate shall be rounded to the nearest whole cent. Any floor sweepings on hand more than 30 days after the warehouse closes for the auction season shall be considered as marketed. The floor sweepings on hand shall be weighed by the warehouseman and the weight shall be certified by the warehouseman, such weighing to be done in the presence of a representative of either the county committee or the State committee. Floor sweepings which are destroyed in the presence of a representative of the county committee within 30 days after the warehouse closes for the season shall not be considered as marketed when determining the quantity of floor sweepings marketed. If the county committee determines, after the warehouse has been closed for the

auction season for more than 30 days, that the cumulative quantity of floor sweepings marketed and considered marketed in the current marketing year is in excess of the allowable floor sweepings, the person responsible for such marketings shall be given notice of the determination and shall be afforded an opportunity to request reconsideration of such determination in accordance with the provisions of Part 780 of this chapter. A determination that a civil penalty is due for marketing floor sweepings in excess of the allowable floor sweepings shall not become final and shall not be assessed until such person has been afforded an opportunity to a hearing and such person has exhausted the applicable administrative remedies. The notice of assessment shall require such person to pay the civil penalty to the "Agricultural Stabilization and Conservation Service, USDA" within 15 days after the date of mailing of the notice.

10. In § 726.89 a new paragraph (f) is added to read as follows:

§ 726.89 Producers penalties; false identification; failure to account; canceled quotas; overmarketing proportionate share.

* * * * *

(f) *Ineligible for price support.* Effective for the 1983 and subsequent crops, a penalty at the basic rate as specified in § 726.86 for the current marketing year shall be assessed with respect to any marketings of burley tobacco by any producer on a farm if such producer is ineligible for price support because the farm operator or other producer on the farm has not agreed to make a contribution to the No Net Cost Account as required by Part 1464 of this title.

11. In § 726.90 a new paragraph (d) is added.

§ 726.90 Payment of penalty.

* * * * *

(d) *Request for return of payment.* Any producer of tobacco and any other person who paid any penalty after the marketing of all tobacco available for marketing from the farm may request the return of the amount of any such payment which is in excess of the amount required to be paid. Such request shall be filed on Form MQ–85, Farm Record and Account, with the county office within 2 years after the payment of the penalty. Approval of return of any such payment to a producer shall be by the county committee, subject to the approval of the State executive director.

12. Section 726.91 is revised to read as follows:

§ 726.91 Lien for penalty.

(a) *Lien on tobacco.* Until the amount of any penalty which is imposed in accordance with the provisions of section 314 of the Act (7 U.S.C. 1314) is paid, a lien shall exist in favor of the United States for the amount of the penalty on:

(1) The tobacco with respect to which such penalty is incurred.

(2) Any other tobacco subject to marketing quotas in which the person liable for payment of the penalty has an interest and which is marketed in the same or a subsequent marketing year.

(b) *Lien precedence.* The lien on any other tobacco attaches at the time the debt is entered on a debt record in:

(1) *Indebted producers.* The county ASCS office for the county in which a subsequent crop of tobacco is grown.

(2) *Indebted warehouseman.* The State ASCS office for the State in which the warehouse is located.

(3) *Indebted dealer.* The State ASCS office for the State to which the dealer is required to file reports.

(c) *List of tobacco penalty debts.* Each county and State ASCS office shall maintain a list of tobacco marketing penalty debts which have been entered on the debt record for the respective office. The list shall be available for examination upon written request by any interested person.

13. In § 726.92, paragraph (f) is revised to read as follows:

§ 726.92 Producer's records and reports.

* * * * *

(f) *Amount of quota reduction.* The farm marketing quota determined for a farm for the current year shall be reduced by that amount of tobacco which is involved in a marketing quota violation as described in paragraphs (a), (c), (d), or (e) of this section which occurred in any prior year. However, the amount of such reduction shall not exceed the current year farm marketing quota. The county committee shall determine the amount of tobacco involved in the marketing quota violation. If the actual quantity of tobacco involved in such violation is unknown, the county committee shall determine the quantity by considering both the condition of the crop during production, if known, and such other information as is available.

14. In § 726.93, paragraph (a)(4) is amended by removing the words "Data Systems Field Office (DSFO)" and inserting, in their place, the words "Kansas City Field Office (KCFO)"; paragraph (b) is amended by revising the heading to read *"Identification of producer sales of tobacco."*, by renumbering the existing paragraph as "(1)", and by adding a heading for paragraph (1) to read *"Tobacco sale bill."*; paragraph (c)(3) is amended by removing "C&MS" and inserting, in its place, "AMS"; paragraph (d)(2) is amended by removing "DSFO" and inserting, in its place, "KCFO"; paragraph (m) is amended by revising the heading to read *"Reporting of processed leaf account tobacco."*; a new paragraph (b)(2) is added; and paragraph (g)(12) is revised to read as follows:

§ 726.93 Wharehouseman's records and reports.

* * * * *

(b) * * *

(2) *Basket ticket.* At the time tobacco is weighed for marketing, the warehouseman shall record the weight of the basket or sheet of tobacco on the tobacco sale bill and on the basket ticket. If the marketing card which is presented to identify the tobacco at weigh-in bears the notation "No Price Support," the same notation shall be entered by the warehouseman on the basket ticket for each basket or sheet of tobacco which is identified with the same marketing card.

* * * * *

(g) * * *

(12) The total of the resales column on Form MQ–79 which represents the non-auction sales, including floor sweepings nonauction sales, by the warehouse.

* * * * *

15. In § 726.94, paragraphs (a), (b), (c)(1), (c)(2), and (c)(3) are revised and paragraph (c)(7) is added to read as follows:

§ 726.94 Dealer's records and reports.

* * * * *

(a) *Record of marketings.* A dealer shall keep records which provide the following information for each lot of tobacco, including scrap tobacco, purchased or sold by the dealer:

(1) *Purchases.* (i) The name of:

(A) The warehouse through which the tobacco was purchased, if purchased at a warehouse auction; or

(B) The operator of the farm on which the tobacco was produced, if purchased from a producer as a nonauction purchase, and the name of the producer of the tobacco, if different from the operator; or

(C) The seller if purchased as a nonauction purchase from a warehouseman or dealer.

(ii) The identification number of the warehouse, farm, or dealer, as applicable, at/from which the tobacco was purchased.

(iii) The address and percentage share of the proceeds of the farm operator and any other producer from whom tobacco was purchased as a nonauction purchase.

(iv) The date of purchase.

(v) The pounds of tobacco purchased.

(vi) The gross purchase price.

(vii) The amount of penalty.

(viii) The amount deducted for the No Net Cost Tobacco Account.

(ix) The quantity of tobacco purchased from a prior crop and carried over for marketing in a subsequent crop year.

(2) *Sales.* (i) The name and identification number of:

(A) The warehouses through which the tobacco was sold, if sold at a warehouse auction, or

(B) The buyer if the tobacco was sold as a nonauction sale.

(ii) The date of sale.

(iii) The pounds of tobacco sold.

(iv) The gross sale price.

(b) *Nonauction purchase.* Each purchase of tobacco from a burley tobacco producing area shall be identified by a marketing card issued for the farm on which the tobacco was produced unless an AMS inspection certificate is obtained prior to purchase which shows that the tobacco being offered for sale is a kind of tobacco which is not subject to marketing quotas.

(1) After each nonauction purchase, the dealer shall enter a declining balance of "110 percent of quota" on the reverse side of the marketing card. The declining balance shall be determined by reducing the previous "110 percent of quota" entry on the marketing card by the number of pounds of tobacco purchased. The date the tobacco was purchased also shall be entered on the marking card at the time each lot of tobacco is purchased.

(2) After each nonauction purchase, the dealer shall prepare a Form MQ–72–2 which shall set forth the following:

(i) The date of the purchase.

(ii) The registration number of the dealer.

(iii) The name and address of the person selling the tobacco.

(iv) The identification number (farm number, warehouse code, or dealer number, as applicable) of the person selling the tobacco.

(v) The pounds of tobacco purchased.

(vi) The amount of penalty collected.

(vii) The method (estimating or weighing) of determining the pounds of tobacco marketed.

(viii) The signature of the seller and the date signed.

(3) The dealer shall make deductions for producer contributions to the No Net Cost Tobacco Account as provided for in Part 1464 of this title. For nonauction purchases during the 1982–83 marketing year, the dealer shall deduct one cent per pound from the price paid to the producer for the tobacco, except for a purchase which is identified with a marketing card bearing the notation "No Price Support." For nonauction purchases which are made by the dealer from producers during the 1983–84 and subsequent marketing years, the dealer shall make a deduction in accordance with Part 1464 of this title from the price paid to the producer for the tobacco. However, a deduction shall not be made if the original "110 percent of quota" entry on the marketing card used to identify the tobacco was zero pounds. The amount of the deduction which is applicable to burley tobacco marketed during each marketing year will be that amount per pound which is approved and announced by the Secreatary as the producer contribution to the No Net Cost Tobacco Account for each such marketing year.

(c) *Record and report of purchases and resales.* (1) Each dealer shall keep a record and make reports on Form MQ–79 showing all purchases and resales of tobacco made by or for the dealer and, in the event of a purchase or resale of tobacco which is purchased by the dealer from a crop of tobacco produced prior to the current crop, the fact that such tobacco was so purchased and carried over from a crop produced prior to the current crop.

(2) A Form MQ–79 shall be prepared and a copy, together with executed copies of Form MQ–72–2 for all nonauction purchases, shall be forwarded to the State ASCS office not later than the end of the calendar week in which such tobacco was purchased or resold. However, if tobacco is purchased prior to the opening of the local auction market, a Form MQ–79 shall be prepared and a copy, together with executed copies of Form MQ–72–2 for all nonauction purchases, shall be forwarded to the State ASCS office not later than the end of the calendar week which would include the first sale date of the local auction markets. In addition, if tobacco is resold in a State other than where the tobacco is produced and the auction markets at such location open earlier than the auction market where the tobacco normally would be sold at auction by farmers, reports together with executed copies of Form MQ–72–2 for all nonauction purchases shall be prepared and forwarded to the State ASCS office not later than the end of the calendar week which would include the first day of the local auction market where the resale takes place.

(3) The data to be entered on Form MQ–72–2 for nonauction purchases from a producer shall be the data which is enumerated in accordance with the provisions of paragraph (b)(2) of this section.

* * * * *

(7) In addition to Form MQ–79 and Form MQ–72–2, a Form MQ–79 (Supplemental) shall be executed to record information relating to each purchase of tobacco for which a contribution to the No Net Cost Tobacco Account is deducted from the price paid to the producer for the tobacco. The Form MQ–79 (Supplemental) shall be forwarded to the State ASCS office at the time of forwarding the Form MQ–79 on which the purchase is recorded. A check, draft, or money order in the amount of the deduction recorded on Form MQ–79 (Supplemental) and drawn payable to Commodity Credit Corporation shall be forwarded to the State ASCS office at the same time as Forms MQ–79 and MQ–79 (Supplemental).

§ 726.95 [Amended]

16. Section 726.95 is amended by removing, in paragraph (b), the words, "Production Adjustment Division,".

17. Section 726.100 is revised to read as follows:

§ 726.100 Duties of Kansas City ASCS Field Office.

The Kansas City ASCS Field Office (KCFO) has responsibility for processing certain data and making such reports as may be required by the Deputy Administrator.

§ 726.101 [Amended]

18. Section 726.101 is amended by removing the words "Program Operations Division and".

19. Section 726.103 is revised to read as follows:

§ 726.103 Information confidential.

All data reported to or acquired by the Secretary pursuant to the provisions of this subpart shall be kept confidential by all officers and employees of the U.S. Department of Agriculture, by all members of county and community committees, and all county office employee. Only such data so reported or acquired as the Deputy Administrator deems relevant shall be disclosed by them, and then only in a suit or administrative hearing under title III of the Act. The provisions of this section shall not be deemed to prohibit the issuance of general statements based upon the report of a number of parties

which statements do not identify the information furnished by any person.

20. In § 726.105, the first sentence in paragraph (a) is revised to read as follows:

§ 726.105 Recordkeeping and reporting requirements for processed producer carryover tobacco.

(a) *General.* Except with respect to the 1982 crop of burley tobacco for which the Burley Tobacco Growers Cooperative Association and the Burley Stabilization Corporation may process and store producer carryover tobacco and may act as the producer's marketing agent in marketing the producer's tobacco during the 1983–84 marketing year, this section shall not be applicable to 1979 and subsequent crops of burley tobacco. * * *

* * * * * *

Signed at Washington, D.C. on April 19, 1983.

Everett Rank,

Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc. 83-10806 Filed 4-21-83; 8:45 am]

BILLING CODE 3410-05-M

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

7 CFR Part 726

Burley Tobacco Marketing Quota Regulations

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule amends the regulations at 7 CFR Part 726 to implement the provisions of the No Net Cost Tobacco Program Act of 1982 (Pub. L. 97-218, 96 Stat. 197, approved July 20, 1982) with respect to the sale or forfeiture of burley tobacco quotas by persons other than individuals.

DATE: Comments on the proposed rule must be submitted on or before May 23, 1983 in order to be assured of consideration.

ADDRESS: Send comments to the Director, Tobacco and Peanuts Division, ASCS, Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013. All written submissions made pursuant to this notice will be made available for public inspection in Room 5750 South Building, USDA, between the hours of 8:15 a.m. and 4:45 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Jack S. Forlines, Agricultural Program Specialist, Tobacco and Peanuts Division, USDA-ASCS, P.O. Box 2415, Washington, D.C. 20013; (202) 382-0200.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Secretary's Memorandum 1512-1 and has been classified as "not major." It has been determined that this rule will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State or local governments, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The title and number of the Federal Assistance Program to which this rule applies are: Commodity Loan and Purchases; 10.051, as found in the Catalog of Federal Domestic Assistance.

While the Regulatory Flexibility Act is not applicable of this proposed rule, an Initial Regulatory Flexibility Impact Analysis has been prepared with a Preliminary Regulatory Impact Analysis. Since this action may have a significant economic impact on a substantial number of small entities,the impact analysis addresses the issues required in section 603 of the Act. The analysis is published herein, and copies have been sent to the General Counsel of the Small Business Administration. Additional copies are available from Director, Analysis Division, Agricultural Stabilization and Conservation Service USDA, P.O. Box 2415, Washington, D.C. 20313.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

This proposed rule is necessary to implement the provisions of the No Net Cost Tobacco Program Act of 1982 (hereinafter referred to as the "Act"). The Act amended the Agricultural Adjustment Act of 1938 by adding a new section 316B to require that any person (including but not limited to governmental entities, public utilities, educational institutions, and religious institutions, but not including any individual) which owns a farm for which a burley tobacco marketing quota is established to forfeit or sell such quota if such person is not significantly involved in the management or use of land for agricultural purposes. Such quota must be sold not later than December 1, 1983, or December 1, of the year after the year in which the farm is acquired, whichever is later. If the quota is not sold by the applicable date, the person shall forfeit the quota to the county ASC committee.

This proposed rule would revise 7 CFR 726.69 to establish provisions with respect to the forfeiture of burley tobacco quota owned by persons, other than individuals, which are not significantly involved in the management or use of land for agricultural purposes. The major provisions of the proposed rule are as follows:

(1) *Sale of burley tobacco quotas.* The sale of burley tobacco quotas is permitted by persons, other than individuals, who own a farm having a burley tobacco quota and who are not significantly involved in the management and use of the land for agricultural purposes. However, such sales may be made only to persons who are or will become active burley tobacco producers within the same county. At the time a transfer agreement is filed with the county ASC office to transfer quota by sale, the agreement must specify the farm to which the quota shall be assigned. This procedure is designed to prevent "hip-pocket" quotas (i.e., quotas assigned to persons rather than to farms). It is the responsibility of a purchaser of any burley tobacco quota who is not the owner of the farm to which the quota is assigned to take whatever measures are deemed to be necessary to protect the investment in such purchase should the producer fail to remain an active producer on the farm to which the burley tobacco quota has been assigned. Any burley tobacco quota which is purchased may not be sold except as may be required to prevent forfeiture. In addition, the owner of the farm to which the burley tobacco quota is assigned is the only person who is authorized to sell such quota.

(2) *Forfeiture of burley tobacco quotas.* Persons, as defined in 7 CFR Part 719, such as corporations, public utilities, partnerships, associations, educational institutions, religious institutions, governing bodies, joint ventures, (but not including a farming operation involving only a husband and wife), and all others, except individuals, owning farms must sell or forfeit any burley tobacco quotas on such farms unless such owners are significantly involved in the management or use of land for agricultural purposes. The phrase "significantly involved in the management and use of land for agricultural purposes" will hereinafter be referred to as "significantly involved."

To be considered as significantly involved, a person must satisfy the county ASC committee that: (a) Its primary purpose is the management or use of land for production of crops which are planted and harvested annually and/or livestock (including pasture or forgage for livestock) and (b) it receives more than 50 percent of its gross income from the management or use of land for agricultural purposes. Further, to prevent circumvention of the statutory requirement that, except for any individual, persons who are not significantly involved must sell or forfeit any burley tobacco marketing quotas established for farms owned by such person, any other person owning more than 50 percent of the assets of the owner of such farms also must be significantly involved.

For example, if Person A is the owner of burley tobacco marketing quota and Person B owns more than 50 percent of the assets of Person A, both Persons A and B must each have received more than 50 percent of their gross income from the management or use of land for agricultural purposes.

To determine whether an owner of a farm for which a burley tobacco marketing quota is established, is significantly involved, an analysis will be made by the county ASC committee. First, the nature of the ownership interest must be determined. If an individual owns such farm, no further inquiry shall be made and the marketing quota established for such farm shall not be subject to forfeiture. However, a second determination shall be made if it is determined that the owner of such farm is not an individual.

With regard to this second determination, it shall be determined whether or not the owner is "significantly involved." If such owner is not significantly involved, no further inquiry shall be made and the marketing quota established for such farm shall be subject to forfeiture. If such owner is significantly involved, a third determination is necessary to determine whether such owner is owned by any other person, including ownership by an individual.

If it is determined during the course of this third inquiry that 50 percent or more of such owner is owned by an individual, no further inquiry shall be made and such owner of the farm shall be determined to be significantly involved. Accordingly, the marketing quota established for such farm shall not be subject to forfeiture. If it is determined that more than 50 percent of such owner is owned by any person(s) which is not an individual, a fourth inquiry shall be made.

In this fourth inquiry, a determination shall be made with respect to each such person which is not an individual to determine whether such person is significantly involved. If any such person is not significantly involved, the entire burley tobacco marketing quota established for such farm shall be subject to forfeiture.

In addition to the foregoing, an institution of higher education, such as a university or college, shall be considered as significantly involved if actively engaged in the production of tobacco for experimental or instructional purposes. Instructional purposes must include classroom courses which require the active participation of students in such activities as the preparation of land for the planting of tobacco and the growing and harvesting of tobacco. Experimentation and educational instruction in tobacco production by institutions of higher education are in the public interest. It is clear from the legislative history of the Act that Congress did not intend to divest these institutions of their burley tobacco quota so long as the institutions are actively engaged in the described activities.

As used in section 316B of the 1938 Act, as amended, the phrase "owns a farm" indicates that ownership of land is a significant factor in determining whether a burley tobacco quota must be forfeited under certain conditions. Accordingly, this proposed rule provides that the phrase "owns a farm" means the ownership of: (a) A farm as constituted in accordance with the provisions of 7 CFR Part 719 if the entire farm shares a common ownership: or (b) a tract of land within a farm as constituted in accordance with the provisions of 7 CFR Part 719 if the farm, as constituted, consists of separate ownership tracts. Thus, when determining the amount of a barley tobacco quota which is subject to forfeiture because the owner is not significantly involved in the management or use of land for agricultural purposes, the county ASC committee will consider each ownership tract as though it were a separate farm in those cases where a farm consists of tracts of land under separate ownership.

Once a burley tobacco quota is purchased, the purchaser must share, for a period of five years, in the risk of production of tobacco which is produced subject to the quota or the quota shall be sold or forfeited.

(3) *Forfeiture pools.* In each county, a forfeiture pool will be established for forfeited burley tobacco quotas. Burley tobacco quotas which are forfeited will be reallocated by the county committee to eligible persons after taking into consideration such factors as the size of the current quota on the farm and the length of time the applicant has leased quota. Forfeited burley tobacco quotas may be reallocated to farms which currently do not have a burley tobacco quota.

(4) *Forfeiture of reallocated quota.* If an applicant fails to share in the risk of production of burley tobacco during any of the five years beginning with the crop year in which the quota is reallocated, the burley tobacco quota shall be forfeited. Mere failure to utilize the quota will not result in forfeiture but will extend the five-year period one year for each year the quota is not utilized.

Summary of Preliminary Regulatory Impact Analysis and Initial Regulatory Flexibility Impact Analysis

I. Title

Proposed Rules—Burley and Flue-Cured Tobacco Marketing Quota Regulations.

II. Need for Action

To implement amendments to the Agricultural Adjustment Act of 1938 which were made by the "No Net Cost Tobacco Program Act of 1982" (Pub. L. 97–218) which require that any person (including but not limited to governmental entities, public utilities, educational institutions, and religious institutions, but not including any individual) which is not significantly involved in the management or use of land for agricultural purposes, and which owns a farm for which a burley tobacco quota or a flue-cured tobacco allotment and quota are established, to sell such allotment and/or quota within a prescribed time period or such allotment and/or quota shall be forfeited for reallocation to active tobacco producers in the same county.

III. Options Considered

The statute is specific in the action that is required. Therefore, no options were considered.

IV. Legislative Basis for Action

This action is taken in accordance with sections 316A and 316B of the Agricultural Adjustment Act of 1938 as added by sections 202 and 302 of Pub. L. 97–218.

V. Expected Impacts

A. Direct Impacts.

1. Those persons, other than individuals, who are not significantly involved in the management and use of land for agricultural purposes must sell any burley tobacco quota or flue-cured tobacco allotment and quota that are established for any farm which such person may own or such allotment and/or quota will be forfeited.

2. Allotment and/or quota may be purchased by or reallocated to only those persons who will be active producers of the kind of tobacco.

B. *Indirect Impacts.*

No indirect impacts are anticipated.

C. *USDA and Other Federal Outlays.*

There will be no outlays of Federal funds, except for administrative expense.

VI. Projected Reporting, Recordkeeping, and Other Compliance Requirements

Any person, other than an individual, which owns a farm for which a burley tobacco quota or flue-cured tobacco allotment and quota are established may be requested by the county ASC committee to submit documentation with respect to whether such person is significantly involved in the management or use of land for agricultural purposes. Records which

ordinarily would be required of such persons for normal business purposes would generally be sufficient for providing such documentation. Therefore, no additional professional skills are required in order to comply with the requirements of this proposal.

VII. Federal Rules Which Duplicate, Overlap, or Conflict With the Proposals

The proposed rules do not duplicate, overlap, or conflict with the provisions or requirements of any other rules promulgated by the Federal government.

VIII. Significant Alternatives to the Proposed Rules

Sections 316 A and 316 B of the Agricultural Adjustment Act of 1938 mandate the actions with respect to which the proposed rules relate. Therefore, there are no alternatives to the proposed rules which will accomplish the statutory objectives.

List of Subjects in 7 CFR Part 726

Marketing quotas, Reporting requirements, Tobacco.

Proposed Rule

PART 726—[AMENDED]

Accordingly, it is proposed that 7 CFR Part 726 be amended as follows:

1. The table of contents is amended as follows:

Sec.

* * * * *

726.69 Forfeiture of quota.

* * * * *

2. The authority citation reads as follows:

Authority: Sec. 301, 313, 314, 314A, 316B, 317, 372–375, 377, 378, 52 Stat. 38, as amended, 47, as amended, 48, as amended, 96 Stat. 210, 215, 75 Stat. 469, as amended, 79 Stat. 66, 52 Stat. 63, as amended, 65–66, as amended, 70 Stat. 206, 7 U.S.C. 1301, 1313, 1314, 1314–1, 1314b–2, 1314c, 1363, 1372–1375, 1377, 1378, Sec. 401, 63 Sta. 1054, as amended, 7 U.S.C. 1421.

3. Section 726.69 is revised to read as follows:

§ 726.69 Forfeiture of quota.

(a) *Determination of quota subject to forfeiture.* (1) For purposes of paragraph (b) of this section, the phrase "owns a farm" means ownership of:

(i) A farm as constituted under Part 719 of this chapter if the entire farm shares a common ownership; or

(ii) All of the land within a farm which shares common ownership (commonly referred to as a "tract") if the parent farm consists of tracts of land having separate ownership.

(2) For purposes of paragraph (b) of this section, the county committee shall apportion, in accordance with the provisions of Part 719 of this chapter, the burley tobacco quota assigned to a farm between the various tracts of land which are separately owned by:

(i) A person which is not significantly involved in the management or use of land for agricultural purposes, as described in paragraph (b) of this section.

(ii) An individual, or owned by a person which is significantly involved in the management or use of land for agricultural purposes.

(3) The farm marketing quota determined under this section for each farm or tract, as applicable, shall be the amount of quota subject to forfeiture under this section.

(b) *Person not significantly involved in management or use of land for agricultural purposes.* For purposes of this paragraph, the term "person" means a person as defined in Part 719 of this chapter, including any governmental entity, public utility, educational institution, religious institution, or joint venture (but not including any farming operation involving only a husband and wife), but excluding any individual.

(1) *Required forfeiture.* Any person not significantly involved in the management or use of land for agricultural pruposes which owns a farm for which a burley tobacco marketing quota is established shall forfeit such quota which is not sold on or before:

(i) *Farm owned or acquired before January 1, 1983.* December 1, 1983.

(ii) *Farm acquired on or after January 1, 1983.* December 1 of the year after the year in which the farm is acquired.

(2) *Significantly involved.* A person shall be considered to be significantly involved in the management or use of land for agricultural purposes if the county ASC committee determines that:

(i) The primary business purpose of the person is the management or use of land for the production of crops which are planted and harvested annually, and or livestock, including pasture and forage for livestock;

(ii) For the 3 preceding years, more than 50 percent of the gross income of the person has been derived from the management or use of land as described in paragraph (b)(2)(i) of this section; and

(iii) Any other person or all persons which in combination own more than 50 percent or more of the assets of the owner of the farm for which a burley tobacco marketing quota is established also meet the criteria specified in paragraphs (b)(2)(i) and (ii) of this section.

(iv) In addition, an institution of higher education, such as a university or college, shall be considered to be a person significantly involved in the management or use of land for agricultural purposes if the county ASC committee determines that it is actively engaged in the production of tobacco for experimental purposes or for instructional purposes under a program whereby students are enrolled in courses requiring them to actually produce the tobacco crop.

(3) *Documentation.* Within 30 days after a written request is made by the county ASC committee, or within such extended time as may be granted by the county ASC committee, a person must submit such documentation as may be requested to support a determination that the provisions of paragraph (b)(2) of this section have been met with respect to such person. Upon failure of such person to timely respond to such request, the county ASC committee shall determine that the person is not significantly involved in the management and use of land for agricultural purposes.

(c) *Buyer of quota fails to share in risk of production.*—(1) *Forfeiture required.* If any person buys a burley tobacco quota in accordance with the provisions of § 726.68 and such person fails to share in the risk of producting the tobacco which was planted subject to such quota during any of the five crop years beginning with the crop year for which the purchase became effective, such person shall forfeit the purchased allotment and quota which is not sold on or before December 31 of the year after the crop year in which such crop was planted.

(2) *Failure to utilize purchased quota.* The failure to utilize purchased burley tobacco quota shall not result in the forfeiture of such quota, but the five year period which is specified in paragraph (c)(1) of this section shall be extended one year for each year in which the quota is not utilized.

(3) *Reduction for failure to share in risk of production.* The effective quota shall be reduced, but not below zero pounds, for leasing and marketing quota purposes only, to the extent of the purchased quota for each crop year after the crop year in which the buyer of such quota fails to share in the risk of producing a crop of tobacco which is subject to such quota.

(4) *Determining forfeited amount.* If only part of the quota on a farm is attributable to a purchased quota, the amount of the farm marketing quota which must be forfeited under this paragraph shall be determined by increasing or decreasing each respective purchase of farm marketing quota for the farm to reflect changes in national

quota factors since the purchase occurred and subtracting the pounds of quota which have been sold to prevent forfeiture.

(d) *Hearing.* Before any forfeiture of quota becomes effective under the provisions of this section, the county committee shall:

(1) Schedule a hearing for the affected person.

(2) Notify the affected person of the hearing at least 10 days in advance of the hearing.

(3) Make a determination, on the basis of any evidence presented at the hearing, as to whether or not the affected person knowingly failed to take steps to prevent forfeiture of quota.

(4) Notify the affected person of the county committee determination and, if forfeiture of quota is to be required, afford such person an opportunity to appeal to a review committee in accordance with the provision of Part 711 of this chapter.

(e) *Apportionment of data and determination of quota after forfeiture.*—(1) *Apportionment of data.* The pounds of farm marketing quota retained on the forfeiting farm after the forfeiture shall be divided by the farm marketing quota established for the forfeiting farm before the forfeiture to determine a factor for apportioning farm data. The data to be retained on the forfeiting farm shall be determined by multiplying the factor by the following data of the forfeiting farm:

(i) The overmarketings which have not been subtracted when determining the effective farm marketing quota of the forfeiting farm.

(ii) The pounds of quota transferred from the forfeiting farm by lease or by the owner in the current year.

(iii) The pounds of quota reduced in the current year for a marketing quota violation in a prior year.

(iv) The previous year's effective farm marketing quota.

(v) The previous year's marketings.

(vi) The previous year's farm marketing quota.

(vii) The pounds of quota transferred to the farm by lease or by the owner in the previous year.

The portion of the forfeiting farm data which shall be included in a forfeiture pool for the county shall be determining by subtracting the pounds of each respective item of farm data which are retained on the forfeiting farm from the pounds of the respective item of data which was established for the forfeiting farm before the forfeiture.

(2) *Forfeiture pool data.* The data for the forfeiture pool shall be added to any previous data in the forfeiture pool.

(3) *Quota after forfeiture.* After adjustment of data, the effective farm marketing quota shall be determined in accordance with the provisions of § 726.57 for the forfeiting farm.

(f) *Forfeiture pool.*—(1) *Forfeiture pool required.* A forfeiture pool shall be established in each county in which a forfeiture of quota occurs. The forfeiture pool shall be increased to include data for each forfeiture and shall be decreased for each reallocation in order to reflect any forfeited or reallocated amounts of:

(i) The farm marketing quota for the current year.

(ii) The quota reduced for violation.

(iii) The quota transferred from the forfeiting farm by lease or by the owner.

(iv) The previous year's effective farm marketing quota.

(v) The previous year's marketings.

(2) *Adjustment of data in forfeiture pool.* At the beginning of the current year, the data in the forfeiture pool shall be adjusted by the factor used in determining quotas for old farms. Quota data in the forfeiture pool shall be decreased each time any burley tobacco quota is reallocated from the forfeiture pool. Such decrease in the quota data will be made in the same proportion as the pounds of quota which are reallocated from the pool are to the pounds of quota which were in the pool before the reallocation.

(g) *Reallocation of quota from forfeiture pool.*—(1) Application. In order to establish eligibility to receive quota from the forfeiture pool in the current year, an application must be made on a form approved by the Deputy Administrator. Such application must be filed:

(i) *Who may file.* By an active producer.

(ii) *When to file.* On or before April 30: *Provided,* That the State committee may establish an earlier date if notice of such earlier date is given in time for interested applicants to file an application by the earlier date.

(iii) *Where to file.* At the county ASCS office which serves the farm for which the application is filed.

(2) *Eligibility of applicant.* In order for an applicant to be eligible for quota from the forfeiture pool the county committee must determine that:

(i) The application was filed timely.

(ii) The applicant is an active tobacco producer.

(iii) During the current year or during the four years preceding the current year, the applicant has not sold or forfeited qouta from any farm.

(3) *Time to reallocate.* The county committee shall:

(i) Not reallocate any quota from the forfeiture pool until the time has passed for filing an application for forfeited quota for the current year.

(ii) Reallocate any quota from the forfeiture pool only during the 30-day period beginning on the day after the final date for filing an application for quota from the forfeiture pool.

(4) *Reallocation by county committee.* Reallocation of any burley tobacco quota shall be made by the county committee. In making its determination of the amounts of quota to reallocate, the county committee may consider the size of the current quotas on the farms of the eligible applicants, the length of time the applicants have been farming tobacco, the type of farming done by the applicants (i.e., livestock, grain, or other commodities), previous leasing history of applicants, and such other factors which in the judgment of the county committee should be considered. A burley tobacco quota may be reallocated to a farm which currently does not have a burley tobacco quota. A factor shall not be used to reallocate quota between all eligible applicants.

(5) *Basis for reallocation from forfeiture pool.* Reallocation from the forfeiture pool shall be on the basis of pounds of farm marketing quota.

(6) *Amount of quota to reallocate.* The county committee may reallocate all or part of the quota in the forfeiture pool. The minimum and maximum amounts of quota which may be reallocated to an eligible applicant are:

(i) *Minimum.* The total amount of quota in the pool or 100 pounds, whichever is less.

(ii) *Maximum.* 500 pounds: *Provided,* That not to exceed 1,500 pounds may be reallocated with State committee approval.

(7) *Data for receiving farm.* All quota data for the forfeiture pool shall be apportioned to the receiving farm in the proportion that the reallocated farm marketing quota is to the total farm marketing quota in the forfeiture pool before the reallocation. The data determined for the receiving farm in accordance with the provisions in this paragraph shall be added to any previous data for the receiving farm.

(8) *Quota for receiving farm.* After any adjustments which are made in accordance with the provisions of this section, the effective farm marketing quota shall be determined for the receiving farm in accordance with the provisions of § 726.57.

(h) *Forfeiture of reallocated quota.* Any burley tobacco quota which is reallocated in accordance with the provisions of this section shall be forfeited if the applicant to whom the quota is reallocated fails to share in the

risk of producing a crop of tobacco which is subject to such quota during any of the five years beginning with the crop year during which the quota is reallocated. The amount of farm marketing quota which must be forfeited shall be determined in the same manner which is specified in paragraph (c)(4) of this section with respect to the forfeiture of purchased quota. Any forfeiture of quota shall occur on December 1 of the year in which the applicant fails to share in the risk of production of tobacco which is produced subject to such quota: *Provided*, That while the failure to utilize a quota shall not subject the quota to forfeiture, the five year period which is specified in this paragraph shall be extended by a year for each year in which the allotment and quota is not utilized.

(i) *Successor-in-interest.* A successor-in-interest shall be subject to the provisions of this section in the same manner and to the same extent as would be applicable to the person whose interest has been assumed by such successor-in-interest.

(1) *New owner of farm.* The new owner of a farm on which a portion or all of the farm marketing quota for such farm was either purchased and/or was reallocated from forfeited quota shall become the successor-in-interest to the previous owner of the farm. However, if a farm is acquired by a new owner on or before June 30 of the current crop year and such owner would otherwise be required to sell or forfeit the farm marketing quota because in the preceding crop year the buyer of such quota did not share in the risk of producing a crop of tobacco which was subject to such purchased or reallocated quota, the new owner may be considered the buyer of quota instead of being considered as a successor-in-interest to the previous owner of the farm. However, the new owner must furnish to the county committee on or before June 30 of the current year, a certification that such owner intends to become an active burley tobacco producer. Any purchased or reallocated quota, which is acquired by a new owner who is considered to be the buyer of quota in accordance with the provisions of this paragraph, shall be subject to forfeiture under the same terms and conditions which would be applicable if the new owner actually had purchased the quota at the time the farm was acquired.

(2) *Buyer no longer shares in risk of production.* The owner of a farm shall become the successor-in-interest to the buyer of burley tobacco quota which was transferred to a farm but which was not owned by such buyer if the buyer ceases to share in the risk of production of burley tobacco produced on the farm.

Signed at Washington, D.C. on April 19, 1983.

Everett Rank,

Administrator, Agricultural Stabilization and Conservation Service.

7 CFR Part 725

Flue-Cured Tobacco Acreage Allotment and Marketing Quota Regulations

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule amends the regulations at 7 CFR Part 725 to implement the provisions of the No Net Cost Tobacco Program Act of 1982 (Pub. L. 97-218, 96 Stat. 197, approved July 20, 1982) with respect to the forfeiture of flue-cured tobacco acreage allotments and marketing quotas by persons other than individuals.

DATE: Comments on the proposed rule must be submitted on or before May 23, 1983 in order to be assured of consideration.

ADDRESS: Send comments to the Director, Tobacco and Peanuts Division, ASCS, Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013. All written submissions made pursuant to this notice will be made available for public inspection in Room 5750 South Building, USDA, between the hours of 8:15 a.m. and 4:45 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Jack S. Forlines, Agricultural Program Specialist, Tobacco and Peanuts Division, USDA-ASCS, P.O. Box 2415, Washington, D.C. 20013; (202) 382-0200.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Secretary's Memorandum 1512-1 and has been classified as "not major." It has been determined that this rule will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State or local governments, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The title and number of the Federal Assistance Program to which this rule applies are: Commodity Loan and Purchases; 10.051, as found in the Catalog of Federal Domestic Assistance.

While the Regulatory Flexibility Act is not applicable to this proposed rule, an Initial Regulatory Flexibility Impact Analysis has been prepared with a Preliminary Regulatory Impact Analysis. Since this action may have a significant economic impact on a substantial number of small entities, the impact analysis addresses the issues required in section 603 of that Act. The analysis is published herein, and copies have been sent to the General Counsel of the Small Business Administration. Additional copies are available from Director, Analysis Division, Agricultural Stabilization and Conservation Service, USDA, P.O. Box 2415, Washington, D.C. 20013.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

This proposed rule is necessary to implement the provisions of the No Net Cost Tobacco Program Act of 1982 (hereinafter referred to as the "Act"). The Act amended the Agricultural Adjustment Act of 1938 by adding a new section 316A to require that any person (including but not limited to governmental entities, public utilities, educational institutions, and religious institutions, but not including any individual) which owns a farm for which a flue-cured allotment and marketing quota are established to forfeit or sell such allotment and quota if such person is not significantly involved in the management or use of land for agricultural purposes. Such allotment or quota must be sold not later than December 1, 1983, or December 1 of the year after the year in which the farm is acquired, whichever is later. If the allotment and quota are not sold by the applicable date, the person shall forfeit the allotment and quota to the county ASC committee.

An interim rule was published in the Federal Register on December 17, 1982, (47 FR 56473) which amended 7 CFR Part 725 to set forth rules relating to the sale or forfeiture of flue-cured tobacco allotments and quotas. This proposed rule would add a new paragraph (b) to 7 CFR 725.74 to establish provisions with respect to the forfeiture of allotment and quota established for farms owned by

persons, other than individuals, which are not significantly involved in the management or use of land for agricultural purposes. The phrase "significantly involved in the management and use of land for agricultural purposes" will hereinafter be referred to as "significantly involved."

To be considered as significantly involved, a person must satisfy the county ASC committee that: (a) Its primary purpose is the management or use of land for production of crops which are planted and harvested annually and/or livestock (including pasture or forage for livestock) and (b) it receives more than 50 percent of its gross income from the management or use of land for agricultural purposes. Further, to prevent circumvention of the statutory requirement that, except for any individual, persons who are not significantly involved must sell or forfeit any flue-cured tobacco allotments and marketing quotas established for farms owned by such person, any other person owning more than 50 percent of the assets of the owner of such farms also must be significantly involved.

For example, if Person A is the owner of a flue-cured tobacco allotment and marketing quota and Person B owns more than 50 percent of the assets of Person A, both Persons A and B must each have received more than 50 percent of their gross income from the management or use of land for agricultural purposes.

To determine whether an owner of a farm for which a flue-cured tobacco acreage allotment and marketing quota are established is significantly involved, an analysis will be made by county ASC committee. First, the nature of the ownership interest must be determined. If an individual owns such farm, no further inquiry shall be made and the allotment and marketing quota established for such farm shall not be subject to forfeiture. However, a second determination shall be made if it is determined that the owner of such farm is not an individual.

With regard to this second determination, it shall be determined whether or not the owner is significantly involved. If such owner is not significantly involved, no further inquiry shall be made and the allotment and marketing quota established for such farm shall be subject to forfeiture. If such owner is significantly involved, a third determination is necessary to determine whether such owner is owned by any other person, including ownership by an individual.

If it is determined during the course of this third inquiry than 50 percent or more of such owner is owned by an individual, no further inquiry shall be made and such owner of the farm shall be determined to be significantly involved. Accordingly, the allotment and marketing quota established for such farm shall not be subject to forfeiture. If it is determined that more than 50 percent of such owner is owned by any person(s) which is not an individual, a fourth inquiry shall be made.

In this fourth inquiry, a determination shall be made with respect to each such person which is not an individual to determine whether such person is significantly involved. If any such person is not significantly involved, the entire flue-cured tobacco allotment and marketing quota established for such farm shall be subject to forfeiture.

In addition to the foregoing, an institution of higher education, such as a university or college, shall be considered as significantly involved if actively engaged in the production of tobacco for experimental or instructional purposes. Instructional purposes must include classroom courses which require the active participation of students in such activities as the preparation of land for the planting of tobacco and the growing and harvesting of tobacco. Experimentation and educational instruction in tobacco production by institutions of higher education are in the public interest. It is clear from the legislative history of the Act that Congress did not intend to divest these institutions of their flue-cured tobacco allotment and quota so long as the institutions are actively engaged in the described activities.

Summary of Preliminary Regulatory Impact Analysis and Initial Regulatory Flexibility Impact Analysis

I. Title

Proposed Rules—Burley and Flue-Cured Tobacco Marketing Quota Regulations.

II. Need for Action

To implement amendments to the Agricultural Adjustment Act of 1938 which were made by the "No Net Cost Tobacco Program Act of 1982" (Pub. L. 97–218) which require that any person (including not any limited to governmental entities, public utilities, educational institutions, and religious institutions, but not including any individual) which is not significantly involved in the management or use of land for agricultural purposes, and which owns a farm for which a burley tobacco quota or a flue-cured tobacco allotment and quota are established, to sell such allotment and/or quota within a prescribed time period or such allotment and/or quota shall be forfeited for reallocation to active tobacco producers in the same county.

III. Options Considered

The statute is specific in the action that is required. Therefore, no options were considered.

IV. Legislative Basis for Action

This action is taken in accordance with sections 316A and 316B of the Agricultural Adjustment Act of 1938 as added by sections 202 and 302 of Pub. L. 97–218.

V. Expected Impacts

A. *Direct Impacts.*

1. Those persons, other than individuals, who are not significantly involved in the management and use of land for agricultural purposes must sell any burley tobacco quota or flue-cured tobacco allotment and quota that are established for any farm which such person may own or such allotment and/or quota will be forfeited.

2. Allotment and/or quota may be purchased by or reallocated to only those persons who will be active producers of the kind of tobacco.

B. *Indirect Impacts.* No indirect impacts are anticipated.

C. *USDA and Other Federal Outlays.* There will be no outlays of Federal funds, except for administrative expense.

VI. Projected Reporting, Recordkeeping, and Other Compliance Requirements

Any person, other than an individual, which owns a farm for which a burley tobacco quota or flue-cured tobacco allotment and quota are established may be requested by the county ASC committee to submit documentation with respect to whether such person is significantly involved in the management or use of land for agricultural purposes. Records which ordinarily would be required of such persons for normal business purposes would generally be sufficient for providing such documentation. Therefore, no additional professional skills are required in order to comply with the requirements of this proposal.

VII. Federal Rules Which Duplicate, Overlap, or Conflict With The Proposals

The proposed rules do not duplicate, overlap, or conflict with the provisions or requirements of any other rules promulgated by the Federal government.

VIII. Significant Alternatives to the Proposed Rules

Section 316A and 316B of the Agricultural Adjustment Act of 1938 mandate the actions with respect to which the proposed rules relate. Therefore, there are no alternatives to the proposed rules which will accomplish the statutory objectives.

List of Subjects in 7 CFR Part 725

Acreage allotment, Marketing quota, Report requirements, Tobacco.

Proposed Rule

PART 725—[AMENDED]

Accordingly, it is proposed that 7 CFR Part 725 be amended as follows:

1. The authority citation for 7 CFR Part 725 reads as follows:

Authority: Sec. 301, 313, 314, 316, 316A, 317, 363, 372–375, 377, 378, 52 Stat. 38 as amended, 47, as amended, 48, as amended, 75 Stat. 469, as amended, 96 Stat. 205, 79 Stat. 66, as amended, 52 Stat. 63, as amended, 65–66, as amended, 70 Stat. 206, as amended, 72 Stat. 995, as amended, 7 U.S.C. 1301, 1313, 1314, 1314b, 1314b–1, 1314c, 1363, 1372–75, 1377, 1378, Sec. 401, 63 Stat. 1054, as amended, 7 U.S.C. 1421.

2. In § 725.74, a new paragraph (b) is added to read as follows:

§ 724.75 Forfeiture of allotment and quota.

* * * * *

(b) *Person not significantly involved in management or use of land for agricultural purposes.* For purposes of this paragraph, the term "person" means a person as defined in Part 719 of this chapter, including any governmental entity, public utility, educational institution, religious institution, or joint venture (but not including any farming operation involving only a husband and wife), but excluding any individual.

(1) *Required forfeiture.* Any person not significantly involved in the management or use of land for agricultural purposes which owns a farm for which a flue-cured tobacco acreage allotment and marketing quota are established shall forfeit, in accordance with the provisions of § 725.72, such allotment and quota which is not sold on or before:

(i) *Farm owned or acquired before January 1, 1983.* December 1, 1983.

(ii) *Farm acquired on or after January 1, 1983.* December 1 of the year after the year in which the farm is acquired.

(2) *Significantly involved.* A person shall be considered to be significantly involved in the management or use of land for agricultural purposes if the county ASC committee determines that:

(i) The primary business purpose of the person is the management or use of land for the production of crops which are planted and harvested annually, and/or livestock, including pasture and forage for livestock;

(ii) For the 3 preceding years, more than 50 percent of the gross income of the person has been derived from the management or use of land as described in paragraph (b)(2)(i) of this section; and

(iii) Any other person or all other persons which in combination own more than 50 percent of the assets of the owner of the flue-cured tobacco allotment and marketing quota also meet the criteria specified in paragraphs (b)(2) (i) and (ii) of this section.

(iv) In addition, an institution of higher education, such as a university or college, shall be considered to be a person significantly involved in the management or use of land for agricultural purposes if the county ASC committee determines that it is actively engaged in the production of tobacco for experimental purposes or for instructional purposes under a program whereby students are enrolled in courses requiring them to actually produce the tobacco crop.

(3) *Documentation.* Within 30 days after a written request is made by the county ASC committee, or within such extended time as may be granted by the county ASC committee, a person must submit such documentation as may be requested to support a determination that the provisions of paragraph (b)(2) of this section have been met with respect to such person. Upon failure of such person to timely respond to such request, the county ASC committee shall determine that the person is not significantly involved in the management and use of land for agricultural purposes.

Signed at Washington, D.C. on April 15, 1983.

C. Hoke Leggett,

Acting Administrator, Agricultural Stabilization and Conservation Service.

Department of Energy

Federal Energy Regulatory Commission

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Volume 871]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: April 19, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register.**

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487–4808, 5285 Port Royal Rd., Springfield, Va. 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 mile rule)
102–3: New well (100 ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease

Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal Seams
107–DV: Devonian Shale
107–PE: Production enchancement
107–TF: New tight formation
107–RT: Recompletion tight formation

Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-C

[Volume 872]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: April 19, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register**.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487–4808, 5285 Port Royal Rd., Springfield, Va 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 Mile rule)
102–3: New well (1000 Ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal Seams
107–DV: Devonian Shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10782 Filed 4-21-83; 8:45 am]

BILLING CODE 6717-01-C

[Volume 873]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: April 19, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register**.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487–4808, 5285 Port Royal Rd., Springfield, Va 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 Mile rule)
102–3: New well (1000 Ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal Seams
107–DV: Devonian Shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary

[FR Doc. 83-10783 Filed 4-21-83; 8:45 am]

BILLING CODE 6717-01-C

[Volume No. 874]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: April 19, 1983.

The following notices of determinations were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in acordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register**.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487–4808, 5285 Port Royal Rd., Springfield, Va. 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 Mile rule)
102–3: New well (1000 Ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease

Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal Seams
107–DV: Devonian Shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation

Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

Department of the Interior

Office of Surface Mining Reclamation and Enforcement

Permanent State Regulatory Program of Virginia; Disapproval of Certain Provisions of a State Program Amendment and Proposal to Supersede State Laws and Regulations; Removal of Condition of State Program Approval

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 946

Permanent State Regulatory Program of Virginia; Disapproval of Certain Provisions of a State Program Amendment

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule.

SUMMARY: This document disapproves certain provisions of a proposed State program amendment relating to reclamation standards for operations of two surface acres or less submitted by Virginia under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The provisions of the proposed amendment being disapproved have been found to be inconsistent with SMCRA and the Federal regulations. Part 946 of title 30 of the CFR is being amended to reflect this action.

EFFECTIVE DATE: April 22, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Ralph Cox, Big Stone Gap Field Office, Office of Surface Mining, P.O. Box 626, Big Stone Gap, Virginia 24219. Telephone: (703) 523–4303.

SUPPLEMENTARY INFORMATION: On March 3, 1980, the Secretary of the Interior received a proposed regulatory program from the Commonwealth of Virginia. On October 22, 1980, following a review of the proposed program as outlined in 30 CFR Part 732, the Secretary approved in part and disapproved in part the proposed program (45 FR 69977–70000). Virginia resubmitted its proposed regulatory program on August 13, 1981, and after a subsequent review, the Secretary approved the program subject to the correction of minor deficiencies. The approval was effective upon publication of the notice of conditional approval in the December 15, 1981 **Federal Register** (46 FR 61088–61115).

Information pertinent to the general background, revisions, modifications, and amendments to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Virginia program can be found in the December 15, 1981 **Federal Register** (46 FR 61088–61115).

For the reader's information concerning the following, Chapter 19 of the Code of Virginia refers to the Virginia permanent regulatory program approved by the Secretary on December 15, 1981. Chapter 23 of the Code of Virginia refers to the provisions reinstating reclamation controls on surface mining operations of less than two acres.

One of the minor conditions of the approval imposed by the Secretary was as follows:

> Condition "r" requires Virginia to submit a copy of a revised policy statement or otherwise amend its program to make its coal haul roads policy consistent with the Federal requirements.

Pursuant to the Secretary's decision, the condition was due to be satisfied by February 15, 1982. On January 28, 1982, the State requested an extension of the condition deadline until April 1, 1982, primarily because a bill, which would reinstate reclamation controls on surface mining operations of less than two acres, was pending before the Virginia General Assembly (Administrative Record No. VA 376). On February 3, 1982, OSM published a proposed rule to extend the condition deadline until April 1, 1982 (47 FR 5013). On February 24, 1982, the Assistant Secretary of the Interior for Energy and Minerals, published a final rule extending the condition date to April 1, 1982 (47 FR 8008). Following receipt of a copy of the bill (Virginia House bill 123), the Director, OSM, on February 19, 1982, provided the State with comments and recommendations concerning specific provisions of the draft legislation (Administrative Record No. VA 380).

On March 31, 1982, Virginia submitted a letter describing the actions which had been undertaken and would be taken by the Commonwealth to resolve condition "r" (Administrative Record No. VA 383). First, Virginia stated that the General Assembly had enacted a bill that would repeal a section of the Code of Virginia allowing deeding of haul roads to counties. Second, Virginia pointed to draft regulations for coal haul road performance standards it proposed to adopt as State regulations. Finally, Virginia stated that the Virginia General Assembly had enacted H.B. 123 which, upon signature by the Governor, would become effective July 1, 1982. On April 26, 1982, OSM published a notice of receipt of the proposed amendments, a public comment period and opportunity for public hearing (47 FR 17827).

On July 9, 1982, the State submitted the enacted provisions cited in its March 31, 1982, letter (Administrative Record No. VA 400). On July 23, 1982, OSM reopened the public comment period for these amendments (47 FR 31897). On August 19, 1982, at 47 FR 36127, the Director, OSM, published a notice approving the State program amendments concerning the State's regulations for coal haul road performance standards and the legislative change to end the deeding of haul roads to counties. However, the Director postponed action on two proposed program modifications consisting of enacted legislation (Chapter 23, Title 45.1 of the Virginia Code, formerly H.B. 123) and proposed draft regulations to implement chapter 23 until Federal regulations relating to the two-acre exemption were effective Therefore, the Director stated no decision was being made on either of the above proposed amendments or on the overall adequacy of all the modifications submitted by Virginia on March 31, 1982, to satisfy condition "r"

On September 29, 1982, following a preliminary review of Virginia's Chapter 23, OSM sent a letter to Virginia providing its tentative review of Chapter 23 (Administrative Record No. VA 430) The Director provided this letter because he believed the revised Federal two-acre exemption rule published August 2, 1982 (47 FR 33424), in conjunction with other provisions, provided a sufficient standard by which to review Chapter 23. Also, if legislative changes were necessary to Chapter 23, the Director wanted to provide Virginia with timely comment so that the Virginia Legislature in its early 1983 session could address possible changes to Chapter 23. On October 14, 1982, OSM published a notice reopening the public comment period to allow the public an opportunity to comment on the Director's letter of September 29, 1982 (47 FR 45886). On November 1, 1982, Virginia responded to the points raised in the Director's letter of September 29, 1982 (Administrative Record No. VA 435).

Director's Findings

1. Chapter 23

The Director finds, in accordance with SMCRA and 30 CFR 732.17 and 732.15, that the program amendment consisting of Chapter 23 of the Code of Virginia and its implementing regulations is not inconsistent with SMCRA and the Federal regulations except for the provisions specified below.

The following provisions of Virginia's Chapter 23 and the regulations thereunder are disapproved for the reasons listed below.

Section 45.1–364.A.1.

This section prescribes when operations are deemed under common ownership or control and treated as a

single operation, for the purpose of determining the affected area of a coal surface mining operation.

The complete text of Section 45.1–364.A.1 is as follows:

Section 45.1–364. Applicability.—A. Coal mining operations which affect two surface acres or less shall be regulated under the provisions of this chapter. In determining the affected area for the purpose of this chapter and Chapter 19 (§ 45.1–226 et seq.) of this title, the following criteria shall apply:

1. Two or more contiguous coal mining operations, the total combined surface area of which exceeds two acres and which are owned or controlled by the same operator, shall be deemed a single operation affecting more than two surface acres and subject to the applicable provisions of Chapter 19 of this title. The fact that a haul road connects two or more operations shall not make them contiguous.

The complete text of Section 3.01(a)(1) of the Virginia Coal Surface Mining Reclamation Regulations for Operations Disturbing Two Surface Acres or Less is as follows:

3.01 Permit Acreage Computation. (a) The criteria listed below shall be used to determine the coal surface mining activities qualifying for the "two acre" exemption and those subject to Chapter 19, Title 45.1 of the Code of Virginia.

(1) Two or more contiguous operations, the total area of which exceeds two acres and which are owned or controlled by the same operator, shall be deemed a single operation subject to applicable provisions of Chapter 19, Title 45.1 of the Code of Virginia.

The Director finds this section to be inconsistent with the Federal regulations because of Virginia's phrase "owned or controlled by the same operator." The revised Federal regulations at 30 CFR 700.11(b)(2)(ii) provide one of the three tests for physical relatedness. Section 700.11(b)(2)(ii) states that operations are deemed under common ownership or control if they are owned or controlled, directly or indirectly, by or on behalf of (1) the same person; (2) two or more persons, one of whom controls, is under control with, or is controlled by the other; or (3) members of the same family and their relatives, unless it is established that there is no direct or indirect business relationship between or among them. The revised regulations go on to define what "control" means. The Director has determined that Virginia's phrase "owned or controlled by the same operator," is not consistent with the categories of persons contained in the Federal provisions cited above.

Section 45.1–364.A.3

This section prescribes when a road should be included in the affected area of an operation.

The complete text of Section 45.1–364.A.3 of Chapter 23 is as follows:

3. Roads permitted to another operator will not be included in acreage calculation.

The complete text of Section 3.01(a)(5) of the Virginia two surface acres or less regulations is as follows:

(5) Haul roads not exempted by Section 2.02(p) of these regulations shall be included in the acreage calculations, provided they are not permitted to another operator.

Section 45.1–364.A.3 of Chapter 23 states that roads permitted to another operator will not be included in acreage calculation. The revised Federal regulations at 30 CFR 700.11(b)(1) provide that, where a segment of a road is used for access or coal haulage by more than one surface coal mining operation, the entire segment shall be included in the affected area of each of those operations, provided that two or more operations which are deemed related shall be considered as one operation.

In issuing its revised Federal rule, OSM rejected the idea of allocating the road to the first operator with the right to permit the road because it could lead to abuse of the exemption. Such a concept would allow one operator to include the road in its affected area; then a whole series of different operations along the road which in fact "affect" the road would be able to exclude the road for purposes of calculating the two-acre exemption. Therefore, the Director finds that the criterion set forth by Virginia is inconsistent with the Federal provision.

It should be noted that the alternative selected by OSM will not require double bonding or double permitting of any segment of a road. The attribution to more than one operation of a segment of a road is done solely for purposes of determining the size of the affected area. Only one operation at a time is required to actually permit or bond any segment of such a road.

Section 45.1–364.A.4

This section prescribes when surface areas above underground mine workings will be included in the affected area.

The complete text of Section 45.1–364.A.4 of Chapter 23 is as follows:

4. Surface areas above underground coal mine workings shall not be included in the affected area, provided that such surface area is not likely to be substantially adversely impacted by subsidence or disturbed by other mining related activities.

The complete text of Section 3.01(a)(4) of the Virginia two surface acres or less regulations is as follows:

(4) Surface area above underground coal mine workings shall not be used in calculating acreage under this Section, provided that the surface area is not likely to be substantially adversely impacted by subsidence or disturbed by other mining related activites.

This section of Chapter 23 states that the surface area above underground workings shall not be used to calculate the affected area unless the surface area is likely to be "substantially adversely" impacted by subsidence or disturbed by other mining related activities. The use of the term "substantially adversely" implies that some surface impact could occur and that the impacted area nevertheless would not be included in the affected area. The Director finds that this section of Chapter 23 is inconsistent with 30 CFR 701.5 and that it conflicts with the definition of "affected area" contained in the Virginia permanent program regulations pursuant to Chapter 19, which has been approved by the Secretary of the Interior. The Virginia definition of "affected area" at V701.5 of Virginia's regulations states: "With respect to underground mining operations, "affected area" means: (i) Any water or surface land upon or in which those activities are conducted or located; and (ii) land or water area, which is located above underground mine workings."

The Director finds that Chapters 19 and 23 must be consistent since a single determination of eligibility for the two acre exemption must be made. In this section, Virginia's approach seems to be that the eligibility determination is made under Chapter 23. Although the Director realizes that Chapter 23 is a regulatory program which is in addition to Chapter 19, he believes that the Chapter 19 provisions must first be applied before any operation could qualify for an exemption from Chapter 19.

Therefore, the Director disappproves the above specified provisions of Chapter 23 and its implementing regulations. In addition, any other provision(s) of the Virginia two acres or less regulations which may be interpreted to be related to or to stem directly from the above disapproved provisions are also disapproved.

2. Federal Preemption

It is generally not necessary to use section 505 of SMCRA or 30 CFR 730.11(a) with regard to proposed amendments to approved State regulatory programs because "No such change to laws or regulations shall take effect for purposes of a State program until approved as an amendment." 30 CFR 732.17(g). Without Secretarial

approval, therefore, the Virginia statutory and regulatory changes have not become effective, and section 505 thus would not apply.

In this instance, however, the Commonwealth of Virginia has actually implemented unapproved statutory and regulatory changes and has raised section 505 in court pleadings. The Commonwealth appears to contend that its changes have become effective and that section 505 is applicable. The Commonwealth has placed certain operators in an untenable position because the provisions disapproved in this notice are ineffective as a matter of Federal law and, according to the Commonwealth, effective as a matter of State law. This situation also is unusual in that Virginia's Chapter 23 contains provisions which conflict with Federal law as well as provisions which go beyond and do not conflict with Federal law.

Therefore, to avoid any doubt whatsoever concerning OSM's intentions in this unusual and significant matter, and because OSM has determined that the following State laws and regulations are inconsistent with SMCRA and its implementing regulations, OSM will give notice, under section 505 of SMCRA and 30 CFR 730.11(a), that Sections 45.1–364.A.1, 45.1–364.A.3 and 45.1–364.A.4 of Chapter 23 of the Code of Virginia and Sections 3.01(a)(1), 3.01(a)(5), and 3.01(a)(4) of the Virginia Coal Surface Mining Reclamation Regulations for Operations Disturbing Two Surface Acres or Less are inconsistent with SMCRA and its implementing regulations. A separate notice to that effect is being published in the **Federal Register**; it will provide a 30-day period for public comment.

3. Condition "r"

Inasmuch as the Director disapproves the above-cited provisions of Chapter 23 and its implementing regulations and inasmuch as two previous State program amendments consisting of Virginia regulations for coal haul road performance standards and of a statutory change to end the deeding of haul roads to counties have been approved (August 19, 1982 at 47 FR 36127), the Director, via a separate **Federal Register** notice, will invite pubic comment on a proposed rule to remove condition "r" on the approval of the Virginia State Program.

Public Comment

Some comments, primarily in reponse to the Director's September 29, 1982 letter (Administrative Record No. VA 430), were received. However, all these comments were directed to the revised Federal two-acre rule of August 2, 1982 (47 FR 33424). Therefore, these comments and the corresponding responses in the August 2, 1982 **Federal Register** are not being repeated. Comments from Federal agencies were limited and did not identify any specific deficiencies of the proposed program amendment.

Pursuant to section 503(b) of SMCRA and 30 CFR 732.17(h)(10)(i) of those Federal agencies invited to comment, comments were received from the following: Army Corps of Engineers, Fish and Wildlife Service, Bureau of Land Management, Minerals Management Service, National Park Service, Soil Conservation Service and the Mine Safety and Health Administration.

Disapproval of Certain Provisions of Program Amendment

Accordingly, Sections 45.1–364.A.1, 45.1–364.A.3 and 45.1–364.A.4 of Chapter 23 of the Code of Virginia; and Sections 3.01(a)(1), 3.01(a)(5) and 3.01(a)(4) of the Virginia Coal Surface Mining Reclamation Regulations for Operations Disturbing Two Surface Acres or Less are hereby disapproved pursuant to the above Director's Findings.

Effect of Director's Decision

Section 503 of SMCRA establishes that a State may not exercise jurisdiction under the Act unless the State program is approved by the Secretary. Similarly, the Secretary's regulations at 30 CFR 732.17(a) require that any alteration of an approved State program must be submitted to OSM as a program amendment. Thus, any changes to the program are not enforceable by the State until approved by the Secretary. The Federal regulations at 30 CFR 732.17(g) clearly prohibit any unilateral changes to approved State programs. In his oversight of the State program, the Secretary will recognize only the statutes and regulations approved by him, and will require the enforcement by the State of only such provisions. Therefore, the provisions that the Secretary is approving today will take effect today for purposes of the State program. Those provisions the Secretary has not approved today may not be implemented by the State in any manner until such time as the Secretary approves them.

Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act.* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 946

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Accordingly, Part 946 of Title 30 is amended as set forth herein.

Dated: April 20, 1983.

Carson W. Culp, Jr.,

Acting Director, Office of Surface Mining Reclamation and Enforcement.

PART 946—[AMENDED]

Part 946 of Title 30 is amended by revising § 946.10 to read as follows:

§ 946.10 State regulatory program approval.

The Virginia State Program, as submitted on March 3, 1980, as amended and clarified on June 16, 1980, as resubmitted on August 13, 1981, and clarified in a meeting with OSM on September 21 and 22, 1981, and in a letter to the Director of the Office of Surface Mining on October 15, 1981, was conditionally approved, effective December 15, 1981. Beginning on that date, the Department of Conservation and Economic Development, Division of Mined Land Reclamation, was deemed the regulatory authority in Virginia for all surface coal mining and reclamation operations and all exploration operations on non-Federal and non-Indian lands. Beginning on July 21, August 19, September 21, and December 13, 1982, January 18, February 28, and

April 21, 1983, the program also included program amendments submitted on January 28, July 8, July 9, August 13, September 30, and December 20, 1982, and March 22, 1983, respectively. Further, beginning on April 22, 1983 the program includes a program amendment consisting of Chapter 23, of the Code of Virginia and its implementing regulations except for § 45.1.364.A.1, 45.1.364.A.3 and 45.1.364.A.4 of Chapter 23; and 3.01(a)(1), 3.01(a)(5) and 3.01(a)(4) of the Virginia Coal Surface Mining Reclamation Regulations for Operations Disturbing Two Surface Acres or Less, submitted on July 9, 1982. Copies of the conditionally approved program, as amended, are available for review at:

Virginia Division of Mined Land Reclamation, Drawer U, 622 Powell Avenue, Big Stone Gap, Virginia 24219

Virginia Department of Conservation and Economic Development, 1100 State Office Building, Richmond, Virginia 23219

Office of Surface Mining Reclamation and Enforcement, Flannagan and Carroll Streets, Lebanon, Virginia 24266

Office of Surface Mining Reclamation and Enforcement, Room 5315, 1100 L Street NW., Washington, D.C. 20240

BILLING CODE 4310-05-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 946

Permanent State Regulatory Program of Virginia; Proposal To Supersede State Laws and Regulations; Removal of Condition of State Program Approval

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: This document announces and seeks public comment on proposed actions by OSM (1) to preempt and to supersede specific provisions of Virginia's laws and regulations concerning the two-acre exemption from regulation of surface coal mining operations under the Surface Mining Control and Reclamation Act of 1977 (SMCRA) and (2) to remove one of the conditions of approval of the Virginia permanent regulatory program under SMCRA. This action is being taken because the Director has initially determined that these provisions are inconsistent with SMCRA, the Federal regulations at 30 CFR 700.11 and the permanent regulatory program administered by Virginia under Chapter 19 of the Code of Virginia. The Director's determination is based on the reasons cited under the section titled "Director's Findings" found in a separate notice of final rulemaking pertaining to the Virginia permanent regulatory program that is appearing in today's **Federal Register.**

DATE: Written comments, data or other relevant information relating to these actions concerning the Virginia program not received on or before 4:00 p.m. on May 23, 1983 will not necessarily be considered.

ADDRESSES: Written comments should be mailed or hand delivered to: Ralph Cox, Director, Big Stone Gap Field Office, Office of Surface Mining Reclamation and Enforcement, Highway 23, South, P.O. Box 626, Big Stone Gap, Virginia 24219, Telephone: (703) 523–4303.

Copies of the Virginia program, the proposed modifications to the program, a listing of any scheduled public meetings and all written comments received in response to this notice will be available for review at the OSM offices and the office of the State regulatory authority listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays:

Office of Surface Mining Reclamation and Enforcement, Room 5315, 1100 L Street NW. Washington, D.C. 20240
Office of Surface Mining Reclamation and Enforcement, Highway 23, South, Big Stone Gap, Virginia 24219
Office of Surface Mining Reclamation and Enforcement, Flannagan and Carroll Streets, Lebanon, Virginia 24266
Virginia Division of Mined Land Reclamation, 620 Powell Avenue, Big Stone Gap, Virginia 24219

FOR FURTHER INFORMATION CONTACT: Mr. Ralph Cox, Big Stone Gap Field Office, Office of Surface Mining, P.O. Box 626, Big Stone Gap, Virginia 24219, Telephone: (703) 523–4303.

SUPPLEMENTARY INFORMATION: For detailed background on the actions proposed in this document, see the notice of final rulemaking pertaining to the Virginia permanent regulatory program that is also appearing in today's **Federal Register.**

Director's Findings and Proposed Actions

1. Federal Preemption

Pursuant to Section 505(b) of SMCRA and 30 CFR 730.11(a), the Director proposes to preempt and supersede the following provisions of Chapter 23 of the Code of Virginia and implementing regulations thereunder. This action is being taken because the Director has initially determined that these provisions are inconsistent with SMCRA, the Federal regulations at 30 CFR 700.11 and the permanent regulatory program administered by Virginia under Chapter 19 of the Code of Virginia. The Director's determination is based on the reasons cited under the section titled "Director's Findings" found in a separate notice of final rulemaking pertaining to the Virginia permanent regulatory program that is appearing in today's **Federal Register.**

The following provisions of Chapter 23 of the Code of Virginia and the implementing regulations thereunder are proposed for Federal preemption:

Section 45.1–364.A.1 and Related Regulation

This section prescribes when operations are deemed under common ownership or control and treated as a single operation, for the purpose of determining the affected area of a coal surface mining operation.

The complete text of Section 45.1–364.A.1 is as follows:

Section 45.1–364. Applicability.—A. Coal mining operations which affect two surface acres or less shall be regulated under the provisions of this chapter. In determining the affected area for the purpose of this chapter and Chapter 19 (§ 45.1–226 et seq.) of this title, the following criteria shall apply:

1. Two or more contiguous coal mining operations, the total combined surface area of which exceeds two acres and which are owned or controlled by the same operator, shall be deemed a single operation affecting more than two surface acres and subject to the applicable provisions of Chapter 19 of this title. The fact that a haul road connects two or more operations shall not make them contiguous.

The complete text of Section 3.01(a)(1) of the Virginia Coal Surface Mining Reclamation Regulations for Operations Disturbing Two Surface Acres or Less is as follows:

3.01 Permit Acreage Computation. (a) The criteria listed below shall be used to determine the coal surface mining activities qualifying for the "two acre" exemption and those subject to Chapter 19, Title 45.1 of the Code of Virginia.

(1) Two or more contiguous operations, the total area of which exceeds two acres and which are owned or controlled by the same operator, shall be deemed a single operation subject to applicable provisions of Chapter 19, Title 45.1 of the Code of Virginia.

Section 45.1–364.A.3 and Related Regulation

This section prescribes when a road should be included in the affected area of an operation.

The complete text of Section 45.1–364.A.3 of Chapter 23 is as follows:

3. Roads permitted to another operator will not be included in acreage calculation.

The complete text of Section 3.01(a)(5) of the Virginia two surface acres or less regulations is as follows:

(5) Haul roads not exempted by Section 2.02(p) of these regulations shall be included in the acreage calculations, provided they are not permitted to another operator.

Section 45.1–364.A.4 and Related Regulation

This section prescribes when surface areas above underground mine workings will be included in the affected area.

The complete text of Section 45.1–364.A.4 of Chapter 23 is as follows:

4. Surface areas above underground coal mine workings shall not be included in the affected area, provided that such surface area is not likely to be substantially adversely impacted by subsidence or disturbed by other mining related activities.

The complete text of Section 3.01(a)(4) of the Virginia two surface acres or less regulations is as follows.

(4) Surface area above underground coal mine workings shall not be used in calculating acreage under this Section, provided that the surface area is not likely to be substantially adversely impacted by

subsidence or disturbed by other mining related activities.

2. Removal of Condition "r"

Inasmuch as the Director has disapproved the above-cited provisions of Chapter 23 of the Code of Virginia and implementing regulations in the separate notice of final rulemaking published today and inasmuch as two previous State program amendments consisting of Virginia regulations for coal haul road performance standards and of a statutory change to end the deeding of haul roads to counties have been approved (August 19, 1982 at 47 FR 36127), the Director proposes to remove condition "r" of the approval of the Virginia permanent program.

The Director has initially determined that those provisions of Chapter 23 and its implementing regulations not determined to be inconsistent with SMCRA and the Federal regulations, taken together with the two amendments previously approved, satisfy the haul roads policy required by the Secretary in his December 15, 1981, approval of the Virginia program.

Following the public comment period and (1) upon completion of the actions proposed in this document pursuant to section 505(b) of SMCRA and 30 CFR 730.11(a), or (2) upon the State's written agreement to enforce its program in conformity with the Director's actions in today's separate notice of final rulemaking disapproving certain proposed amendments to Chapter 23 of the Code of Virginia and its implementing regulations, OSM proposes to remove condition "r" of the approval of the Virginia program.

Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act.* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

Part IX

Federal Election Commission

Communications by Corporations or Labor Organizations

FEDERAL ELECTION COMMISSION

11 CFR Part 114

[Notice 1983-10]

Communications by Corporations or Labor Organizations

AGENCY: Federal Election Commission.

ACTION: Withdrawal of regulations from Congress.

SUMMARY: On March 1, 1983, the Federal Election Commission transmitted revisions of 11 CFR 114.3 and 114.4 and certain amendments to §§ 114.1, 114.5, 114.7 and 114.8 to Congress for legislative review pursuant to 2 U.S.C. 438(d). These regulations address communications by corporations and labor ogranizations to their solicitable class as well as to the general public. The Commission has decided, however, to withdraw these regulations from Congress to permit further public comment on certain issues. The Commission intends to transmit a new set of rules when the comment period has run.

EFFECTIVE DATE: April 21, 1983.

FOR FURTHER INFORMATION CONTACT: Ms. Susan Propper, Assistant General Counsel, 1325 K Street, NW, Washington, D.C. 20463, (202) 523-4143 or (800) 424-9530.

SUPPLEMENTARY INFORMATION: The Commission transmitted revised regulations governing communications by corporations and labor organizations to Congress on March 1, 1983, in accordance with the legislative review provisions of 2 U.S.C. 438(d). (These regulations were published in their entirety on March 4, 1983, (48 FR 9236)). Under section 438(d), the Commission may prescribe regulations if neither House has disapproved them after 30 legislative days.

The Commission has decided to withdraw the regulations from Congress in order to seek additional public comment on these regulations, in particular on the issues relating to the class of people solicitable by labor organizations and incorporated membership organizations. Since these issues appear throughout the regulations, the Commission is withdrawing §§ 114.3 and 114.4 and the amendments to §§ 114.1, 114.5, 114.7, and 114.8 in their entirety as published on March 4, 1983 (48 FR 9236).

The Commission is publishing today a Notice of Proposed Rulemaking to seek public comment on these two regulations. After the conclusion of the public comment period and further Commission consideration of the proposals, the Commission intends to transmit the rules to Congress for legislative review.

Dated: April 21, 1983.

Danny L. McDonald,

Chairman, Federal Election Commission.

BILLING CODE 6715-01-M

FEDERAL ELECTION COMMISSION

11 CFR Part 114

[Notice 1983-11]

Communications by Corporations and Labor Organizations

AGENCY: Federal Election Commission.

ACTION: Second notice of proposed rulemaking.

SUMMARY: The Commission seeks public comment on proposed revisions to 11 CFR Part 114 which would add executive and administrative personnel to the class of persons who may be solicited by labor organizations. A second set of revisions to Part 114 would add families of members to the class of persons who may be solicited by incorporated membership organizations, trade associations, cooperatives and corporations without capital stock. These revisions were transmitted to Congress for legislative review as part of a general revision of 11 CFR 114.3 and 114.4. The Commission has now withdrawn those regulations from Congressional consideration pending the receipt of comments on this Notice.

DATE: Comments must be received on or before May 23, 1983.

ADDRESS: Susan E. Propper, Assistant General Counsel, 1325 K Street, NW., Washington, D.C. 20463.

FOR FURTHER INFORMATION CONTACT: Susan E. Propper, Assistant General Counsel, (202) 523-4143 or (800) 424-9530.

SUPPLEMENTARY INFORMATION: On March 1, 1983, the Commission transmitted proposed revisions of 11 CFR 114.3 and 114.4 and certain amendments to §§ 114.1, 114.5, 114.7 and 114.8 to Congress for legislative review under 2 U.S.C. 438(d). The text of these revisions was published in the **Federal Register** on March 4, 1983. (48 FR 9236). The Commission has now withdrawn these regulations from Congressional consideration, however, pending additional public comment.

The Commission requests public comment on the proposed regulations, particularly with respect to the proposed inclusion of executive and administrative personnel within the restricted class of labor organizations and the proposed inclusion of families of members within the restricted class of corporation such as membership organizations, trade associations, cooperatives and corporations without capital stock. These proposed changes would permit partisan communications to be made to such persons under 11 CFR 114.3 and would also permit those persons to be solicited for contributions to a separate segregated fund under 11 CFR 114.5, 114.7 or 114.8 as appropriate. The language of the proposed revisions is set forth in the Commission's March 4, 1983, **Federal Register** Notice cited above.

Further Commission action, including a second transmittal of sections 114.3 and 114.4 and amendments to sections 114.1, 114.5, 114.7 and 114.8 to Congress, will be taken after the comment period is concluded.

Certification of No Effect Pursuant to 5 U.S.C. 605(b) (Regulatory Flexibility Act)

I certify that the attached proposed rules will not, if promulgated, have a significant economic impact on a subtstantial number of small entities. The Basis for this certification is that no entity is required to make any expenditures under the proposed rules.

Dated: April 21, 1983.

Danny L. McDonald,

Chairman, Federal Election Commission.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Presidential Documents

Title 3—

The President

Presidential Determination No. 83–5 of March 30, 1983

Presidential Certification and Delegation of Authority With Respect to Section 163 of P.L. 97–377

Memorandum for the Honorable George P. Shultz, the Secretary of State

Pursuant to the authority vested in me by Section 163 of the second Joint Resolution appropriating funds for fiscal year 1983 (P.L. 97–377), I hereby certify that I have reliable assurances that the countries for which Congress has been informed for this fiscal year of proposed foreign military sales financing or of expected foreign military sales agreements will not transfer sensitive United States equipment, materials, or technology in violation of agreements entered into under the Arms Export Control Act to any communist country, or to any country that receives arms from a communist country.

Pursuant to the authority vested in me by Section 621 of the Foreign Assistance Act of 1961, as amended, Section 301 of Title 3 of the United States Code, and as President of the United States, I hereby delegate to you the functions conferred upon me by Section 163 of P.L. 97–377.

This certification and delegation of authority shall be reported to Congress and shall be published in the **Federal Register.**

Rules and Regulations

Federal Register
Vol. 48, No. 80
Monday, April 25, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Part 1942

Security Requirements for Community Programs Loans With Joint Financing

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) is amending its regulations regarding security requirements for loans on Water and Waste Disposal (WWD) and Community Facility (CF) projects that are jointly financed by FmHA and other lenders. The present regulations require that for these loans FmHA must obtain at least a parity lien position with the other lender. This action is being taken because differences in interpretation have developed as to how the regulations apply to cases where FmHA and the other lender want to use different security and FmHA field offices have requested guidance as to what conditions are necessary to have a parity lien. The intended effect of the proposed amendments is to clarify when a parity lien is required and provide addjtional guidance regarding conditions necessary to constitute parity in lien positions.

EFFECTIVE DATE: April 25, 1983.

FOR FURTHER INFORMATION CONTACT: M. Wayne Stansbery, Loan Officer, Community Facilities Loan Division, Farmers Home Administration, USDA, Room 6306, South Agriculture Building, Washington, DC 20250, telephone (202) 382–1490.

SUPPLEMENTARY INFORMATION:

Classification

This action has been reviewed under USDA procedures established in Secretary's Memorandum 1512–1 which implements Executive Order 12291 and has been determined to be nonmajor. The rule will not have: (a) An annual effect on the economy of $100 million or more; or (b) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (c) significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of the United States based enterprises to compete with foreign based enterprises in domestic or export markets.

Clearinghouse Review

The FmHA programs and projects which are affected by this Instruction are subject to State and local clearinghouse review in the manner delineated in FmHA Instruction 1901–H.

Environmental Impact

This document has been reviewed in accordance with 7 CFR Part 1901, Subpart G, "Environmental Impact Statements." It is the determination of FmHA that this action does not constitute a major federal action significantly affecting the quality of the human environment and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required.

Programs Affected

Catalogue of Federal Domestic Assistance (CFDA) No. 10.423, Community Facilities Loans; CFDA No. 10.418, Water and Waste Disposal Systems for Rural Communities.

Background

FmHA regulations for Community Facilities (CF) and Water and Waste Disposal (WWD) loans state in part: "When processing a loan utilizing joint financing, FmHA will obtain at least a parity position with the other lender." The primary reason for this requirement is the concern that if FmHA participates in joint financing of a facility with another lender and accepts a junior lien, FmHA would need to ensure the first lien holder is paid in order to protect FmHA's interest. Since many of the loans made under these programs are secured by tax-exempt bonds, such an arrangement could have the practical effect of FmHA guaranteeing the first priority tax-exempt bonds. The parity requirement is to ensure that in the event of default each lender will be affected on a proportionate basis. A common joint financing plan with public bodies is for one lender to secure its loan with general obligation bonds and the other lender to secure its loan with revenue bonds. FmHA has generally held that the parity requirement was not applicable in those cases since the two lenders were not sharing the same security. Recently, however, those financing plans have been questioned under the regulations.

Alternatives

The first alternative is to make no changes in the regulations. Because of recent interpretations of the regulations, this would require training FmHA field personnel that when joint financing with another lender is proposed, using two types of security, FmHA must obtain a parity lien position on both types of security. This requirement would complicate loan processing and closing and discourage private sector lenders from participating with FmHA in joint financing.

FmHA has selected an alternative of amending the regulations to clarify that joint financing may be accomplished by FmHA taking one type of security and the other lender taking a different type of security, when adequate security of more than one type is available. Parity lines will be required when the same security is to be shared by FmHA and the other lender. FmHA is also complying with the requests of some of its field offices to provide guidelines as to conditions required to constitute a parity line position. FmHA believes this option will maximize the net benefit to society.

Comments

A proposed rule was published in the Federal Register (47 FR 1512) on January 13, 1983, with a 30 day comment period. Four letters of comments were received. One was totally supportive of the proposed rule. Issues raised in the other three letters were as follows:

In regard to the proposed paragraph on protective advances, one commenter said State law would not allow for

compliance and another commenter felt the meaning was unclear. This paragraph has been rewritten to provide more clarity and flexibility.

Two commenters objected to the provision that the use of a trustee for the FmHA portion of the debt is not acceptable. FmHA borrowers must execute a loan resolution agreeing to certain conditions not normally required by private lenders. FmHA must be able to work directly with the borrower to supervise and enforce the loan resolution. Also, FmHA provides closer management supervision and assistance than a normal trustee. This paragraph has been rewritten to provide some flexibility, but a direct relationship between FmHA and the borrower must be maintained.

One commenter expressed concern that the method provided for apportioning inadequate funds between regular payments is different from what is commonly done in the commenter's state. The method provided is preferred by FmHA and has been retained.

The paragraph on apportionment of funds in the event of liquidation of assets has been revised to comply with FmHA grant requirements when the project includes a grant. This paragraph has also been revised concerning the method of apportioning funds in the event of liquidation or sale of assets. It was determined that funds should be apportioned to the lenders on the basis of the pro rata amount loaned, but not to exceed their respective outstanding balances.

It should be noted that FmHA is reserving the authority, at the National Office level, to waive or modify any of the parity conditions as necessary on individual cases.

List of Subjects in 7 CFR Part 1942

Community development, Community facilities, Loan programs—housing and community development, Loan security, Rural area, Waste treatment and disposal—domestic, Water supply—domestic.

PART 1942—ASSOCIATIONS

Accordingly, FmHA is amending Subpart A of Part 1942, Chapter XVIII, Title 7, Code of Federal Regulations, as follows:

§ 1942.3 [Amended]

1. Section 1942.3 is amended by changing the reference in lines 13 and 14 from "§ 1942.17 (g)(1)(iii)(B)(*2*), (g)(2)(iii)(B)(*2*)" to "§ 1942.17 (g)(2)(iii)(B)(*2*), (g)(3)(iii)(B)(*2*)".

§ 1942.5 [Amended]

2. Section 1942.5(b)(1)(ii)(G) is amended by changing the reference in line five from "§ 1942.17 (g)(1)(iii) and (g)(2)(iii)" to "§ 1942.17 (g)(2)(iii) and (g)(3)(iii)."

3. Section 1942.17 is amended by redesignating paragraphs (g)(1) and (g)(2) as paragraphs (g)(2) and (g)(3) respectively, revising the introductory paragraph of paragraph (g) and adding a new paragraph (g)(1) to read as follows:

§ 1942.17 Appendix A—Community Facilities.

* * * * *

(g) *Security.* Loans will be secured by the best security position practicable in a manner which will adequately protect the interest of FmHA during the repayment period of the loan. Specific requirements for security for each loan will be included in a letter of conditions.

(1) *Joint financing security.* For projects utilizing joint financing, when adequate security of more than one type is available, the other lender may take one type of security with FmHA taking another type. For projects utilizing joint financing with the same security to be shared by FmHA and another lender, FmHA will obtain at least a parity position with the other lender. A parity position is to ensure that with joint security, in the event of default, each lender will be affected on a proportionate basis. A parity position will conform with the following unless an exception is granted by the National Office.

(i) *Terms.* It is not necessary for loans to have the same repayment terms to meet the parity requirements. Loans made by other lenders involved in joint financing with FmHA for facilities should be scheduled for repayment on terms similar to those customarily used in the State for financing such facilities.

(ii) *Use of trustee or other similar paying agent.* The use of a trustee or other similar paying agent by the other lender in a joint financing arrangement is acceptable to FmHA. A trustee or other similar paying agent will not normally be used for the FmHA portion of the funding unless required to comply with State law. The responsibilities and authorities of any trustee or other similar paying agent on projects that include FmHA funds must be clearly specified by written agreement and approved by the FmHA State Director and Regional Attorney. FmHA must be able to deal directly with the borrower to enforce the provisions of loan and grant agreements and perform necessary servicing actions.

(iii) *Regular payments.* In the event adequate funds are not available to meet regular installments on parity loans, the funds available will be apportioned to the lenders based on the respective current installments of principal and interest due.

(iv) *Disposition of property.* Funds obtained from the sale or liquidation of secured property or fixed assets will be apportioned to the lenders on the basis of the pro rata amount loaned, but not to exceed their respective outstanding balances; provided, however, funds obtained from such sale or liquidation for a project that included FmHA grant funds will be apportioned as may be required by the grant agreement.

(v) *Protective advances.* Protective advances are payments made by a lender for items such as insurance or taxes, to protect the financial interest of the lender, and charged to the borrower's loan account. To the extent consistent with State law and customary lending practices in the area, repayment of protective advances made by either lender, for the mutual protection of both lenders, should receive first priority in the apportionment of funds between the lenders. To ensure agreement between lenders, efforts should be made to obtain the concurrence of both lenders before one lender makes a protective advance.

* * * * *

4. Section 1942.17(g)(2)(iii)(A)(*9*) is amended by changing the reference in lines two and three from "paragraphs (g)(1)(iii)(A)(*1*) through (*8*)" to "paragraphs (g)(2)(iii)(A)(*1*) through (*8*)."

5. Section 1942.17(g)(2)(iii)(B) is amended by changing the reference in lines three and four from "paragraphs (g)(1)(iii)(A)(*6*) through (*9*)" to "paragraphs (g)(2)(iii)(A)(*6*) through (*9*)."

6. Section 1942.17(g)(2)(iii)(C) is amended by changing the references in lines two and three from "paragraphs (g)(1)(iii)(A)(*1*) through (*5*)" to "paragraphs (g)(2)(iii)(A)(*1*) through (*5*)" and in lines fourteen and fifteen from "(g)(1)(iii)(A)(*6*) through (*9*)" to "(g)(2)(iii)(A)(*6*) through (*9*)."

7. Section 1942.17(g)(3)(iii)(A)(*5*) is amended by changing the reference in lines two and three from "paragraphs (g)(2)(iii)(A)(*1*) through (*4*)" to "paragraphs (g)(3)(iii)(A)(*1*) through (*4*)."

(7 U.S.C. 1989; 7 CFR 2.23; 7 CFR 2.70)

Dated: April 13, 1983.

BILLING CODE 3410-07-M

DEPARTMENT OF ENERGY

Office of the Secretary

10 CFR Part 800

Loans for Bid or Proposal Preparation by Minority Business Enterprises Seeking DOE Contracts and Assistance

AGENCY: Office of Minority Economic Impact, Energy.

ACTION: Amendment of rule.

SUMMARY: The Department of Energy hereby amends the regulation governing DOE loans to minority business enterprises to assist them to bid for and obtain DOE contracts and agreements and certain subcontracts. Before this amendment, the regulation limited the "tier" of eligible subcontracts to "first-tier" subcontracts; that is, restricted eligible subcontracts to those with DOE operating contractors. Response to the announced availability of loans to first-tier sucontractors has been disappointing. Accordingly, it is DOE's purpose, effective immediately, to lift this restriction, so as to extend the range of financial assistance under the regulation to include second-tier subcontracts; that is, to include loans to defray expenses of bidding for and obtaining contracts with first-tier subcontractors of DOE operating contractors in furtherance of the research, development, demonstration or other contract activities of the Department of Energy. In this manner, DOE hopes to generate increased numbers of eligible applicants for its loan program. The amendments to §§ 800.001, 800.003, 800.100, 800.200 and 800.201 of the regulation, as set forth below, are confined to this single purpose.

EFFECTIVE DATE: April 25, 1983.

FOR FURTHER INFORMATION CONTACT:

Ms. Rosslee G. Douglas, Director, Office of Minority Economic Impact, Mail Stop 5B–110, 1000 Independence Avenue, S.W. (Forrestal), Washington, D.C. 20585. Telephone (202) 252–8383.

George Samels, Office of General Counsel, Mail Stop 6B–158, 1000 Independence Avenue, S.W. (Forrestal), Washington, D.C. 20585. Telephone (202) 252–2440.

SUPPLEMENTARY INFORMATION:

I. Background

On September 4, 1981, DOE issued its regulation to provide loans to minority business enterprises to assist them to participate in DOE research, development, demonstration and contract activities. Loans are to defray a maximum 75% of costs of bidding for and obtaining DOE contracts or agreements, or subcontracts with DOE operating contractors. The current regulation (Title 10, Code of Federal Regulations, Part 800) became effective October 5, 1981 (46 FR 44686, September 4, 1981).

II. Proposed Amendments

The amendments accomplished by this revision are to §§ 800.001, 800.003, 800.100, 800.200 and 800.201 of 10 CFR Part 800. In each instance, the amendment is confined to inserting words indicating that eligibility for financial assistance is extended by one additional "tier", or implementing that extension of eligibility. The inserted words simply extend the program so as to include loans to obtain contracts with first-tier subcontractors of DOE operating contractors in furtherance of the research, development, demonstration or other contract activities of the Department of Energy, and to implement that extension.

III. Other Matters

A. DOE Act and Administrative Procedure Act

Section 501(c)(1) of the DOE Organization Act (Pub. L. 95–91; 42 U.S.C. 7191) provides that if DOE determines that no substantial legal or factual issue exists as to a rule, and determines that the amendment is unlikely to have a substantial impact on the Nation's economy or on large numbers of individuals or businesses, that rule may be promulgated in accordance with the Administrative Procedure Act.

Based on the response to the loan program and limited purposes and financial resources of the program, DOE has determined that there are no substantial issues of law or fact in this rule.

Under the Administrative Procedure Act, notice and comment are not required where unnecessary or contrary to the public interest. DOE has determined that prior notice and comment with respect to this rule are unnecessary because of the rule's uncontroversial and limited nature, and that the public interest would best be served by removing the restriction in the current regulation as swiftly as possible.

For the foregoing reasons, the normal requirement for a delayed effective date under 5 U.S.C. 553(d) does not apply.

B. Executive Order 12291

Section 3 of Executive Order (E.O.) 12291 (46 FR 13193, February 19, 1981) requires that DOE determine whether a proposed rule is a "major rule", as defined by section 1(b) of E.O. 12291. In promulgating the current regulation, DOE determined that the proposed amendments do not meet the E.O. 12291 definition of a major rule as one likely to result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Therefore, a regulatory impact analysis is not required.

DOD has submitted these amendments for review by the Office of Management and Budget under the Executive Order.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980, Pub. L. 96–354, (5 U.S.C. 601–612) requires, in part, that an agency prepare an initial regulatory flexibility analysis for any proposed rule, unless it determines that the rule will not have a "significant economic impact" on a substantial number of small entities. In promulgating the current regulation, the Secretary of Energy certified that it will not have such impact (46 FR 44689 Sept. 4, 1981). The proposed amendments will not impose any additional burdens or impact on small entities, but rather they are designed to achieve economic effects beneficial to yet a further "tier" of minority business enterprises. Therefore, DOE does not believe the obligation involved has a significant impact on small entities, and accordingly, as required by section 603(b), DOE certifies that the amendment will not have a significant economic impact on a substantial number of small entities.

D. Environmental Review

These amendments merely remove a restriction on DOE's program of financial assistance to minority business enterprises in their preparation of bids and proposals. DOE has determined that promulgation of the amendments and removal of the restriction clearly is not a major Federal action with significant environmental impact, and therefore does not require preparation of an environmental assessment or environmental impact statement under the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 and following).

E. Paperwork Reduction Act

The original reporting requirements contained in Part 800 were approved by OMB and assigned control number 1901–0242. These amendments impose no new and change no existing reporting requirement.

List of Subjects in 10 CFR Part 800

Government contracts, Loan programs/business, Minority businesses, Research.

(Department of Energy Organization Act, Pub. L. 95–91, Title II, as amended by Pub. L. 95–619, Title VI, Section 641, November 9, 1978, 92 Stat. 3284, classified to 42 United States Code annotated 7141)

Issued in Washington, D.C. April 19, 1983.

Donald Paul Hodel,

Secretary of Energy.

PART 800—[AMENDED]

Accordingly, for the reasons set out in the preamble, Part 800 of Title 10, Code of Federal Regulations is amended as follows:

1. Section 800.001 is revised to read as follows:

§ 800.001 Purpose.

The purpose of this regulation is to set forth policies and procedures for the award and administration of loans to minority business enterprises. The loans are to assist such enterprises in participating fully in research, development, demonstration and contract activities of the Department of Energy. The loans are to defray a percentage of the cost of obtaining DOE contracts and other agreements, including procurements, cooperative agreements, grants, loans and loan guarantees; of obtaining subcontracts with DOE operating contractors; and of obtaining contracts with first-tier subcontractors of DOE operating contractors in furtherance of the research, development, demonstration or other contract activities of DOE. Issuance of loans under this regulation is limited to the extent funds are provided in advance in appropriation acts. This regulation implements the authority for such loans in Section 211(e) of the Department of Energy (DOE) Organization Act, Pub. L. 95–619, Title VI, section 641, November 9, 1978, 92 Stat. 3284 (42 U.S.C.A. 7141).

2. In § 800.003, the definition of "Costs" is revised to read as follows:

§ 800.003 Definitions.

* * * * *

"Costs" of a bid or proposal means the cost of preparing, submitting and supporting a bid or proposal, whether solicited or not, for a DOE contract or other agreement such as a procurement contract, grant, cooperative agreement, loan or loan guarantee; or a subcontract with a DOE operating contractor; or a contract with a first-tier subcontractor of a DOE operating contractor in furtherance of the research, development, demonstration or other contract activities of DOE.

* * * * *

3. Section 800.100 is amended by the addition of the following sentence at the end of the section:

§ 800.100 Solicitation of applications.

* * * * *

In such solicitations, DOE shall further indicate that, in the case of applications for loans relating to bids or proposals for contracts with first-tier subcontractors of DOE operating contractors, information necessary to substantiate such applications may be unavailable to DOE from such subcontractors. If the substantiating information is not made available to DOE in a timely manner, the application may be rejected.

4. In § 800.200, paragraph (a) is revised to read as follows:

§ 800.200 Maximum loan; allowable costs.

(a) A loan under this regulation shall not exceed 75 percent of allowable costs of a bid or proposal to obtain a DOE contract or other agreement (such as a procurement contract, cooperative agreement, grant, loan or loan guarantee), or a subcontract with a DOE operating contractor, or a contract with a first-tier subcontractor of a DOE operating contractor in furtherance of the research, development, demonstration or other contract activities of DOE.

* * * * *

5. In § 800.201, paragraph (c) is revised to read as follows:

§ 800.201 Findings.

* * * * *

(c) That, by terms of the loan, applicant's use of the funds will be limited to bidding for and obtaining a contract or other agreement with the Department of Energy, a subcontract with a DOE operating contractor, or a contract with a first-tier subcontractor of a DOE operating contractor in furtherance of the research, development, demonstration or other contract activities of DOE.

* * * * *

BILLING CODE 6450–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 82–NM–20–AD; Amdt. 39–4634]

Airworthiness Directives; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new Airworthiness Directive (AD) which requires inspection and retorquing/replacement of the forward fuse bolts on trailing edge flap tracks Nos. 1, 2, 3, 4, 5, 6, 7, and 8 on certain Boeing Model 747 airplanes. This action is required because service experience and testing have indicated that the fuse bolts may not reach service life limits. Fuse bolt failures could allow one end of the flap to become detached from the airplane.

DATES: Effective May 31, 1983. Compliance scheduled as prescribed in the body of the AD, unless already accomplished.

ADDRESS: The applicable service bulletins may be obtained upon request from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124.

FOR FURTHER INFORMATION CONTACT: Mr. Owen Schrader, Airframe Branch, ANM–120S, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 767–2516. Mailing Address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an AD to require inspection and retorquing/replacing the forward fuse bolts on the trailing edge flap tracks was published in the **Federal Register** (47 FR 46895) on October 21, 1982. The comment period for the proposal closed on November 22, 1982.

Interested persons have been afforded an opportunity to participate in the making of this AD. Due consideration has been given to all comments received.

Comments were received from four operators and the Air Transport Association of America. Several comments requested an increase in the proposed 200 landings threshold, after the effective date, to allow for phase-in of the inspection requirements with

significant maintenance visits. The FAA concurs that this may be done without undue derogation of safety. Therefore, paragraph A. has been changed to require inspections within 400 landings after the effective date of this AD.

Another comment concerned the necessity of the requirement for inspection/replacement of the flap track fuse bolts in tracks number 2 through 7, since the adverse service experience has only been on tracks number 1 and 8. The FAA position to require inspection of these tracks is based on recent Boeing test data that indicates these fuse bolts, being of similar design, could also fail.

Based upon another comment requesting extension of the inspection cycle on flap track 4 and 5 fuse bolts from 2000 to 4000 landings a review of the manufacturer's analysis indicates that these bolts could also fail at less than 4000 landings; therefore, the FAA does not concur.

Since this condition is likely to exist or develop on other airplanes of the same type design, an Airworthiness Directive is being issued which requires inspection of the flap track fuse bolts and replacement of the bolts as terminating action.

It is estimated that 254 airplanes of U.S. registry will be affected by this AD; that it will take approximately 30 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. Repair parts are estimated at $3,000 per airplane. Based on these figures, the total cost impact of the AD is estimated to be $1,066,800. For these reasons the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. Few, if any, small entities within the meaning of the Regulatory Flexibility Act would be affected.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the proposed rule with the changes noted.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

Boeing: Applies to Model 747 series airplanes certificated in all categories listed in Boeing Service Bulletin 747–57–2206, Revision 1, and Service Bulletin 747–57–2217, Revision 1, or later FAA approved revisions. The effectivity is divided into eight groups for Service Bulletin 747–57–2206–R1 and three groups for Service Bulletin 747–57–2217–R1, listed in the service bulletins. To prevent trailing edge flap track fuse bolt failures, accomplish the following:

A. Within 400 landings after the effective date of this AD, unless accomplished within the last 1600 landings, and at intervals thereafter not to exceed 2000 landings until the replacement called for in paragraphs B. or C. is accomplished, visually inspect the bolts listed in Table I, below, for deformation and failure. Bolts found deformed or failed must be replaced in accordance with paragraphs B. or C., as applicable, prior to further flight. Bolts found acceptable for service are to be retorqued in accordance with Table I prior to further flight.

B. Unless previously accomplished replace forward fuse bolts on flap tracks No. 1, 2, 3, 6, 7, and 8 with redesigned bolts in accordance with Figures 1, 3, and 5 of Boeing Service Bulletin 747–57–2206–R1, or later FAA approved revision, within 200 landings after the effective date of this AD, or prior to the accumulation of the thresholds listed in Table 1, 3, and 4, Section III, of the above Boeing Service Bulletion whichever is later. Installation of these bolts constitutes terminating action for these tracks.

C. Unless previously accomplished, replace on flap tracks No. 2, 4, 5, and 7, forward fuse bolts listed in Table I & II of Boeing Service Bulletin 747–57–2217–R1 or later FAA approved revisions, in accordance with Figures 2 and 3 of the bulletin within 200 landings after the effective date of this AD, or prior to the accumulation of 25,000 landings, whichever is later. Installation of these bolts constitutes terminating action for these tracks.

D. For purposes of complying with this AD, subject to acceptance by the assigned FAA Maintenance Inspector, the number of landings may be determined by dividing each airplane's hours time in service by the operator's fleet average from takeoff to landing for the airplane type.

E. Alternate means of compliance with the AD which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

F. Aircraft may be ferried to a base for maintenance in accordance with Sections 21.197 and 21.199 of the Federal Aviation Regulations.

G. This AD supersedes AD 78–25–06.

TABLE I

Flap track	Inspect and retorque in accordance with	Airplane part No.	Group
1 and 8....	Fig. 2, S/B 57–2206–R1.	See table I, section III of S/B 57–2206–R1.	I–IV, VII and VIII as defined by S/B 57–2206–R1.
2 and 7....	Fig. 1, S/B 57–2217–R1.	See table I, of S/B 57–2217–R1.	III as defined by S/B 57–2217–R1.
4 and 5....	Fig. 4, S/B 57–2217–R1.	See table II, of S/B 57–2217–R1.	I, II, and III as defined by S/B 57–2217–R1.

Note.—Later FAA approved revisions of the above service bulletins may be used.

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may also be examined at FAA Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

This Amendment becomes effective May 31, 1983.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.—For the reasons discussed earlier in the preamble, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). I certify under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a substantial number of small entities since it involves few, if any, small entities. A final evaluation has been prepared for this regulation and has been placed in the docket. A copy of it may be obtained by contacting the person identified under the caption "For Further Information Contact."

Issued in Seattle, Washington on April 13, 1983.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 83–NM–32–AD; Amendment 39–4635]

Airworthiness Directive; Gates Learjet Model 35/36 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new Airworthiness Directive (AD) that requires inspection, modification, or replacement of the right-hand hydraulic pressure line on all Gates Learjet Models 35 and 36 series airplanes. This action is the result of a recent incident in which the right-hand engine hydraulic pressure line (P/N 2607003–472) ruptured

due to chafing with a nearby wire bundle. Inspection in accordance with a Gates Learjet Service Bulletin is necessary to prevent hydraulic system loss and a potential fire.

DATE: Effective May 3, 1983.

Compliance: Within 30 hours time in service after the effective date of this AD.

ADDRESS: Gates Learjet Alert Service Bulletin SB 35/36-29-1, dated February 21, 1983, pertains to this matter. This bulletin may be obtained from Gates Learjet, P.O. Box 7707, Wichita, Kansas 67277, telephone (316) 946-2000.

FOR FURTHER INFORMATION CONTACT: Robert R. Jackson, Systems and Equipment Branch, FAA, Central Region, Wichita Aircraft Certification Office, Room 238, Terminal Building 2299, Mid-Continent Airport, Wichita, Kansas 67209, telephone (316) 269-7008.

SUPPLEMENTARY INFORMATION: A recent failure in the right-hand engine hydraulic pressure line has been reported. The failure was caused by chafing by the generator wire bundle. Failure of this line (P/N 2607003-406, P/N 2607003-454 or P/N 2607003-472 depending on airplane serial number) could possibly cause a total hydraulic failure by depleting the reservoir. The subsystems affected by hydraulic pressure loss are brakes, landing gear, landing gear doors, spoilers, and flaps. Pneumatic systems are provided for emergency actuations of brakes, landing gear, and landing gear doors. Further, shorting the wire bundle could cause sparking and, when fueled by hydraulic oil, could result in a fire.

Gates Learjet has developed Alert Service Bulletin 35/36-29-1 which provides for inspection of the right hand engine hydraulic pressure line and checking its proximity to the electric wire bundle. Further, this bulletin provides for necessary modifications and/or replacement procedures.

Since the condition described herein is likely to exist or develop on other airplanes of the same type design, an AD is being issued, applicable to all Gates Learjet Models 35 and 36 airplanes. The AD requires compliance with Gates Learjet Alert Service Bulletin 35/36-29-1.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment in effect less than thirty (30) days.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

Gates Learjet: Applies to Model 35, Serial Numbers 001 through 495 and Model 36, Serial Numbers 001 through 052, certificated in all categories. Compliance required as indicated unless already accomplished.

1. To assure that no interference exists between right hand engine hydraulic pressure line and wire bundle, comply with Gates Learjet Alert Service Bulletin SB 35/36-29-1, dated February 21, 1983, within the next thirty (30) flight hours.

2. Alternative means of compliance which provide an equivalent level of safety may be used when approved by the Manager, Wichita Aircraft Certification Office, FAA, Central Region.

3. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

This amendment becomes effective May 3, 1983.

(SECs. 313(a), 601 and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423; Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "**FOR FURTHER INFORMATION CONTACT.**"

Issued in Seattle, Washington on April 13, 1983.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 83-ANE-14; Amdt. 39-4633]

Airworthiness Directives; TRW Hartzell Propeller Model HC-B( )TN, HC-B( ) MP and HC-B( )MN Turbopropellers

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing Airworthiness Directive 78-18-01 applicable to TRW Hartzell Model HC-B( )TN-2, HC-B( )TN-3, HC-B( )MP-3 propellers installed on Pratt & Whitney Aircraft of Canada Model PT6A-( ) series engines and Models HC-B( )TN-5, HC-B( )MN-5 propellers installed on AiResearch Model TPE-331-( ) series engines. This AD is needed to preclude propeller attach bolt failures or improperly secured propellers and requires installation of new propeller attach bolts, P/N B-3339, by a wet torque procedure. Also, a torque recheck is required for current turbopropeller installations using P/N A-2047 bolts.

DATES: Effective—April 28, 1983.

Compliance Schedule—As prescribed in body of AD.

ADDRESSES: The applicable service information may be obtained from TRW Hartzell Propeller, 350 Washington Avenue, Piqua, Ohio 45356.

A copy of the applicable service documents and historical file on this AD is contained in the Rules Docket, Office of Regional Counsel, FAA, Attn: Rules Docket No. 83-ANE-14, 12 New England Executive Park, Burlington, Massachusetts 01803, and may be examined weekdays, except Federal holidays between 8:00 am and 4:30 pm.

FOR FURTHER INFORMATION CONTACT: Mr. Henry L. Weiss, Chicago Aircraft Certification Office, Propulsion Branch, ACE-140C, FAA, 2300 East Devon Avenue, Des Plaines, Illinois 60018; telephone 312-694-7134.

SUPPLEMENTARY INFORMATION: This AD supersedes AD 78-18-01, Amendment 39-3290, which currently requires a dry torque installation of A-2047 propeller attach bolts. After issuing Amendment 39-3290, there have been reports of improperly secured propellers found during time-between-overhaul (TBO) intervals due to loose bolts. Since this condition is likely to exist or develop in other propellers of the same design, an AD is being issued which requires a torque recheck of applicable turbopropeller installations and the wet torque installation of improved strength

B–3339 attach bolts for new or replacement propellers.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical, and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Propellers, Aircraft, Aviation safety.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by superseding Amendment 39–3290, AD 78–18–01, by adding the following new AD:

TRW Hartzell Propeller: Applies to all the TRW Hartzell Model HC–B3TN–2, HC–B3TN–3, HC–B3TN–5, HC–B4TN–3, HC–B4TN–5, HC–B4MN–5, and HC–B5MP–3 turbopropellers. The HC–B( )TN–2, HC–B( )TN–3, and HC–B( )MP–3 propellers are installed on Pratt & Whitney Aircraft of Canada Model PT6A–( ) series engines. The HC–B( )TN–5 and HC–B( )MN–5 series propellers are installed on the AiResearch TPE–331–( ) series engines.

Compliance required as indicated, unless already accomplished. To preclude propeller attach bolt failures or improperly secured propellers, accomplish the following:

A. Prior to further flight, all new propeller installations and serviceable propellers which are being reinstalled must be installed as follows:

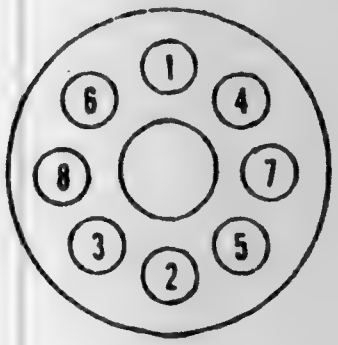
(1) Install the propeller oil seal to the engine flange after ensuring that the engine and propeller flanges are clean.

(2) Carefully install propeller on the engine flange ensuring that complete and true contact is established.

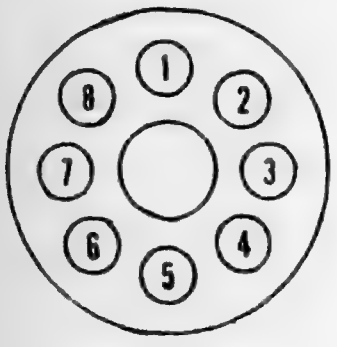
(3) Apply MIL–T–5544 Petrolated Graphite or TRW Hartzell Lubricant P/N A3338 to bolt threads and bolt washer surfaces (and remainder of bolt if desired).

(4) Install eight new B–3339 bolts and eight new A–2048–2 washers through engine flange into propeller flange.

(5) Torque all bolts, with a torque wrench and an appropriate adapter, to 40 ft.-lbs. and then to 80 ft.-lbs. following torque sequence "A" (shown below). Final torque all bolts using "B" sequence (shown below) to 100 to 105 ft.-lbs. Safety all bolts in an FAA approved manner.



A



B

Note.—TRW Hartzell Instruction No. 140 dated March 15, 1982, also pertains to this subject.

B. Within the next 50 hours time in service after the effective date of this AD, accomplish the following on all applicable turbopropeller installations presently using P/N A–2047 propeller attach bolts:

(1) Check the torque, with a torque wrench and an appropriate adapter, of all eight propeller attach bolts (with washers installed). Torque should be 100 to 125 ft.-lbs. with *dry* threads. (Caution: Do not use any lubricant with the A–2047 bolts. Safety all bolts in an FAA approved manner.)

(2) If the torque of any 1 of the bolts is found to be less that 100 ft.-lbs. or greater than 125 ft.-lbs., remove *all* 8 bolts and washers and replace with *new* (B–3339) bolts and new (A–2048–2) washers in accordance with paragraphs A (1) through (5) herein. (Caution: Do *not* use an intermix of A–2047 and B–3339 bolts in the same installation.)

Note.—The A–2047 bolt has the letter "H" stamped inside a triangle on the bolt. The B–3339 bolt has the part number stamped inside the cupped head.

C. Upon request of the operator, an equivalent means of compliance with the requirements of this AD may be approved by the Manager, Chicago Aircraft Certification Office, FAA, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

This amendment becomes effective April 28, 1983.

This amendment supersedes Amendment 39–3290 (43 FR 42731) AD 78–18–01.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Note.—The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule, since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "**FOR FUTHER INFORMATION CONTACT.**"

Issued in Burlington, Massachusetts, on April 12, 1983.

14 CFR Part 71

[Airspace Docket No. 83–ASO–8]

Designation of Transition Area Choctaw, Florida

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment designates the Choctaw, Florida, transition area in the vicinity of Navy Outlying Field (OLF) Choctaw. This action, which will lower the base of controlled airspace from 1,200 to 700 feet above the surface, will provide controlled airspace for Instrument Flight Rule (IFR) operations in the vicinity of OLF Choctaw. An instrument approach procedure, predicated on the Santa Rosa TACAN facility, has been developed to serve OLF Choctaw and additional controlled airspace is required for protection of IFR operations.

EFFECTIVE DATE: 0901 G.m.t., June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763–7646.

SUPPLEMENTARY INFORMATION:

History

On Tuesday, February 22, 1983, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by designating a 700-foot transition area in the vicinity of Choctaw, Florida. This transition area will provide controlled airspace for protection of instrument flight operations in the vicinity of OLF Choctaw (48 FR 7466). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. All comments received were favorable. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3A dated January 3, 1983.

Rule

This amendment to Part 71 of the Federal Aviation Regulations designates the Choctaw, Florida, transition area and lowers the base of controlled airspace in the vicinity of OLF Choctaw from 1,200 to 700 feet above the surface.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Transition area.

PART 71—[AMENDED]

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) is further amended, effective 0901 G.m.t., June 9, 1983, as follows:

Choctaw Outlying Field, FL—New

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of OLF Choctaw (Lat. 30°30'28"N., Long. 86°57'20"W.); excluding that airspace that coincides with the Pensacola and Milton transition areas.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on April 14, 1983.

George R. LaCaille,

Acting Director, Southern Region.

14 CFR Part 71

[Airspace Docket No. 83-ASO-4]

Designation of Transition Area, Lexington, Mississippi

AGENCY: Federal Aviation Adminstration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment designates a transition area at Lexington, Mississippi, to accommodate Instrument Flight Rule (IFR) operations at C. A. Moore Airport. This action lowers the base of controlled airspace from 1,200 to 700 feet above the surface in the vicinity of the airport. An instrument approach procedure, based on the Greenwood VORTAC facility, has been developed to serve the airport and this additional controlled airspace is required to protect IFR operations.

EFFECTIVE DATE: 0901 G.m.t., June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, GA 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

History

On Thursday, February 10, 1983, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by designating a transition area at Lexington, Mississippi, to provide controlled airspace for aeronautical operations in the vicinity of C. A. Moore Airport. (48 FR 6126). The operating status of the C. A. Moore Airport is changed from VFR to IFR and this transition area will provide the controlled airspace for accommodation of IFR operations. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments were received in response to publication. Except for editorial changes this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3A dated January 3, 1983.

Rule

This amendment to Part 71 of the Federal Aviation Regulations designates the Lexington, Mississippi, transition area to accommodate aeronautical operations at C. A. Moore Airport.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Transition area.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) is further amended, effective 0901 GMT, June 9, 1983, as follows:

Lexington C. A. Moore Airport, MS—New

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of C. A. Moore Airport (Lat. 33°07'31"N., Long. 90°01'33"W.); within 4.5 miles each side of Greenwood VORTAC 148° radial, extending from the 6.5-mile radius area to 8 miles northwest of the airport.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regualtions for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on April 14, 1983.

George R. LaCaille,

Acting Director, Southern Region.

BILLING CODE 4910-13-M

DEPARTMENT OF COMMERCE

International Trade Administration

DEPARTMENT OF THE INTERIOR

Office of the Secretary

15 CFR Part 303

Allocation of Watch Quotas for Calendar Year 1983 Among Watch Producers Located in the Virgin Islands, Guam, and American Samoa

AGENCY: Import Administration, International Trade Administration, Commerce; and Office of the Secretary, Interior.

ACTION: Final rule.

SUMMARY: This action is necessary for the Departments to carry out the responsibilities assigned to them by Pub. L. 97–446, which substantially amended Pub. L. 89–805. This document amends 15 CFR Part 303, which governs the allocation of duty-free watch quotas to producers located in the U.S. insular possessions (Guam, American Samoa, and the Virgin Islands). It amends § 303.3 to provide for an appendix to the part containing the annual allocation formula and other special rules. It also adds this appendix for calendar year 1983. Sections 1 through 6 and 8 and 9 of the appendix set forth the allocation formula and other requirements of the allocation process. Sections 10 and 11 establish the administrative and procedural requirements of the new production incentive benefit, which entitles watch producers to request refunds of duties on watch imports from non-insular sources up to a certain percentage of each producer's creditable wages in the territory the previous year. Section 7 of the appendix defines "creditable wages" for both allocation and production incentive purposes. The authority citation is also amended to take the new law into account.

EFFECTIVE DATE: April 25, 1983.

FOR FURTHER INFORMATION CONTACT: Frank Creel (202) 377–1660.

SUPPLEMENTARY INFORMATION: The Departments of Commerce and the Interior have determined that these rules do not constitute a "major rule" as defined by Section 1(b) of Executive Order 12291 since these rules are not likely to result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices in either the public or private sector; or

(3) Significant adverse impact on the domestic economy or on the ability of U.S. enterprises to compete with foreign enterprises.

The General Counsel of the Department of Commerce has certified that this action will not have a significant economic impact on a substantial number of small entities (as there are fewer than ten entities affected by this action). The rule, therefore, is not subject to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*

Finally, the Departments have determined that publication of this rule will not increase the information collection burden on the public and will, in fact, reduce the reporting and recordkeeping burden on the respondents. The overall burden is limited to those companies receiving the associated federal benefits. The information collection is made on Form ITA–334P under OMB approval number 0625–0040. Publication of these rules is consistent with the Departments' responsibilities under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

On January 4, we published our proposals for 1983 and invited comments from the public (48 FR 263). After Pub L. 97–446 was enacted on January 12, we published additional proposals and extended the period for comments to March 21 (48 FR 7186, February 18, 1983).

We received comments from four parties interested in the rules. We discuss these comments below.

One commenter focused on the low tariff applicable to quartz analog watches. Since the tariffs are set by law, we are unable to address the commenter's concerns in this rulemaking.

A second commenter had four suggestions:

(1) Adopt an "escape clause" for the value limitations on components in the event economic forces push the industry "into the upper range of the low end of the market."

(2) Change the definition of "value" (for the purpose of the value limitations on components) to "the value of merchandise plus all charges and costs incurred as landed in the U.S. insular possession."

(3) Add language to account for unforeseeable and uncontrollable events in the certification of intent and ability to sustain operations beyond calendar year 1983 (Section 11(b)(1)).

(4) Clarify whether or not watch producers who might receive a special allocation under Section 11(b)(3) of the appendix (which refers to § 303.5(a)(5) in the body of the regulations) would have to meet the mimimum assembly tests for new applicants * * * or be permitted to resume their former operations, which were not circumscribed by these tests."

We have adopted one of these suggestions in the final rule. Our reasons, in the same order, are:

(1) An "escape clause" is unnecessary. We noted when we made the proposal that the value limitations "could be modified in future years if circumstances dictated a change." We can also modify the limitations in shorter periods of time if necessary. See also our comments on suggestion 3.

(2) The definition of value in our proposal was proposed because of its conformity with the definition used by Customs officials in the territory. This simplifies the auditing of records. The change suggested by the commenter does help clarify that the "last point of shipment" is not the territory itself, but it also removes that conformity. We have adopted a change in the final rule which clarifies the meaning of "value" in this rule, but which preserves definitional uniformity among the concerned federal agencies.

(3) This change would duplicate an existing provision. Section 303.11(a) of the codified rules allows interested parties to "petition for relief from the application of *any* rule on the basis of hardship or *extraordinary circumstances* resulting in the inability of the petitioner to comply with the rule" (emphasis added).

(4) No watch producers whose operations "were not circumscribed" by the minimum assembly tests can take advantage of the special allocation provision and receive a 1983 certificate. Only firms active in 1981 or 1982 are eligible, while the minimum assembly tests have been in force since 1979. Also, § 303.5(a)(5) authorizes us to take into account the firm's "proposed assembly operations" as well as "its intentions and capacity to make meaningful contributions." We would exercise this authority to ensure that all firms operate under the same rules. All firms not active in 1983 will be required to apply for quota under a new entrant provision in 1984.

Another commenter, claiming that it "would be able to purchase watch movements, fully assembled * * * at highly competitive prices" (for direct import into the United States), implied that, even with the new legislation the Virgin Islands watch industry should be considered a marginally attractive investment opportunity. This commenter requested that the proposed assembly standard "be replaced with a 'labor' standard." This change, he claimed, would permit watch producers to "perform a variety of quality control

operations, including inspection of the assembled rotor and train, and a full time check of each unit," operations which "would not be covered by the 'assembly' standard."

The commenter continued that "the goals of the legislation * * * should allow us to bring completed watch movements into the Virgin Islands and do the casing in the Virgin Islands."

Insular watch producers already receive credit for casing and quality control operations of the type mentioned by the commenter, for satisfying the minimum assembly criteria on which duty-free entry is established as well as for quota allocation purposes. We disagree with the commenter that such operations are adequate as well as creditable. Pub. L. 97–446, first of all, specifically requires the Departments to adopt minimum *assembly* standards. This requirement was intended to cover movements as well. We specifically reject the idea that the transformation of the insular watch industry into a casing and quality control point is compatible with, much less mandated by, the goals of the recent legislation.

The same commenter stated that "repairs should be permitted in the Virgin Islands" and repair labor "should be credited to the creditable wages." If this should be found inappropriate, the wages credited for repairs "might be limited to (a) percentage of the total Virgin Islands labor." The fourth commenter made the same recommendation.

We agree that the recommended change might help create additional employment in the territories, which is the primary purpose of the recent legislation. By the same token, we believe the territories should become repair facilities no more than we believe they should become casing facilities. On balance, the commenter's suggestion that we give partial credit relative to other kinds of operations has merit.

We intend to propose a 1984 rule which would give partial credit for non-3(a) repair activities. The limit we would propose for such credit would be 20% of the watch producer's total creditable wages. We invite comments from the public on this matter (the specific proposal will also, of course, be included in a later notice in the **Federal Register**). Our decision not to adopt the rule this year will have no effect on the amount of any watch producer's benefits based on the verified data for calendar year 1982.

Apart from comments received, we are making some editorial changes in the final rule.

(1) In the February proposal, we proposed to raise the ceiling on creditable wages for individuals from $23,000 to $28,000. We showed the proposed change in Section 7 but not in Section 1. The final rule adopts the proposal in both sections.

(2) We based the proposed rules for the use and transfer of certificates on a preliminary version of the Form ITA–361. We are making minor changes in Section 11(d)(3) to conform the rule with the final version of the form.

(3) We neglected to amend the authority citation for 15 CFR Part 303 even though the enactment of Pub. L. 97–446 obviously requires such amendment. We do so here.

List of Subject in 15 CFR Part 303

Imports, Customs duties and inspection, Watches and jewelry, Marketing quotas, Administrative practice and procedure, Reporting and recordkeeping requirements, American Samoa, Guam, Virginia Islands.

PART 303—[AMENDED]

Part 303 is amended as follows:

1. The authority citation for part 303 is revised to read as follows:

Authority: Sec. 110, Pub. L. 97–446, 96 Stat. 2329 (19 U.S.C. 1202).

2. Section 303.3 is revised to read as follows:

§ 303.3 Annual allocation formula and other special provisions.

(a) The appendix to this part contains the criteria or formulae which will be used by the Secretaries in calculating each watch producer's annual watch quota allocation, and other special rules or provisions the Secretaries may periodically adopt in order to carry out their responsibilities in a timely manner while taking into account changing circumstances.

(b) References in the appendix to the quota, unless indicated otherwise, are to that quota available for allocation or reallocation in the current calendar year. Specifications of or references to data or bases to be used in the calculation of current year quotas (e.g., economic contributions and shipments) are, unless indicated otherwise, those which were generated in the year prior to the current year.

(c) The Secretaries may propose changes to the appendix at any time they consider such changes necessary to fulfilling their responsibilities. Normally, however, such changes will be proposed towards the end or at the beginning of each calendar year.

(d) Interested parties shall be provided an opportunity to submit written comments on all proposed changes.

3. The following appendix is added at the end of Part 303:

Appendix

Section 1. (a) A portion of the Virgin Islands quota determined in accordance with subsection (c) below will be allocated on the basis of (1) the net dollar amount of economic contributions to the Virgin Islands consisting of the dollar amount of wages, up to a maximum of $28,000 per person, paid by each producer to Virgin Islands residents and attributable to each producer's headnote 3(a) watch and watch movement assembly operations plus the dollar amount of income taxes attributable to its headnote 3(a) watch and watch movement assembly operations (excluding penalty and interest payments and deducting income tax refunds and subsidies paid by the Virgin Islands government), and (2) the number of units of watches and watch movements assembled in the Virgin Islands and entered by each producer duty-free into the customs territory of the United States.

(b) In making allocations under this formula, a weight of 80 percent will be assigned to the economic contributions factor and a weight of 20 percent will be assigned to the shipments factor. In calculating each producer's economic contributions, the Departments shall deduct from creditable wages and negative tax balances. That is, if the total of a producer's income tax payments (excluding penalties and interest charges) is smaller than the total of refunds and subsidies received from the Virgin Islands government, the difference of the two sums shall be deducted from the producer's creditable wages for allocation purposes.

(c) An amount representing that portion of the Virgin Islands quota equal to the ratio of general headnote 3(a) shipments of watches and watch movements from the territory to the total Virgin Islands, quota in the previous year will be allocated among the producers in the Virgin Islands, in accordance with the allocation factors and weights specified in (b) above.

Section 2. Except as specified in Section 4, the Guam quota may be allocated, pursuant to § 303.5(a)(2) of this part, to the single Guam producer (see also subsection 3(b) and Section 8, below).

Section 3. (a) The portion of the Virgin Islands quota not allocated pursuant to Section 1, except as specified in Section 4, will be allocated among firms meeting the requirements of paragraphs (1) or (2) of this section. Eligible firms will be allocated quota in accordance with the factors and weight specified in Section 1. Allocation of the portion of the Virgin Islands quota under this section will be made to firms which: (1) Assembled all watch movements shipped from unassembled movements having at least 26 discrete components and all watches (that is, cased movements) from at least 29 discrete components and at least 3 case components; or (2) Made wage payments in the territory averaging not less than $.75 per watch movement and $.95 per watch assembled and shipped into the customs territory of the United States. In determining a firm's eligibility under this criterion, the Departments may make appropriate data

adjustments to take into account wages paid for units assembled but not shipped or shipped but not assembled during the calendar year prior to the year of the allocation.

(b) Allocation of the portion of the Guam quota not allocated pursuant to Section 2 may be allocated pursuant to Sec. 303.5(b) of this part.

Section 4. Quota set aside for new firms in Guam under subsection 5(b) shall be subtracted from the quota amount allocable under Section 2, before allocations are made pursuant to that subsection.

Section 5. (a) Applications from new firms are invited for the American Samoa quota. Due to the limited size of the American Samoa quota, the Departments will allocate that quota to a single firm which offers the best prospect of a meaningful long-term contribution to the economy of the territory.

(b) Applications from new firms are invited for 500,000 units of the Guam quota.

(c) Applicants for new-entrant quotas must complete applicable sections of Form ITA–334P, copies of which may be obtained from the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230. Detailed instructions for completing ITA–334P will be provided by the Statutory Import Programs Staff together with copies of the application form.

(d) The Departments will consider new entrant applications only from firms which certify to the Departments that they are able and willing to meet the minimum assembly or wage contribution criteria established in Section 3. Following the Secretaries' determination that a qualifying application has been received, an announcement will be published in the **Federal Register** establishing a closing date for further applications. The closing date shall be 30 days from the date of such notice. If the Departments do not receive prior to September 1 a qualifying application for quota set aside by subsection (b) above, that quota may be reallocated among eligible producers pursuant to § 303.5(b) of this part.

Section 6. Reallocation of quota that becomes available will be restricted to those firms satisfying the criteria established in subsection 3(a), to any new entrant firms selected pursuant to Section 5 above, and to the existing Guam firm, provided its operations at the time of the reallocation satisfy the criteria established in subsection 3(a).

Section 7. *Definitions.* (a) "Creditable wages" means all wages up to $28,000 per person paid to residents of the territories employed in a firm's headnote 3(a) watch and watch movement assembly operations. Excluded, however, are wages paid: (i) Accountants, lawyers, or other professional personnel who may render special services to the firm, (ii) persons assembling non-headnote 3(a) watches and watch movements, and (iii) persons engaged in the repair of non-headnote 3(a) watches and watch movements. Non-headnote 3(a) watches and watch movements include, but are not limited to, watches and movements which: are liquidated as dutiable by the U.S. Customs Service; contain any material which is the product of any country with respect to which Column 2 rates of duty apply; are ineligible for duty-free treatment pursuant to Section 10 of this Appendix; or the Departments have determined the assembly of which did not involve substantial and meaningful work in the insular possession. ("Substantial and meaningful work" shall be considered to have taken place if the minimal assembly requirements of the U.S. Customs Service have been complied with; see 45 FR 37324, June 2, 1980.) Wages paid to persons engaged in both headnote 3(a) and non-headnote 3(a) assembly and repair activities may be credited proportionately for their headnote 3(a) activities, provided the firm maintains production and payroll records adequate for the Departments' verification of the headnote 3(a) portion.

(b) "Discrete movements components" means screws, parts, components and subassemblies not assembled together with another part, component or subassembly at the time of importation into the territory. (A mainplate containing set jewels or shock devices, together with other parts, would be considered a single discrete component, as would a barrel bridge subassembly.) Excluded are dials, dial washer, dial screws, hour wheels, hands, automatic mechanisms and related parts, day-date mechanisms and calendar features, and jewels.

Section 8. (a) All firms must, as a condition for receipt of allocations or reallocations based on subsection 3(a) criteria, certify to the Departments that they will not alter assembly operations in a manner which would result in their failure to satisfy the respective criteria.

(b) If the Departments have reason to believe that a producer has not complied with or is not complying with the certification required by subsection (a) of this section, they may issue an order requiring the producer to show cause within 30 days of receipt of the order why the duty-free quota to which it would otherwise be entitled should not be cancelled or reduced by the Departments.

Section 9. (a) the quarterly reporting requirements of § 303.8(a) of this part are suspended and copies of Form ITA–321P will not be forwarded to producers at the times specified by that provision.

(b) Each producer must comply with § 303.8(b) of this part and report any changes in ownership, interest and control which have occurred during any quarter by April 15, July 15 and October 15, respectively, but may do so by letter.

Section 10. *Limitation on value of components used.* (a) Watch movements assembled from components with a value of more than $20 and watches assembled from components with a value of more than $40 shall not be eligible for duty-free entry into the U.S. customs territory.

(b) As used in subsection (a), "value" means the value of the merchandise plus all charges and costs incurred up to the last point of shipment (i.e., prior to entry of the parts and components into the insular possession).

(c) Wages expended in the assembly of watches and watch movements described in Subsection 10(a) are wages for non-headnote 3(a) assembly activity, as defined in Subsection 7(a) of this Appendix.

Section 11. *Production Incentive certificates.* (a) Calculation of value.

(1) The Departments shall verify total creditable wages paid by each producer during the calendar year and divide by the total units it shipped during the calendar year to derive its average creditable wage per unit shipped (APS). The Departments may, however, make adjustments for these data in the manner set forth in Section 3(a)(2) of this Appendix.

(2) The value of each producer's certificate shall equal the producer's APS times the sum of:

(i) The number of units shipped up to 300,000 units times a factor of 90%; plus

(ii) incremental units shipped up to 450,000 times a factor of 85%; plus

(iii) incremental units shipped up to 600,000 units times a factor or 80%; plus

(iv) incremental shipments up to 750,000 units times a factor of 65%.

(3) For purposes of determining the applicable amount of each producer's certificate to be issued during calendar year 1983, the greater of (i) The producer's creditable wages for calendar year 1982 or (ii) 60% of the producer's creditable wages for calendar year 1981 shall be considered the creditable wages for 1982. Data on any firm's 1981 operations not available in the insular possession during the Departments' 1983 annual verification must be made available to the Departments at a time and location specified by the Departments.

(4) "Creditable wages" means wages as defined in Section 7(a) of this Appendix.

(b) Issuance of certificates.

(1) Certificates ("Certificates of Entitlement to Secure the Refund of Duties on Watches and Watch Movements (Pub. L. 97–446)"; Form ITA–360) shall be issued as soon as possible after February 1, 1983 (with the exceptions specified in (2) and (3), below) upon receipt of the producer's certification that it intends and shall be able to sustain operations beyond calendar year 1983.

(2) Certificates shall not be issued to more than one company in the same insular possession which are owned or controlled by the same corporate entity.

(3) Any producer which failed or was inelgible to request a calendar year 1983 quota prior to January 31, 1983, shall be ineligible to receive a calendar year 1983 certificate. Any producer which assembled and shipped watches for at least six months of 1981 or six months of 1982 may, however, reestablish its eligibility, whether or not such producer had informed the Departments of its intention to discontinue insular watch production, by taking actions necessary to resume assembly prior to June 1, 1983. Only after such producer has actually begun assembly operations in 1983 and has satisfied the Departments that it intends and shall be able to sustain operations beyond calendar year 1983 shall the producer be eligible to receive its certificate based on the creditable wages generated during calendar year 1981 or 1982 and verified by the Departments. The Departments may make appropriate 1983 allocations to such firms under the provisions of § 303.5(a)(5) of the codified regulations.

(c) Security and handling of certificates.

(1) Certificates (Form ITA–360) authorize the holder to request the refund of duties (see (d), below). Certificates themselves may not be used to secure such refunds.

(2) Certificate holders are responsible for the security of the certificates. They shall be maintained at the territorial address of the insular producer or at another location having the advance approval of the Departments.

(3) All requests for refunds made pursuant to the certificates shall be entered on the reverse side of the certificate.

(4) Certificates shall immediately be returned by registered mail to the Departments: (i) Together with any request for refunds which exhausts the entitlement on the face of the certificate, (ii) upon expiration of the certificate, or (iii) upon demand (for good cause) by the Departments.

(5) The transfer of certificate entitlements may be affected only in accordance with the procedures described in (d) below.

(d) The use and transfer of certificate entitlements.

(1) To request a refund pursuant to a certificate entitlement, the insular producer shall execute a Form ITA–361 ("Request for Refund of Duties on Watches and Watch Movements (Pub. L. 97–446)") in accordance with the instructions thereon. After authentication by the Department of Commerce, the Form ITA–361 may be used to secure the refund of duties on watch movements, watches, and (except for discrete cases) parts therefor (excluding articles containing any material which is the product of a country with respect to which Column 2 rates of duty apply) which were entered into the customs territory of the United States during the two-year period prior to the issue date of the certificate and during the one year period the certificate remains valid. Copies of the appropriate Customs entries must be provided with the request for refund (Form ITA–361) in order to establish a basis for issuing the claimed amounts. Certification regarding drawback claims and liquidated refunds relating to the presented entries is required from the claimant on Form ITA–361.

(2) The refund of duties pursuant to Pub. L. 97–446 is governed by regulations issued by the U.S. Customs Service, U.S. Department of the Treasury. Unauthorized use of any official form or other violation of the Customs regulations shall, upon receipt by the Departments of official information of such violation, result in the cancellation of the affected certificate and may subject the violator to other penalities provided by the Customs regulations.

(3) To transfer a portion or all of its certificate entitlements, the insular producer shall execute Form ITA–361 and enter in block C of the form the name and address of the party to which it wishes to transfer the entitlement.

(4) After a Form ITA–361 transferring a certificate entitlement to a party other than the certificate holder has been authenticated by the Department of Commerce, the form may be exchanged for any consideration satisfactory to the two parties. In all cases, authenticated forms shall be transmitted to the certificate holder or its authorized custodian (see Section 11(c)(2), above) for disposition.

(5) All disputes concerning the use of an authenticated Form ITA–361 shall be referred to the Departments for resolution. Any party named on an authenticated Form ITA–361 shall be considered an "interested party" within the meaning of § 303.11(a) of the codified regulations (relating to appeals), under the provisions of which all such disputes shall be settled.

Issued at Washington, D.C. on April 20, 1983.

Pedro A. Sanjuan,

Assistant Secretary for Territorial and International Affairs, Department of the Interior.

John L. Evans,

Deputy to the Deputy Assistant Secretary for Import Administration, Department of Commerce.

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Parts 370, 371, 372, 373, and 386

[Docket No. 30413–57]

Mailing Address Changes for Office of Export Enforcement

AGENCY: Office of Export Administration, International Trade Administration, Commerce.

ACTION: Final rule.

SUMMARY: The Compliance Division of the Office of Export Administration has been reorganized into the Office of Export Enforcement. The Office of Export Enforcement's primary responsibility is to enforce the Export Administration Regulations (excluding Part 369, Restrictive Trade Practices or Boycotts). This rule, which neither expands nor limits the provisions of the Export Administration Regulations, changes the mailing address (and other references) for the Compliance Division to that of the Office of Export Enforcement.

DATE: This rule is effective April 25, 1983.

FOR FURTHER INFORMATION CONTACT: Archie Andrews, Director, Exporters' Service Staff, Office of Export Administration, Department of Commerce, Washington, D.C. 20230 (Telephone: (202) 377–4811).

SUPPLEMENTARY INFORMATION:

Rulemaking Requirements

In connection with various rulemaking requirements, the Office of Export Administration has determined that:

1. Under section 13(a) of the Export Administration Act of 1979 (Pub. L. 96–72, 50 U.S.C. app. 2401 *et seq.*) ("the Act"), this rule is exempt from the public participation in rulemaking procedures of the Administrative Procedure Act. This rule does not impose new controls on exports, and is therefore exempt from section 13(b) of the Act, which expresses the intent of Congress that where practicable "regulations imposing controls on exports" be published in proposed form.

2. This rule does not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

3. This rule is not subject to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*

4. This rule is not a major rule within the meaning of section 1(b) of Executive Order 12291 (46 FR 13193, February 19, 1981), "Federal Regulation."

Therefore, this regulation is issued in final form. Although there is no formal comment period, public comments on this regulation are welcome on a continuing basis.

BILLING CODE 3510–25–M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 240

[Rel. No. 34–19687, File No. S7–842]

Securities Confirmations

AGENCY: Securities and Exchange Commission.

ACTION: Final rule amendments.

SUMMARY: The Commission is adopting amendments to Rule 10b–10 under the Securities Exchange Act of 1934 ("Act") which specifies disclosures to be made on confirmations delivered to customers by broker-dealers in connection with transactions in securities. The amendments provide an exception from the immediate delivery requirements of the rule for transactions in shares of certain investment companies that attempt to maintain a constant net asset value. The amendments also will require disclosure to investors of certain yield and call feature information in connection with transactions in debt securities other than municipal securities.

DATES: Paragraphs (c)(1)–(3), relating to the use of monthly confirmation statements, will become effective July 25, 1983. Paragraphs (a)(3)–(5) and (e)(4) of Rule 10b–10, requiring disclosure of yield and call feature information, will become effective January 1, 1984.

FOR FURTHER INFORMATION CONTACT: Susan J. Walters, Esq., (202) 272–7494, Division of Market Regulation, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION:

I. Introduction

The Commission today announced the adoption of amendments to its securities confirmation rule, Rule 10b–10 (17 CFR 240.10b–10) under the Act.[1] the amendments were published for comment in August 1982.[2] As proposed, the amendments would have provided a limited exception to the immediate delivery requirements of the confirmation rule for pre-authorized or "automatic" transactions in shares of money market funds, tax-exempt bond funds or U.S. government funds in connection with certain plans defined as "account management plans." Upon its review of the proposals and consideration of the comments received, the Commission has determined to expand the exception to the immediate confirmation delivery requirements of Rule 10b–10 to allow the use of monthly statements in confirmations of all redemptions and purchases of shares of certain investment companies that attempt to maintain a constant net asset value.

The proposed amendments requiring dislosure of yield and call provisions have been adopted substantially as proposed. These amendments will require any broker or dealer that effects a transaction for or with a customer in any debt security, with certain exceptions, to include in the customer's written confirmation information on the yield and call provisions of the security.

II. Discussion

1. Use of Monthly Statements

Rule 10b–10 generally requires that broker-dealers send to customers a written confirmation of securities transactions on or before completion of the transaction. Since 1977, however, the Commission has granted exemptions from this immediate delivery requirement to allow broker-dealers, in connection with account management plans,[3] to send monthly confirmations of certain transactions in shares of money market funds. The proposed amendments would have codified these exemptions. The amendments would have drawn a distinction between pre-authorized ("automatic") and individually directed ("manual") transactions and between transactions in money market funds pursuant to account management plans and other fund transactions. Only automatic transactions in account management plans would have qualified for the exception as proposed.

The commentators unanimously supported the amendments as a deregulatory initiative that would result in substantial cost savings to the industry and the public without adversely affecting investors. Some commentators noted, however, that extension of the proposed exception to all transactions in investment companies that seek to maintain constant net asset value would provide even greater cost reduction without materially decreasing customer protection. Commentators suggested that where funds maintain a constant net asset value per share and no load is charged, monthly statements would be adequate to ensure investor protection. One commentator also noted that alternative means to immediate

---

[1] 15 U.S.C. 78 *et seq.*

[2] Securities Exchange Act Release No. 18983 (Aug. 20, 1982), 47 FR 37920 (Aug 27, 1982) ("Proposing Release").

[3] The term "account management plan" was defined in the proposed amendments to include plans in which the customer may purchase shares of money market mutual funds as specified in the plan with funds drawn from the customer's account and redeem such shares also in accordance with the terms specified in the plan (*e.g.*, to satisfy a debit balance created by the purchase of securities or by the exercise of a check, credit or debit card or similar withdrawal option provided in the plan). These transactions were considered to be "automatic" (pre-authorized by the customer) as opposed to "manual" (individually directed transactions).

confirmations are frequently available to money market fund shareholders to determine whether a transaction has been effected correctly. For example, a number of funds provide shareholders with a toll free telephone number that they may use to obtain account information. A customer's account executive may also be able to provide account information.

The confirmation is designed to provide customers with information necessary for investment decisions. Where fund shares are priced at a constant net asset value per share and no load is charged, the need for investors to receive immediate confirmations does not appear to outweigh the cost to broker-dealers of providing the confirmation. Accordingly, the Commission has determined to extend the proposed exception to the confirmation delivery requirements of the rule to all transactions in investment companies that attempt to maintain a constant net asset value per share where no sales load or redemption fee is charged. The amendment will become effective July 25, 1983, in order to provide broker-dealers and transfer agents with sufficient time to review their internal controls and develop adequate systems to use the exception.

As adopted, the exception will permit broker-dealers to use monthly account statements in lieu of individual, immediate confirmations for all purchases and redemptions of shares of any no-load open-end investment company registered under the Investment Company Act of 1940 that attempts to maintain a constant net asset value per share and that holds, itself out to be a "money market" fund or has an investment policy calling for at least 80% of its assets in debt securities maturing in 13 months or less. The exception will be available to all broker-dealers that effect transactions in such funds, regardless of whether the broker-dealer is affiliated with the fund.

The monthly account statement is required to be given or sent within five business days of the end of each monthly period and must include substantially all the information currently required in the quarterly confirmation provisions of paragraph (b) of Rule 10b–10.[4] This information will include, among other things, purchases and redemptions of fund shares and the total number of fund shares held by the customer.

[4] The amendment would not, of course, change the availability of other confirmation alternatives such as the use of quarterly statements now permitted by certain provisions of Rule 10b–10.

2. Disclosure of Yield and Call Information

The Commission believes that disclosure of yield and call feature information for transactions in debt securities will significantly benefit investors without unduly increasing industry costs. Yield has been characterized as the single most important piece of information to an investor in the context of a transaction in debt securities, and the securities industry has suggested that broker-dealers should be required to provide that information to customers.[5] The confirmation rule of the Municipal Securities Rulemaking Board ("MSRB") currently requires disclosure of yield information for transactions in municipal securities.[6]

As adopted, the amendments will require broker-dealers to include in the written confirmation of transactions in debt securities with customers [7] several additional items of information. Broker-dealers must disclose, in the case of a transaction in a debt security effected exclusively on a dollar price basis,[8] the dollar price at which the transaction was effected and the yield to maturity calculated from the dollar price.

In the case of a transaction in a debt security effected on the basis of yield, the confirmation must disclose (1) the yield at which the transaction was effected, including the percentage amount and the characterization of the yield as, for example, yield to maturity or call or current yield, and, if effected at yield to call, the type of call (*e.g.*, whole or part-issue call), the call date and call price; (2) the dollar price calculated from the yield at which the transaction was effected; and (3) if the transaction is effected on a basis other than yield to maturity and yield to maturity is less than the represented yield, the yield to maturity as well as the represented yield.

In response to the commentators' concerns, the Commission has exempted from the yield to maturity disclosure requirements transactions in debt securities where the interest rate or maturity date is subject to change. The Commission understands that under these circumstances it is not possible to calculate a meaningful yield to maturity. Therefore, in those instances where such securities trade on a dollar basis, the yield to maturity need not be disclosed. However, if the broker-dealer effects transactions in such securities on a yield basis, the confirmation must contain that yield, including the percentage amount and the characterization of the yield. The yield to maturity, however, is not required to be disclosed for such yield basis transactions.

Transactions in participation interests in notes secured by liens upon real estate continuously subject to pre-payment, such as Government National Mortgage Association securities ("GNMA"), similarly are exempt from the yield to maturity disclosure requirements. Depending upon the level of the interest rates on the mortgages that comprise the pool, the mortgages may be prepaid within varying periods of time. The Commission understands that broker-dealers often quote investors the yield to twelve year average life for purposes of comparing different GNMAs, although that figure may be significantly different from the actual yield to investors. Where the GNMA or similar security is sold on a yield basis, as, for example, the yield to twelve year average life, that yield and the dollar price calculated from the yield must be disclosed. In addition, since some investors may not adequately understand the significance of the yield to twelve year average life, the broker-dealer should clearly explain the significance of that figure to their customers.

If the securities may be called for redemption before maturity, a legend must be included disclosing that fact, that redemption could affect the represented yield and that additional information is available upon request.[9] As discussed in the Proposing Release, the Commission is concerned that investors often do not adequately understand the nature and effect of call provisions on debt securities.[10] The rule does not set forth the particular language of the legend in order to afford flexibility to broker-dealers, particularly

[5] *See, e.g.*, letter from the Corporate Bond Committee of the Securities Industry Association to Roger D. Blanc, Chief Counsel, Division of Market Regulation (July 2, 1979).

[6] MSRB Rule G–15.

[7] As defined in Rule 10b–10(d)(1), the term "customer" does not include a broker or dealer.

[8] One commentator questioned the use of the term "basis" as used in the Rule. For purposes of the Rule, a transaction will be considered to have been effected on a dollar price basis only if a yield figure is not provided either orally or in writing to the customer before preparation of the confirmation. If transactions are in fact effected on a dollar price basis, the confirmations must show the yield to maturity calculated from the dollar price discussed with the customer.

[9] Some commentators requested that the Commission clarify the kind of additional information that would be required to be supplied upon a customer request. Broker-dealers generally will satisfy this requirement by describing the call feature printed on the instrument.

[10] *See* Proposing Release, 47 FR at 37922.

those that have devised a similar legend to comply with MSRB Rule G–15.[11]

III. Certain Findings, Effective Date and Statutory Basis

Section 23(a)(2) of the Act [12] requires the Commission, in adopting rules under the Act, to consider the anti-competitive effect of such rules, if any, and to balance any impact against the regulatory benefits gained in terms of furthering the purposes of the Act. The Commission has considered the amendments to Rule 10b–10 in light of the standards cited in Section 23(a)(2) and believes that adoption of the amendments will not impose any burden on competition not necessary or appropriate in furtherance of the Act.

Pursuant to the Administrative Procedure Act, 5 U.S.C. 553(b), interested persons were given an opportunity to submit written views on the proposed amendments to Rule 10b–10. After consideration of the relevant matters presented, the proposed amendments concerning yield and price disclosures are adopted substantially as proposed with some technical changes for clarity. In response to commentators' suggestions, the proposed amendments dealing with the exception from the immediate confirmation delivery requirements for certain transactions in shares of investment companies are extended to transactions in shares of investment companies that seek to maintain a constant net asset value. The issues with respect to the extension have been thoroughly considered during the comment period. Extended delay in adopting the amendments would be costly to investors and broker-dealers. Therefore, the Commission, for good cause, pursuant to 5 U.S.C. 553(b)(3)(B), finds that further notice and public procedure with respect to the amendments would be unnecessary, impracticable, and contrary to the public interest.

The amendments to Rule 10b–10 with respect to the use of monthly confirmations in lieu of immediate confirmations have been modified in response to commentators' suggestions. These amendments will become effective July 25, 1983.[13] The amendments to Rule 10b–10 with respect to disclosure of yield and call information will become effective January 1, 1984.

Regulatory Flexibility Act Certification

Pursuant to 5 U.S.C. 605(b), the Chairman has certified that the amendments as adopted will not have a significant economic impact on a substantial number of small entities. This certification, including the reasons therefor, is attached to the release.

Statutory Basis

The Securities and Exchange Commission hereby amends § 240.10b–10 in Chapter II, Title 17 of the Code of Federal Regulations, pursuant to its authority under the Act, and particularly Sections 3, 10, 11, 15, 17, and 23 thereof (15 U.S.C. 78c, 78j, 78k, 78*o*, 78q, and 78w).

List of Subjects in 17 CFR Part 240

Reporting requirements, Securities.

Text of Amendments to Rule 10b–10

Chapter II, Title 17 of the Code of Federal Regulations is amended as follows:

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

By amending § 240.10b–10 by adding new paragraphs (a)(3), (a)(4), and (a)(5); by adding new paragraphs (c), (c)(1), (c)(2) and (c)(3); by adding new paragraph (e)(4); by revising the reference to paragraph (a)(4)(ii) in paragraph (a)(3) to read "paragraph (a)(7)(ii)"; by revising the reference to five days in paragraph (b)(2) to read "five business days"; by redesignating existing paragraphs (a)(3), (a)(4), and (a)(5) to be paragraphs (a)(6), (a)(7), and (a)(8), respectively; by redesignating existing paragraph (c) to be paragraph (d); by redesignating existing paragraphs (d), (d)(1), (d)(2), (d)(3), (d)(4), and (d)(5) to be paragraphs (e), (e)(1), (e)(2), (e)(3), (e)(5), and (e)(6), respectively; and by redesignating existing paragraph (e) to be paragraph (f), to read as follows:

§ 240.10b–10 Confirmation of Transactions.

§ 240.10b–10 [Amended]

(a) * * *

(3) In the case of any transaction in a debt security subject to redemption before maturity, a statement to the effect that such debt security may be redeemed in whole or in part before maturity, that such a redemption could affect the yield represented and that additional information is available upon request; and

(4) In the case of a transaction in a debt security effected exclusively on the basis of a dollar price

(i) The dollar price at which the transaction was effected, and

(ii) The yield to maturity calculated from the dollar price; *Provided, however,* that this paragraph (ii) shall not apply to a transaction in a debt security with a maturity date that may be extended by the issuer thereof, with a variable interest rate payable thereon, or a participation interest in notes secured by liens upon real estate continuously subject to prepayment; and

(5) In the case of a transaction in a debt security effected on the basis of yield.

(i) The yield at which the transaction was effected, including the percentage amount and its characterization (*e.g.*, current yield, yield to maturity, or yield to call) and if effected at yield to call, the type to call, the call date and call price;

(ii) The dollar price calculated from the yield at which the transaction was effected; and

(iii) If effected on a basis other than yield to maturity and the yield to maturity is lower than the represented yield, the yield to maturity as well as the represented yield; *Provided, however,* that this paragraph (iii) shall not apply to a transaction in a debt security with a maturity date that may be extended by the issuer thereof, with a variable interest rate payable thereon, or a participation interest in notes secured by liens upon real estate continuously subject to prepayment; and

* * * * *

(c) A broker or dealer may effect transactions for or with the account of a customer without giving or sending to such customer the written notification described in paragraph (a) of this section if

(1) Such transactions are effected in shares of any no-load open-end investment company registered under the Investment Company Act of 1940 that attempts to maintain a constant net asset value per share and that holds itself out to be a "money market" fund or has an investment policy calling for investment of at least 80% of its assets in debt securities maturing in thirteen months or less; and

(2) Such broker or dealer gives or sends to such customer within five business days after the end of each monthly period a written statement

---

[11] While the rule requires use of the legend where debt securities are subject to call, it does not prohibit inclusion of the legend on confirmations of debt securities not subject to early redemption. Therefore, the rule permits the use of pre-printed confirmation forms.

[12] 15 U.S.C. 78w(a)(2).

[13] In the Proposing Release, the Commission stated that the staff would not recommend enforcement action under Rule 10b–10 if broker-dealers conformed their customer confirmation delivery procedures for account management plans, as defined in the release, to the proposed amendments. Broker-dealers may continue to rely on this position in connection with these account management plans pending the effective date of the amendments with respect to monthly confirmations.

disclosing each purchase or redemption, effected for or with, and each dividend or distribution credited to, or reinvested for, the account of such customer during the month; the date of each such transaction; the identity, number and price of any securities purchased or redeemed by such customer in each such transaction; the total number of shares of such securities in such customer's account; and remuneration received or to be received by the broker or dealer in connection therewith; and that any other information required by paragraph (a) will be furnished upon written request; and

(3) Such customer is provided with prior notification in writing disclosing the intention to send the written information referred to in paragraph (c)(1) on a monthly basis in lieu of an immediate confirmation.

* * * * *

(e) * * *

(4) "Debt security" as used in paragraphs (a)(3), (a)(4), and (a)(5) only, means any security, such as a bond, debenture, note, or any other similar instrument which evidences a liability of the issuer (including any such security that is convertible into stock or a similar security) and fractional or participation interests in one or more of any of the foregoing: *Provided, however,* that securities issued by an investment company registered under the Investment Company Act of 1940 shall not be included in this definition;

* * * * *

By the Commission.

Dated: April 18, 1983.

George A. Fitzsimmons,

Secretary.

Regulatory Flexibility Act Certification

I, John Shad, Chairman of the Securities and Exchange Commission, hereby certify pursuant to 5 U.S.C. 605(b) that the proposed amendments to Rule 10b–10 set forth in Securities Exchange Act Release No. 18988, if promulgated, will not have a significant economic impact on a substantial number of small broker-dealers. The Commission received thirteen comment letters which were generally supportive. The amendments requiring yield and call disclosures have been revised to clarify technical questions raised by commentators. In addition, the limited number of small broker-dealers that trade corporate debt securities frequently clear through larger broker-dealers that process the confirmation. Finally, the extension of the exception to permit broker-dealers to use monthly account statements in connection with transactions in shares of certain investment companies will reduce confirmation costs to all broker-dealers engaged in such transactions.

John S. R. Shad,

Chairman.

BILLING CODE 8010–01–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1 and 31

[T.D. 7888]

Income Tax; Taxable Years Beginning After December 31, 1953; Employment Taxes and Collection of Income Tax at Source; Withholding From Amounts Paid Under Accident or Health Plans

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document provides final amendments to the Income Tax Regulations (26 CFR Part 1) and the Employment Tax and Collection of Income Tax at Source Regulations (26 CFR Part 31) relating to withholding from amounts paid under accident or health plans. Changes to the applicable tax law were made by the Tax Reform Act of 1976 and the Tax Reduction and Simplification Act of 1977. The amendments provide guidance to employers who pay amounts under accident or health plans and employees who receive amounts under accident or health plans.

DATES: The regulations are effective with respect to amounts paid under accident or health plans in taxable years beginning on or after January 1, 1977, except that withholding is required only on payments made by an agent of the employer on or after May 25, 1983 unless the agent actually withheld taxes before that date.

FOR FURTHER INFORMATION CONTACT: Barry L. Wold of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202–566–3803).

SUPPLEMENTARY INFORMATION:

Background

On February 12, 1982 (47 FR 6440), the **Federal Register** published proposed amendments to the Income Tax Regulations (26 CFR Part 1) and the Employment Tax and Collection of Income Tax at Source Regulations (26 CFR Part 31) under sections 3401, 3402, 6001, and 6041 of the Internal Revenue Code of 1954. A public hearing was not held, since one was not requested. After consideration of all comments regarding the proposed amendments, those amendments are adopted as revised by this Treasury decision.

Response to Major Comments

Eight comments relating to the notice of proposed rulemaking were received. All of the comments pertained to the rules requiring withholding on payments made by an agent of the employer (§ 31.3401(a)–1(b)(8)(i)(*b*)). Several comments suggested that a later effective date be provided for withholding by agents. The final regulations provide that agents are required to withhold on payments made on or after May 25, 1983 unless the agent actually withheld taxes before that date.

Several other comments stated that it would lessen administrative complexity if all withholding by agents were made at the flat 20 percentage rate provided in § 31.3402(g)–1. The final regulations provide that unless the agent is also the agent of the employer for purposes of withholding from regular wages, the agent may use the flat 20 percentage rate. If the agent is also the agent for purposes of withholding from regular wages, then the general rules of § 31.3402(g)–1 will determine the availability of the flat 20 percentage rate.

Finally, several comnments suggested that the term "insurance risk" necessarily implies shifting risk to an insurance company. That implication reflects a misapprehension of the concept of risk. Persons other than insurance companies may bear insurance risk for purposes of these regulations. For example, an association (such as a trust) described in section 501(c)(9) may bear insurance risk on behalf of employers who contribute to the association. Conversely, an insurance company need not necessarily bear insurance risk, but may be reimbursed on a cost plus fee basis.

Section 122 of the Social Security Amendments of 1983 Act repeals section 105(d) of the Code (relating to certain disability payments) and amends section 37 of the Code to provide a credit for the elderly and permanently and totally disabled, effective for taxable years beginning after December 31, 1983. Consequently, it is anticipated that these final regulations, as well as the final regulations under sections 3402 (o) and 6051(f) of the Code that relate to amounts paid under section 105(d), will be amended to reflect the statutory

changes made by the Social Security Amendments of 1983 Act.

Non-Applicability of Executive Order 12291

The Treasury Department has determined that this regulation is not subject to review under Executive Order 12291 or the Treasury and OMB implementation of the Order dated April 28, 1982.

Regulatory Flexibility Act

No general notice of proposed rulemaking is required by 5 U.S.C. 553 (b) for interpretative regulations. Accordingly, the Regulatory Flexibility Act does not apply and no Regulatory Flexibility Analysis is required for this rule.

Drafting Information

The principal author of these regulations is Barry L. Wold of the Legislation and Regulations Division of the Office of the Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, on matters of both substance and style.

List of Subjects

26 CFR 1.6001–1–1.6109–2

Income taxes, Administration and procedure, Filing requirements, Disability payments.

26 CFR Part 31

Employment taxes, Income taxes, Lotteries, Railroad retirement, Social security, Unemployment tax, Withholding, Amounts paid under accident or health plans, Disability payments.

Adoption of Amendments to the Regulations

Accordingly, the following amendments are made to the Income Tax Regulations (26 CFR Part 1) and the Employment Tax and Collection of Income Tax at Source Regulations (26 CFR Part 31):

Income Tax Regulations

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. A new subparagraph (4) is added to § 1.6041–1(d) and is inserted after subparagraph (3) of that section. The new material reads as follows:

§ 1.6041–1 Return of information as to payments of $600 or more.

* * * * *

(d) *Payments specifically included.* * * *

(4) Amounts paid as disability payments under section 105(d) are required to be reported in returns of information under this section.

* * * * *

Employment Tax Regulations

PART 31—EMPLOYMENT TAXES AND COLLECTION OF INCOME TAX AT SOURCE

Par. 2. Section 31.3401(a)–1(b)(8) is amended by revising subdivision (i) thereof and by removing from the first sentence of the flush material following subdivision (ii)(*b*)(*1*)(*ii*): "after August 1, 1977, the thirtieth day after the publication of this regulation in the Federal Register as a Treasury decision (and, at the option of the employer, such payments reasonably expected to be made prior thereto)". The revised provision reads as follows:

§ 31.3401(a)–1 Wages.

* * * * *

(b) *Certain specific items.* * * *

(8) *Amounts paid under accident or health plans*—(i) *Amounts paid in taxable years beginning on or after January 1, 1977—(a) In general.* Withholding is required on all payments of amounts includible in gross income under section 105(a) and § 1.105–1 (relating to amounts attributable to employer contributions), made in taxable years beginning on or after January 1, 1977, to an employee under an accident or health plan for a period of absence from work on account of personal injuries or sickness. Payments on which withholding is required by this subdivision are wages as defined in section 3401(a), and the employer shall deduct and withhold in accordance with the requirements of chapter 24 of subtitle C of the Code. Third party payments of sick pay, as defined in section 3402(o) and the regulations thereunder, are not wages for purposes of this section.

(*b*) *Payments made by an agent of the employer. (1)* Payments are considered made by the employer if a third party makes the payments as an agent of the employer. The determining factor as to whether a third party is an agent of the employer is whether the third party bears any insurance risk. If the third party bears no insurance risk and is reimbursed on a cost plus fee basis, the third party is an agent of the employer even if the third party is responsible for making determinations of the eligibility of individual employees of the employer for sick pay payments. If the third party is paid an insurance premium and not reimbursed on a cost plus fee basis, the third party is not an agent of the employer, but the third party is a payor of third party sick pay for purposes of voluntary withholding from sick pay under sections 3402(o) and 6051(f) and the regulations thereunder. If a third party and an employer enter into an agency agreement as provided in paragraph (c) of § 31.6051–3 (relating to statements required in case of sick pay paid by third parties), that agency agreement does not make the third party an agent of the employer for purposes of this paragraph.

(2) Payments made by agents subject to this paragraph are supplemental wages as defined in § 31.3402(g)–1. Unless the agent is also an agent for purposes of withholding tax from the employee's regular wages, the agent may deem tax to have been withheld from the employee's regular wages. Consequently, the agent may determine the tax to be withheld from supplemental wages by using a flat percentage rate of 20 percent as provided in § 31.3402 (g)–1.

(3) This paragraph is only applicable to amounts paid on or after May 25, 1983 unless the agent actually withheld taxes before that date.

(*c*) *Exceptions to withholding. (1)* Withholding is not required on payments that are specifically excepted under the numbered paragraphs of section 3401(a) (relating to the definition of wages), under section 3402(e) (relating to included and excluded wages), or under section 3402(n) (relating to employees incurring no income tax liability).

(*2*) Withholding is not required on disability payments to the extent that the payments are excludable from gross income under section 105(d). In determining the excludable portion of the disability payments, the employer may assume that payments that the employer makes to the employee are the employee's sole source of income. This exception applies only if the employee furnishes the employer with adequate verification of disability. A certificate from a qualified physician attesting that the employee is permanently and totally disabled (within the meaning of section 105(d)) shall be deemed to constitute adequate verification. This exception does not affect the requirement that a statement (which includes any amount paid under section 105(d)) be furnished under either section 6041 (relating to information at source) or section 6051 (relating to receipts for employees) and the regulations thereunder.

* * * * *

Par. 3. Section 31.3420(a)–1(d) is revised to read as follows:

§ 31.3402(a)–1 Requirement of withholding.

* * * * *

(d) For provisions relating to the circumstances under which tax is required to be deducted and withheld from certain amounts received under accident and health plans, see paragraph (b)(8) of § 31.3401(a)–1.

* * * * *

§ 31.3402(b)–1 [Amended]

Par 4. Section 31.3402(b)–1(a)(3) (relating to percentage method of withholding) is amended by removing the words "wage continuation plans" and inserting in their place the words "accident and health plans."

§ 31.3402(c)–1 [Amended]

Par 5. Section 31.3402(c)–1(a)(2) (relating to wage bracket withholding) is amended by removing the words "wage continuation plans" and inserting in their place the words "accident and health plans."

§ 31.6001–5 [Amended]

Par 6. Section 31.6001–5(a) (relating to additional records in connection with collection of income tax at source on wages) is amended by removing and reserving subparagraph (11) therefrom and by removing from subparagraph (12) the words "a wage continuation plan (as defined in paragraph (a)(2)(i) of § 1.105–4 and 1.105–5 of this chapter (Income Tax Regulations))—" and inserting in their place the words "an accident or health plan (as defined in section 105 and the regulations thereunder)—".

This Treasury decision is issued under the authority of section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917, 26 U.S.C. 7805).

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

Approved: April 11, 1983.

John E. Chapoton,

Assistant Secretary of the Treasury.

BILLING CODE 4830–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

45 CFR Part 84

Nondiscrimination on the Basis of Handicap in the Provision of Health Care to Handicapped Infants

AGENCY: Office of the Secretary, HHS.

ACTION: Notice of Court Order Declaring Rule Invalid.

SUMMARY: This notice is to advise that the interim final rule issued by the Department of Health and Human Services on March 7, 1983, 48 FR 9630, concerning discrimination in the provision of health care to handicapped infants, has been declared invalid and has no further force and effect.

FOR FURTHER INFORMATION CONTACT: Susan Shalhoub at (202) 245–6585, Office for Civil Rights, Department of Health and Human Services, 330 Independence Avenue, SW., Room 5514, Washington, D.C. 20201.

SUPPLEMENTARY INFORMATION: On March 7, 1983, HHS Acting Secretary Thomas R. Donnelly, Jr., issued an interim final rule amending 45 CFR 84.61 by adding new provisions relating to responsibilities of recipients of Federal financial assistance pursuant to section 504 of the Rehabilitation Act of 1983 in connection with the providing of health care for handicapped infants. On March 18, 1983, the American Academy of Pediatrics, National Association of Children's Hospitals and Related Institutions and the Children's Hospital National Medical Center brought a civil action in the United States District Court for the District of Columbia seeking to have the interim final rule declared invalid and for other relief (*American Academy of Pediatrics, et al.*, v. *Heckler*, Civil Action No. 83–0774).

On April 14, 1982, District Court Judge Gerhard A. Gesell issued an Order and Declaration which, in pertinent part, "declared that the defendant's March 7, 983, inteirm final rule, 48 FR 9630, is arbitrary and capricious and promulgated in violation of the Administrative Procedure Act," and "ordered that the defendant shall promptly place a notice in the **Federal Register** advising that said interim final rule has been declared invalid and has no further force or effect."

This notice complies with the Court's Order.

The Secretary of Health and Human Services has filed Notice of Appeal of the Order and Declaration to the United States Court of Appeals for the District of Columbia Circuit. Should this Order and Declaration be stayed, vacated or reversed, HHS will publish in the **Federal Register** a notice to that effect.

HHS also wishes to advise the public that the comment period provided for in connection with the March 7 rule is suspended. If the District Court's order is set aside, a notice establishing a new deadline for the submission of comments will be published in the **Federal Register.**

Finally, HHS wishes to advise the public that although the Court in *American Academy of Pediatrics* v. *Heckler* decided it was not appropriate in that case "to consider the ramifications and scope of section 504" relating to its applicability to health care for handicapped infants, the opinion noted: "Given the language of the statute and its similarity to other civil rights statutes which have been broadly read, it cannot be said that section 504 does not authorize some regulation of the provision of some types of medical care to handicapped newborns."

Dated: April 19, 1983.

Margaret M. Heckler,

Secretary.

BILLING CODE 4150–04–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 1 and 90

[RM–4039; FCC 83–117]

Practice and Procedure; Private Land Mobile Radio Services; Amendment of the Commission's Rules To Implement a System of Temporary Licensing for Add-On Users of Multiple Licensed Radio Facilities Authorized in the Private Land Mobile Radio Services and Operating Below 800 MHz

AGENCY: Federal Communication Commission.

ACTION: Final rule.

SUMMARY: The Commission is establishing a system of temporary licensing for add-on users of multiple licensing facilities authorized in the Private Land Mobile Radio Services and operating in frequency bands below 800 MHz. This temporary licensing procedure authorizes the use of mobile stations in conjunction with a previously licensed base station for a period of up to 180 days while the Commission considers final authorization. Temporary licensing promotes the larger and more effective use of radio by eliminating unnecessary licensing delays without compromising the Commission's regulatory responsibility to assure proper use of the private radio spectrum. The increasing demand by the public for the use of private land mobile communications requires that the Commission develop new regulatory approaches, such as temporary licensing, to accommodate this demand efficiently and expeditiously.

DATES: Effective April 25, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Frederick J. Day, Rules Branch, Land Mobile & Microwave Division, Private Radio Bureau, (202) 634–2443.

Adminstrative practice and procedure.

47 CFR Part 90

Administrative practice and procedure, Private land mobile radio service, Temporary licensing.

Order

In the matter of amendment of parts 1 and 90 of the Commission's rules to implement a system of temporary licensing for add-on users of multiple licensed radio facilities authorized in the private land mobile radio services, and operating below 800 MHz (RM–4039).

Adopted: March 31, 1983.

Released: April 8, 1983.

By the Commission: Commissioner Sharp concurring in the result.

Introduction

1. We are adopting rule amendments to provide temporary licensing for eligible add-on users of multiple licensed radio facilities authorized in the private land mobile service for operation on frequencies below 800 MHz.

Background

2. In 1976, we implemented temporary licensing for applicants eligible to operate radio stations in the Citizens Band Radio Service.[1] This program was successful and we extended the same procedure to the Maritime Radio Services in 1979.[2] In 1980, a similar temporary licensing program, limited to eligible users adding-on to multiple licensed facilities[3] was implemented in the Business Radio Service in the bands below 470 MHz.[4] When we released new channels in the 800 MHz bands, we extended the temporary licensing concept to eligible add-on users of Specialized Mobile Radio Systems (SMRS)[5] and multiple licensed facilities authorized to operate above 800 MHz in any of the private land mobile services.[6] Most recently we adopted temporary licensing for the General Mobile Radio Service.[7]

3. Shortly after we instituted temporary licensing for eligible users in all the private services seeking to add-on to previously authorized facilities assigned channels in the 800 MHz bands, we received a petition for rule making, RM–4039, from the Special Industrial Radio Service Association, Inc. (SIRSA) requesting that we make temporary licensing available to eligibles in the Special Industrial Radio Service. That portion of SIRSA's petition recommending temporary licensing above 800 MHz is moot because of our previous action. The action we are now taking to conform temporary licensing procedures above and below 800 MHz renders the remainder of SIRSA's petition moot.

Discussion

4. We believe that temporary licensing serves the public interest because it eliminates unnecessary licensing delays without compromising our regulatory responsibilities to assure proper use of the private radio spectrum.[8] The increasing demand by the public for licensing in the private land mobile services requires us to develop new regulatory approaches to accommodate this need in the most efficient and expeditious manner possible. *See FCC* v. *Pottsville Broadcasting Co.*, 309 U.S. 135, 138 (1940); *United States* v. *Southwestern Cable Co.*, 392 U.S. 157, 172–173 (1968). To date, our experience with temporary licensing in the Business Radio Service and in other private services above 800 MHz has been successful. Temporary licensing plays a vital role in promoting "the larger and more effective use of radio." 47 U.S.C. 303(g).

5. Temporary licensing for eligible add-on users of previously authorized facilities is feasible chiefly because the physical and technical aspects of the radio transmitting equipment have already been reviewed and licensed for operation by Commission officials, and the necessary frequency coordination and antenna clearance have been completed. Add-on users merely increase the mobile loading level of the authorized base station facilities and add control points or control stations with antennas of 20 feet or less. They present virtually no risk of increased interference to other radio systems.

6. The benefit of immediate interim access to private mobile radio communications by eligible add-on users clearly outweighs the risk that a few users might not be eligible for licensing. The unauthorized use of transmitting equipment is not contingent upon any type of licensing program. Therefore, we see no compelling reason to burden eligible add-on users with unnecessary licensing delays. We will continue to grant permanent station authorizations only after the staff has completed a thorough evaluation of written applications on FCC Form 574, and after the requisite public interest determinations have been made. *See* 47 U.S.C. 308, 309(a).

7. Under the temporary licensing procedure we are adopting, add-on users must first complete and mail to the Commission FCC Form 574, the application for radio station authorization in the private land mobile radio services. They then must complete and retain the temporary permit form which requires certification that they are eligible in one of the private land mobile radio services, that they are not a representative of a foreign government, and that FCC Form 574 has been completed and mailed to the Commission. Users also must certify that they have not been denied a radio license or had a radio license revoked by the FCC, or been subject to any other legal action concerning the operation of a radio station. Users must state on the temporary permit the location of the base station facilities they intend to share, and give the name and call sign of at least one licensee of the facilities. Finally, users must designate a

[2] *See Order*, 70 FCC. 2d 863 (1979).

[3] The Commission's regulations permit two or more persons eligible in the private services to be licensed for the same base station transmitter, thereby reducing their costs while promoting more efficient use of the spectrum. *See Report and Order*, Docket No. 18921, 47 FR 19527 (May 6, 1982); 47 CFR 90.185.

[4] *See Report and Order*, PR Docket No 79–338, 45 FR 59880 (1980), *aff'd sub nom. Telocator Network of America* v. *FCC*, Docket No. 80–2182 (D.C. Cir. August 14, 1981).

[5] Specialized Mobile Radio Systems are authorized to operate above 800 MHz and to provide service to eligibles in the private service on a commercial basis. An entrepreneur is licensed for the operation of the base station transmitter and the users are licensed for their mobile stations and control stations or points. *See Report and Order*, Docket No. 18262, 46 F.C.C. 2d 752 (1974), *reconsidered, Memorandum Opinion and Order*, Docket No. 18262, 51 F.C.C. 2d 945 (1975) on appeal *Sub nom. NARUC* v. *FCC*, 525 F 2d. 630 (D.C. Cir. 1976), *cert. denied*, 424 U.S. 992 (1976); *Second Report and Order*, PR Docket No. 79–191, 47 FR 41002 (September 16, 1982), *under reconsideration*.

[6] *See Report and Order*, PR Docket No. 79–335, 89 F.C.C. 2d 638 (1982).

[7] *See Report and Order*, PR Docket No. 82–184, 48 FR 4783 (February 3, 1983.

[8] When we adopted the first temporary licensing program in the Business Radio Service, our action was challenged in court as unreasonable and unlawful. The court, however, affirmed our action. *Telocator Network of America* v. *FCC*, Docket No. 80–2182 (D.C. Cir. August 14, 1981). The court held that our decision to implement a temporary licensing program "for additional users of already licensed, shared radio systems in order to eliminate regulatory delay was a reasonable and proper exercise of the Commission's authority under the Communications Act of 1934, as amended." *Id.* The court further held that the temporary licensing procedures do not conflict "with any of the explicit requirements of the Communications Act." *Id.*

temporary call sign consisting of the letters "WT" and their local seven digit business telephone number. They must use this temporary call sign to identify their transmissions until they receive their permanent authorization and call sign from the Commission. Willful false statements made on the temporary permit void its authority and are punishable by fine, imprisonment or both. *See* 18 U.S.C. 1001. Users must sign the temporary permit form and post it at their control point(s) for the shared base station facilities. The temporary permit is valid for up to 180 days.

8. We emphasize that temporary permits are not available for individual, non-shared private stations or for the first user to become a licensee of a base station intended for multiple licensing.

9. The temporary permit form to be used is FCC Form 572, Temporary Permit to Operate a Part 90 Radio Station.

Conclusion

10. The rule amendments we are adopting uniformly extend temporary licensing to all the private land mobile services below 800 MHz. As we stated above, this does not diminish our regulatory responsibilities in any way because we will not grant permanent station licenses until we have received and reviewed complete written applications. Additional mobile users of authorized multiple licensed facilities in any of the private land mobile services, whether operating on frequencies above or below 800 MHz, do not pose interference issues as the requisite frequency coordination and antenna clearance procedures have been completed.

11. The rule amendments in the attached Appendix are essentially procedural in nature and thus are exempt from the prior notice and comment provisions set forth in the Administrative Procedure Act. *See* 5 U.S.C. 553(b)(3)(A). We also find that prior notice and comment procedures are unnecessary. 5 U.S.C. 553(b)(3)(B). The temporary licensing procedure we are adopting is identical to the well-established procedure that is already successfully used in other private land mobile services. Thus, we believe our action is not controversial and that receipt of additional comments would not significantly add to the public record on the temporary licensing approach. Accordingly, we believe that there is good cause for adoption of these rule amendments without affording prior notice and permitting public comment. Further, because these rule changes are procedural in nature and operate to relieve a restriction, they are not subject to the 30 day effective date provisions of the Administrative Procedure Act and will be made effective immediately. *See* 5 U.S.C. 553(d).

12. Authority for these rule amendments appears in Sections 4(i) and 303(r), of the Communications Act of 1934, as amended. 47 U.S.C. 4(i) and 303(r). Accordingly, it is ordered That Parts 1 and 90 of the Commission's Rules are amended as set forth in the attached Appendix effective upon publication in the **Federal Register**, and That this proceeding is terminated.

13. It is Further Ordered, That the Secretary shall cause a copy of this Order to be published in the **Federal Register**.

14. For further information about this action contact Frederick J. Day, Rules Branch, Private Radio Bureau, FCC, Washington, D.C. 20554, (202) 634–2443.

Secretary.

Appendix A

PART 1—[AMENDED]

Parts 1 and 90 of Chapter 1 of Title 47 of the Code of Federal Regulations are amended as follows:

1. In Part 1, § 1.925(h) is revised to read as follows:

§ 1.925 Application for special temporary authorization, temporary permit, or interim amateur permit.

* * * * *

(h) An applicant for a Part 90 radio station license to use the facilities of a multiple licensed base station or Specialized Mobile Radio System may operate the radio station for a period of up to 180 days under a temporary permit evidenced by a properly executed certification of FCC Form 572 after mailing a formal application for station license to the Commission, provided that the antenna(s) employed by the control station(s) is twenty feet or less above ground or twenty feet or less above a man-made structure (other than an antenna tower) to which it is affixed. The temporary operation of stations, other than mobile stations, within the Canadian coordination zone will be limited to stations with a maximum of 5 watts effective radiated power and a maximum antenna height of 6.1 meters above average terrain.

PART 90—[AMENDED]

2. In Part 90 Subpart G, § 90.159 is revised to read as follows:

§ 90.159 Temporary permit.

An applicant for a private land mobile station license utilizing an already authorized facility may operate the radio station(s) for a period of up to 180 days under a temporary permit evidenced by a properly executed temporary license certificate after mailing a formal application for station license together with evidence of frequency coordination, if required, to the Commission, provided that the antenna(s) employed by the control station(s) is twenty feet or less above ground or twenty feet or less above a manmade structure other than an antenna tower to which it is affixed. The temporary operation of stations, other than mobile stations within the Canadian coordination zone will be limited to stations with a maximum of 5 watts effective radiated power and a maximum antenna height of 6.1 meters above average terrain.

[FCC 83-152]

Radio Broadcast Services; Amendment of the Commission's Rules To Conform a Specific Section to a Section of the Communications Act of 1934

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: By this action, the Commission conforms § 73.3525 of its Rules to the amendment of Section 311(c)(3) of the Communications Act of 1934, as amended, contained in the Communications Amendments Act of 1982. This amendment to the Communications Act removed the prohibition on excessive reimbursement for agreements between or among competing applicants to withdraw applications to remove mutual exclusivity.

DATE: Effective April 7, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Molly Pauker, Mass Media Bureau, (202) 632–6460.

List of Subjects in 47 CFR Part 73

Radio, Television.

Order

In the Matter of: amendment of part 73 of the Commission's rules to conform § 73.3525

to amendment of section 311(c)(3) of the Communications Act of 1934, as amended.

Adopted: April 7, 1983.

Released: April 14, 1983.

By the Commission: Commissioner Fogarty absent.

1. On September 13, 1982, Section 311(c)(3) of the Communications Act of 1934 [1] was amended by the Communications Amendments Act of 1982, Pub. L. 97–259, 96 Stat. 1087, Section 116(a). This Section of the Act requires Commission approval of settlement agreements between or among competing applicants for broadcast licenses whereby one or more applicants withdraw to eliminate mutual exclusivity.

2. Prior to amendment, Section 311(c)(3) permitted the Commission to approve agreements contemplating direct or indirect payment to any party in consideration for withdrawal of the application only if it found that "* * * the amount or value of such payment * * * is not in excess of the aggregate amount determined by the Commission to have been legitimately and prudently expended and to be expended by such applicant in connection with preparing, filing, and advocating the granting of this application." To implement this statutory provision, § 73.3525 of the Commission's Rules provides, in pertinent part; as follows:

(a) Whenever applicants for a construction permit for a broadcast station enter into an agreement to procure the removal of a conflict between applications pending before the FCC by withdrawal or amendment of an application or by its dismissal pursuant to § 73.3568, all parties thereto shall, within 5 days after entering into the agreement, file with the FCC a joint request for approval of such agreement. The joint request shall be accompanied by a copy of the agreement and an affidavit of each party to the agreement setting forth in full all relevant facts including, but not limited to:

(1) The exact nature of any consideration (including an agreement for merger of interests) promised or paid;

(2) Information as to who initiated the negotiations;

(3) Summary of the history of the negotiations;

(4) The reasons why it is considered that the arrangement is in the public interest; and

(5) A statement fully explaining and justisfying any consideration paid or promised.

(b) The affidavit of any applicant to whom consideration is paid or promised shall, in addition, include an itemized accounting of the expenses incurred in connection with preparing, filing and advocating his application, and such factual information as the parties rely upon for the requisite showing that such reported expenses represent legitimate and prudent outlays. No such agreement between applicants shall become effective or be carried out unless and until the FCC has approved it, or until the for FCC review of the agreement has expired.

(47 CFR 73.3525 (1981)

3. The amendment of Section 311(c)(3) replaced language relating to consideration or paid in connection with agreements to withdraw applications with the following:

The Commission shall approve the agreement only if it determines that (A) the agreement is consistent with the public interest, convenience, or necessity; and (B) no party to the agreement filed its application for the purpose of reaching or carrying out such agreement.

4. On November 17, 1982, the Mass Media Bureau issued a Public Notice and announced that it planned to initiate a rulemaking proceeding to determine whether the statutory amendment required the Commission to modify its proscription of excessive reimbursement for withdrawal of competing applications and whether § 73.3525 should be modified accordingly.[2] Pending the outcome of this rulemaking, the Bureau announced an interim policy of continued application of the present rule.

5. By its *Order* of March 3, 1983, FCC 83–95, *In re Applications of Texas Television, Inc., et al.*, adopted March 3, 1983, released March 9, 1983, the Commission found that the interim policy conflicts with amended Section 311(c)(3) and declared the policy void. It is appropriate that § 73.3525 be conformed to reflect this action. Therefore, § 73.3525 (a) and (b) is hereby amended to eliminate requirements relating to the former statutory limit in payments in consideration of settlement agreements. *See* Appendix attached thereto.

6. The rule amendments adopted herein are essentially procedural in nature and thus are exempt from the prior notice and comment provisions set forth in the Administrative Procedure Act. *See* 5 U.S.C. 553(b)(3)(A). We also find that prior notice and comment procedures are unnecessary. 5 U.S.C. 553(b)(3)(B). The rule amendments merely serve to conform our rules to the requirements of amended Section 311(c)(3) of the Act by eliminating procedural requirements imposed upon applicants who enter into settlement agreements and impose no additional burdens on applicants. Therefore, we believe this action is not controversial and would be unlikely to generate any significant comment from members of the public. Further, because this rule change is procedural and operates to relieve a restriction, the 30 day effective date requirements of the Administrative Procedure Act do not apply. *See* 5 U.S.C. 553(d)(3). Authority for the amendment adopted herein is contained in Sections 303(r) 311(c) and 4(i) of The Communications Act of 1934, as amended.

7. In view of the foregoing, *it is ordered*, That, effective upon adoption of this decision, § 73.3525 of the Commission's Rules is amended as set forth in The Appendix attached hereto.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

William J. Tricarico,

Secretary.

Appendix

PART 73—[AMENDED]

Part 73 of Chapter I of Title 47 of The Code of Federal Regulations is hereby amended as indicated below:

1. Section 73.3525 is amended by revising paragraph (a) to read as follows, removing present paragraph (b) and redesignating paragraphs (c) through (i) as (b) through (h):

§ 73.3525 Agreements for Removing Application Conflicts.

(a) Whenever applicants for a construction permit for a broadcast station enter into an agreement to procure the removal of a conflict between applications pending before the FCC by withdrawal or amendment of an application or by its dismissal pursuant to § 73.3568, all parties thereto shall, within 5 days after entering into the agreement, file with the FCC a joint request for approval of such agreement. The joint request shall be accompanied by a copy of the agreement and an affidavit of each party to the agreement setting forth:

(1) The reasons why it is considered that such agreement is in the public interest; and

(2) A statement that its application was not filed for the purpose of reaching or carrying out such agreement.

DEPARTMENT OF THE INTERIOR
Office of the Secretary
43 CFR Subtitle A

Coastal Barrier Resources Act; Advisory Guidelines

AGENCY: Department of the Interior, Office of the Secretary.

ACTION: Rule-related notice and request for comments.

SUMMARY: This document sets forth the Department's general statement of policy and advisory guidelines regarding the provisions of the Coastal Barrier Resources Act (CBRA) that address limitations on Federal expenditures and financial assistance, and exceptions to the limitations.

DATES: Comments on this document will be accepted through May 12, 1983. The prohibitions on new Federal financial expenditures and assistance other than flood insurance were effective upon enactment of CBRA (October 18, 1982). The prohibition on the sale of new Federal flood insurance for new structures or substantial improvements will be effective October 1, 1983. The Federal Emergency Management Agency, which administers the National Flood Insurance Program, will issue instructions relating to this provision in the near future.

ADDRESS: Comments should be directed to Mr. Ric Davidge, Chairman, Coastal Barriers Task Force, U.S. Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Mr. Frank McGilvrey, Coastal Barriers Coordinator, U.S. Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240; (202-343-5000).

SUPPLEMENTARY INFORMATION: On October 18, 1982, President Reagan signed the Coastal Barrier Resources Act (CBRA) into law (Pub. L. 97-348). The law establishes the Coastal Barrier Resources System as referred to and adopted by Congress, and prohibits all new Federal expenditures and financial assistance within the units of that System unless specifically excepted by the Act. These provisions of the Act became effective immediately. The Act also amends and conforms the Federal flood insurance provisions of the Omnibus Budget Reconciliation Act of 1981 (OBRA) pertaining to undeveloped coastal barriers. The statutory ban on the sale of new Federal flood insurance for new construction or substantial improvements in these areas will go into effect on October 1, 1983.

On November 19, 1982, the Department of the Interior published interpretive guidelines and a general statement of policies pertaining to that portion of the Department's responsibilities which concerned the coastal barrier resource system maps (47 FR 52388). Two actions were undertaken at that time: (1) Filing, distribution and availability of the Coastal Barrier Resources System maps, and (2) adoption of the Department's policy in administering those maps, specifically in regard to minor and technical boundary changes which may be made prior to April 18, 1983.

These guidelines elaborate on the definition of expenditures and financial assistance, the definition of "new" expenditures and financial assistance and prescribe guidelines for consultation with the Department. As stated by the Director of the Office of Management and Budget in a letter dated March 7, 1983 to the Secretary: "(OMB) fully agree(s) that questions regarding the limitations on financial expenditures be interpreted by all agencies in a consistent manner. Therefore (OMB) will look to the Department of the Interior to develop guidelines and definitions which all agencies, including OMB, can use."

1. *Environmental Effects:* These guidelines describe the procedures Federal agencies should follow in consulting with the Department of the Interior prior to making an expenditure on or providing assistance to activities excepted under Section 6 of CBRA. Such activities generally continue the status quo, provide localized environmental benefits or localized emergency disaster assistance. Therefore, the Department has determined that these guidelines will have no significant impact on the environment.

2. *Statement of Effects:* The Department of the Interior has determined that these interpretive guidelines are not a major rule under E.O. 12291 and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act. These guidelines will result in minimal cost to Federal agencies and some economic effects on local firms and businesses to the extent that they are engaged in activities excepted by Section 6 of CBRA and paid for or assisted by Federal funds.

3. *Paperwork Reduction Act:* These interpretive guidelines do not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

4. *Authorship Statement:* This document has been prepared by the Coastal Barriers Task Force within the Department of the Interior. The Chairman of the Task Force is Mr. Ric Davidge, Office of the Assistant Secretary for Fish and Wildlife and Parks.

5. *Public Participation:* Interested persons, organizations, Federal agencies and other entities are encouraged to submit comments on these guidelines. Comments will be accepted until May 12, 1983.

6. *Identification of Subjects:* An identification of subjects is not necessary because this document is not designed to be codified in the Code of Federal Regulations.

Coastal Barrier Resources System: Prohibition on New Federal Expenditures and Procedures for Consultation

I. *Definitions and Limitations*

Financial Assistance

The Act removes Federal incentives for development from the System units unless otherwise permitted by CBRA itself.

Section 3(3) provides the generic definition of financial assistance which defines the general scope of the Act: "any form of loan, grant, guaranty, insurance, payment, rebate, subsidy, or any other form of direct or indirect Federal assistance." On October 1, 1983, this definition will also include Federal flood insurance.

Section 5(a) of the Act provides the general prohibition on new Federal expenditures and financial assistance in System units and provides a listing of specifically prohibited expenditures or assistance. Section 5(a) states:

Except as provided in Section 6, no new expenditures or new financial assistance may be made available under authority of any Federal law for any purpose within the Coastal Barrier Resources System, including, but not limited to—

(1) Construction or purchase of any structure, appurtenance, facility or related infrastructure;

(2) Construction or purchase of any road, airport, boat landing facility on, or bridge or causeway to, any System unit;

(3) Assistance for erosion control or other stabilization of any inlet, shoreline, or inshore area, except in certain emergencies.

The Department has identified additional specific examples of Federal program expenditures and financial assistance prohibited in units of the Coastal Barrier Resources System under CBRA. We interpret the Act to include, but not be limited to, the following programs:

Department of Agriculture
Farmers Home Administration

—Loans for rural disaster relief, water systems, wastewater systems, commercial development, community services, subdivision development, and recreational facilities.

Rural Electrification Administration

—Loans for electrical system development.

Department of Commerce

Economic Development Administration

—Grants for planning and administering local economic development programs.

Office of Coastal Zone Management

—CEIP grants—(coastal energy improvement program).

Department of Defense

U.S. Army

Corps of Engineers

—Construction and financial assistance involving beach erosion control, hurricane protection, and flood control works.

Department of Energy

—Energy development programs.

Department of Housing and Urban Development

—Block grants for community development.

—Mortgage insurance, housing assistance or rehabilitation subsidy programs.

—Urban Development Action Grants.

Department of the Interior

National Park Service

—Grants to states for land acquisition and development of protected areas, and for preparation of State Comprehensive Outdoor Recreation Plans through the Land and Water Conservation Fund (where development of coastal barriers is addressed).

—Grants for historic preservation (for construction purposes).

Department of Transportation

Federal Aviation Administration

—Grants for airport planning and development.

Federal Highway Administration

—Federal assistance to states for highway construction.

Urban Mass Transportation Administration

—Capital improvement and operating grants.

Environmental Protection Agency

—Grants for wastewater treatment construction (Sec. 201 grants), water quality management planning (Sec. 208 grants).

Federal Emergency Management Agency

—Federal National Insurance Program.

—Disaster assistance program.

Federal Home Loan Administration

—Guaranteed housing loans.

General Services Administration

—Construction or reconstruction of Federal property.

Small Business Administration

—Loans to small businesses for disaster relief, upgrading of water treatment systems, and other purposes.

—Disaster assistance to homeowners.

Veterans Administration

—Guaranteed housing loans.

"New" Expenditures

CBRA's limitations on Federal expenditures and financial assistance are only applicable to "new" expenditures or "new" financial assistance. Section 5(a) specifically provides that:

Except as provided in section 6, no new expenditures or new financial assistance may be made available under authority of any Federal law for any purpose within the Coastal Barrier Resources System * * *

Section 5(b) articulates when an expenditure or financial assistance is established to be "new" and therefore precluded. Section 5(b) provides:

(b) An expenditure or financial assistance made available under authority of Federal law shall, for purposes of this Act, be a new expenditure or new financial assistance if—

(1) In any case with respect to which specific appropriations are required, no money for construction or purchase purposes was appropriated before the date of the enactment of this Act; or

(2) No legally binding commitment for the expenditure or financial assistance was made before such date of enactment.

As further established by the legislative history, this subsection creates a dual definition. The concept of new expenditures or new financial assistance is defined in terms of actions that require specific appropriations and actions that do not require specific appropriations.

First, a Federal expenditure or financial assistance that does not rest upon a specific appropriation is new, and therefore precluded, unless a legally binding commitment for the site-specific expenditure or financial assistance was made before October 18, 1982, when the President signed the bill into law. The applicable date for Federal flood insurance is October 1, 1983. General intentions, moral obligations, statements of intent or policy are not adequate. A legally binding commitment is one that establishes a right to the funds in question as a matter of law; that is, the right must be an obligation against the United States. Necessarily, such an obligation must rest upon the availability of appropriations in existence prior to the cut-off date of October 18, 1982, or on specific contract authority to obligate funds of the United States in advance of appropriations. There is no general authority to obligate funds of the United States absent the availability of appropriations from the Congress. Such an obligation would be in violation of the Anti-Deficiency Act.

Second, expenditures or financial assistance with respect to which specific appropriations are required are self-evident. These are discrete Federal expenditures—not operating on a general program appropriation as provided above—that are funded by individual line item reference directly within a specific Appropriation Act. This is typically done by recitation of a specific project name. Such a specific appropriation prior to October 18, 1982, permits the Federal expenditure or financial assistance to continue. Absent such a specific appropriation of the funds in question, however, the expenditure or financial assistance would be "new" and would be precluded.

II. *Exceptions and Consultation*

Section 6 of the Act outlines the specific exceptions to the general prohibition on new Federal expenditures or financial assistance. The law grants exceptions for energy projects which can only be carried out within the system; maintenance of channel improvements; maintenance of roads, structures or facilities that are essential links to a larger network or system; military activities essential to national security; and Coast Guard facilities. In addition to these five specific exceptions, Section 6(6) outlines seven other activities that may be excepted if the activity is consistent with the purposes of the Act.

Section 6(a) of the Act requires the appropriate Federal officer to consult with the Secretary before making any Federal expenditures or financial assistance available under the provisions of Section 6. Procedures for consultation follow the discussion of exceptions.

Exceptions

(1) *Energy projects (section 6(a)(1)).* Federal assistance may be made available for energy projects in or adjacent to coastal areas for "any use or facility necessary for the exploration, extraction, or transportation of energy resources which can be carried out only on, in, or adjacent to coastal water

areas because the use or facility requires access to the coastal water body." The legislative history (House Report 97–841) states that "this provision is intended to be read broadly in terms of energy projects. However, the provision should not be interpreted to allow assistance for projects primarily designed to encourage development but which might be carried out in the guise of energy development."

(2) *Channel improvements (section 6(a)(2)).* Maintenance of existing channel improvements and related structures, such as jetties can continue. The use of disposal sites for dredge materials is included under this exception, so long as the sites are related to, and necessary for, the maintenance of an existing project. Section 6(b) requires that an existing channel improvement or an existing related structure be funded, in part or totally, before the date of enactment, i.e., the channel must have existed or have had funds appropriated for construction before October 18, 1982. According to the legislative history, this is not a license or authority for construction of new channels.

The legislative history also states: The criterion for determining whether Federal assistance would or would not be precluded is the existence of the channel at the time of enactment of this legislation. If it is in existence, or if money has been appropriated for its construction, then any Federal financial assistance for activities to maintain it, including, for example, the complete reconstruction of jetties or other structures, would be permitted. It is also the Committee's intent that, because of the unstable nature of barrier islands, existing channels can be relocated periodically. (House Report 97–841).

(3) *Roads Structures or Facilities (section 6(a)(3)).* Maintenance, replacement, reconstruction, or repair, but not expansion, of publicly-owned or publicly-operated roads, structures, or facilities that are *essential links in a larger network or system* can continue. This exception is re-iterated in Section 6(a)(6)(f). However, that provision includes roads structures or facilities which may not be essential links in a larger system or network.

Consistent with the House legislative report on CBRA, the reference to "structures and facilities" appears to be limited to related roadworks, rather than such items as publicly-owned utilities. The legislative history indicates that the Congressional intent to include drains, gutters, curbs and other related roadworks under this exception. The House Report also emphasizes that financial assistance will not be provided for the expansion of such structures, roads or facilities. (House Report 97–840).

(4) *Military activities (section 6(a)(4)).* Military activities *essential to national security* are excepted. We note that the legislative history of this provision specifically provides that "this exemption should be read broadly and that the Department of Defense should be the judge of the essentiality of the actions: (House Report 97–841). The Conference Report (97–928) further clarifies the intent of this exemption by stating: "the determination as to whether military activities are essential to national security must be made in accordance with existing law and procedure."

(5) *Coast Guard (section 6(a)(5)).* Expenditure of funds or provision of financial assistance for the construction, maintenance, operation and rehabilitation of Coast Guard facilities can continue.

(6) *Conservation, navigation, recreation, scientific research, disaster relief, roads, shoreline stabilization (section 6(a)(6)).* The following actions or projects are excepted, *providing the expenditure is consistent with the purposes of the Act* as provided in Section 2(b) (i.e., to minimize loss of human life, wasteful Federal expenditures and damage to fish, wildlife and other natural resources).

(A) Projects for the study, management, protection and enhancement of fish and wildlife resources and habitats, including, but not limited to, acquisition of fish and wildlife habitats and related lands, stabilization projects for fish and wildlife habitats, and recreational projects.

The legislative history states: "This exception recognizes the value of System units as fish and wildlife habitats and is in complete conformity with the purposes of the legislation. It is intended that the full range of Federal financial assistance authorized for protecting and managing fish and wildlife habitats will continue to be available. This includes, where necessary, assistance for stabilization projects to protect valuable habitats. Federal funds for projects involving facilities for fish and wildlife-related recreation would also be allowed. It is intended by the Committee that any development of recreational facilities be consistent with the purposes of the legislation." (House Report 97–841).

The language finally agreed upon by the Conference Committee, however, agreed to accept the House language but qualified it by requiring that such actions must be consistent with the purposes of the Act.

(B) The establishment, operation, and maintenance of air and water navigation aids and devices, and for access thereto.

The legislative history indicates that, in almost every instance, placement and such aids and devices on undeveloped coastal barriers would be appropriate. (House Report 97–841).

(C) Projects under the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601–4 through 11) and the Coastal Zone Management Act of 1972 (16 U.S.C. 1451 et seq.).

Clearly the legislative history applied to Section 6(a)(6)(A) would be generally applicable to this provision as well. Recreational use of system units should be encouraged so long as it is accomplished consistent with the purposes of the Act.

(D) Scientific research, including but not limited to aeronautical, atmospheric, space, geologic, marine, fish and wildlife and other research, development, and applications.

(E) Assistance for emergency actions essential to the saving of lives and the protection of property and the public health and safety, if such actions are performed pursuant to sections 305 and 306 of the Disaster Relief Act of 1974 (42 U.S.C. 5145 and 5146) and section 1362 of the National Flood Insurance Act of 1968 (42 U.S.C. 4103) and are limited to actions that are necessary to alleviate the emergency.

Section 305 of the Disaster Relief Act authorizes the President, in a declared emergency, to provide any or all of the assistance available under the Act as the President deems appropriate.

(F) The maintenance, replacement, reconstruction, or repair, but not the expansion, of publicly owned or publicly operated roads, structures, or facilities. There is a distinction between this exception, which may be applied if the action is consistent with the purposes of the Act, and the exception cited in Section 6(a)(3), which requires that the action be one that is an essential link in a larger network or system.

(G) Nonstructural projects for shoreline stabilization that are designated to mimic, enhance, or restore natural stabilization systems.

The legislative history cites the planting of dune grass or other beach nourishment activities as examples of these projects.

While it is the responsibility of the appropriate Federal officer to determine whether an action permitted under this section is consistent with the purposes of the Act, it is equally the Department of the Interior's responsibility to provide

technical information and to comment, when asked, on the proposed action in terms of its consistency with those same purposes.

III. *Consultation*

Federal Agencies should consult with the Secretary of the Interior and allow him the opportunity to provide written comment prior to making Federal expenditures or financial assistance available for an action excepted under Section 6 of CBRA within a CBRS unit. Compliance with this provision of the law rests initially on the Federal officer responsible for making the funds or financial assistance available for a permitted action. The Secretary's responsibility is to respond to a consultation request by providing technical information and comments on the question of consistency with CBRA.

Consultation Process

The consultation process will be carried out at two operational levels.

First, discrete projects identified in an agency's budget proposal should be submitted to the Fish and Wildlife Service, Department of Interior, for comment at least 45 days prior to transmittal to OMB. The Fish and Wildlife Service will acknowledge receipt of the transmittal, review the project, consult with the agency as necessary and provide a written response within 30 days through the Assistant Secretary for Fish and Wildlife and Parks.

On projects that are subject to provisions of NEPA, consultation should be accomplished early enough to permit the results to be included in the draft environmental statement or other appropriate environmental document.

Second, consultation requests for maintenance type projects such as channel maintenance or highway repair, that are managed by agency field-level officials should be made through the appropriate Regional Director of the Fish and Wildlife Service.

The Act provides for two levels of exception. Section 6(a)(1–5) clearly allows certain designated Federal activities. When consulting on these activities, the Department will simply provide technical information and register an opinion as to whether the activity in fact is that which the clause allows.

Section 6(a)(6) provides an additional caveat for the included list of exceptions that emphasize the requirement that the action "* * * is consistent with the purposes of this Act."

For activities falling under this subsection, the Department will also comment on the consistency of the proposed action with the purposes of CBRA as stated in Section 2(b): "* * * to minimize the loss of human life, wasteful expenditure of Federal revenues, and damage to fish, wildlife and other natural resources associated with coastal barriers along the Atlantic and Gulf coasts."

Several Federal agencies requested clarification of certain exceptions or rendered an opinion as to their interpretation. We propose that bilateral discussions between each affected agency and the Department be initiated to clarify their concerns and to establish procedures for the conduct of consultations.

The Department consultation officer is Mr. Frank McGilvrey, U.S. Fish and Wildlife Service, (202), 343–5000. Each agency affected by the Section 6 exceptions should have its consultation officer contact either Mr. Davidge or Mr. McGilvrey at their earliest convenience.

Dated: April 19, 1983.

J. Craig Potter,

Acting Assistant Secretary for Fish and Wildlife and Parks.

[FR Doc. 83–10758 Filed 4–22–83: 8:45 am]

BILLING CODE 4310–70–M

Office of Hearings and Appeals

43 CFR Part 4

Adoption of Regulations Implementing the Equal Access to Justice Act

AGENCY: Office of Hearings and Appeals, Interior.

ACTION: Final rule with request for comments.

SUMMARY: The Office of Hearings and Appeals in the Department of the Interior is issuing a final rule to implement the Equal Access to Justice Act (Pub. L. 96–481, 5 U.S.C. 504 (Supp. IV 1980)).

DATES: This rule is effective on April 25, 1983.

Written comments must be received on or before June 24, 1983.

ADDRESS: Written comments should be sent to Director, Office of Hearings and Appeals, Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT: Patrick Sheehy, Office of Hearings and Appeals (703) 235–3750; Deborah Ryan, Office of the Solicitor, (202) 343–5216.

SUPPLEMENTARY INFORMATION: The Equal Access to Justice Act (Pub. L. 96–481, 5 U.S.C. 504 (Supp. IV 1980)) provides for the award of attorneys fees and other expenses to certain parties who prevail over the Federal Government in administrative proceedings conducted under section 554 of the Administrative Procedure Act (5 U.S.C. 554) in which the position of the United States is represented. The Equal Access to Justice Act requires each agency that conducts proceedings covered by the Act to establish uniform procedures for making awards after consultation with the Chairman of the Administrative Conference of the United States.

On March 10, 1981, the Chairman of the Administrative Conference published a draft model rule for Federal agency implementation of the Act and requested public comment on the rule (46 FR 15895). On June 25, 1981, the Chairman issued a model rule for the guidance of Federal agencies in implementing the Act (46 FR 32900). The Office of Hearings and Appeals has followed the model rule as well as guidance provided by the Office of Management and Budget in establishing its procedures for making awards under the Act.

The Department has determined that the requirements for notice and public comment on the rule has been satisfied, because the public had an opportunity to comment on the model rule issued by the Administrative Conference that was used as the basis for this rule. However, consistent with the Department's public participation policy, public comments on the rule are invited. The Department will consider all comments received and make such amendments to the rule as may be appropriate.

Because the Act became effective October 1, 1981, the Department has found that good cause exists for waiving the usual 30-day waiting period before the rule becomes effective. Waiver will allow immediate implementation of the Department's procedures under the Act.

The Department has determined that the rule is not major and does not require a regulatory impact analysis under E.O. 12291, because the rule is not expected to have an annual effect on the economy of $100 million or more or to result in substantial increases in costs or prices for the Department or other parties involved in administrative proceedings conducted by the Office of Hearings and Appeals. The Department has also determined that the rule will

not have a significant economic effect on a substantial number of small entities and does not require a flexibility analysis under the Regulatory Flexibility Act, because the costs incurred by small entities in utilizing the rule's procedures are expected to be low and may result in recoupment of all costs.

Paperwork Reduction Act. The information collection requirement contained in §§ 4.608 through 4.610 below, requiring an application for fees and expenses in an adversary adjudication under the Equal Access to Justice Act, has been submitted to the Office of Management and Budget for approval under the Paperwork Reduction Act, 44 U.S.C. 3507.

The primary authors of this document are Patrick Sheehy, Office of Hearings and Appeals, and Deborah Ryan, Office of the Solicitor.

PART 4—[AMENDED]

Accordingly, in 43 CFR Part 4, Subpart F is added to read as follows:

Subpart F—Implementation of the Equal Access to Justice Act in Agency Proceedings

General Provisions

Sec.

4.601 Purpose of these rules.
4.602 Definitions.
4.603 Proceedings covered.
4.604 Applicability to Department of the Interior proceedings.
4.605 Eligibility of applicants.
4.606 Standards for awards.
4.607 Allowable fees and expenses.

Information Required From Applicants

4.608 Contents of application.
4.609 Net worth exhibit.
4.610 Documentation of fees and expenses.
4.611 Time for submission of application.

Procedures for Considering Applications

4.612 Filing and service of documents.
4.613 Answer to application.
4.614 Settlement.
4.615 Extensions of time and further proceedings.
4.616 Decision on application.
4.617 Appeals Board review.
4.618 Judicial review.
4.619 Payment of award.

Authority: Sec. 203(a)(1), Pub. L. 96–481, 94 Stat. 2325 [5 U.S.C. 504(c)(1)].

Subpart F—Implementation of the Equal Access to Justice Act in Agency Proceedings

General Provisions

§ 4.601 Purpose of these rules.

These rules are adopted by the Department of the Interior pursuant to section 504 of title 5, United States Code, as amended by section 203(a)(1) of the Equal Access to Justice Act, Pub. L. 96–481. Under the Act, an eligible party may receive an award for attorney fees and other expenses when it prevails over the Department in an adversary adjudication under 5 U.S.C. 554 before the Office of Hearings and Appeals, unless the Department's position as a party to the proceeding was substantially justified or special circumstances make an award unjust. The purpose of these rules is to establish procedures for the submission and consideration of applications for awards against the Department.

§ 4.602 Definitions.

As used in this part:

(a) "The Act" means section 504 of title 5, United States Code, as amended by section 203(a)(1) of the Equal Access to Justice Act, Pub. L. 96–481.

(b) "Adversary adjudication" means an adjudication under 5 U.S.C. 554 in which the position of the United States is represented by counsel or otherwise, but excludes an adjudication for the purpose of establishing or fixing a rate or for the purpose of granting or renewing a license.

(c) "Adjudicative officer" means the official who presided at the adversary adjudication.

(d) "Department" refers to the Department of the Interior or the relevant department component which is a party to the adversary adjudication (*e.g.*, Office of Surface Mining Reclamation and Enforcement or Bureau of Land Management).

(e) "Proceeding" means an adversary adjudication as defined in § 4.602(b).

(f) "Party" includes a person or agency named or admitted as a party, or properly seeking and entitled as of right to be admitted as a party, in an agency proceeding, and a person or agency admitted by an agency as a party for limited purposes.

§ 4.603 Proceedings covered.

(a) These rules apply to adversary adjudications required by statute to be conducted by the Secretary under 5 U.S.C. 554. Specifically, these rules apply to adjudications conducted by the Office of Hearings and Appeals under 5 U.S.C. 554 which are required by statute to be determined on the record after opportunity for an agency hearing. These rules do not apply where adjudications on the record are not required by statute even though hearings are conducted using procedures comparable to those set forth in 5 U.S.C. 554.

(b) If a proceeding includes both matters covered by the Act and matters specifically excluded from coverage, any award made will include only fees and expenses related to covered matters.

§ 4.604 Applicability to Department of the Interior proceedings.

The Act applies to any adversary adjudication pending before the Office of Hearings and Appeals of the Department of the Interior at any time between October 1, 1981, and September 30, 1984. This includes proceedings begun before October 1, 1981, if final Departmental action has not been taken before that date, and proceedings pending on September 30, 1984.

§ 4.605 Eligibility of applicants.

(a) To be eligible for an award of attorney fees and other expenses under the Act, the applicant must be a party prevailing over the Department in the adversary adjudication for which it seeks an award. The applicant must show that it meets all pertinent conditions of eligibility set out in these regulations.

(b) The types of eligible applicants are as follows:

(1) An individual with a net worth of not more than $1 million;

(2) The sole owner of an unincorporated business which has a net worth of not more than $5 million, and not more than 500 employees;

(3) A charitable or other tax-exempt organization described in section 501(c)(3) of the Internal Revenue Code (26 U.S.C. 501(c)(3)) with not more than 500 employees;

(4) A cooperative association as defined in section 15(a) of the Agricultural Marketing Act (12 U.S.C. 1141j(a)) with not more than 500 employees; and

(5) Any other partnership, corporation, association, or public or private organization with a net worth of not more than $5 million and not more than 500 employees. A unit of state or local government is not a public organization within the meaning of this provision.

(c) For the purpose of eligibility, the net worth and number of employees of an applicant shall be determined as of the date the adversary adjudication was initiated.

(d) An applicant who owns an unincorporated business will be

considered as an "individual" rather than a "sole owner of an unincorporated business" if the issues on which the applicant prevails are related primarily to personal interests rather than to business interests.

(e) The employees of an applicant include all persons who regularly perform services for remuneration for the applicant, under the applicant's direction and control. Part-time employees shall be included.

(f) The net worth and the number of employees of the applicant and all of its affiliates shall be aggregated to determine eligibility. Any individual or group of individuals, corporation, or other entity that directly or indirectly controls or owns a majority of the voting shares of another business, or controls in any manner the election of a majority of that business' board of directors, trustees, or other persons exercising similar functions shall be considered an affiliate of that business for purposes of this part. In addition, the adjudicative officer may determine that financial relationships of the applicant other than those described in the paragraph constitute special circumstances that would make an award unjust.

(g) An applicant is not eligible if it has participated in the proceeding solely on behalf of other persons or entities that are ineligible.

§ 4.606 Standards for awards.

(a) A prevailing applicant may receive an award for fees and expenses incurred in connection with a proceeding unless (1) the position of the Department as a party to the proceeding was substantially justified, or (2) special circumstances make the award sought unjust. No presumption arises that the Department's position was not substantially justified simply because the Department did not prevail.

(b) An award will be reduced or denied if the applicant has unduly or unreasonably protracted the proceeding.

§ 4.607 Allowable fees and expenses.

(a) The following fees and other expenses are allowable under the Act:

(1) Reasonable expenses of expert witnesses;

(2) Reasonable cost of any study, analysis, engineering report, test, or project which is found necessary for the preparation of the party's case; and

(3) Reasonable attorney or agent fees.

(b) The amount of fees awarded will be based upon the prevailing market rates for the kind and quality of services furnished, except that—

(1) Compensation for an expert witness will not exceed the highest rate at which the Department pays expert witnesses; and

(2) Attorney or agent fees will not exceed $75 per hour.

(c) In determining the reasonableness of the fee sought, the adjudicative officer shall consider the following:

(1) The prevailing rate for similar services in the community in which the attorney, agent, or witness has performed the service;

(2) The time actually spent in the representation of the applicant;

(3) The difficulty or complexity of the issues in the proceeding;

(4) Any necessary and reasonable expenses incurred; and

(5) Such other factors as may bear on the value of the services performed.

Information Required From Applicants

Note.—*Information Collection.* The information collection requirement contained in §§ 4.608 through 4.610, requiring an application for fees and expenses in an adversary adjudication under the Equal Access to Justice Act, has been approved by the Office of Management and Budget under the Paperwork Reduction Act, 44 U.S.C. 3507 and has been assigned clearance numbers 1084–0011. The information is required to seek an award of fees and expenses.

§ 4.608 Contents of application.

(a) An application for an award of fees and expenses under the Act shall identify the applicant and the proceeding for which an award is sought. Two copies of the application shall be filed with the adjudicative officer. The application shall show that the applicant has prevailed and identify the position of the Department in the proceeding that the applicant alleges was not substantially justified.

(b) The application shall include a statement that the applicant's net worth at the time the proceeding was initiated did not exceed $1 million if the applicant is an individual (other than a sole owner of an unincorporated business seeking an award in that capacity) or $5 million in the case of all other applicants. An applicant may omit this statement if:

(1) It attaches a copy of a ruling by the Internal Revenue Service that it qualifies as an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)(3)) and is exempt from taxation under section 501(a) of the Code or in the case of an organization not required to obtain a ruling from the Internal Revenue Service on its exempt status, a statement that describes the basis for the applicant's belief that it qualifies under section 501(c)(3) of the Code; or

(2) It states that it is a cooperative association as defined in section 15(a) of the Agricultural Marketing Act (12 U.S.C. 1141j(a)).

(c) If the applicant is a partnership, corporation, association, or public or private organization (including charitable or other tax exempt organizations or cooperative associations) or a sole owner of an unincorporated business, the application shall state that it did not have more than 500 employees at the time the proceeding was initiated, giving the number of its employees and describing briefly the type and purpose of its organization or business.

(d) The application shall itemize the amount of fees and expenses for which an award is sought.

(e) The application may include any other matters that the applicant believes should be considered in determining whether and in what amount an award should be made.

(f) The application shall be signed by the applicant or an authorized officer of the applicant. The application shall contain or be accompanied by a written verification under oath or affirmation under penalty of perjury that the information provided in the application and all accompanying material is true and complete to the best of the signer's information and belief.

§ 4.609 Net worth exhibit.

(a) Each application except a qualified tax-exempt organization or a qualified cooperative association must submit with its application a detailed exhibit showing its net worth at the time the proceeding was initiated. If any individual, corporation, or other entity directly or indirectly controls or owns a majority of the voting shares or other interest of the applicant, or if the applicant directly or indirectly owns or controls a majority of the voting shares or other interest of any corporation or other entity, the exhibit must include a showing of the net worth of all such affiliates or of the applicant including the affiliates. The exhibit may be in any form convenient to the applicant, provided that it makes full disclosure of the applicant's and all affiliates' assets and liabilities and is sufficient to determine whether the applicant qualifies under the standards of 5 U.S.C. 504(b)(1)(B)(i). The adjudicative officer may require an applicant to file additional information to determine the applicant's eligibility for an award.

(b) The net worth exhibit shall describe any transfers of assets from, or obligations incurred by, the applicant or any affiliate, occurring in the one-year period to the date on which the proceeding was initiated, that reduced

the net worth of the applicant and its affiliates below the applicable net worth ceiling. If there were no such transactions, the exhibit shall so state.

(c) Ordinarily, the net worth exhibit shall be included in the public record of the proceeding. However, an applicant that objects to public disclosure of information in any portion of the exhibit and believes there are legal grounds for withholding it from disclosure may submit that portion of the exhibit directly to the adjudicative officer in a sealed envelope labeled "Confidential Financial Information," accompanied by a motion to withhold the information from public disclosure. The motion shall describe the information sought to be withheld and explain, in detail, why it falls within one or more of the specific exemptions from mandatory disclosure under the Freedom of Information Act, 5 U.S.C. 552, and whether it is covered by the Trade Secrets Act, 18 U.S.C. 1905, or other applicable statutes; why public disclosure of the information would adversely affect the applicant; and why disclosure is not required in the public interest. The material in question shall also be served on counsel representing the agency against which the applicant seeks an award, but need not be served on any other party to the proceeding. If the adjudicative officer finds that the information should not be withheld from disclosure, it shall be placed in the public record of the proceeding. Otherwise, any request to inspect or copy the exhibit shall be disposed of in accordance with the Department's established procedures under the Freedom of Information Act, 43 CFR 2.11 *et. seq.*

§ 4.610 Documentation of fees and expenses.

(a) The application shall be accompanied by full documentation of the fees and expenses, including the cost of any study, analysis, engineering report, test, or project, for which an award is sought.

(b) The documentation shall include an affidavit from each professional firm or individual whose services are covered by the application, stating the actual time expended and the rate at which fees and other expenses were computed and/or charged and describing the specific services performed.

(1) The affidavit shall itemize in detail the services performed by the date, number of hours per date, and the services performed during those hours. In order to establish the hourly rate, the affidavit shall state the hourly rate billed to and paid by the majority of clients during the relevant time periods.

(2) If no hourly rate is paid by the majority of clients because, for instance, the attorney or agent represents most clients on a contingency basis, the attorney or agent shall provide affidavits from two attorneys or agents with similar experience, who perform similar work in the same or similar geographic location, stating the hourly rate which they bill and are paid by the majority of their clients during a comparable time period.

(c) The documentation shall also include a description of any expenses for which reimbursement is sought and a statement of the amounts paid and payable by the applicant or by any other person or entity for the services provided.

(d) The adjudicative officer may require the applicant to provide vouchers, receipts, or other substantiation for any expenses claimed.

§ 4.611 Time for submission of application.

(a) An application must be filed no later than 30 days after final disposition of the proceeding. Action on an application for an award of fees or other expenses filed prior to final disposition of the proceeding shall be stayed pending such final disposition.

(b) Final disposition means the later of (1) the date on which the final Department decision is issued; or (2) the date of the order which finally resolves the proceeding, such as an order approving settlement or voluntary dismissal.

Procedures for Considering Applications

§ 4.612 Filing and service of documents.

Any application for an award and any other pleading or document related to an application shall be filed with the adjudicative officer and serve on all parties to the proceeding in the same manner as other pleadings in the proceeding, except as provided in § 4.609(c) for confidential financial information.

§ 4.613 Answer to application.

(a) Within 30 calendar days after service of an application, the Department shall file an answer. If the Department fails to answer or otherwise fails to contest or settle the application, the adjudicative officer may, upon a satisfactory showing of entitlement by the applicant, make an award for the applicant's fees and other expenses under 5 U.S.C. 504 in accordance with § 4.616.

(b) If the Department and the applicant believe that they can reach a settlement concerning the award, the Department and the applicant may jointly file a statement of their intent to negotiate. The filing of such a statement shall extend the time for filing an answer for an additional 30 days from the date of filing of the statement. Further extensions may be granted by the adjudicative officer upon the joint request of the Department and the applicant.

(c) The answer shall explain in detail any objections to the award requested and identify the facts relied on to support the objection. If the answer is based on any alleged facts not already reflected in the record of the proceeding, the Department shall include with the answer either a supporting affidavit or a request for further proceedings.

§ 4.614 Settlement.

An applicant and the Department may agree on a proposed settlement of an award before final action on the application, either in connection with a settlement of the underlying proceeding, or after the underlying proceeding has been concluded. If the applicant and the Department agree on a proposed settlement of an award before an applicant has been filed, the application shall be filed with the proposed settlement.

§ 4.615 Extensions of time and further proceedings.

(a) The adjudicative officer may on motion and for good cause shown grant extensions of time other than for filing an application for fees and expenses after final disposition in the adversary adjudication.

(b) Ordinarily, the determination of an award will be made on the basis of the written record of the underlying proceeding and the filings required or permitted by the foregoing sections of these rules. However, the adjudicative officer may, *sua sponte*, or on motion of any party to the proceedings require or permit further proceedings, such as informal conferences, oral argument, additional written submissions or an evidentiary hearing. Such further proceedings shall be held only when necessary for full and fair resolution of the issues arising from the application and shall be conducted as promptly as possible. A motion for further proceedings shall specifically identify the information sought on the disputed issues and shall explain why the further proceedings are necessary to resolve the issues.

§ 4.616 Decision on application.

The adjudicative officer shall promptly issue a decision on the

application which shall include proposed written findings and conclusions, and the reasons or basis therefore, on such of the following as are relevant to the decision:

(a) The applicant's status as a prevailing party;

(b) The applicant's qualification as a "party" under 5 U.S.C. 504(b)(1)(B);

(c) Whether the Department's position as a party to the proceeding was substantially justified;

(d) Whether special circumstances make an award unjust;

(e) Whether the applicant during the course of the proceedings engaged in conduct that unduly and unreasonably protracted the final resolution of the matter in controversy; and

(f) The amounts, if any, awarded for fees and other expenses, with reasons for any difference between the amount requested and the amount awarded. If neither the applicant nor the Department appeals within 30 days from receipt of the adjudicative officer's decision, this decision will be the final Departmental decision.

§ 4.617 Appeals Board review.

If review is sought by the applicant or the Department, the decision of the adjudicative officer will be reviewed by the appropriate appeals board in accordance with the Department's procedures for the type of underlying proceeding involved. The appeals board will then issue the final Departmental decision on the application.

§ 4.618 Judicial review.

Judicial review of final Departmental decisions on awards may be sought as provided in 5 U.S.C. 504(c)(2).

§ 4.619 Payment of award.

An applicant seeking payment of an award shall submit a copy of the final decision granting the award to the Assistant Secretary for Policy, Budget and Administration, U.S. Department of the Interior, Washington, D.C. 20240. A statement that review of the underlying decision is not being sought in the United States courts, or that the process for seeking review of the award has been completed, must also be included.

Dated: August 20, 1982.

Donald Paul Hodel,

Under Secretary.

BILLING CODE 4310-10-M

Proposed Rules

Federal Register
Vol. 48, No. 80
Monday, April 25, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Foreign Agricultural Service

7 CFR Ch. XV

Licenses for Importation of Sugar To Be Re-Exported in Sugar Containing Products

AGENCY: Foreign Agricultural Service, USDA.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Foreign Agricultural Service is considering developing a proposed rule that would establish procedures and conditions for the issuance of licenses to permit the importation of sugar exempt from the quotas on sugar, sirups, and molasses as modified by Presidential Proclamation 4941 of May 5, 1982, as amended. Sugar imported under such a license would have to be re-exported in sugar containing products. The purpose of this notice is to elicit comments and suggestions regarding the formulation of such a proposed rule.

DATE: Comments must be received on or before June 24, 1983.

ADDRESS: Mail comments to Chief, Sugar Group, Horticultural and Tropical Products Division, Foreign Agricultural Service, USDA, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: James A. Truran, Chief, Sugar Group, Foreign Agricultural Service, 12th & Independence Avenue, SW., South Building, Washington, D.C. 20250, Tel: (202) 447-2916.

SUPPLEMENTARY INFORMATION: Presidential Proclamation 4941 of May 5, 1982 modified the import quota for sugar, sirups and molasses described in items 155.20 and 155.30 of the Tariff Schedules of the United States (TSUS) under a provision in the Geneva (1967) Protocol of the General Agreement on Tariffs and Trade (Note 1 of Unit A, Chapter 10, Part 1 of Schedule XX; 19 U.S.T. 5133). Presidential Proclamation 5002 of November 30, 1982, amended Proclamation 4941 to read in part as follows:

> The Secretary may exempt the entry of articles described in items 155.20 and 155.30 from the requirements or limitations established pursuant to this headnote on the condition that such articles: (1) be used only for the production (other than by distillation) of polyhydric alcohols, except polyhdric alcohols for use as a substitute for sugar in human food consumption; or (2) be re-reported in refined form or in sugar containing products. Such articles shall be entered under licenses issued pursuant to regulations promulgated by the Secretary * * *.

Under the proposed rule, licenses would be granted for sugar to be re-exported in sugar containing products. The certificate of eligibility requirements contained in 15 CFR 2011 would not apply to this sugar. Separate rules would apply to sugar re-exported in refined form and sugar to be used in the production of certain polyhydric alcohols.

Formulation of the proposed rule for the issuance of licenses for the importation of non-quota sugar to be re-exported in sugar containing products will require extensive input by the full range of potential beneficiaries of this regulation. These beneficiaries are likely to include users of sugar in prepared foods (e.g., gelatins, flavored drink mixes, cakes, candy and other confections) canners and packers of fruits and berries, and bottlers of soft drinks, among others. Concomitant with USDA program goals, establishment of procedures and conditions for the issuance of licenses should take into account, as much as possible, the divergent needs of the above mentioned sugar consumers and potential re-exporters.

The heterogeneous nature of this group presents several policy problems for the regulatory authority in formulating regulations covering this matter. Among the most pertinent issues are the following: (1) Who should be issued a license; (2) how long shall a license be effective; (3) can an agent be used by an end-users; (4) what quantity shall be assigned to each license; (5) how should processing losses be accounted for in the disposition of license quantities; (6) as bonding is envisioned (in order to guarantee that sugar imported under license is used only for the purpose intended), how shall the monetary obligation of the bond be handled; and (7) what documentation will be required to constitute proof of re-export. Another important issue is the sequence of the importation of the quota-exempt sugar and the exportation of the sugar containing product. Should the proposed rule allow importation of quota-exempt sugar in order to replace sugar already exported in sugar containing products? If so, should replacement licensing be the only type of licensing (that is, should licenses under the proposed rule only allow quota-exempt sugar to be imported to replace sugar already exported in sugar containing products, or should the licenses also provide for the importation of quota-exempt sugar prior to the eventual export of the sugar in sugar containing products).

The public is invited to submit written comments and suggestions regarding the development of the proposed rule to the above address.

It would be helpful if the comments addressed as many of these issues as possible and raised any additional pertinent issues. Each person submitting suggestions regarding the proposed rule is requested to include his/her name and address and should give reasons for the suggestions. Copies of all written communications will be available for examination by interested persons in Room 6091 South Building, U.S. Department of Agriculture, during regular business hours.

Signed at Washington, D.C. on April 19, 1983.

Richard A. Smith,

Administrator, Foreign Agricultural Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 83-NM-17-AD]

Airworthiness Directives; Aerospatiale (Sud Nord) Nord 262A and 262A-12 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes an Airworthiness Directive (AD) that would require visual inspections, treatment against corrosion, and replacement of rudder hinge support tubes, if necessary, on Aerospatiale (Sud Nord) Nord 262A and 262A–12 series airplanes. There have been reports of internal corrosion in rudder hinge support tubes on the Nord 262 fleet which, if allowed to progress, could result in loss of rudder control.

DATE: Comments must be received no latter than June 13, 1983.

ADDRESSES: The applicable service information may be obtained from Aerospatiale, Service Commercial N262, Boite Postale 159, 36003 Chateauroux, France, or may also be examined at the address shown below.

FOR FURTHER INFORMATION CONTACT: Mr. Sulmo Mariano, Foreign Aircraft Certification Branch, ANM–150S, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 767–2530. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket and be submitted in duplicate to the address specified below. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 83–NM–17–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

Discussion

Internal corrosion and corrosion penetration to the outer surface has been found in rudder hinge support tubes on Nord 262A and 262A–12 series aircraft during routine maintenance.

The Direction General de l'Aviation Civile (DGAC) has declared Aerospatiale N262 Fregate Service Bulletin No. 55–10 as mandatory. This service bulletin prescribes inspection procedures, protective treatment and replacement of components, as necessary, on the rudder hinge support structure.

Since these conditions are likely to exist or develop on airplanes of this model registered in the United States, an AD is proposed that would require visual inspection of the upper and lower rudder hinge support tubes, support tube replacement or corrosion protection treatment, and repetitive inspections as appropriate to prevent failure of the rudder hinge support tubes.

It is estimated that 16 U.S. registered airplanes will be affected by this AD, that it will take approximately 13 manhours per airplane to accomplish the required actions, and that the average labor cost will be $35 per manhour. Repair parts are estimated at $250 per airplane. Based on these figures, the total cost impact of this AD to U.S. users is estimated to be $11,280. For these reasons, the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. Few small entities within the meaning of the Regulatory Flexibility Act would be affected.

Aviation safety, Aircraft

The Proposed Amendment

PART 39—[AMENDED]

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new Airworthiness Directive:

Aerospatiale (Sud Nord): Applies to Nord 262A and 262A–12 series airplanes, certificated in all categories. Compliance required within 100 hours time in service or 3 months, whichever occurs first after the effective date of this AD. To prevent failure of the rudder hinge support tubes and subsequent loss of rudder control, accomplish the following unless previously accomplished:

1. Inspect, protect against corrosion, or replace components, if necessary, in accordance with paragraph II, Accomplishment Instructions, of Aerospatiale N262 Fregate Service Bulletin No. 55–10, Revision 1, dated December 29, 1981.

2. Repeat the inspection required by paragraph 1., above, at intervals not to exceed five years.

3. Alternate means of compliance which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

4. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85)

Note.—For the reasons discussed earlier in the preamble, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities since it involves few small entities. A regulatory evaluation has been prepared and has been placed in the public docket.

Issued in Seattle, Washington on April 14, 1983.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

[Airspace Docket No. 83–AWA–11]

Proposed Alteration of VOR Federal Airways

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the descriptions of several VOR Federal airways in the vicinity of Denver, CO, by deleting alternate airway segments and renumbering other airway segments. This action supports our agreement with the International Civil Aviation Organization (ICAO) to eliminate all alternate airway descriptions from the National Airspace System.

DATE: Comments must be received on or before June 9, 1983.

ADDRESS: Send comments on the proposal in triplicate to: Director, FAA, Northwest Mountain Region, Attention: Manager, Air Traffic Division, Docket No. 83–AWA–11, Federal Aviation

Administration, FAA Building, Boeing Field, Seattle, WA 98108.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Regulations and Obstructions Branch (AAT-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 83-AWA-11." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

Proposal

The FAA is considering an amendment to § 71.123 of Part 71 the Federal Aviation Regulations (14 CFR Part 71) to alter the descriptions of several VOR Federal airways in the vicinity of Denver, CO, by deleting the alternate route segments. In addition, those alternate routes required for air traffic control will be renumbered. This action supports our agreement with ICAO to eliminate all alternate route designations from the National Airspace System. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

VOR Federal airways.

Proposed amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

V-8 [Amended]

By deleting the words "Akron, CO; Hayes Center, NE, including a north alternate via INT Akron 063° and Hayes Center 276° radials and also a south alternate via INT Akron 094° and Hayes Center 246° radials; Grand Island, NE, including a N alternate via INT Hayes Center 059° and Grand Island 273° radials, and also a S alternate; Omaha, NE;" and substituting the words "Akron, CO; Hayes Center, NE; Grand Island, NE; Omaha, NE;"

V-28 [Amended]

By deleting the words "Phillip, SD; 56 miles, 35 MSL, Pierre, SD, including a north alternate; Huron, SD;" and substituting the words "Philip, SD; Pierre, SD; Huron, SD;"

V-200 [Amended]

By deleting the words "Meeker, CO; 37 miles, 26 miles, 140 MSL, 130 MSL to Kremmling, CO, including a N alternate via Hayden, CO." and substituting the words "Meeker, CO; to Kremmling, CO."

V-220 [Amended]

By deleting the words "From Kremmling, CO," and substituting the words "From Meeker, CO; Hayden, CO; Kremmling, CO;"

V-211 [Amended]

By deleting the words "to Cortez, including a W alternate via INT Durango 249° and Cortez 150° radials." and substituting the words "to Cortez."

V-421 [Amended]

By deleting the words "Farmington, NM, including a west alternate via INT Gallup 008° and Farmington 233° radials; Durango, CO;" and substituting the words "Farmington, NM; Durango, CO;"

V-484 [Amended]

By deleting the words "Gunnison, CO, including a south alternate from Grand Junction to Gunnison, via Montrose, CO; 13 miles, 112 MSL, 131 MSL" and substituting the words "Gunnison, CO;"

(Secs. 307(a), 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulation for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C. on April 15, 1983.

B. Keith Potts,

Manager, Airspace-Rules and Aeronautical Information Division.

Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 83–AEA–1." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of the Notice of Proposed Rulemaking (NPRM) by submitting a request to the Office of Regional Counsel, AEA–7, Federal Aviation Administration, Fitzgerald Building (Formerly Federal Building), John F. Kennedy International Airport, Jamaica, New York 11430. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2 which described the application procedure.

Proposal

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) so as to extend the 700 foot transition area generally out to the west of the airport beyond the 6.5 mile radius of the airport and four miles either side of the 080° radial of the St. Thomas Vortac, to the vortac. Section 71.181 of Part 71 of the Federal Aviation Regulation was republished in Advisory Circular AC70–3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

Transition areas.

Proposed Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. Amend § 71.181 of Part 71, Federal Aviation regulations, by altering the description of the Chambersburg, Pennsylvania, 700-Foot Floor Transition Area as follows:

Chambersburg, Pa. amended.

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the center, 39°58'23" N., 77°38'37" W. of Chambersburg Municipal Airport, Chambersburg, Pa.; within an 8-mile radius of the center of the airport, extending clockwise from a 039° bearing from the airport to a 061° bearing from the airport; within a 15-mile radius of the center of the airport, extending clockwise from a 061° bearing from the airport to a 135° bearing from the airport; within an 8-mile radius of the center of the airport, extending clockwise from a 135° bearing from the airport to a 174° bearing from the airport; within a 7-mile radius of the center of the airport, extending clockwise from a 174° bearing from the airport to a 241° bearing from the airport; within 4 miles each side of the St. Thomas VORTAC 080° radial, extending from the 6.5-mile radius area to 29 miles east of the VORTAC; the St. Thomas 233° radial within four miles each side of the Runway 6 centerline from the Chambersburg Municipal Airport, and extending southwest for eight miles.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Jamaica, New York on March 31, 1983.

Norbert A. Owens,

Acting Director, Easter Region.

BILLING CODE 4910–13–M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 240

[Rel. No. 34–19678; File No. S7–969]

Processing of Tender Offers Within the National Clearance and Settlement System

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rulemaking.

SUMMARY: Because of certain securities processing inefficiencies that have been occurring in connection with tender offers when depositaries do not make allowance for book-entry delivery of tendered securities, the Commission is today publishing this release, which discusses, among other things, the causes of those inefficiencies and their effects on the national clearance and settlement system and in the secondary trading markets. This release also proposes for comment Rule 17Ad–14 under the Securities Exchanges Act of 1937 (the "Act") which would require registered transfer agents acting on

behalf of bidders as tender agents to establish and maintain at all qualified registered securities depositories holding the subject company's securities specially designated accounts for purposes of receiving by book-entry from depository participants the delivery of tendered securities that are depository eligible.

DATE: Comments must be received on or before May 27, 1983.

ADDRESSES: Comment letters should refer to File No. S7–969 and should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 450 Fifth Street, Washington, D.C. 20549. All comments will be available for public inspection and copying at the Commission's Public Reference Room.

FOR FURTHER INFORMATION CONTACT: Dan W. Schneider, Esq., at (202) 272–2401, or Thomas V. Sjoblom, Esq., at (202) 272–7379, Division of Market Regulation, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: Tender offer activity by bidders [1] has increased dramatically over the last few years. The Commission believes, however, that insufficient attention has been paid to the functioning of the national clearance and settlement system in the context of tender offers, even though the magnitude of some recent large tender offers has discernibly affected the clearance and settlement of securities transactions associated with those offers. Accordingly, the release discusses certain facilities available to financial institutions that participate in registered securities depositories, the securities processing problems that have occurred in connection with some recent large tender offers, the need for uniform resolution of those problems, and the existence of automated programs for processing tender offers. In addition, the release discusses a proposal made by The Depository Trust Company, Inc. ("DTC") that would not only mandate the use of automated, book-entry services provided by depositories but also facilitate the uniform use of automated trade clearance systems during tender offers. While the Commission is confident that bidders and securities processors will continue voluntarily to make changes in their securities processing programs to accommodate tender offers, the Commission regards these problems as so important that it is responding to DTC's recommendations by proposing a tender agent rule, Rule 17Ad–14, which would require the bidder's agent to establish specially designated accounts with qualified registered securities depositories for purposes of receiving by book-entry the delivery of tendered securities from depository participants.

[1] The term "bidder" is defined in Rule 14d–1(b)(1) of the Act [17 CFR 240.14d–1(b)(1)] to mean, in pertinent part, "any person who makes a tender offer or on whose behalf a tender offer is made. . . ." For purposes of this release, however, the term bidder also encompasses issuers making tender offers for their own shares.

I. The National Clearance and Settlement System

Since the "paperwork crisis" in the late 1960's [2] entities involved in post-execution, "back-office" securities processing services— namely, broker-dealers, banks, clearing corporations, securities depositories and transfer agents (collectively, the "securities processing industry")—have corporated in developing and using efficient date processing and communication techniques to complete their securities transactions. Although brokerage firms had used centralized clearing facilities to process securities transactions for decades, those processing systems, for the most part, operated on a manual basis. [3] During the 1970's, however, the securities processing industry began rapidly building an automated, reliable and financially responsible national system for trade comparison, clearance, settlement and transfer. [4]

[2] The paperwork crisis of the late 1960's nearly brought the securities industry to a standstill and directly or indirectly resulted in the failure of a large number of broker-dealers. This crisis resulted from the sharply increased volume and historic inattention to securities processing (*e.g.*, inefficient, duplicative and extensively manual clearance and settlement systems, poor records, insufficient controls over funds and securities, and the use of untrained personnel to perform processing functions). In the aftermath of the paperwork crisis, the securities industry, the Commission and the Congress turned their attention to securities processing. Among other things, the Commission actively urged policies designed to foster greater access to clearing corporations and securities depositories by all qualified broker-dealers and other financial intermediaries, and the Congress amended the Act to authorize development of a national system for the prompt and accurate clearance and settlement of securities transactions. *See* Section 17A(a) of the Act.

[3] *Id. See.* S. Huebner, *The Stock Market*, at 236–65 (1938).

[4] During the 1970's the entities comprising the securities processing industry developed and implemented significant improvements in their securities processing operations. The improvements included the automation of labor-intensive functions (*e.g.*, broker-dealer and transfer agents converted their recordkeeping and processing functions from primarily manual to automated systems), the establishment of new and more efficient clearance and settlement systems (*e.g.*, continuous net settlement ("CNS") systems, *see note 29 infra*, and institutional trade settlement systems), rapid growth in the use of securities depositories, and an intensification of efforts to complete interfaces among previously unrelated clearance and settlement systems.

Integral to the developing national system were securities depositories. [5] The growth and success of securities depositories occurred as a direct result of the financial industry's desires to minimize the physical movement of stock certificates and related paper, facilitate book-entry settlement of securities transactions, enable the use of centralized dividend accounting, and provide for increased communication efficiencies among depository participants and transfer agents located throughout the country. Centralized vault facilities at registered securities depositories, for instance, greatly facilitate the immobilization [6] of corporate securities certificates. [7]

[5] A securities depository is a "custodial" clearing agency that operates a centralized system for the handling of securities certificates. *See* § 3(a)(23) of the Act. As clearing agencies, securities depositories must be registered with the Commission pursuant to §§ 17A(b) and 19 of the Act. Currently, there are five registered securities depositories: DTC, the Philadelphia Depository Trust Company ("Philadep"), the Pacific Securities Depository Trust Company, the Midwest Securities Trust Company ("MSTC") and the New England Securities Depository Trust Company.

A registered securities depository accepts deposits of securities from broker-dealers, banks and other financial institutions (collectively referred to as "participants"); credits those securities to the general free accounts of the depositing participants; and, pursuant to instructions of the participants, effects book-entry deliveries of securities (including pledges) among participants (and participating pledgee banks). *See, e.g.*, DTC, *Participant Operating Procedures*, §§ B and C. The physical securities deposited with a securities depository are held in a fungible bulk, no significant portion of which is identified or identifiable to a particular participant or pledgee; each participant or pledgee having securities of a given issue credited to its account has a pro-rata interest in the physical securities of the issue held in custody by the securities depository in its nominee name. *See generally* §8–320 of the Uniform Commercial Code. Depositories also may provide facilities for payment by participants to other participants in connection with book-entry deliveries of securities. Securities credited to a participant's or a pledgee's account may be withdrawn by the participant or pledge in physical form for delivery to persons who do not maintain accounts with the depository. Certificates may be withdrawn (i) after re-registration in a name designated by the withdrawing party ("withdrawals by transfer") or (ii) in the name of a depository's nominee ("nominee name certificates"), in which case the nominee appoints the withdrawing party as attorney to effect transfer of the certificate ("COD withdrawals"). *See e.g.*, DTC, *Participant Operating Procedures*, §§ D and E.

[6] The desire to immobilize securities certificates became a matter of affirmative federal regulatory policy in 1975 when Section 17A(e) was added to the Act. That Section provides, in pertinent part, that "the Commission shall use its authority under this title to end the physical movement of securities certificates inconnection with the settlement among brokers and dealers of transactions in securities. . . ."

[7] Eligibility of a security issue for depository services generally depends on whether that security is traded in an active market and is easily transferable. *See, e.g.*, DTC Rule 5; MSTC Rule 2, section 2; and Philadep Rule 5.

Industry confidence in securities depositories as custodians, moreover, has reduced certificate withdrawals, generally, to special circumstances such as customer requests, that place heavy demand on a broker-dealer's limited working supply of certificates. In addition, through reciprocal accounts and telephonic and electronic interfaces, the nation's registered securities depositories have become linked on an automated basis. Furthermore, through these automated depository links, registered clearing corporations—which compare, account for, and initiate settlement of, securities transactions—have experienced increased efficiency in processing trades of their clearing members.

The securities processing industry, therefore, has made great progress since the paperwork crisis in exploiting "state of the art" data processing and communication techniques and in linking together the several components of the national clearance and settlement system.[8] Today, as a result, brokers and other participating institutions can compare, clear and settle securities transactions through a nationwide network of automated facilities, irrespective of the market in which a particular trade has been executed.

II. Current Problems Associated With the Processing of Tender Offers

Despite the extensive growth of automated processing systems, however, many of the paperwork problems that led in 1975 to enactment of Section 17A(a) still exist with respect to tender offer processing that occurs without the benefit of securities depositories.[9] Indeed, the processing of tendered securities and regular-way trades [10] in the subject company's securities during tender offers has not effectively been integrated into the national clearance and settlement system, even though that system should be able to accommodate in a safe, efficient and automated manner all related aspects of securities processing activities during tender offers.[11] Particularly when the services of securities depositories cannot be used during a tender offer (*e. g.*, when the subject company's securities become ineligible for those services), [12] the consequent manual handling of certificates for pysical trade settlement and tender activity increases inefficiency and poses financial risk for all entities involved in securities processing.

Moreover, increased cost and confusion for securities firms and ultimately, for investors (*e.g.*, in the form of increased interest or other charges and delays) inevitably result when securities firms must deal separately with several clearing systems and procedures to settle trades involving securities that are the subject of a tender offer. These problems, apparent during recent large tender offers and discussed in detail below, occur when securities tendered for acceptance and when secondary trades in those securities are processed without the benefit of depository services.

A. *Processing of Tendered Securities in a Non-Depository Physical Certificate Environment.* As suggested above, a central processing benefit of securities depositories lies in eliminating the physical circulation of securities certificates. In a tender offer, however, deliveries for purposes of tender must be made to the bidder's *depositary*.[13] If that depositary agent does not participate, for purposes of the offer, in a securities depository holding the subject company's securities as custodian, delivery to the depositary agent must be accomplished by broker-dealers, banks and other institutions through the physical tender of securities certificates outside the securities depository, rather than through book-entry delivery, even though they may be depository participants.[14] The time contraints, however, surrounding physical delivery during a sizeable tender offer can be severe.[15] For that reason, and because of the inventory management problems that can be encountered when a securities depository attempts to operate in a manual, rather than an automated, mode,[16] some securities depositories

---

[8] *See* Section 17A(a) (1) (C), (D) of the Act.

[9] The Senate Subcommittee's February 1972 Report accompanying the Securities Industry Study identified two primary causes of the paperwork crisis:

First, the industry had failed to develop a nationwide system for the clearance and settlement of securities transactions. Second, there existed a lack of uniformity and coordination among the various methods and systems of clear[ance] and settlement. The Subcommittee found an alarming lack of supervision, coordination, and central decision making which was delaying implementation of many of the technological innovations available to help solve processing problems.

S. Rep. No. 94–75, 94th Cong., 1st Sess., reprinted in [1975] U.S. Code Cong. & Ad. News, at 232. *See generally* note 2 *supra*.

[10] The term "regular-way" trades, as used in this release, refers to exchange executed transactions that are scheduled to settle on the fifth day following the execution date (*i.e.*, "trade date + 5," or "T + 5").

[11] While some securities depositories have adopted special programs and procedures to accommodate tender offer activity, only one securities depository has available an automated, book-entry program for the processing of tendered securities. *See* note 44 *infra* and accompanying text, and discussion *infra* at 26–36.

[12] *See* note 16 *infra* and accompanying text.

[13] A depositary—to be distinguished from a registered securities depository, which is a clearing agency (*see* note 5 *supra*)—is a key entity involved in the processing of most, if not all, tender offers. While the bidder customarily answers all questions regarding the validity, form, eligibility, and acceptance of tenders, the depositary, commonly a bank, is appointed by the bidder to receive and hold on behalf of the bidder all securities submitted by tendering securityholders.

As agent for tendering securityholders pursuant to the letters of transmittal (*see* note 19 *infra*), the depositary receives tenders (*i.e.*, letters of transmittal, guarantees of delivery, stock powers and certificates). In that capacity, the depositary usually is constituted with full powers of substitution to (1) deliver the certificates for tendered shares, with accompanying evidence of transfer and authority, to, or upon the order of, the bidder upon receipt from the bidder of the consideration offered; (2) present those certificates for transfer on the books and records of the subject company; and (3) receive all benefits and otherwise exercise all rights of beneficial ownership for tendered securities registered in "street" or nominee" name. *See* note 22 *infra*. In addition, as agent for the tendering securityholders, the depositary receives payment from the bidder and distributes that payment to tendering securityholders for securities accepted by the bidder.

[14] Simply stated, if the depositary agent does not establish and maintain an account at the securities depository, there can be no book-entry delivery from depository participants to the bidder's depositary agent.

[15] Of course, there may be little time after an offer is announced for a bidder and its depositary to set up with a securities depository receipt and delivery arrangements for the subject company's securities. Thus, the need for such arrangements should be taken into account at an early stage by the bidder and persons acting on behalf of the bidder when designing the tender offer.

[16] Heavy certificate withdrawal demands for physical delivery can present enormous inventory management problems to any sizeable securities depository. As a general matter, securities depositories maintain in their vaults primarily large denomination certificates representing aggregated participants' positions in that issue of securities ("jumbo certificates"). The number of certificates in smaller denominations is often just sufficient to meet participants' routine withdrawal needs. In a tender offer in which depository facilities cannot be used for the offer, the precise timing and extent of demand for physical certificates can be unpredictable. Because "jumbo certificates" may need to be presented by the securities depository to the transfer agent for breakdown into several certificates of smaller denominations, a securities depository, at critical points during such tender offers, can have difficulty delivering to participants on an expedited basis certificates in the precise denominations needed. Moreover, even when a bidder provides in an offer for a protection period (*see* note 27 *infra*), a large securities depository may be unable to assure its participants that appropriately denominated certificates will be available from the depository or the transfer agent for timely delivery by participants directly to the bidder's depositary agent. Further, it may not always be possible for every securityholder to obtain a "guarantee of delivery" (*see* note 21 *infra*) from an eligible institution acceptable to the bidder or its depositary. For example, the terms of tender offers commonly require that the guarantor must be a member of the NASD or national securities

step out of the processing stream during large tender offers handled by non-participating depositary agents by declaring deposited stock of the subject company ineligible for continued depository services and returning those deposits to participants.[17]

When the services of a securities depository are not available, securityholders desiring to tender their securities to the bidder face special problems not otherwise confronted in today's automated processing environment. As a consequence, tendering securityholders and the bidder may be adversely affected.[18] For example, tendering securityholders must, pursuant to letters of transmittal,[19] deposit physical certificates with the bidder's depositary either directly or through financial institutions,[20] or they must guarantee later delivery.[21] Before certificates can be delivered to the bidder's depositary, however, securities registered in the name of a person other than the beneficial owner (*e.g.*, stock registered to a broker-dealer in street or nominee name)[22] may first need to be presented by the custodian of those securities to the transfer agent for denominational breakdown of share quantities represented by the certificate[23] and for re-registration.[24] A securityholder who decides at the last minute to tender—or even a securityholder who decides to tender by guarantee of subsequent delivery—may be unable to accomplish timely delivery of physical certificates to the bidder. In that event, tendering securityholders may miss the offer entirely[25] or at least miss it at that premium;[26] or they may remain obligated to the bidder under guarantees of delivery. In addition, bidders may not receive before the expiration date has elapsed, or prior to the end of the protect period when one is provided,[27] the desired precentage of the subject company's securities.

A certificate-based, non-depository, physical tender, settlement and transfer system, therefore, ineffectively serves most, if not all, of the parties involved.

---

exchange, a commercial bank or a trust company, which may not be ready accessible to a tendering securityholder.

[17] For example, DTC, the largest of the four active securities depositories, declared the securities of Conoco, Inc. ("Conoco") ineligible for DTC's services during the summer 1981 competing tender offers by E. I. DuPont de Nemours ("DuPont"), Joseph E. Seagram & Sons, Inc. ("Seagram") and Mobil Corporation ("Mobil") for control of Conoco. DTC customarily "exits" the stock of the subject company during large tender offers in which the bidder's depositary agent does not establish an account at DTC for purposes of book-entry delivery of that stock, particularly when those offers are for a significant percentage of that stock on deposit at DTC and when the target company's transfer agent is located outside of New York. Not all securities depositories follow such procedures, however. Midwest Securities Trust Company ("MSTC"), for example, did not declare Conoco stock ineligible for its depository services. The different decisions made by securities depositories regarding the continued eligibility of the subject company's stock appear to be attributable to such factors as the relative volume of activity in that stock, number of participants, size of deposits, share denominations of registered certificates currently being held, percentage of shares on deposit in relation to the percentage of shares sought in the offer, relative inventory management problems, and differing fiduciary philosophies.

[18] Financial intermediaries, who are depository participants, also may lose the opportunity to use depository services for the collateral use of untendered shares (*e.g.*, as collateral for loans, delivery for short sales, or for delivery on customer's fails to deliver, *see note* 31 *infra*)

[19] A letter of transmittal is the document by which a securityhoder of the subject company accepts the bidder's invitation to tender or offer to purchase; offers to sell the subject company's shares to the bidder; appoints the depositary as the agent to receive and hold tendered securities; and actually deposits with, or guarantees to deliver to, the depositary the subject company's securities being tendered. For the most part, securityholders who possess certificates registered to their name and who desire to tender into the offer need only submit those certificates properly endorsed with a letter of transmittal to the bidder's depositary. The latter of transmittal is the basic instrument for effecting transfer of the tendered securities. After expiration of the offer or applicable withdrawal periods (*see* Section 14(d)(5) of the Act and Rule 14d–7 thereunder [17 CFR 240.14d–7]), the bidder can present those certificates to the subject company's transfer agent for cancellation and for issuance of certificates registered in the name of the bidder. If certificates are not immediately available for tender and delivery to the depositary or forwarding agent (*e.g.*, securities are being held in a custodial account, or securities are registered in street or nominee name, *see* note 22 *infra*), bidders commonly permit tenders to be made by or through eligible institutions (*i.e.*, commercial banks, trust companies, members of a national securities exchange, or members of the NASD) without the concurrent deposit of certificates. In that case, the guarantee of delivery (*see* note 21 *infra*) contained in the letter of transmittal must be executed by an eligible institution. *See* note 18 *supra*. *See, e.g., Indiana Nat'l Bank* v. *Mobil Oil Corp.*, 578 F.2d 180, 182 (7th Cir. 1978).

[20] In the context of a tender offer, a securityholder simply may want a broker-dealer, bank or trust company to effect the transaction for him. In these situations, the tender may be made by one of those institutions, if eligible, by submitting a letter of transmittal and by representing that the tender is being made on behalf of a person deemed to own the shares within the meaning of Rule 10b–4 under the Act [17 CFR 240.10b–4]. Rule 10b–4 under the Act makes it a "manipulative or deceptive device or contrivance" within the meaning of Section 10(b) of the Act for any person to tender a security unless he owns it or owns a security convertible into, exchangeable or exercisable for, the tendered security. *See* Rule 10b–4(a) [17 CFR 240.10b–4(a)] An owner of a security is defined as one who has title to the security, has purchased the security, or has converted, exchanged or exercised another security (*e.g.*, option) that entitles him to obtain the security. A person is deemed to own a security, however, only to the extent that he has a "net long position" in the security. *See* Rule 10b–4(b) [17 CFR 240.10b–4(b)].

[21] The offer to purchase (in the case of a cash tender offer) or prospectus (in the case of a registered exchange offer) ordinarily specifies how securities may be tendered when certificates are not immediately available for delivery. A method commonly employed is the use of a "guarantee of delivery," whereby a tendering securityholder or eligible institution promises that the certificates for those securities will be delivered to the bidder s depositary within a specified number of days (usually eight days) after the date of the letter of transmittal.

[22] Securityholders frequently may not personally possess the certificates needed for delivery and deposit in response to a bidder's offer because other financial institutions may have custody of those certificates, in which case they usually are registered in "street name" or "nominee name." "Nominee name" registration refers to arrangements used by institutional investors (*e.g.*, insurance companies and investment companies) and financial intermediaries (*e.g.*, broker-dealers, banks and trust companies) for registration of securities held by them for their own account or for the account of their customers who are the beneficial owners of the securities. "Street name" registration refers to the practice of a broker-dealer registering in its name, or in the name of a nominee, securities left with the broker by its customers or held by a broker for its own account. It is a specialized type of nominee name registration. *See, Final Report of the Securities and Exchange Commission on the Practice of Recording the Ownership of Securities in the Records of the Issuer in Other than the Name of the Beneficial Owner of Such Securities*, at 1 (December 3, 1976).

[23] When securities are being held by a financial institution (*e.g.*, a broker-dealer or custodian bank) for beneficial owners, that institution usually possesses only a few certificates of small denomination for anticipated physical delivery; the remaining securities either are held in, and represented by, large denomination share certificates or are on deposit at a securities depository. In order to provide a given beneficial owner with a certificat representing the appropriate number of shares needed for tender, the financial institution may need to send a certificate to the transfer agent for breakdown into smaller denominations.

[24] Of course, if the person to whom the securities are registered in street name has a certificate representing the precise number of shares needed by the beneficial owner for purposes of tender, that person can simply endorse the certificate or provide a stock power to the beneficial owner.

[25] *See, e.g., Indiana Nat'l Bank* v. *Mobil Oil Corp.*, *supra* note 19, 578 F.2d at 184 (failure to deliver certificates pursuant to letter of transmittal when required by offer as condition precedent to payment did not constitute proper tender). Pursuant to Rule 14e–1(d), of course, the bidder tender). Pursuant to Rule 14e–1(d), of course, the bidder may extend the expiration date of the offer on proper notification. *See* 17 CFR § 240.14e–1(d). In addition, the bidder may extend the delivery date after the offer expires. For example, Seagram several times extended the delivery date for Conoco stock. *See* "Seagram Extends Stock Deadline," Washington Post, August 21, 1981, at D–8.

[26] *See also* Section 14(d)(7) of the Act and Rule 14e–1(b) thereunder [17 CFR 240.14e–1(b)], which prescribe the conditions under which the bidder may increase the consideration offered.

[27] A "protect period" or "protection period" refers to that period of time *after* expiration of an offer during which securities of the subject company may be delivered to the bidder's depositary in accordance with the letters of transmittal, guarantees of delivery or other documentation (*e.g.*, telegrams, facsimile transmissions or letters from eligible institutions) submitted prior to expiration. During large tender offers, bidders commonly provide for a protection period of approximately eight days.

Participants and the bidder's agent are burdened with labor-intensive operations to control a large volume of certificate movement in the subject company's securities, and several parties, including securityholders who desire to tender their shares, may suffer monetary losses.

B. *Problems Associated with Trade Settlement in the Subject Company's Securities.* During a tender offer there often is unusually heavy trading activity in the securities of the subject company. When depository services for those securities are unavailable, however, trade clearance and settlement can become inefficient and costly. For example, trades in those securities cannot be settled through institutional delivery ("ID") systems [28] or continuous net settlement ("CNS") systems [29] because those systems depend on book-entry access to participants' depository accounts.[30]

The inability of brokers, banks and other institutions to use ID systems for settlement of institutional trades during tender offers increases securities processing costs and may increase institutional trade commission fees. To settle delivery obligations in secondary market trades under these circumstances, institutions that act as their own custodians, as well as brokers and agent banks, necessarily incur greater personnel and other costs in delivering physical certificates and funds. In addition, because delays can occur in dispatching and delivering physical certificates to complete secondary market trades, brokers' physical "fails-to-deliver" and "fails-to-receive"[31] are likely to increase, which inevitably requires brokers to incur extraordinary financing costs. These additional financing costs, therefore, coupled with increased expenses associated with processing institutional secondary market trades outside the depository,[32] can influence brokers to increase their commission fees to institutions.

Similarly, when depository and CNS systems are unavailable, trades in the subject company's securities are likely to be settled pursuant to clearing corporation balance orders.[33] Balance orders instruct participants to settle trades among themselves on a net daily basis, in the absence of depository book-entry services, through the physical exchange of securities for cash. Even though balance orders reflect netted daily settlement instructions and thereby reduce the number of settlements necessary for that day, as contrasted to a CNS system, balance orders increase the physical movement of certificates; and, by requiring brokers to devote additional resources to manual certificate settlement, balance orders can reduce the efficiency of broker-dealer trade processing. Such increased physical certificate movement inevitably contributes to "fails-to-deliver" and "fails-to-receive" and requires broker-dealers that are parties to balance orders to employ several remedial mechanisms to effect delivery or to protect rights of ownership.

The two most common clearing agency remedies are buy-ins [34] and liability notices.[35] Because the national clearance and settlement system consists of several clearing corporations and depositories, however, broker-dealers, when relating to these various clearing corporations in settling trades, can face differing buy-in and liability notice rules and procedures.[36] Similarly, clearing agencies that are parties to balance orders may have to accommodate remedies that vary in important details from agency to agency. The existence of differing procedures can reduce the efficiency and

---

[28] For a discussion of institutional delivery systems, *see, e.g.*, DTC, *Participant Operating Procedures*, § M; File No. SR–MSTC–82–1 (National ID System). *See also* Securities Exchange Act Release No. 19227 (November 9, 1982) [47 FR 51658 (November 16, 1982)].

[29] A CNS system is characterized generally by the severance of the link between the *original* parties to compared trades and the interposition of the *system* as the *contra* party. The system generates a single, daily net "buy" or "sell" position for each issue of securities in which a participant has compared trades due to settle on T+5 and nets accumulated positions against any previously unsettled net buy or sell positions in that issue. As the *contra* side for each net settlement obligation, the clearing agency's CNS system, rather than the original parties to the trades, becomes the entity which is obligated to deliver or receive securities and money and with which fails to deliver or receive securities must be resolved. *See* note 31 *supra*. The clearing agency carries "fails" forward from day to day as open obligations and protects itself against financial risk by, among other things, obtaining mark-to-the-market payments on open obligations from each participant whose failure to satisfy those open obligations would place the system at risk.

[30] The Commission recognizes that, even if depository facilities remain available during a tender offer, the CNS system of an affiliated clearing corporation may be unavailable. This is most notably the case at the National Securities Clearing Corporation ("NSCC"), which has a limited set of CNS account numbers in its current program. So that NSCC's CNS services can be available to participants during tender offers in which depository services are available, the Commission encourages NSCC to continue its efforts to redesign its CNS account system.

[31] A "fail-to-deliver" arises when the selling broker-dealer does not deliver a certificate in proper form at the agreed upon settlement date to the buying broker-dealer. Conversely, a "fail-to-receive" arises when the buying broker-dealer has not received delivery of securities from a selling broker-dealer as of settlement date.

[32] In that respect, recent concerted industry efforts to eliminate these broker financing costs and streamline the institutional trade settlement process through the mandatory use of ID systems, hinged as those systems are on the eligibility of securities for depository services, will become irrelevant during tender offers processed without the benefits of securities depositories. *See* Securities Exchange Act Release No. 19227 (November 9, 1982) [47 FR 51658 (November 16, 1982)].

[33] Unlike CNS systems, daily balance order ("DBO") systems currently do not involve clearing agency interpositioning between the parties to a trade. Instead, while the system generates a daily net "buy" or "sell" position for each issue of securities in which a participant has a compared trade due to settle that day, it allocates among, and issues to, participants balance orders to deliver or receive net buy or sell positions. DBO systems do not net accumulated positions against any previous unsettled trades in that issue. Due to the allocation procedure, on a given day participants may be required to deliver securities to or receive securities from a participant with which it had no trades. Although securities and money settlement are made through the DBO system, any "fails" resulting from a participant's failure to deliver or receive are treated as fails between the *parties* to the balance order and must be resolved between them (rather than with the system).

[34] If a broker-dealer holding a deliver balance order does not make delivery of all cleared securities pursuant to a balance order within the time specified, the broker-dealer holding the receive balance order to whom the securities are to be delivered may cause securities not so delivered to be bought-in (*i.e.*, cause execution of an order to buy those securities at a reasonable price in the market of its choice). *See, e.g.*, NSCC Rule 10.

[35] Clearing corporations, by rule, enable their participants to use liability notices to protect their rights in a tender offer (*i.e.*, protect the value of the offer) when a trade occurs on or before the last day of expiration or the protection period but when the settlement date is scheduled to occur thereafter. The broker holding the receive balance order that wants its right to tender protected must issue a notice of liability to the delivering broker (*i.e.*, *contra* party) directly or through the clearing agency. The rules of the various clearing corporations specify the time within which the notice must be issued (usually one business day prior to the end of the protect period). If the *contra* party/broker-dealer fails to deliver the securities on expiration date as specified in the notice, the *contra* party is liable for any damages caused thereby.

[36] For example, The Options Clearing Corporation's ("OCC") buy-in rule for the exercised equity options (OCC Rule 910) permits buy-ins approximately 24 hours after scheduled settlement has failed; under Rule 9 of the Midwest Clearing Corporation ("MCC"), when the long value participant (*i.e.*, the clearing member to whom stock is owed) originating the buy-in notice for stock trades is an MCC clearing member, the proposed execution date for the buy-in cannot be set earlier than the third business day following settlement date; and NSCC's rules permit execution of buy-ins three business days after settlement date when securities are in its balanced order system, but provides a shorter time frame for continuous net settlement buy-ins through NSCC. (*See* NSCC's Procedures, § IX. A.) Moreover, the rules of some clearing corporations do not permit retransmittal of buy-in notices. To compound the problem, both the NYSE and the NASD have buy-in rules which some brokers attempted to utilize during the tender offers for Conoco. *See* NYSE Rule 282 and NASD Manual (CCH) ¶3559. Because varying procedures produce confusion and delay, the Commission encourages the clearing agencies to continue to work together to reach a uniform resolution to these differences. *See also* note 38 *infra*.

predictability of settlement resolution,[37] increase the demand for stock in the cash market, and expose clearing corporations to financial risk.[38]

These inefficiencies, delays and risks are amplified when the subject company's security underlies exchange-traded options contracts. Processing problems in these securities may be exacerbated if a large number of options exercises occur prior to the offer's expiration date. Theoretically, the number of options contracts written on the underlying securities and outstanding at any given time can far exceed the authorized or outstanding amount for the particular underlying issue. While most options contracts normally are closed out in the secondary market, during a tender offer outstanding options contracts for a significant percentage of the public float of the subject company's security may be exercised in order to enable market participants to tender on the basis of the exercised position or to cover a separate delivery obligation.[39] If, at the same time, a significant percentage of the public float has been tendered by physical delivery or guarantees of delivery to the bidder's agent, so that those securities already are committed and unavailable, a "short squeeze" may be created.[40] This phenomenon may not only require the institution of extraordinary settlement procedures,[41] but also contribute to significant upward price pressure in the secondary cash market.[42]

For example, the competing tender and exchange offers for Conoco collectively resulted in all or substantially all of Conoco's shares being tendered. During August 1981, when a "short squeeze" became apparent, exercising holders of call options who had not received Conoco stock by exercise settlement date, and uncovered call option writers seeking to cover settlement obligations, turned to the cash market to satisfy their tender obligations. On Monday, August 17, Conoco stock was trading regular-way in the primary market at a price of $80 per share; the cash market price, however, had climbed to $97 per share. As the last date approached for delivery of certificates pursuant to guarantees of delivery within the terms of Seagram's offer (August 19th), accumulating purchase requirements reportedly threatened to push the cash market price above $100, to perhaps more than 20 points above the price in the regular-way market.[43]

[37] For example, during the June–August 1981 competing tender offers for Conoco, broker-dealers, particularly those that held arbitrage positions in the stock of Conoco, were faced with receiving, issuing and retransmitting multiple letters of liability; borrowing Conoco shares, often at a premium, in order to avoid liability; arranging for rush transfers or the exchange of certificates with other firms in order to meet denominational needs for balance order deliveries; continuing to receive or deliver certificates in satisfaction of balance order obligations and incurring interest costs when deliveries could not be turned around the same day; and attempting to satisfy their delivery obligations in Conoco by offsetting transactions that had settled in one system with transactions that had settled in another system (*e.g.*, firms attempted to assert rights to receive under NSCC balance orders to offset buy-in liabilities that resulted from OCC exercise assignments).

[38] For example, some but not all clearing agencies will accept liability notices through the clearing interfaces for trades executed on, or immediately prior to, the expiration date of the tender offer but which settle after the expiration date. When one clearing corporation accepts such a liability notice from a long value participant (*i.e.*, the participant to whom securities are owed) and the short value (*i.e.*, the participant account that owes the securities) is in the account of another clearing corporation that, through the interface, either declines the notice or agrees to provide "best efforts" protection only, the clearing corporation accepting the long value participant's notice can have a significant financial exposure. Even when they will accept a liability notice, some clearing corporations customarily will not act on a notice for physical delivery prior to the last day of the tender offer (or the protect period, if one exists), regardless of the terms of the liability notice. In that instance, if the bidder's agent begins paying on the offer early, receiving (long value) participants that have not yet taken delivery (and thus have not presented securities to the bidder's agent) cannot obtain and use their tender proceeds on the early payment date. Moreover, if a long value participant in one clearing corporation tenders the subject company's securities by a guarantee of delivery five business days prior to expiration of the offer, it is customary for the depositary to require delivery of those securities eight days after tender (*i.e.*, in this case, by the third day of the protect period following expiration of the offer). If a *contra* clearing corporation that is short in the tendering participant's clearing system does not make delivery to that clearing system by the date specified in the liability notice (usually the day prior to the last day of the protect period, which is normally the eighth business day following expiration of the offer), then the clearing corporation whose long value participant tendered by submitting the gurantee of delivery runs the risk of being held liable by that participant pursuant to the liability notice for the terms of the offer for having caused that tendering participant to fail to satisfy its guarantee. While significant losses to date have been avoided due to special cooperative efforts by the staffs of the respective clearing corporations, the Commission believes that this situation cannot continue and must be resolved uniformly among the clearing corporations as soon as possible.

[39] For purposes of Rule 10b-4, the irrevocable exercise of a call option makes the holder an owner of the underlying stock at the time of exercise and thus able to tender without having to wait to receive the stock. *See* Rule 10b-4(b)(4) [17 CFR 240.10b-4(b)(4)]. *See generally* note 20 *supra*.

[40] For example, in the tender offers for Conoco, a short squeeze developed because, among other things: (i) there were competing bidders; (ii) Conoco's stock was made ineligible for depository services; (iii) securities processing problems occurred in delivering physical shares among brokers, the forwarding agent and the depositary, which produced a large number of fails to deliver Conoco stock, including fails by "naked" call option writers who did not have stock available for delivery when assigned exercise notices; and (iv) an apparently thin cash market existed for Conoco stock just prior to expiration of Seagram's offer, which precluded defaulting parties to stock trades and exercising call option holders from obtaining stock to meet delivery or tender obligations.

In an extreme case, a significant shortage of underlying stock could mean that one competing bidder would fail to receive the requested amount.

In addition, under new Rule 14d-8 under the Act [17 CFR § 240.14d-8], which provides for a pro rata period of five business days beyond the withdrawal period under Rule 14d-7 [17 CFR § 240.14D-7], call option writers, who have tendered the underlying stock into the offer but who, after the withdrawal date has elapsed, are assigned exercise notices as a result of exercise activity near the expiration date, will be unable to withdraw from the offer to meet their delivery obligations to these exercising holders.

[41] A short squeeze, among other things, may result in the introduction of the extraordinary cash settlement remedy at OCC. Whenever, in the judgment of OCC, a tender offer or competing offers threaten to reduce the available supply of the subject company's stock to a level expected to be insufficient, among other things, to permit performance by uncovered writers of their obligations on outstanding call options contracts on that stock, OCC may invoke special settlement procedures. Under OCC's by-laws, OCC may first institute broker-to-broker settlement on a trade-by-trade basis, requiring exercising clearing members to exchange cash for physical securities directly with an assigned clearing member (rather than effect settlement of trades in the subject company's stock through automated netting programs of correspondent clearing corporations). Broker-to-broker settlement of exercised options contracts enables OCC to identify specifically which contracts fail to settle and, in turn, which writers fail to deliver stock.

Second, OCC may suspend the settlement obligations of call option writers that are unable to deliver stock, suspend OCC remedies available to clearing members exercising those "suspended" contracts, and set prices for cash settlement of those contracts in lieu of stock settlement.

The tender offer for Conoco was the first and only time OCC has set a cash settlement price. Moreover, according to OCC's recently revised policy, OCC will continue to require settlement of all exercises of options contracts through the facilities of correspondent clearing corporations (and not at OCC) during and following cash tender offers for securities underlying options contracts, unless the application of that policy, in the judgment of OCC, would be inequitable or impractical. *See* OCC By-laws, Art. VI, § 19, Interpretations and Policies .01 and .02, as amended October 29, 1982 (SEC File No. SR–OCC–81–8). Therefore, the instances in which the OCC cash settlement remedy will be invoked in the future would appear to be extremely rare.

[42] Due to the sporadic and fragmented nature of this market, *see* note 43 *infra*, it is very difficult to gauge accurately at any particular time the supply of stock that might be available at various price levels if substantial buying interest became known. Thus, if a short squeeze pushes the cash market price above the tender offer price, uncovered call option writers receiving exercise notice assignments may have to pay a significant premium to cover their delivery obligations.

[43] Unlike regular-way trades that are scheduled to settle on T+5, *see* note 10 *supra*, cash market transactions are effected for same-or-next-day settlement. The cash market operates informally, generally through brokers for member firms on the floor of an exchange who communicate indications of interest in buying and selling the stock for accelerated settlement. The terms and prices of

Of course, depository eligibility of the subject company's securities would not remedy the cash market impact from the short squeeze phenomenon. Nevertheless, the Conoco experience clearly indicates that, to the extent automated settlement mechanisms are unavailable during the perod of high volume that usually accompanies a tender offer, there is an increase in the incidence of stock and options settlement "fails" and the number of physical delivery requirements. As a corollary, heavy cash market demand can occur from the required additional buy-in activity to cover these "fails" and from investors' needs to purchase shares to satisfy their tender obligations under guarantees of delivery. The need for immediate delivery of stock to settle cash market trades can place dramatic upward pressure on the cash market price, pushing the cash market price out of skew with the regular-way market price. Those pressures can be relieved during tender offers, to the benefit of all financial institutions, through the full availability and use of all automated clearance and settlement systems.

III. Depository Trust Company's Voluntary Offering Program

The Depository Trust Company, Inc. ("DTC"), a securities depository registered as a clearing agency under the Act, operates, as a service to its participants and bidders, a system for handling within an automated, book-entry environment securities that are the subject of voluntary offers, including tender offers.[44] In general, after a bidder has appointed an agent to which securities are to be tendered (*e.g.*, a forwarding agent or depositary), DTC, the bidder and that agent enter into a letter of agreement on the procedures to be followed in processing through DTC letters of transmittal and securities tendered or to be tendered, subsequent withdrawals of securities or book-entry returns of securities not taken down by the bidder in a prorationing, and payments due participants. The agreed upon procedures, therefore, describe how the bidder's agent and DTC's participants can interact promptly and efficiently, so that book-entry processing, especially movements of securities to the bidder's agent, can continue uninterrupted.[45]
